* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S (5 year estimates)

[The following information is required for requests for Public Assistance.]

Public Assistance

The two relevant categories under PA are B, Emergency Protective Measures, and F, Public Utilities.

In the October to December time frame, the State received an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $ in one time costs and $ in daily expenditures.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource in times of emergency. The County, from which we could normally obtain insurance coverage information, does not track this. In any case, per the Department of Insurance and Financial Services referenced above, normal property insurance would have this type of damage as an exclusion. The likelihood of coverage is very low.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount

of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively.

No PDA has been conducted or requested at this point in time due to the obvious severity of the emergency and the immediacy of the need for emergency protective measures. I am requesting Direct Federal Assistance from other agencies who's resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $178,000,000, in accordance with the tables at Enclosures A and B.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U S C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206 35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office. Cell.

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office:) Cell

6. Declaration Request For: ☒ Major Disaster (Stafford Act Sec. 401) ☐ Emergency (Stafford Act Sec 501(a))

7. *Incident Period:* *Beginning Date* _____ *End Date* _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding)

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive. Based on current U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under 6 are high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

Expedited Major Disaster Declaration Request

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☒ Crisis Counseling Program ☒ Disaster Unemployment Assistance

☒ All ☒ Disaster Case Management ☒ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities, for Indian tribal government, list tribe(s) and/or *tribal area(s)) If additional space is needed, please enclose additional documentation).*

Townships of Flint, Genesee and Mt. Morris; Cities of Burton and Flint; County of Genesee

We request all available programs. The Individual Assistance programs will be needed to assist residents/water service customers with an estimated $54,619,500 to repair damaged lead service lines on private property. The damage estimate is based on damage assessments conducted by the City of Flint with the Genesee County Equalization Department.

For States, identify Federally-recognized Tribes in the requested counties (if applicable)
N/A

*Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.*

**Not Required for Emergency Declaration Request*

11. *Programs and Areas Requested (Continued)*

Public Assistance ☐ N/A ☒ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☒ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities, for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Flint, Genesee and Mt. Morris, Cities of Burton and Flint, County of Genesee

We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, cartridges, and water test kits. Damage assessments conducted by the City of Flint with the Genesee County Equalization Department concluded that the total potential damages to the City of Flint water distribution infrastructure is estimated at $712,800,000.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:

Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work, (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

N/A

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☒ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15 List of Enclosures and Supporting Documentation

3. Governor's or Tribal Chief Executive's Name
Rick Snyder, Governor
4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Captain Chris A. Kelenske Office: Cell:
5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number
Mr. Anthony Katarsky Office: Cell:
6. Declaration Request For: **_X_ Major Disaster (Stafford Act Sec. 401)** __Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____

Or _X_ Continuing. If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply). (Note: on the form check all boxes that apply)
Check the box "Other "please specify)" and enter description of incident Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

Based on the 2010 U.S. census data, the population of the City of Flint is 102,400. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8200. Children in this age range are at high-risk for lead exposure as they are in the development stage of growth. To date approximately XYZ of this population group have been tested for lead blood levels as a result of this incident. Of the remaining general population, approximately XYZ have been tested for lead blood levels as a result of this incident.

The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city. To date, XYZ (or XYZ%) of those households have received a water filter to address the potential lead in the water.

The City of Flint estimates the cost to remove and replace the entire water distribution infrastructure with lead components at $XYZ million. This includes the publicly owned infrastructure as well as the privately owned service lines.

Other impacts: MDEQ, MDHHS, MDTMB, MDARD, MDE, MTED

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health disaster. This included equipment, personnel, materials and supplies, facilities, technical

expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, Talent and Economic Development and Transportation.     Check the box in this section and fill-in the date of execution of the State Emergency Plan in section b.

15. List of Enclosures and Supporting Documentation
    Check all of the appropriate boxes in this section.

    The form must be signed by the Governor and dated.

    Note: If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

End of Page 4 of 4

Historically, the Flint Water Treatment Plant utilized the Flint River as the source for providing drinking water to its customers. In 1967, the city of Flint (City) started to purchase treated water from the Detroit Water and Sewerage Department (DWSD). The DWSD water source is Lake Huron. The Flint River supply infrastructure to the water treatment plant was continuously maintained as an emergency backup source to the system.

Over time, the DWSD source became financially strenuous to the City and in January 2006 discussions ensued regarding utilizing the proposed Karegnondi Water Authority, which was not yet constructed, as an alternative primary long-term water supply for Genesee County and the Flint Water Treatment Plant customers. In 2009, the Lake Huron water supply study for the Karegnondi Water Authority was conducted and an Executive Summary and Preliminary Engineering Report were generated. Due to the financial strains the City was experiencing, they resolved to end their contract with DWSD and temporarily convert the water supply back to the Flint River as the source for the Flint Water Treatment Plant prior to the completion of the Karegnondi Water Authority. In April 2014 the Michigan Department of Environmental Quality (MDEQ) issued the Flint Water Treatment Plant construction permits for full time operation enhancements. In May 2014, the conversion of the source was implemented and the Flint Water Treatment Plant began distributing water to its customers.

To ensure compliance with the federal Lead and Copper Rule requirements for corrosion control, The City commenced two 6-month lead and copper monitoring periods. A first 6-month monitoring period ended on December 31, 2014, and the City's report was due to the MDEQ on January 10, 2015. The results from this report indicated the lead level (90^{th} percentile) was 6 ppb, just over the 5 ppb level deemed as having optimized corrosion control. On March 30, 2015 the MDEQ notified the City of the 6ppb results.

On June 30, 2015, second 6-month lead and copper monitoring period ended. After consultation with the EPA on July 21, the MDEQ notified the City of the results on August 17, 2015. At that time the MDEQ, reported that their analysis indicated a lead level of 11 ppb (90^{th} percentile), and required the City to install corrosion control equipment and begin treatment.

On July 28, 2015 the MDEQ received information from Michigan Department of Health and Human Services (MDHHS) indicating blood lead levels in City of Flint residents were consistent with past years seasonal variations.

On September 24, 2015 Hurley Children's Hospital revealed data indicating elevated blood lead levels in children who reside certain zip codes in the City. This same date the MDHHS reaffirms that their data is more comprehensive than that of Hurley Children's Hospital and remained consistent with past year seasonal variations. On September 25, the City announced a lead advisory regarding the drinking water to its citizens.

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the

DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Historically, the Flint Water Treatment Plant utilized the Flint River as the source for providing drinking water to its customers. In 1967, the city of Flint (City) started to purchase treated water from the Detroit Water and Sewerage Department (DWSD). The DWSD water source is Lake Huron. The Flint River supply infrastructure to the water treatment plant was continuously maintained as an emergency backup source to the system.

Over time, the DWSD source became financially strenuous to the City and in January 2006 discussions ensued regarding utilizing the proposed Karegnondi Water Authority, which was not yet constructed, as an alternative primary long-term water supply for Genesee County and the Flint Water Treatment Plant customers. In 2009, the Lake Huron water supply study for the Karegnondi Water Authority was conducted and an Executive Summary and Preliminary Engineering Report were generated. Due to the financial strains the City was experiencing, they resolved to end their contract with DWSD and temporarily convert the water supply back to the Flint River as the source for the Flint Water Treatment Plant prior to the completion of the Karegnondi Water Authority. In April 2014 the Michigan Department of Environmental Quality (MDEQ) issued the Flint Water Treatment Plant construction permits for full time operation enhancements. In May 2014, the conversion of the source was implemented and the Flint Water Treatment Plant began distributing water to its customers.

To ensure compliance with the federal Lead and Copper Rule requirements for corrosion control, The City commenced two 6-month lead and copper monitoring periods. A first 6-month monitoring period ended on December 31, 2014, and the City's report was due to the MDEQ on January 10, 2015. The results from this report indicated the lead level (90^{th} percentile) was 6 ppb, just over the 5 ppb level deemed as having optimized corrosion control. On March 30, 2015 the MDEQ notified the City of the 6ppb results.

On June 30, 2015, second 6-month lead and copper monitoring period ended. After consultation with the EPA on July 21, the MDEQ notified the City of the results on August 17, 2015. At that time the MDEQ, reported that their analysis indicated a lead level of 11 ppb (90^{th} percentile), and required the City to install corrosion control equipment and begin treatment.

On July 28, 2015 the MDEQ received information from Michigan Department of Health and Human Services (MDHHS) indicating blood lead levels in City of Flint residents were consistent with past years seasonal variations.

On September 24, 2015 Hurley Children's Hospital revealed data indicating elevated blood lead levels in children who reside certain zip codes in the City. This same date the MDHHS reaffirms that their data is more comprehensive than that of Hurley Children's Hospital and remained consistent with past year seasonal variations. On September 25, the City announced a lead advisory regarding the drinking water to its citizens.

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the

DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare an Expedited Major Disaster with a Preliminary Damage Assessment to follow if a disaster declaration occurs, and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River in 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—*and the painstaking work of physicians at* Hurley Medical Center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for blood lead levels. Of those tested, fifty residents have exhibited elevated blood lead levels. Twenty eight of the persons found to have elevated blood lead levels are children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The MDHHS has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a significant economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned, and we are assuming it can't be used for potable purposes. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals Assistance Program will be essential to recovery.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, a Volunteer Reception Center (VRC) was established, and the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) conducted a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance ~~–IHP~~, and Public Assistance ~~– Category B~~, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency.

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs) This includes working closely with the local primary care provider community and Women/Infants/Children (WIC) clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The City of Flint is categorized as a food desert. The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant Some residents may have to make a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 8.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MDTED)

The MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified

allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help

address some of the challenges to a nutritious food system This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.) All establishments received a letter in October 2015 with guidance and will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts.

No animal licensed shelters exist in the water service area. The primary focus is and should be on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will *conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing* associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating the cost for replacement at $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is more than double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12 3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief

assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 *U S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R . §§ 206.35 and 206 36. Failure to use this form may result* in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office ell

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: ell:

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period. Beginning Date _____ End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint *and confirmed by the State Chief Medical Executive. Based on U.S. census data, the population of the City of Flint is* 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under 6 are in a high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities, for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation)

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. The Individual and Households Program will be needed to assist residents/water service customers with an estimated $54,619,500 over a period of 1 year to repair damaged lead service lines on private property.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ *Emergency Protective* Measures (Category B) ☐ *Permanent Work (Categories C-G)** (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or *tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions, please enclose additional* documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton, County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, filter cartridges, and water test kits

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).
N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ *I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety.* Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and.

a. I request the following type(s) of assistance:
Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.
State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. *In accordance with 44 C.F.R. § 206 208, the State or Indian tribal government agrees that it will, with respect to direct* Federal assistance (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work, (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.
N/A

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13 *Other Federal Agency Programs*

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following.

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1 Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to. Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C F.R.. §§ 206 35 and 206 36 Failure to use this form may result in a failure to meet *these requirements and/or a delay in processing the request.*

2a. Name of State (as defined in Stafford Act 102, 42 U S C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. *Designation of State or Tribal Coordinating Officer upon declaration (if available)* and phone number
Richard D. Snyder	Captain Chris A Kelenske Office Cell

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: Cell:

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e g , United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide
☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D Historic and Current Snowfall Data) ☐ *Straight-Line Winds*
☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm
☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive. Based on U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under 6 are in a high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. 8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive Based on current U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under 6 are high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)
Expedited Major Disaster Declaration Request

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☒ Crisis Counseling Program ☒ Disaster Unemployment Assistance

☒ All ☒ Disaster Case Management ☒ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation)

Townships of Flint, Genesee and Mt. Morris; Cities of Burton and Flint, County of Genesee

We request all available programs. The Individual Assistance programs will be needed to assist residents/water service customers with an estimated cost as much as $54,619,500 to repair damaged lead service lines on private property. The damage estimate is based on damage assessments conducted by the City of Flint with the Genesee County Equalization Department.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☒ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☒ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities, for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions, please enclose additional documentation.

Townships of Flint, Genesee and Mt. Morris; Cities of Burton and Flint; County of Genesee

We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs which could be in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, cartridges, and water test kits. Damage assessments conducted by the City of Flint with the Genesee County Equalization Department concluded that the total potential damages to the City of Flint water distribution infrastructure is estimated at $712,800,000.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).
N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and

a. I request the following type(s) of assistance:

Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.
State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

Cost Figures for Flint Water Response: Population and Community Health Administration (PHCSA)

Type	Priority	Intervention	Rationale	Cost
Education				
Secondary Prevetion				
		School nursing	To monitor, case manage, treat, promote wellness (socioemotional), school nutrition, etc...	$500,000
		Special Education	20 percent of children with BLLs greater than or equal to 25 @ age two receive special education for an average of 9 years.	$2,500,000
		Pre-Post school programming	To provide structured, safe supervised programming	$9,000,000
Nutrition				
Secondary Prevention				
		Expand WIC eligibility requirements	To increase availability of healthy nutrition for impacted children	$1,380,000
		Promote breastfeeding education and support services	To protect children from lead exposure, promote cognitive development	$85,000
Tertiary Prevention		Educate and promote lead-exposure diet	To limit absorption and promote excretion of lead in exposed children	$110,000
Medical Health				
		Immediate Treatment and treatment of lead-associated ADHD	Immediate treatment of childr	$18,280,849
Secondary Prevention		Promote caregiver capacity. Increase capacity of maternal infant suppport services	To support parents and programs to improve parenting skills and early identification of developmental delays	$250,000 $325,000 $120,000
		Education for primary care providers regarding toxic stress	To indentify developmental delays early	*$100,000*
		Increase pediatric healthcare access to a patient centered medical home	To continuously drive patients to their primary care provider	$100,000

Tertiary Prevention	Creation of the Flint Children's Health and Development Fund	To support short and long-term health, medical care, and developmental needs of Flint children exposed to lead	$100,000,000
	Behavorial Health Services	To provide necessary mental/behavioral health services to exposed population	$7,000,000
Assessment	Identification and tracking of exposed children/cohort	To determine extent of injury and long-term neurodevelopmental, medical, socioeconomic impact. To allow for identification of exposed children and ongoing surveillance	$100,000
Subtotal			**$139,155,849**

Budget Estimates
FY16 Supplemental Request

Appropriation	**FTEs**	**Amount**
Cost for epidemiologists	2	$115,000
Cost to abate lead in homes in Flint	3.5	$1,687,500
Additional lead investigations	0	$100,000
Increase nurse case management	1	$75,000
Increase community education	2	$120,000

WIC outreach and trasportation	1	$60,000	
Total FY16 fuding Request	**$10**	**$2,157,500**	
FY17 Supplemental Request			
Continuation of FY16 Supplemental	8	$850,000	
Cost for epidemiologists	2	$220,000	
Cost to abate lead homes in Flint	4	$2,261,000	
Additional lead investigations	0	$130,000	
Increase nurse case management	1	$100,000	
Increase community education	2	$180,000	
WIC outreach and transportation	1	$90,000	
Total FY17 Funding Request	**18**	**$3,831,000**	
Total FTE	**27.5**		
GRAND TOTAL			**$145,144,349**

Notes

It is reasonable to have a nurse in 5 schools in Flint. $500,000

Lifetime costs $2.5 million for a cohort of two year olds.

$1,000/9000 children

Low demand for ready to feed formula, Expansion of WIC eligibility and income to children 7-10 yrs require USDA approval. $1.38 M

Promote breasfeeding- We believe an additional lactation consultant would be helpful at GCHD

Dietician for nutrition counseling/education at Genesee County Health Department

Immediate treatment: $280,849
ADHD includes medication and counseling: $18 million annually

Expansion of home visitation programs. Parent education via community classes related to preventing toxic stress (ACEs)- Perhaps this is something that the *Genesee Coalition could undertake. 5 grants at* $50,000/ea to interested community partners. Parents as teachers program- 5 staff to do home visitation at $65,000/ea. One MDHHS FTE- $120,000 to establish and monitor contracts

$100,000 for provider education to Hurley Hospital

Funding for Children's Healthcare Access Program (CHAP)

Estimate provided by Dr. Mona Hanna Attisha; estimate should be validated by acutarial analysis

700,000/10 years

Identification and tracking of exposed children/cohort- We think it is reasonable to enhance capacity to support health information exchange and integration between laboratories and the MICLPS registry.

Notes

Support two epidemiologists to analyze blood lead levels based on zip codes in the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted. Positions will be supported through contracts with MPHI. Costs reflect contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 3.5 contractual staff - 2.5 field consultants to conduct abatement and one to assist with client application and form processing (total $187,500). Funds for the service include the cost to abate 100 homes @ $15,000 each ($1.5 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Additional contractual efforts to support lead investigations in 100 additional homes in the City of Flint. Service will be provided by ETC Consulting.
Funds support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, provide nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.
Contractual FTEs will work with the Genesee County Health Department (GCHD) to build educational efforts in that community to develop a more detailed education plan.

One contractual peer educator FTE at Genessee County Health Department to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and overall health of pregnant moms and infants.

Continue the funds from the original FY16 supplemental for existing nurse case management of EBL home investigations.
Continue the funds from the FY16 request above and support two epidemiologists to analyze blood lead levels and will address broader areas beyond the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted.
Continue the funds from the FY16 request above and finance contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 4 contractual staff - 3 field consultants to conduct abatement and one to assist with client application and form processing (total $311,000). Funds for the service include the cost to abate an increase to 130 homes @ $15,000 each ($1.95 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.
Funds support additional lead environmental investigations. This is lead investigations in homes of children with high blood lead levels to determine all of the sources of lead exposure and plan for mitigation of lead. This does not include funding for lead abatement. This is done via contract with ETC Consulting. (No FTEs)
Continue the funds from the FY16 request above to support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.
Continue the contractual health educators at GCHD to work collaboratively with community agencies on awareness of lead hazards, increase lead testing, and nutrition education.
One contractual peer educator FTE at GCHD to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and improve the overall health of pregnant moms and infants. Bus tokens (10,000 at $1 = $10,000), bus signs and other promotion materials for WIC at $5,000.

Additional lead investigations	0	$130,000
Increase nurse case management	1	*$100,000*
Increase community education	2	$180,000
WIC outreach and transportation	1	$90,000
Total FY17 Funding Request	**18**	**$3,831,000**
Total FTE	**27.5**	
GRAND TOTAL		**$145,144,349**

Notes

It is reasonable to have a nurse in 5 schools in Flint. $500,000

Lifetime costs $2.5 million for a cohort of two year olds.

$1,000/9000 children

Low demand for ready to feed formula, Expansion of WIC eligibility and income to children 7-10 yrs require USDA approval. $1.38 M

Promote breasfeeding- We believe an additional lactation consultant would be helpful at GCHD

Dietician for nutrition counseling/education at Genesee County Health Department

Immediate treatment: $280,849
ADHD includes medication and counseling: $18 million annually

Expansion of home visitation programs. Parent education via community classes related to preventing toxic stress (ACEs)- Perhaps this is something that the *Genesee Coalition could undertake. 5 grants* at $50,000/ea to interested community partners. Parents as teachers program- 5 staff to do home visitation at $65,000/ea. One MDHHS FTE- $120,000 to establish and monitor contracts

$100,000 for provider education to Hurley Hospital

Funding for Children's Healthcare Access Program (CHAP)

Estimate provided by Dr. Mona Hanna Attisha; estimate should be validated by acutarial analysis

700,000/10 years

Identification and tracking of exposed children/cohort- We think it is reasonable to enhance capacity to support health information exchange and integration between laboratories and the MICLPS registry.

Notes

Support two epidemiologists to analyze blood lead levels based on zip codes in the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted. Positions will be supported through contracts with MPHI. Costs reflect contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 3.5 contractual staff - 2.5 field consultants to conduct abatement and one to assist with client application and form processing (total $187,500). Funds for the service include the cost to abate 100 homes @ $15,000 each ($1.5 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Additional contractual efforts to support lead investigations in 100 additional homes in the City of Flint. Service will be provided by ETC Consulting.
Funds support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, provide nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.
Contractual FTEs will work with the Genesee County Health Department (GCHD) to build educational efforts in that community to develop a more detailed education plan.

One contractual peer educator FTE at Genessee County Health Department to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and overall health of pregnant moms and infants.

Continue the funds from the original FY16 supplemental for existing nurse case management of EBL home investigations.

Continue the funds from the FY16 request above and support two epidemiologists to analyze blood lead levels and will address broader areas beyond the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted.

Continue the funds from the FY16 request above and finance contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 4 contractual staff - 3 field consultants to conduct abatement and one to assist with client application and form processing (total $311,000). Funds for the service include the cost to abate an increase to 130 homes @ $15,000 each ($1.95 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Funds support additional lead environmental investigations. This is lead investigations in homes of children with high blood lead levels to determine all of the sources of lead exposure and plan for mitigation of lead. This does not include funding for lead abatement. This is done via contract with ETC Consulting. (No FTEs)

Continue the funds from the FY16 request above to support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.

Continue the contractual health educators at GCHD to work collaboratively with community agencies on awareness of lead hazards, increase lead testing, and nutrition education.

One contractual peer educator FTE at GCHD to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and improve the overall health of pregnant moms and infants. Bus tokens (10,000 at $1 = $10,000), bus signs and other promotion materials for WIC at $5,000.

DCDS Hours Entry by Coding Block

(Last revised 1/28/14)

To change your default entry to Hours by Coding Block Entry:

1. Log into DCDS.
2. Select Options.
3. Check Hours by CB (Coding Block) Entry to change your default.

To enter **work** Hours by Coding Block (regular, overtime, comp time earned, etc.):

1. Open your time sheet as you normally do.
2. You should see an Hours Entry by Coding Block section above the time entry section. *The blue line is the active line.*
3. Click your cursor in the AY box and enter the last 2 digits of the appropriation (fiscal) year.
4. Tab to Index and enter your Index number.
5. Tab to PCA and enter the PCA associated with work you did for the number of hours worked that you worked on it.
6. Move down to the time entry section and select the appropriate Hours Type.
7. Tab to the appropriate day and enter the number of hours associated with the PCA you entered above.
8. Enter daily comments for each Hours Type.
9. Select Save.
10. At the end of the pay period, select Submit.

To enter hours for holidays, comp time used, annual leave, sick leave, school & community leave, bank leave time used, administrative leave, initial leave, jury duty, Plan A:

1. Check the "std" (standard coding) box under the Hours Entry by Coding Block section.
2. Move down to the time entry section and select the appropriate Hours Type.
3 Tab to the appropriate day and enter the number of hours.
4. Enter the required information for school & community leave. Required information includes all of the following: 1) name of the school or community activity sponsor; 2) name of the event; description of the volunteer services performed; and 4) the time period that the employee performed the volunteer services.
5. Select Save.

6. At the end of the pay period, select Submit.

To view your time sheet.

1. Select Reports.
2. Select Employee Data Collection.
3. Selection Option B - Detail Time (or Option A - Coding Block Detail Time).
4. Enter Department 55.
5. Enter Agency 01.
6. Enter TKU 044. (EMHSD)
7. Select the PP (pay period) End Date.
8. Select OK.

American Red Cross

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Audience:

- Individuals or groups of event-based volunteers (EVBs).
- Community partners and stakeholders, (i.e. non-profit and faith-based organizations, businesses and government agencies).

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

VRC Operations
Hours: 9 a.m. to 7p m.
Location: American Red Cross
1401 South Grand Traverse
Flint, Michigan 48503
Dial 2-1-1

DCDS Hours Entry by Coding Block

(Last revised 1/28/14)

To change your default entry to Hours by Coding Block Entry:

1. Log into DCDS.
2. Select Options.
3. Check Hours by CB (Coding Block) Entry to change your default.

To enter **work** Hours by Coding Block (regular, overtime, comp time earned, etc):

1. Open your time sheet as you normally do
2. You should see an Hours Entry by Coding Block section above the time entry section. *The blue line is the active line.*
3. Click your cursor in the AY box and enter the last 2 digits of the appropriation (fiscal) year.
4. Tab to Index and enter your Index number.
5. Tab to PCA and enter the PCA associated with work you did for the number of hours worked that you worked on it
6. Move down to the time entry section and select the appropriate Hours Type.
7. Tab to the appropriate day and enter the number of hours associated with the PCA you entered above.
8. Enter daily comments for each Hours Type.
9. Select Save.
10. At the end of the pay period, select Submit.

To enter hours for holidays, comp time used, annual leave, sick leave, school & community leave, bank leave time used, administrative leave, initial leave, jury duty, Plan A:

1. Check the "std" (standard coding) box under the Hours Entry by Coding Block section.
2. Move down to the time entry section and select the appropriate Hours Type.
3. Tab to the appropriate day and enter the number of hours.
4. Enter the required information for school & community leave. Required information includes all of the following: 1) name of the school or community activity sponsor; 2) name of the event; description of the volunteer services performed; and 4) the time period that the employee performed the volunteer services.
5. Select Save.

6. At the end of the pay period, select Submit.

To view your time sheet:

1. Select Reports.
2. Select Employee Data Collection.
3. Selection Option B - Detail Time (or Option A - Coding Block Detail Time).
4. Enter Department 55.
5. Enter Agency 01.
6. Enter TKU 044. (EMHSD)
7. Select the PP (pay period) End Date.
8. Select OK.

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since May 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would eventually prove to be very challenging to historical central cities—especially Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as *Shelley versus Kraemer* (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to the dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,143	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	444,341	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.2%	52.6%	43.5%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an emergency manager was assigned by the governor (in 2011), providing greater authority to sort through the many challenges and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. Flint falls into the category of city that has been called a "legacy city" (See *Rebuilding America's Legacy Cities*, edited by Alan Mallach in 2012 and published by American Assembly, Columbia University), caught in the problems of transitioning from its historic mid-20th Century manufacturing base into new roles for 21st Century health and success. It has been caught in a long-term trap of an aging infrastructure combined with dwindling municipal revenues. And although there are opportunities available by which the city might successfully make that transition, its current problems must first be overcome. (Mallach xi, 180-183) In order to offset mismatches between a central legacy city and the disproportionate wealth of the surrounding areas it serves, various planners and urban policy experts (e.g. Norman Krumholz, Myron Oldfield, John Rusk) have found that various forms of revenue sharing may be justified, greater integrating the central districts with the overall metropolitan area whose health is mutually intertwined, or finding ways to fund the health of essential central sections and infrastructure within existing political and organizational structures, networks, and capacities. Cities are legally "creatures of the state" and thus subject to the effects of state policy. Where past policies had resulted in an accumulation of fiscal

problems for central cities, new policies have the potential to help solve these same problems in the long-term. But first, the immediate threats to health for nearly 100,000 permanent city residents, plus tens of thousands of non-residents who make daily use of the city's resources, services, and amenities, must be corrected. The importance of the problems of aging city infrastructure has become clear, but the first step is to protect the health of the area's residents, as longer-term solutions continue to be developed with a keener awareness of the relationship between the health of each central city, and the quality of life for each broader metropolitan area and the state as a whole. A successful response to the current emergency will also help to inform the handling of similar challenges that might occur in other legacy cities, with this one crisis potentially providing the urgency and will to address related problems in other locations, lessening the potential for their infrastructure to produce a similar emergency-level situation.

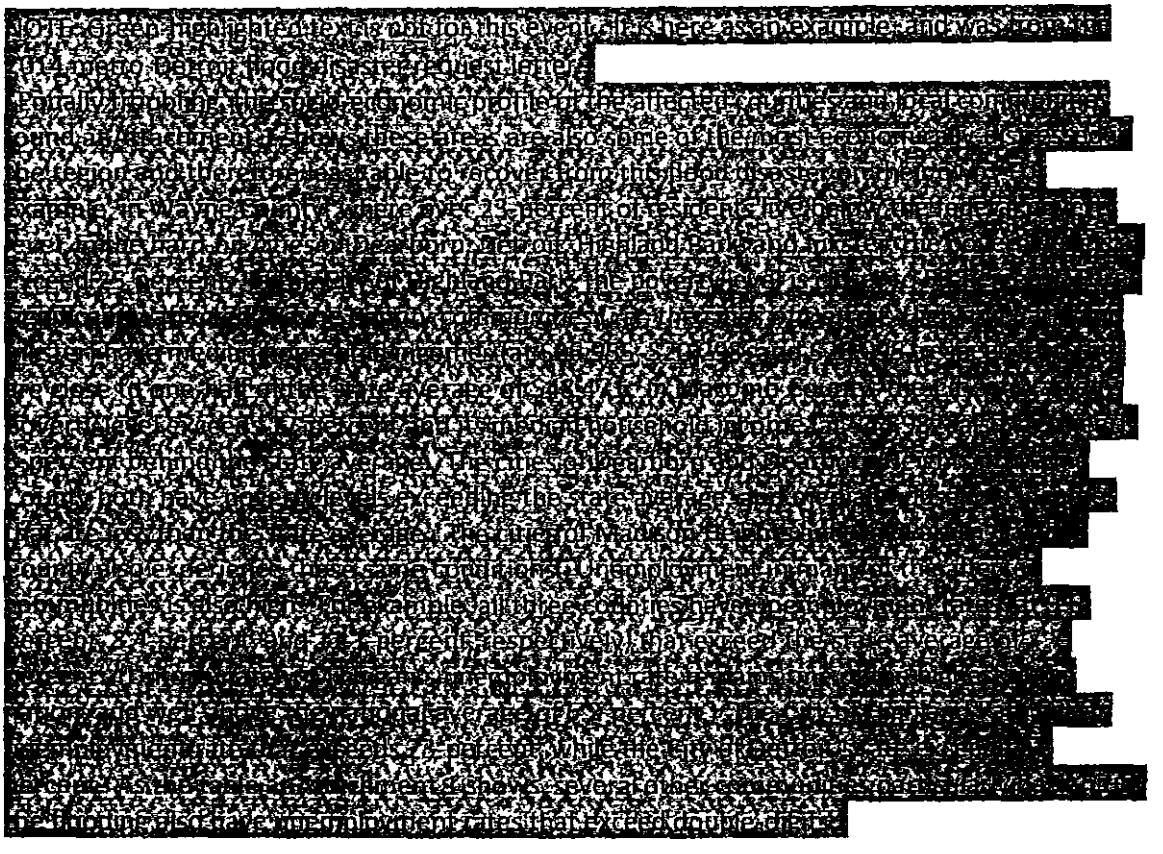
The city's poverty rate is 2.67 times higher than the national poverty rate, and the city's median household income is less than half of that for the nation as a whole. Average unemployment rates within the city were nearly three times the national rates. A disproportionate number of the city's residents have disabilities (functional needs). Although the percentage of elderly residents is slightly below average, the opposite is true for the percentage of young children under age 5, and it is this age category that is most vulnerable to the effects of lead exposure. The percentage of children under 5 is higher in Flint than the respective percentages for Genesee County, the State of Michigan, and the United States as a whole. (Refer to the following table.)

Demographic Profile of the Affected Municipality

	Persons Below Poverty Level	Median Household Income	Children under 5 years	Percent Elderly (65+ years)	Percent with Disabilities	Percent Pre-Disaster Unemployment (5-year estimate)
National Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State Average	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint (Genesee Co.)	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

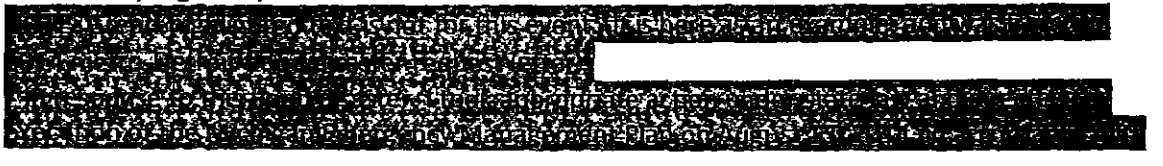
Data Sources
U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

NOTE: The general direction I had started with my draft text was to *historically frame this* situation as the result of various trends that affected large central cities during the past 60-100 years, with the choking of central city resources eventually causing mismatches that would eventually have to be addressed. Thus, unlike so many previous administrations, Michigan recently actually undertook some significant actions to directly address some of these issues of budget, debt, bankruptcy, school district losses, etc. in historic cities like Detroit, Flint, Benton Harbor, Pontiac, etc. where huge population losses occurred primarily within the central city, *while overall urban area growth continued and resulted in resource splits.* Naturally, these references, deriving from a theoretical urban planning perspective, will need to be reviewed for their *political feasibility.*



The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this emergency:

(Describe response actions by state and local governments. Describe any state/local Individual *Assistance programs.)*



[redacted]

(Provide the disaster history of the State over the past 12 months... List areas that have sustained damage from this event and other disasters in the previous 12 months, and include any other pertinent factors that would have a bearing upon the State's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.)

(If Individual Assistance is being requested, provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations [children under 5]. Include a comparison of the percentage of the state and local government averages and national averages. Indicate source of data cited.) NOTE: This data is provided in Attachment 1.

(If Public Assistance is being requested, provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include a discussion of significant impacts to specific areas. If any local communities have sustained significant damage and have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita. Discuss the level of insurance coverage.

[redacted]

[redacted]

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 15, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Regional Administrator Andrew Velasquez
FEMA Region V
City, State, Zip Code

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § [Major Disaster citation (206.36), Emergency citation (206.35)], I request that you declare an emergency for the ***State of Michigan*** as a result of ***the elevated blood lead levels of citizens, especially children, within the City of Flint discovered in October, 2015***.

[The following information is required for ALL requests. Provide additional information that is not contained in the form. If requested information is included in the form, it is not necessary to repeat in the cover letter.]

As of the most recent update of January 8, 2016, 2,182 Flint residents have been tested for lead levels and 43 residents have exhibited elevated blood lead levels. Of those, 23 were children under the age of six, the most likely age cohort to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank for people needing assistance. The American Red Cross has established a Disaster Recovery Operation and also are providing warehousing management, volunteers for canvassing and water distribution, and are also working to establish a Volunteer Reception Center. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint, including its residents, businesses and worker population, as well as pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines as well as

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this disaster:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

The EMHSD maintains

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. However, we will likely not have a clear picture until the end of the week. Even once this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With comprehensive water testing plan that the DEQ is

implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and USDA's Rural Development's programs, we have been working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system.

Department of Health and Human Services – Human Services (MDHHS)

MDHHS has been working steadily to provide assistance to the local community through its many different programs.

Healthy foods. MSU-Extension has been giving out recipes but residents must be able to purchase it. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden but necessary.

In some homes the plumbing is very poor; as a result the faucet filter may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for family of 2 is $98 per month. For a family of 4 with leaks etc. you are looking at about $150 or more per month.

Additional ongoing testing will be required for those with the blood levels-treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table **"Michigan – Genesee – Flint Demographic Summary"** shown below.

- Of those, there is a notable rise in children age 0-17 living in poverty:
  - 2012: 31.8%
  - 2006: 25.4%

- The median income for Flint residents between 2009 and 2013 was is markedly lower than the state's median income, also shown in the table **"Michigan – Genesee – Flint Demographic Summary"** shown below.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with No. 1 the best in the state). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5 % of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47%
  - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS. The table following shows the distribution among Flint's zip codes.

MDHHS Program Data

City of Flint		
Program	**Cases**	**Recipients**
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578

[redacted]

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels. Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels. The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

[redacted]

[redacted]

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The situation that occurred in the City of Flint would not be a covered loss. Therefore, it is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the

Department of Environmental Quality of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the City of Flint and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

This analysis was based on a study by the University of Michigan Risk Science Center and the Michigan Network for Children's Environmental Health. The study, linked below, cited studies that showed the direct correlation in loss of IQ with elevated lead levels. This loss of IQ was directly correlated to loss of lifetime income potential, as well as costs for treatment, costs for special education, and ADHD treatment for cohorts under 5 years old.

The excel chart uses the findings from this study and applies it to Flint's population of 0-5 year olds. We're not sure what number to use in the field labeled "estimated percent of population impacted", but it's saved at 6% of 0-5 year olds impacted. Depending on the lead levels, the lifetime earnings loss ranges from $33 Million to over $89 Million if 6% of 0-5 year olds were impacted. The % of population can be changed for each blood lead level to get the impact.

http://www.riskscience.umich.edu/wp-content/uploads/2013/12/Economic-Impact-of-Lead-in-Michigan-Web.pdf

Again, this analysis is based on the study linked above. If the findings and methodology of the study aren't acceptable, then the attached Excel calculations shouldn't be used. Also, we have not reached out to UM to see if any of their assumptions have changed since this was done in 2014 or if our correlations and

methodology are acceptable. With additional time, we would confirm our method with the UM team.

With input from the Department of Treasury, we assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water like restaurants will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses are also having to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems reasonable, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term there would be the cost of a new water system, which would have a significant cost. Direct health related costs would be on top of this estimate.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, trucks and drivers to assist with delivering supplies to PODs and assisting with neighborhood visits.

DTMB also facilitated the establishment of the JIC at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:
Truckloads of water - 32;
Brita faucet filters – 27,000
Brita Replacement filters – 1,600
PUR faucet filters – 12,500
PUR 3-pack replacement filters – 40,000

Disaster History

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act. While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term

Recovery in Southeast Michigan continues to struggle. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Black mold continues to be a problem in many households and unmet needs such as furnaces continue to be a problem. A Long Term Recovery committee has met regularly, but resources continue to be difficult to obtain, at best.

[The following information is required for requests for Individual Assistance.]

Provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations. Include a comparison of the percentage of the State, local, or Indian tribal government averages and national averages.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U S Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

[The following information is required for requests for Public Assistance.]

Provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include in your discussion significant impacts to specific areas. If any local communities have sustained significant damage and have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita.

Discuss level of insurance coverage.

Insert concluding statement.

Note: *Provide numbers and amounts, as appropriate.*

Sba schools, longer in summer if they cant get water, businesses, restaurants, food prep, potable water costs

Cost Figures for Flint Water Response: Population and Community Health Administration (PHCSA)

Type	Priority	Intervention	Rationale	Cost
Education				
Secondary Prevetion				
		School nursing	To monitor, case manage, treat, promote wellness (socioemotional), school *nutrition, etc...*	*$500,000*
		Special Education	20 percent of children with BLLs greater than or equal to 25 @ age two receive special education for an average of 9 years.	$2,500,000
		Pre-Post school programming	To provide structured, safe supervised programming	$9,000,000
Nutrition				
Secondary Prevention				
		Expand WIC eligibility requirements	To increase availability of healthy nutrition for impacted children	$1,380,000
		Promote breastfeeding education and support services	To protect children from lead exposure, promote cognitive development	$85,000
		Educate and promote lead-exposure diet	To limit absorption and promote excretion of lead in exposed children	$110,000
Tertiary Prevention				
Medical Health				
		Immediate Treatment and treatment of lead-associated ADHD	Immediate treatment of childr	$18,280,849
		Promote caregiver capacity. Increase capacity of maternal	To support parents and programs to improve parenting skills and early identification of	$250,000 $325,000
Secondary Prevention		infant suppport services	developmental delays	$120,000
		Education for primary care providers regarding toxic stress	To indentify developmental delays early	$100,000
		Increase pediatric healthcare access to a patient centered medical home	To continuously drive patients to their primary care provider	$100,000

Tertiary Prevention	Creation of the Flint Children's Health and Development Fund	To support short and long-term health, medical care, and developmental needs of Flint children exposed to lead	$100,000,000
	Behavorial Health *Services*	To provide necessary mental/behavioral health services to exposed *population*	$7,000,000
Assessment	*Identification* and tracking of exposed children/cohort	To determine extent of injury and long-term neurodevelopmental, medical, socioeconomic impact. To *allow for identification of* exposed children and ongoing surveillance	$100,000
Subtotal			**$139,155,849**

Budget Estimates
FY16 Supplemental Request

Appropriation	**FTEs**	**Amount**
Cost for epidemiologists	2	$115,000
Cost to abate lead in homes in Flint	3.5	$1,687,500
Additional lead investigations	0	$100,000
Increase nurse case management	1	$75,000
Increase community education	2	$120,000

WIC outreach and trasportation	1	$60,000
Total FY16 fuding Request	**$10**	**$2,157,500**
FY17 Supplemental Request		
Continuation of FY16 Supplemental	8	$850,000
Cost for epidemiologists	2	$220,000
Cost to abate lead homes in Flint	4	$2,261,000
Additional lead investigations	0	$130,000
Increase nurse case management	1	$100,000
Increase community education	2	$180,000
WIC outreach and transportation	1	$90,000
Total FY17 Funding Request	**18**	**$3,831,000**
Total FTE	**27.5**	
GRAND TOTAL		**$145,144,349**

Notes

It is reasonable to have a nurse in 5 schools in Flint. $500,000

Lifetime costs $2.5 million for a cohort of two year olds.

$1,000/9000 children

Low demand for ready to feed formula, Expansion of WIC eligibility and income to children 7-10 yrs require USDA approval. $1.38 M

Promote breasfeeding- We believe an additional lactation consultant would be helpful at GCHD

Dietician for nutrition counseling/education at Genesee County Health Department

Immediate treatment: $280,849
ADHD Includes medication and counseling: $18 million annually

Expansion of home visitation programs. Parent education via community classes related to preventing toxic stress (ACEs)- Perhaps this is something that the Genesee Coalition could undertake. 5 grants at $50,000/ea to interested community partners. Parents as teachers program- 5 staff to do home visitation at $65,000/ea. One MDHHS FTE- $120,000 to establish and monitor contracts

$100,000 for provider education to Hurley Hospital

Funding for Children's Healthcare Access Program (CHAP)

Estimate provided by Dr. Mona Hanna Attisha; estimate should be validated by acutarial analysis

700,000/10 years

Identification and tracking of exposed children/cohort- We think it is reasonable to enhance capacity to support health information exchange and integration between laboratories and the MICLPS registry.

Notes

Support two epidemiologists to analyze blood lead levels based on zip codes in the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted. Positions will be supported through contracts with MPHI. Costs reflect contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 3.5 contractual staff - 2.5 field consultants to conduct abatement and one to assist with client application and form processing (total $187,500). Funds for the service include the cost to abate 100 homes @ $15,000 each ($1.5 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Additional contractual efforts to support lead investigations in 100 additional homes in the City of Flint. Service will be provided by ETC Consulting.
Funds support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, provide nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.
Contractual FTEs will work with the Genesee County Health Department (GCHD) to build educational efforts in that community to develop a more detailed education plan.

One contractual peer educator FTE at Genessee County Health Department to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and overall health of pregnant moms and infants.

Continue the funds from the original FY16 supplemental for existing nurse case management of EBL home investigations.
Continue the funds from the FY16 request above and support two epidemiologists to analyze blood lead levels and *will address broader areas beyond the City of Flint.* Work conducted by the epidemiologists will be new functions not currently conducted.
Continue the funds from the FY16 request above and finance contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 4 contractual staff - 3 field consultants to conduct abatement and one to assist with client application and form processing (total $311,000). Funds for the service include the cost to abate an increase to 130 homes @ $15,000 each ($1.95 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.
Funds support additional lead environmental investigations. This is lead investigations in homes of children with high blood lead levels to determine all of the sources of lead exposure and plan for mitigation of lead. This does not include *funding for lead abatement. This is done via contract with ETC Consulting.* (No FTEs)
Continue the funds from the FY16 request above to support the increased testing and follow up necessary with the *new homes being investigated. Nurse case* managers provide follow up with families, nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.
Continue the contractual health educators at *GCHD* to work collaboratively with community agencies on awareness of lead hazards, increase lead testing, and nutrition education.
One contractual peer educator FTE at GCHD to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and improve the overall health of pregnant moms and infants. Bus tokens (10,000 at $1 = $10,000), bus signs and other promotion materials for WIC at $5,000.

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since April 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would prove to be challenging to historical central cities such as Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as Shelley versus Kraemer (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to a dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,413	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	445,589	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.3%	52.6%	43.4%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an official bankruptcy (declared in 2XXX) appeared to provide one of the clearest means to sort through the many debts and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. A disproportionate number of the city's residents are in poverty. A disproportionate number of the city's residents have disabilities (functional needs).

The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this disaster:

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

ATTACHMENT 2 TO MAJOR DISASTER REQUEST

Significant State and Local Response and Recovery Actions

Search and Rescue. The rapid and severe flash flooding inundated numerous sections of interstate highways, major state highways, and local roadways in the metropolitan Detroit area in the hours immediately after the heavy rainfall on August 11, trapping hundreds of vehicles and motorists in the rising water. Many of these motorists sought refuge on the tops of their vehicles or on nearby high ground and had to be rescued by Michigan State Police officers, local law enforcement officers, and local fire department personnel. Michigan State Police resources were particularly valuable to the search and rescue efforts. State Police officers provided direct assistance to stranded motorists, checked the status of abandoned vehicles, and assisted local responders in blocking access to flooded roadways. In addition, divers with the Michigan State Police Underwater Recovery Unit checked more than one hundred submerged vehicles for occupants (fortunately, none were found), and the State Police Aviation Unit conducted aerial fly-overs of the impacted areas to search for additional stranded motorists and to take aerial photographic and video footage of the flood scenes. (Some of those photographs are included at Attachment 3 to provide visual documentation of the scope and magnitude of the flooding.)

Critical Facilities and Infrastructure Restoration. A number of critical facility and infrastructure emergency restoration measures were implemented in the affected counties and local communities during the response to the severe flooding. Particularly hard hit were the interstate highways and major state roadways in and around metropolitan Detroit, although roadways in all three counties were heavily impacted by the flooding. Many sections of the affected highways in and around metropolitan Detroit (including interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39) were inundated with flood water, trapping vehicles and motorists who could not make their way through the rapidly-deepening water. This forced the closure of these roadway sections – in some cases for several days – so that crews from the Michigan Department of Transportation, Michigan State Police, and county and local road and law enforcement agencies could oversee the removal of stranded (and generally inoperable) vehicles; assess the physical damage to and conduct safety checks of road, bridge, and related infrastructure; and initiate appropriate facility repair and restoration measures so that the closed sections of roadway could be safely reopened to the motoring public. (Refer to the road closure map found at Attachment 3.)

Repair and restoration measures included but were not limited to: conducting safety checks of and making temporary or permanent repairs to damaged structures; removing water, mud and debris from the roadway, bridges, and rights-of-way; stabilizing banks to prevent further debris flows and physical degradation; repairing signage and electronic signals, where required; repairing pumping equipment and associated facilities to ensure they are operational; and testing the repaired facilities to ensure they will allow for safe travel. In most cases, the dedicated work crews were able to reopen the damaged highway and roadway facilities within 36-48 hours. However, some of the damaged sections of roadway and bridge infrastructure will

require more extensive permanent repairs which will take several weeks to several months to complete once funding is available to finance the repairs.

Uninsured damage to other local public facilities and infrastructure was significant. For example, in the City of Warren in Macomb County, the Police Department and Fire Department incurred nearly $2.8 million in uninsured damage to their police and fire vehicles and associated equipment. This includes 10 fully-equipped Fire Department vehicles and six fully-equipped Police Department vehicles requiring replacement, and another seven fire vehicles and nine police vehicles requiring major repairs. The City of Sterling Heights, also in Macomb County, had nearly $620,000 in insured public utility damage, while in St. Clair Shores, uninsured damage to public buildings and associated equipment totaled $225,000. In the City of Royal Oak in Oakland County, uninsured damage to a local high school and middle school totaled $210,000. Uninsured damage to St. John Providence Hospital in the City of Southfield in Oakland County was $200,000. Uninsured damage to Oakwood Hospital in the City of Dearborn in Wayne County exceeded $1.8 million, while in the City of Highland Park, also in Wayne County, uninsured damage to public utilities, city hall, and the community recreation center totaled in excess of $450,000. In the City of Detroit in Wayne County, uninsured damage to public buildings and equipment was over $930,000, with the majority of that total coming from damage to Police Department facilities. These are just a few instructive examples from the nearly $16.8 million in public damage that occurred in Michigan. Although temporary repair and restoration measures have been put in place in most instances to bring the damaged facilities and infrastructure in the three counties to basic operational status, almost all will still require extensive permanent repairs and restoration to bring them back to their pre-flood condition. That will not occur in a timely or comprehensive manner without federal disaster relief assistance.

Emergency Sheltering and Mass Care. Although the rapid (and unanticipated), heavy rainfall did not allow for preventive evacuations of the public in impacted areas, emergency sheltering and mass care services were required in several instances. For example, on August 11, over 400 stranded motorists had to be temporarily sheltered for the evening in the City of Warren because roadway flooding prohibited further travel and resulted in many areas being inaccessible by vehicle. (Many of these individual's vehicles were deeply submerged in flood water and would not have been able to travel anyway because of the damage to their vehicle.) Along M-10 in Wayne County, approximately 50 motorists were stranded for an extended period from the evening of August 11 through August 13 due to the deep flood water in the walled-in, lower sections of the highway. During this time, the American Red Cross provided these stranded individuals with food, water, and comfort kits until the roadway could be de-watered and reopened for travel. For six days after the flooding occurred, a small number of displaced flood survivors were sheltered and cared for at an American Red Cross shelter in Garden City in Wayne County because their homes were inaccessible and/or incurred sufficient damage to render them unsafe for occupancy. Lastly, the American Red Cross also provided cots and comfort kits to nearly two-dozen displaced residents at two apartment complexes in the cities of Detroit (Wayne County) and Troy (Oakland County) so that the residents could use other (unaffected) vacant units within the respective complexes for shelter, rather than having to be moved elsewhere to a temporary shelter facility.

I must note that these emergency sheltering and mass care figures are somewhat misleading, as we received reports that many more flood survivors were temporarily displaced because of flood damage and/or inaccessibility but sought shelter with nearby family, friends, or in unaffected area hotels and motels. As it is next to impossible to track these "unofficial" evacuations with any accuracy, it is safe to say that the number of temporarily displaced flood survivors is much higher than reported through official channels.

The American Red Cross generally led the organized emergency sheltering and mass care effort, supported by the Michigan Department of Human Services, the Salvation Army, and other community-based relief organizations.

Flood Recovery for Individuals and Families. To assist affected flood survivors in recovering from this devastating disaster, the American Red Cross teamed with the Michigan Department of Human Services, Michigan 2-1-1, the Michigan Community Service Commission, and other community-based relief organizations to establish and operate "Multi-Agency Resource Centers" (MARCs) in 10 different locations over a six-day period in the latter-half of August. (A corresponding map found at Attachment 3 shows the initial locations of these MARCs.) The Multi-Agency Resource Centers, which were visited by several thousand flood survivors, provided a location and means to disseminate information regarding flood recovery and available flood recovery assistance. Through these centers, flood survivors could connect with or be referred to agencies and organizations that could assist them in their recovery – addressing everything from filing insurance claims, to replacing food and clothing, to making repairs to damaged homes. In addition, the Multi-Agency Resource Centers also provided a clearinghouse for the distribution of flood clean-up kits, personal comfort kits, and other recovery supplies to those requiring such items. To date, over 300 referrals for behavioral health assistance have been made through the centers and other involved agencies.

In addition to the Multi-Agency Resource Centers, flood survivors also have the opportunity to request flood recovery information and/or assistance via the Internet or Michigan 2-1-1 telephone system. These options were widely disseminated to the public and the media in various information releases. For the internet options, affected individuals could register directly with the Recovery Coordination Center (discussed in "Management of Emergency Volunteers" below) operated by Michigan Voluntary Organizations Active in Disasters, at www.bit.ly/floodcleanupsemi, or they could register via a specially-designated web page (www.michigan.gov/miflood) at the Michigan State Police Emergency Management and Homeland Security web site, which provides a link to the Recovery Coordination Center registration form. Either option results in a referral for recovery assistance to one of the Michigan Voluntary Organizations Active in Disasters member organizations providing assistance through the Recovery Coordination Center.

(I must note that, although the Multi-Agency Resource Centers, Michigan 2-1-1, and the aforementioned web sites have been tremendously successful to date in identifying and addressing both short- and longer-term recovery needs of the affected flood survivors in this disaster, it is clear that even these collective efforts are not going to be sufficient to identify and address all of the unmet needs of the thousands of flood survivors. This is particularly true with regard to home rebuilding and restoration efforts to ensure safe re-occupancy of damaged

structures. Because over 80-percent of the affected households in the three-county area did not have insurance in place to address the damage incurred in this flash flood, it is very likely that many will be forced to occupy their homes with potentially dangerous and/or unhealthy conditions present due to damaged electrical and mechanical systems and/or the presence of black mold or other contaminants on building materials not properly dried out and restored. Simply put, the long-term unmet needs of the flood survivors far outstrip the combined resources of the involved voluntary organizations, volunteers, and existing human service programs to remedy those needs. Clearly, federal disaster relief assistance is required to enable these flood survivors to fully recover from this devastating flood and allow them to make their dwellings safe and sanitary for re-occupancy.)

Without significant relief assistance from the federal government, these individuals will not have the resources necessary to fully repair and restore their damaged homes and mechanical systems, ensure their homes are free of mold and other health hazards, and replace damaged essential household items such as appliances, clothing, food, medications, and furniture and bedding. Without federal relief assistance, it is an almost certainty that many individuals will continue to struggle to recover and be forced to live in unhealthy conditions due to mold, contact with contaminated materials, and substandard (and likely unsafe) mechanical systems that they could not afford to have properly repaired by licensed professionals.

Management of Emergency Volunteers. To date, hundreds of emergency volunteers have been mobilized through the collective efforts of the American Red Cross, Michigan Voluntary Organizations Active in Disasters, Michigan Community Service Commission, Michigan Department of Human Services, local and state emergency management offices, and community-based organizations, to assist in the recovery from this flood disaster. In fact, volunteers have been and continue to be the lifeblood of the flood recovery effort. The aforementioned agencies and organizations have done a tremendous job in managing these volunteer resources and ensuring their timely and effective use. As I previously indicated, several Multi-Agency Resource Centers have been established and successfully operated in the affected counties to allow for the distribution of clean-up and personal comfort kits, and to facilitate the connection of those in need with the agencies and organizations that can provide recovery and relief information and/or assistance.

Central to the disaster volunteer management effort has been the establishment of a Recovery Coordination Center (RCC) to provide a means to coordinate the efforts of organizations that provide volunteer assistance to flood survivors needing help in repairing and restoring their home. The majority of the volunteers providing assistance are working under the framework of Michigan Voluntary Organizations Active in Disasters, and in coordination with state and local emergency management agencies, Michigan 2-1-1, the American Red Cross, the Michigan Department of Human Services, and other community-based organizations. The Recovery Coordination Center helps identify flood survivors requiring recovery assistance and determines the nature and scope of their recovery needs. The center provides ongoing case management for individual recovery and rebuilding/restoration efforts, ensuring that no one "falls through the cracks" and does not receive the assistance they need. Affected individuals are identified and referred to the Recovery Coordination Center by Michigan 2-1-1, local and state emergency management offices, Michigan Department of Human Services county offices,

the Michigan Community Service Commission, churches and other faith-based organizations, or by involved volunteers themselves. Once a flood victim is registered with the Recovery Coordination Center, their recovery needs are referred to the appropriate agency or volunteer organization for follow-up action. Through the center, voluntary organizations can also track their recovery efforts, thus ensuring an accurate accounting of the volunteer hours spent with each flood victim. Currently, over 4,000 homeowners have requested clean-up and restoration assistance through the Recovery Coordination Center. To date, over 250 homes have been completed using volunteers coordinated through the center.

However, as I indicated earlier, even with these outstanding volunteer efforts in place the collective capabilities of volunteers can only go so far in meeting the more difficult long-term recovery needs aimed at ensuring safe and sanitary conditions in flood-damaged homes. Because of the lack of adequate insurance (less than one in five households was adequately insured) to help pay for potentially-expensive repair and restoration activities required to make home structural elements and mechanical systems safe and functional, and to fully-remove the presence of black mold and other contaminants in flood-damaged building materials, it is essential that federal disaster relief assistance be provided. Absent this assistance, affected flood survivors will, in many cases, be forced to live in potentially-dangerous and/or unsanitary conditions because they do not have the financial resources necessary to fully restore their dwellings to pre-flood condition in a timely manner – or at all.

Debris Removal to Protect Public Health and Safety. Debris management was a critically important recovery issue in the days and weeks immediately following this flood disaster. Throughout the affected counties and communities, extensive and rapid debris operations were required to clear and remove flood-damaged building materials and personal property from curbsides and roadway rights-of-way in residential and commercial areas in order to protect public health and safety and enable the continuing use of adjacent roadways, sidewalks, and fire hydrants. The wet, heavy, contaminated flood debris from tens-of-thousands of flood-damaged homes and businesses, coupled with the hot and humid weather conditions that occurred in the days that immediately followed the flood disaster, set the stage for potentially-dangerous and unsanitary conditions in these densely-populated and heavily-developed urban areas. Because of the very real potential for a public health emergency, it was necessary for the affected local communities to muster all of the private and public debris clearance and removal resources they could to ensure rapid and environmentally-compliant removal and disposal of this debris.

In that regard, the affected local jurisdictions did an exemplary job in rapidly managing this difficult and potentially life-threatening recovery issue. With the assistance of various state agencies working out of the State Emergency Operations Center, the local jurisdictions were able to identify sufficient resources to address their debris removal and disposal needs in a rapid and environmentally-compliant manner. All of the affected local communities effectively worked with the Michigan Department of Environmental Quality to obtain required emergency waivers for temporary debris storage and transfer centers, and for emergency transportation of flood debris to approved landfill facilities. These debris removal efforts, however, came at a collective $7 million cost to the affected local jurisdictions in the three counties – a cost which

these jurisdictions are not in a position to bear without significant cuts to other essential programs and services.

Emergency Public Information. During the first hours and days after the flash flooding occurred, the affected local jurisdictions and several Michigan state agencies undertook a comprehensive emergency public information campaign to warn residents of the health and safety risks posed by the flooding and flood-related damage, and to provide updates on recovery issues and concerns. Of particular concern initially were the health and safety risks associated with structural damage, damaged electrical and mechanical systems, and contaminated flood debris. Later, the public information focus shifted to address longer-term recovery issues such as use of licensed and reputable contractors, price-gouging, scam avoidance, and home restoration best practices. This public information campaign continues today, in both English and appropriate non-English languages, and will so for the foreseeable future until all recovery-related issues and concerns have been effectively dealt with. All appropriate media sources have been utilized in this campaign, including television, radio, print media, and web and social media sites. Although there were two incident-related deaths in the early days after the flooding, since that time this campaign has been largely successful in minimizing flood-related injuries and health and safety problems.

The Michigan United Way 2-1-1 telephone referral system has been a tremendously successful means of disseminating important recovery-related information and making referrals to agencies and organizations that can provide recovery assistance. To date, Michigan 2-1-1 has fielded nearly 10,000 calls from individuals seeking flood recovery information and/or referrals. Michigan 2-1-1 has been instrumental in connecting individuals in need with the appropriate resources to enable them to recover from this flood disaster. Despite its success, Michigan 2-1-1 also had one potential downside, that is, the large number of "abandoned" calls from callers that chose to hang up rather than utilize the call-back option when lines were busy. Telephone logs show that over 3,100 calls were abandoned between mid-August and the first week of September. This is disturbing to me because there is no way to track with certainty whether or not these individuals actually did receive the information and/or assistance they were seeking when they initially called Michigan 2-1-1. My hope is that they did, but I suspect a portion of these callers simply gave up and did not further seek recovery information and/or assistance.

(I must note that my concerns in this regard are not necessarily limited to Michigan 2-1-1. Reports received from state and local staff that participated in the Preliminary Damage Assessment indicate that a potentially large number of affected individuals may not have sought assistance due to a number of reasons, including but not limited to: a general distrust of or frustration with government; language and/or cultural barriers; technology barriers, i.e., do not regularly monitor media reports, the internet, or social media; or a lack of understanding regarding available resources and the means for accessing those resources. If federal disaster relief assistance is granted based on this request, we may find many additional individuals that may seek to apply for federal assistance – over and above those estimates developed in the Preliminary Damage Assessment.)

State Response and Recovery Assistance Efforts. Michigan's state departments and agencies and nongovernmental partner organizations have provided whatever appropriate resources they had at their avail to assist the affected counties and local jurisdictions in responding to and recovering from this flood disaster. Although the following is by no means an all-inclusive accounting of all response and recovery efforts, it does provide brief synopses of some of the more noteworthy efforts:

The **Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD)** began to monitor the incident in the early evening of August 11, after reports of flash flooding were first received from the affected local emergency management officials and the National Weather Service. Immediate communications were established with the local emergency management officials to assess the nature, scope, and magnitude of the incident and to help coordinate the provision of state resources as needed. This monitoring continued through the evening hours of August 11. When reports from the affected local jurisdictions and the Michigan Department of Transportation indicated that metropolitan Detroit interstate highways and major roadways had suffered major flooding, the MSP/EMHSD notified key staff to report to the State Emergency Operations Center (SEOC). The SEOC was in partial activation status for several hours, and then went to full activation status at 10:00 AM on August 12. Numerous departments, agencies, and nongovernmental partners responded and reported to the SEOC for duty.

The MSP/EMHSD coordinated SEOC operations at full activation status for the next 14 days, operating 24 hours a day, 7 days a week, on 12-hour shifts. On August 25, the overnight shift was terminated and the operational hours were changed to 8:00 AM till 8:00 PM. The SEOC remained on that schedule for two days, until August 27, when the hours were changed to 8:00 AM till 5:00 PM to more closely align with the Preliminary Damage Assessment operations ongoing in the three-county impact area. On September 8, the SEOC went to a weekly operational period.

Throughout the SEOC activation, the MSP/EMHSD staffed command, operations, logistics, planning, public information, mapping and technical support positions to keep the SEOC functioning at full capability and to fully support the state department/agency and nongovernmental partner representatives present in the facility. During this period, the MSP/EMHSD coordinated all resource requests received from the affected local jurisdictions, ensuring that each request was appropriately addressed in a timely manner. The MSP/EMHSD also coordinated the collection, compilation, review, analysis, synthesis, and reporting of damage and impact assessment information received from the affected jurisdictions and state departments/agencies. The MSP/EMHSD also conducted several briefings daily for local officials, state departments/agencies and nongovernmental partners, and other interested parties, to keep all stakeholders apprised of ongoing or planned activities and areas of concern. Daily incident management plans were developed by SEOC command staff to focus SEOC activities on planned incident management objectives and to ensure that state resources were being appropriately utilized to address the most pressing issues during the operational period. In addition, the MSP/EMHSD developed numerous daily written situation status reports and public information releases to keep SEOC staff, state government executive and legislative

leadership, local officials, our emergency management partners, and the public informed of ongoing issues, concerns, activities, and opportunities for coordination and/or involvement.

From August 25 to September 9, the MSP/EMHSD worked closely with Federal Emergency Management Agency officials to coordinate and conduct Preliminary Damage Assessments for both Individual Assistance and Public Assistance in the three-county impact area. The MSP/EMHSD was instrumental in the set-up of and conduct of the Preliminary Damage Assessment, handling all administrative and logistical aspects of the operation from the SEOC and an on-site coordination center established at the Double Tree Inn in Dearborn. Lastly, using the assessment information and findings from the Preliminary Damage Assessment, the MSP/EMHSD provided considerable technical assistance to me and my staff in the drafting of this request letter and in compiling the supporting information found in the various Attachments and Enclosures.

In addition to the MSP/EMHSD contributions, the **Michigan State Police (MSP)** also deployed considerable resources during the flood response to assist local officials in controlling access to flooded areas, conducting underwater search and rescue in flooded areas, and assisting with security and traffic control as required. Early in the response, the MSP Aviation Unit also flew aerial reconnaissance and assessment missions over the affected areas to search for additional stranded motorists on flooded highways, to aid local and state officials in determining the scope and magnitude of the flooding, and to take aerial photographs and video footage of flooded areas for damage and impact assessment purposes. (Some of those photographs appear in this letter at Attachment 3.) The MSP Special Operations Division also assisted at the SEOC, and the Michigan Intelligence Operations Center (MIOC) continuously monitored the flooding conditions and sent out situational awareness bulletins on the weather and flooding to all stakeholder partners through the duration of the response and recovery.

The **Michigan Department of Agriculture and Rural Development (MDARD)** made available flood clean-up (to include sewage) guidance to affected food establishments in the three-county impact area. This guidance was provided in English, Spanish, Arabic, and Mandarin languages. In addition, the MDARD and the U.S. Food and Drug Administration (FDA) Detroit District Office coordinated with various food industry associations in Michigan to assess the impact of the flooding on the food and agriculture sector and to determine appropriate follow-up measures necessary to protect public health. (Providing the clean-up guidance to food establishments was one of the necessary measures.) During this outreach process, the MDARD focused on food warehouses and retail establishments while the FDA focused on food processors and other regulated firms (e.g., drug, biologics, medical devices, etc.) within the local jurisdictions most heavily impacted by the flooding. (Those jurisdictions included but were not limited to: Warren, St. Clair Shores, and Clinton Township in Macomb County; Madison Heights, Ferndale, and Royal Oak in Oakland County; and Dearborn, Dearborn Heights, and Detroit in Wayne County.) *In addition, the MDARD also reached out to the affected health departments* (county and City of Detroit) who license and inspect restaurants, and with major grocery store chains and trade associations. MDARD personnel also inspected a number of gasoline stations in the affected area to determine if any had issues with flood water in their gasoline storage

tanks. (One did, but the issue was satisfactorily resolved by the state inspectors.)

The **Michigan Department of Community Health (MDCH)** coordinated with affected local health departments regarding the provision of disaster behavioral health resources; monitored and coordinated with local hospitals and the Region 2 Health Care Coalition regarding flood-related damage and the resultant impacts on hospital operations; and worked closely with the SEOC Public Information Officer to disseminate appropriate and timely health-related information to flood survivors.

The **Michigan Department of Environmental Quality (MDEQ)** coordinated extensively with local officials involved in debris management operations to ensure compliance with federal and state environmental laws and regulations; issued timely emergency approvals of sites designated for use as temporary debris storage and transfer sites; issued other emergency authorizations and waivers where appropriate; provided technical assistance to local officials and private debris management firms regarding issues pertaining to the collection, storage, transport, and disposal of flood-related debris; assisted in the identification of supplemental debris management resources for local officials in need of such resources; and monitored flood-related impacts on local drinking water treatment plants and operations in the affected area.

The **Michigan Department of Human Services (MDHS)** coordinated with involved voluntary relief organizations, community-based organizations, MDHS County Offices and the Michigan Community Service Commission, Michigan 2-1-1, and other human service providers to identify, assess, and attempt to meet the recovery needs of flood survivors. The MDHS undertook a number of activities during the response and recovery phases of this disaster to meet this broad mission, including but not limited to: coordinating with the American Red Cross, Michigan Voluntary Organizations Active in Disasters, and other voluntary relief organizations to establish and operate two temporary emergency shelters, 10 Multi-Agency Resource Centers, and a Recovery Coordination Center; coordinating the distribution of thousands of clean-up and personal comfort kits; coordinating with the SEOC Public Information Officer and other public information officials regarding the dissemination of appropriate and timely recovery information using all available means (e.g., Michigan 2-1-1, web and social media sites, television, radio, etc.); registering eligible flood survivors for the limited MDHS emergency relief assistance available; coordinating the receipt and use of donated goods for the recovery effort; resolving debris management issues for volunteers providing clean-up and/or repair assistance through the Recovery Coordination Center; assisting with volunteer recruitment through the Michigan Community Service Commission and other means; procuring needed supplies for volunteer repair/clean-up teams; and addressing recovery-related issues for various functional needs populations affected by the flooding.

The **Michigan Department of Licensing and Regulatory Affairs (MDLARA)** monitored incident-related energy disruptions and energy supply issues related to the storms and flooding; monitored the operations of regulated health care facilities affected by the flooding; provided (through the Michigan Occupational Safety and Health Administration – MIOSHA) worker safety information to emergency responders and workers, as appropriate; and provided (through the

Bureau of Construction Codes) information to citizens in the City of Highland Park and other communities on mandated building, mechanical, electrical and plumbing inspections.

The **Michigan Department of Technology, Management and Budget (MDTMB)** monitored the impacts of the flooding on state owned and operated facilities and state government operations in the three-county area; assisted in obtaining needed resources for emergency operations and/or flood recovery through standing vendor contracts and/or the state's emergency procurement process; identified and procured office space and coordinated information technology installation for needed emergency facilities; and assisted in transporting recovery supplies to Multi-Agency Resource Centers and other distribution facilities.

The **Michigan Department of Transportation (MDOT),** assisted by local public works and law enforcement personnel and the Michigan State Police, managed the closure of several sections of interstate and state highways in and around metropolitan Detroit that were inundated by flood water. This included several sections interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39. The MDOT also monitored and reported on closures of local roads and bridges by local officials; reported on the scope and magnitude of road and bridge damage in the affected counties; coordinated with the Federal Highway Administration (FHWA) regarding implementation of its Emergency Relief Program; and participated in the Public Assistance Preliminary Damage Assessment for road and bridge damage.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK.

STATE OF WEST VIRGINIA
OFFICE OF THE GOVERNOR
1900 KANAWHA BOULEVARD, EAST
CHARLESTON, WV 25305
(304) 558-2000

EARL RAY TOMBLIN
GOVERNOR

January 27, 2014

Mr. Frank Skaggs, Director
U.S. Small Business Administration
Field Operations Center East
101 Marietta Street, NW
Suite 700
Atlanta, Georgia 30303-2725

Dear Mr. Skaggs:

Beginning January 9, 2014, the West Virginia-American Water Company curtailed service to over 100,000 customers in an area encompassing portions of nine counties in West Virginia. This was triggered by a chemical leak which affected about 300,000 residents—approximately one-sixth of the state's population. Due to a robust public and private response, the adverse effects of this incident have been minimized to the maximum extent possible. However, the lack of tap water has severely affected many of the businesses in Charleston, the capital city, and surrounding areas. The most severely impacted county, Kanawha, is also the most populous and the state's center of commerce.

As a result of this incident, President Barack Obama issued an Emergency Declaration for Direct Federal Assistance to the state and its citizens (FEMA-3366-EM-WV). However, the businesses that were forced to close or had substantially reduced income because they could not maintain acceptable sanitary levels or had reduced traffic due to citizens avoiding the area are not helped by this action.

State, local, and other organizations are beginning to develop information on the financial impact of this event that has caused significant business disruption to many businesses in the affected area. For example, many businesses that serve sports-minded customers had to be closed during the weekend of January 11-12, when there were four (4) National Football League playoff games in addition to other sporting events that would normally add to their attendance and resultant sales of food and drink.

Even after water service was restored, certain businesses, e.g., restaurants, were required to cleanse their facilities in order to meet requirements set by the appropriate local health department. Thus, businesses have suffered loss of revenue and extraordinary costs, and employees have lost wages due to this event.

Based on the information developed thus far, I hereby certify that, in accordance with the Code of Federal Regulations, Title 13, Part 123.3, at least five (5) small businesses in Boone County, Kanawha County and Putnam County, West Virginia, suffered substantial economic injury as a result of the chemical spill that forced a curtailment of water service beginning on January 9, 2014, and continuing until January 17, 2014, in some areas. I further certify that the degree of economic injury is so severe that financial assistance at reasonable rates and terms is not otherwise available, thereby creating the necessity for federal involvement in the form of subsidized loans from the Small Business Administration.

Your assistance in expediting help for our small businesses and eligible private, non-profit organizations as they struggle to meet their financial obligations and pay ordinary and necessary operating expenses during the recovery from this unprecedented event is greatly appreciated. Should you need additional information, please contact Jimmy J. Gianato, the Director of the West Virginia Division of Homeland Security and Emergency Management. Mr. Gianato may be contacted on 304-558-5380 (O), or at Jimmy.J.Gianato@wv.gov.

Sincerely,

Earl Ray Tomblin

EARL RAY TOMBLIN
GOVERNOR

January 27, 2014

Ms. MaryAnn Tierney
Regional Administrator
FEMA Region III
One Independence Mall, Sixth Floor
615 Chestnut Street
Philadelphia, PA, 19106-0444

Through:

Mr. Michael J. Lapinski
Federal Coordinating Officer
FEMA-3366-EM
FEMA Region III
One Independence Mall, Sixth Floor
615 Chestnut Street
Philadelphia, PA, 19106-0444

Dear Ms. Tierney:

Beginning on January 9, 2014, the West Virginia-American Water Company issued an order directing approximately 100,000 customers not to use their tap water. The affected area contained portions of Boone, Cabell, Clay, Jackson, Kanawha, Lincoln, Logan, Putnam, and Roane Counties. This "Do Not Use" order was issued to prevent adverse health effects for the approximately 300,000 residents, as well as those visiting the area. This situation was deemed serious enough to warrant an immediate Presidential Emergency Declaration (FEMA-EM-3366-WV) that utilized Emergency Protective Measures to assist the state in providing for the safety and welfare of the affected citizens, but that help was limited to Direct Federal Assistance.

At the time of the Presidential Emergency Declaration, no one knew how long this assistance would be needed, but by the rapid response to our request, affected citizens were provided the water and food they have needed during this time of deprivation.

The public agencies that have borne the brunt of the extraordinary expenditures required to distribute supplies and meet the needs of the affected population are presently denied access to Category B Emergency Protective Measures funding due to the limitation placed on the program by the wording of the Emergency Declaration. Therefore, I respectfully request that this Emergency Declaration be modified to provide Category B, Emergency Protective Measures, including direct funding assistance, to eligible applicants in the nine counties currently included in the declaration.

This is necessary due to the extraordinary expenditures incurred by state and local responding agencies and the adverse effects on the economy and tax revenues of the affected areas. A preliminary estimate is that state and local responding agencies will incur in excess of $2,000,000 in eligible costs in addition to the state payment of 25% of the costs of the already approved direct federal assistance. And, I must emphasize that the response is ongoing and several of the key agencies have not been able to take the time to provide estimates of their costs because of their commitment to meeting the needs of the people first.

At the same time, the affected area's economy has been devastated by the loss of income to businesses that have been closed or open on a limited basis. One source has estimated that hotels and restaurants have lost $1,000,000 in revenue a day while other businesses have had to close part of their operation. For example, a business selling coffee and food in addition to merchandise could remain open, but lost a portion of its income which, in some cases, can equal or exceed its merchandise revenue. There is concern that this event will further impact the state's economy because of the negative images that many potential tourists have seen.

The closure of businesses costs workers their source of income and increases their need for assistance. A similar situation exists for government at all levels. If businesses and individuals do not make money, then they pay less in taxes and that affects the solvency of state and local governments. A detailed analysis of this event is not possible at this time, but I am certain it will show a total economic loss for the citizens, businesses, and governments of this area that will exceed the direct emergency protective measures we are providing many times over.

The economic and social consequences of this event are far-reaching. The school systems in some of the affected counties have lost instructional time that will result in extending their school calendars to comply with state law, lost food that expired during the outage, and had extraordinary costs to pay in order to flush their water systems and clean the areas exposed to the contaminated water. Ongoing testing of the water supply by National Guard personnel, including members of Civil Support Teams from four states, has assisted in the verification of the levels of the contaminant so it could be determined when the levels fell to the range that the Centers for Disease Control and Prevention believed safe. Yet, despite the best efforts of the company and government many people no longer view their tap water as safe and are continuing to demand bottled water to meet their potable water needs. It is impossible to predict when this will change, if ever.

There is little hope that these costs can be recouped by the party found responsible for this event. The company that was storing the contaminants has filed for bankruptcy and there are several pending suits against that company. It is very unlikely the state will ever receive any reimbursement for its costs from the responsible party. We are aware that the assistance that can be provided through the Stafford Act is limited. However, by granting my request that the Emergency Declaration be modified so eligible Emergency Protective Measures expenditures by state and local governments and eligible non-profit agencies are treated the same as those provided by the federal government, your efforts to help those affected will be as comprehensive as they can be.

Sincerely,

Earl Ray Tomblin
Governor

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

(Date of Request)

The Honorable //// //////
President of the United States
The White House
Washington, D. C.

Through: Regional Administrator [NAME]
FEMA Region _____
City, State, Zip Code

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § [Major Disaster citation (206.36), Emergency citation (206.35)], I request that you declare a [major disaster or emergency] for the ***(name of the State or Indian tribal government)*** as a result of ***(name type of incident and incident date as identified in the declaration request form)***.

[The following information is required for ALL requests. Provide additional information that is not contained in the form. If requested information is included in the form, it is not necessary to repeat in the cover letter.]

Describe deaths and/or injuries associated with the event.

Describe voluntary agency assistance provided to the community in anticipation of or as a result of the event. (including but not limited to activities taken by the American Red Cross (ARC), Salvation Army, Southern Baptists, and Voluntary Organizations Active in Disaster; voluntary agency and/or municipal shelter information, including the number of shelters open, the peak population, total number of overnight stays, and when the shelters closed; number of mental health contacts made by voluntary agencies; number of ARC cases open and closed; number of clean up kits provided; number of meals served; number of fixed and/or mobile feeding sites; level of ARC operation (I-V); and any other type of assistance that was provided by voluntary organizations).

Indicate whether a State of Emergency has been declared, when and to what areas are included in the declaration. Indicate if affected jurisdictions have also declared states of emergency.

Provide a description of damage as a result of the event (such as the impact the event has had on the affected area and population; disruption of normal community functions and services, including damage to any critical facilities that have been rendered non-operational by the event and extended or widespread loss of power or water; emergency conditions that may be present,

health and safety hazards, status of repairs, and estimated completion date(s), if known.

Provide information on PDA findings and how and where they were conducted, including accessibility concerns, if additional space needed from the form.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this disaster:

Describe what has been done to respond to the disaster, including actions pending or taken by the State, local, or Indian tribal governments. Describe any State, local or Indian tribal government Individual Assistance programs.

Provide the disaster history of the State or Indian Tribal government over the past 12 months, including Stafford Act declarations and declarations by the Governor or Tribal Chief Executive and the extent to which the State or Indian tribal government has expended its own funds; list areas that have sustained damage from this event and other disasters in the previous 12 months; and include any other pertinent factors that would have a bearing on the State or Indian tribal government's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.

[The following information is required for requests for Individual Assistance.]

Provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations. Include a comparison of the percentage of the State, local, or Indian tribal government averages and national averages.

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
National Average	%	$	%	%	
State/Tribe Average	%	$	%	%	
List Jurisdictions Requested	%	$	%	%	

* *Indicate source of data cited*

[The following information is required for requests for Public Assistance.]

Provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include in your discussion significant impacts to specific areas. If any local communities have sustained significant damage and

have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita.

Discuss level of insurance coverage.

If applicable, include estimates for emergency dune restoration on non-engineered beaches that may be eligible for the placement of temporary berms in order to eliminate or lesson the threat of additional damage from a five year event. Identify all damage associated with engineered beach projects and indicate whether or not the damage associated with those beaches is included in the PDA information. Note that beach projects under the authority of the United States Army Corps of Engineers, are not eligible for Public Assistance, as they are under the authority of another federal agency, therefore costs associated with such projects should not be included in the PDA information. Such costs should be identified in Enclosure C.

Insert concluding statement.

Sincerely,

///////////
(Governor or Tribal Chief Executive)

Emergency Declaration Assistance vs. Major Disaster Declaration

Emergency Declaration	Major Disaster Declaration
• Limited to **immediate and short-term assistance**, essential to save lives, protect public health and safety and property	• Declaration may include all programs, Individual Assistance, Public Assistance and Hazard Mitigation; or some of the programs.

• Emergency work
  o Debris removal (Category A)
  o Emergency protective measures (Category B)
• Direct Federal Assistance provided by other Federal agencies with or without reimbursement from FEMA
• Coordination role
• Technical assistance
	• Public Assistance may include all Categories A through G or may be limited to emergency work (Categories A and B)
	• Direct Federal Assistance provided by other Federal agencies with or without reimbursement from FEMA
	• Coordination role
	• Technical assistance

Individual Assistance may include:
• Individuals & Households Program
  o Temporary Housing
  o Repairs
  o Replacement
  o Permanent Housing Construction
  o Medical, dental, funeral expenses
  o Personal property & transportation
• Food Commodities (USDA)
• Direct Federal Assistance provided by other Federal agencies with or without reimbursement from FEMA (not necessary for the delivery of IA and is most often associated with an emergency or major) disaster declaration for Public Assistance
• Small Business Administration low interest loans
• Mass Care and ESF 6 support *see below
	Individual Assistance may include:
	• Individuals & Households Program
	  o Temporary Housing
	  o Repairs
	  o Replacement
	  o Permanent Housing Construction
	  o Medical, dental, funeral expenses
	  o Personal property & transportation
	• Food Commodities (USDA)
	• Direct Federal Assistance provided by other Federal agencies with or without reimbursement from FEMA (not necessary for the delivery of IA and is most often associated with an emergency or major)
	• Crisis Counseling
	• Disaster Unemployment Assistance
	• Food Coupons & Distribution (USDA)
	• Legal Services
	• Small Business Administration low interest loans

• Limited to $5 million • However, if limit is exceeded, the FEMA Administrator must report to the Congress on the nature and extent of continuing emergency assistance requirements	
• Federal share – not less than 75% of the eligible costs for Public Assistance	• Federal share – not less than 75% of the eligible costs for Public Assistance
• Hazard Mitigation Grant Program (HMGP) is not authorized under an EM declaration	• HMGP - Section 404 is usually included in all major disaster declarations.

Mass Care and ESF-6 support in an EM
Under 403, at the State's request, options could include:

Evacuation support at embark and debark - support to tracking and other special needs identification0

Support to State and local sheltering capacity:

- FEMA can augment any type of facility (on a limited scale) or take total management responsibility - Can be managed and/or staffed by State, VOLAG, OFA, FEMA, Contract, or combination
- FEMA can supply shelter supplies through FEMA Logistics (cots, blankets, TP, food, etc)
- FEMA can contract for facilities (State cost share)
- Facilities can include congregate (gyms, arenas, other) or semi-private such as dorms, tent cities, military facilities, or cruise ships
- Health assessment teams can deploy to evaluate special needs requirements

Feeding Operations:

- Contract support to traditional food providers or full operations
- Commodities, consumables, and non-expendable
- USDA can support with commodities - **Not food stamps (Requires IA Major Dec)

Household pets - evacuation and shelter

Declarations & Requests

Two Types of Disaster Declarations:

1. Emergency (EM)

Any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States. (44 CFR § 206.2(a)(9))

2. Major Disaster

Any natural catastrophe . . . or, regardless of cause, any fire, flood, or explosion in any part of the United States which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby. (44 CFR § 206.2(a)(17))

FEMA

Declarations & Requests

Three Types of Requests:

- Major
- Expedited Major*
- Emergency (EM)

} Standard Request or Verbal

**For those catastrophes of unusual severity and magnitude when field damage assessments are not necessary to determine the requirement for supplemental Federal assistance, the Governor or Acting Governor may send a written request...for a declaration of a major disaster. (44 CFR § 206.36(d))*

Request Forms

Preliminary Damage Assessment Request Letter

Example Preliminary Damage Assessment Request

[Date]

John Doe, Regional Administrator
Federal Emergency Management Agency-Region V
536 South Clark Street, 6th Floor
Chicago, IL 60605

Dear Mr. Doe:

Communities in [state] experienced extensive damage as a result of [event] that lasted from [Day, Month, Year] to [Day, Month, Year] Based upon information collected during our local assessments, it is clear that the following counties/tribal governments sustained enough damage to warrant joint FEMA/state Preliminary Damage Assessments (PDAs)

[County/Tribe A, B, C, etc]

At this time I am requesting [number of teams and program] to conduct joint FEMA/state PDAs beginning on [date and time]. The PDA organizational meeting will be held at [location and time]

Thank you for your consideration and please let me know if you require additional information.

Respectfully,

Jane Doe
Director

cc: Recovery Division Director
FCO (if applicable)

FEMA

Request Forms

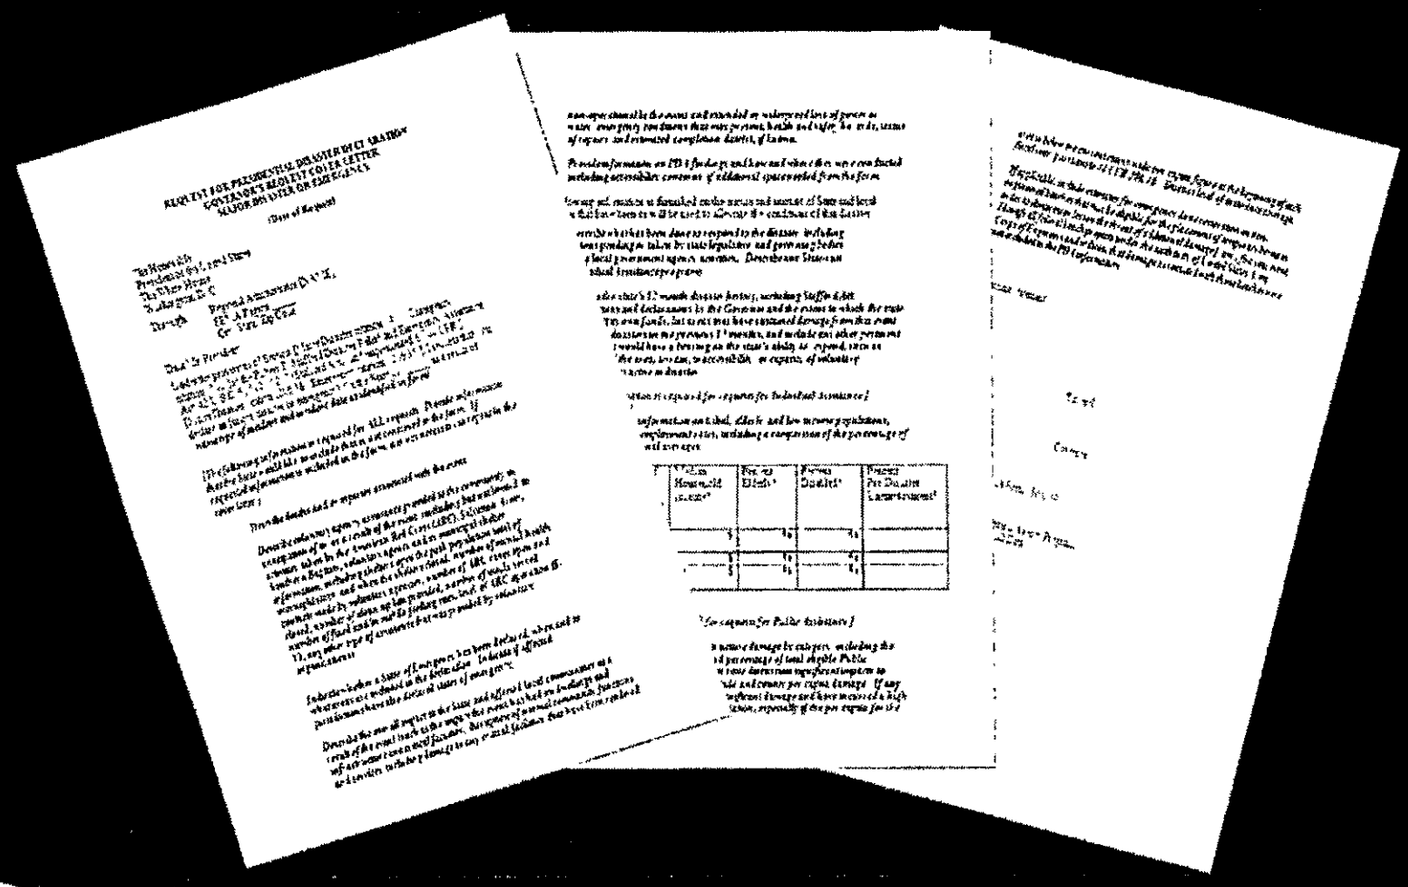
Preliminary Damage Assessment Request

- Requested through the Regional Administrator
- Can be verbal, but needs to be followed up with a written request before PDAs begin
- Requests need to include:
  - Date(s) and type of event
  - Areas impacted
  - Program(s) and number of teams requested
  - Anticipated dates that assessments will occur
  - Day/Time/Location of Organizational Meeting

FEMA

Request Forms

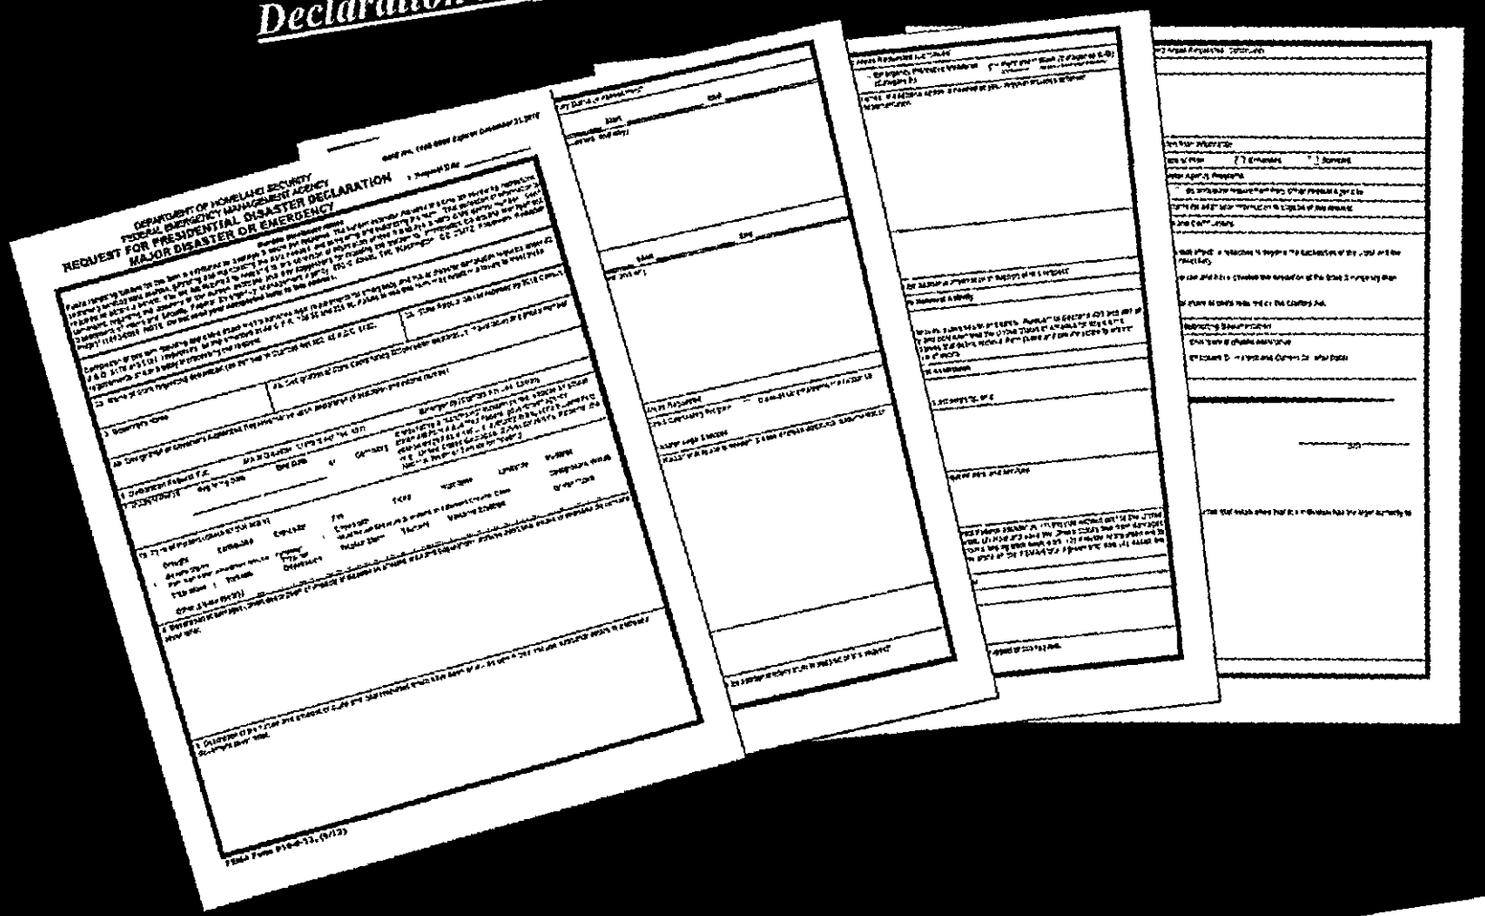
Declaration Request Cover Letter



FEMA

Request Forms

Declaration Request Form (FEMA Form 010-0-13)



FEMA

Request Forms

Declaration Request Cover Letter & Form

- Used for all three types of requests (but not for verbal requests)
- All applicable sections must be completed
- Serve as stand alone documents
  - Accompanies Regional Administrator's Validation and Recommendation to FEMA HQ
- Ensure statutory requirements are met for declaration requests
- Need to ensure most current version is used

FEMA

Request Forms

Common Issues

- Request Cover Sheet
  - Correct Citation (Major vs. Emergency)
  - Incident type and period
  - Deaths & Injuries
  - Voluntary Agency Info (Specifically shelter numbers)
  - Impacts to the area(s) and State responses

FEMA

Request Forms

Common Issues

- Request Form (FEMA Form 010-0-13)
  - Appropriate dates for incident period (**based on NWS**)
  - Incident type(s)
  - Debris Removal
  - DFA
  - Certifications

FEMA

Request Forms

Reminders

- Send in draft copies of the request to Region V for review if desired
- Focus only on requested counties
- Provide justification for any vague or questionable information
- For Public Assistance Declarations
  - Request all counties (if necessary to meet Per Capita)
  - Any counties not requested cannot be counted towards Per Capita

FEMA

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

(Date of Request)

The Honorable //// //////
President of the United States
The White House
Washington, D. C.

Through: Regional Administrator [NAME]
FEMA Region _____
City, State, Zip Code

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § [Major Disaster citation (206.36), Emergency citation (206.35)], I request that you declare a [major disaster or emergency] for the ***(name of the State or Indian tribal government)*** as a result of ***(name type of incident and incident date as identified in the declaration request form)***.

[The following information is required for ALL requests. Provide additional information that is not contained in the form. If requested information is included in the form, it is not necessary to repeat in the cover letter.]

Describe deaths and/or injuries associated with the event.

Describe voluntary agency assistance provided to the community in anticipation of or as a result of the event. (including but not limited to activities taken by the American Red Cross (ARC), Salvation Army, Southern Baptists, and Voluntary Organizations Active in Disaster; voluntary agency and/or municipal shelter information, including the number of shelters open, the peak population, total number of overnight stays, and when the shelters closed; number of mental health contacts made by voluntary agencies; number of ARC cases open and closed; number of clean up kits provided; number of meals served; number of fixed and/or mobile feeding sites; level of ARC operation (I-V); and any other type of assistance that was provided by voluntary organizations).

Indicate whether a State of Emergency has been declared, when and to what areas are included in the declaration. Indicate if affected jurisdictions have also declared states of emergency.

Provide a description of damage as a result of the event (such as the impact the event has had on the affected area and population; disruption of normal community functions and services, including damage to any critical facilities that have been rendered non-operational by the event and extended or widespread loss of power or water; emergency conditions that may be present,

health and safety hazards, status of repairs, and estimated completion date(s), if known.

Provide information on PDA findings and how and where they were conducted, including accessibility concerns, if additional space needed from the form.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this disaster:

Describe what has been done to respond to the disaster, including actions pending or taken by the State, local, or Indian tribal governments. Describe any State, local or Indian tribal government Individual Assistance programs.

Provide the disaster history of the State or Indian Tribal government over the past 12 months, including Stafford Act declarations and declarations by the Governor or Tribal Chief Executive and the extent to which the State or Indian tribal government has expended its own funds; list areas that have sustained damage from this event and other disasters in the previous 12 months; and include any other pertinent factors that would have a bearing on the State or Indian tribal government's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.

[The following information is required for requests for Individual Assistance.]

Provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations. Include a comparison of the percentage of the State, local, or Indian tribal government averages and national averages.

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
National Average	%	$	%	%	
State/Tribe Average	%	$	%	%	
List Jurisdictions Requested	%	$	%	%	

** Indicate source of data cited*

[The following information is required for requests for Public Assistance.]

Provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include in your discussion significant impacts to specific areas. If any local communities have sustained significant damage and

have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita.

Discuss level of insurance coverage.

If applicable, include estimates for emergency dune restoration on non-engineered beaches that may be eligible for the placement of temporary berms in order to eliminate or lesson the threat of additional damage from a five year event. Identify all damage associated with engineered beach projects and indicate whether or not the damage associated with those beaches is included in the PDA information. Note that beach projects under the authority of the United States Army Corps of Engineers, are not eligible for Public Assistance, as they are under the authority of another federal agency, therefore costs associated with such projects should not be included in the PDA information. Such costs should be identified in Enclosure C.

Insert concluding statement.

Sincerely,

///////////
(Governor or Tribal Chief Executive)

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date _____

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36 Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec 401) ☐ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____ or ☐ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must Include Enclosure D Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☐ Other (please specify) _____

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

10. Joint Preliminary Damage Assessment*

☐ Individual Assistance *Dates Performed* **Requested** _____ **Start** _____ **End** _____

Individual Assistance Accessibility Problems (Areas that could not be accessed, and why)

☐ Public Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☐ Individuals and Households Program ☐ *Crisis Counseling Program* ☐ *Disaster Unemployment Assistance*

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

For States, identify Federally-recognized Tribes in the *requested counties (if applicable)*.

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☐ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or *tribal area(s)*). *If additional space is needed or your request includes different categories of work for different jurisdictions, please enclose additional documentation.*

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☐ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 *of the Stafford Act*, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☐ *I request direct Federal assistance for work and services to save lives and protect property, and.*

a. I request the following type(s) of assistance:

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

c. *In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will,* with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work, (2) Hold and save the *United States free from damages* due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☐ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas)

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☐ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date _____ b. Type of Plan ☐ Enhanced ☐ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☐ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☐ I certify the following

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on _____ in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☐ Cover Letter ☐ Enclosure A (Individual Assistance)* ☐ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation _____

_____ _____

Governor's or Tribal Chief Executive's Signature Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive

Not Required for Emergency Declaration Request

Declarations & Requests

Two Types of Disaster Declarations:

1. Emergency (EM)

Any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States. (44 CFR § 206.2(a)(9))

2. Major Disaster

Any natural catastrophe . . . or, regardless of cause, any fire, flood, or explosion in any part of the United States which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby. (44 CFR § 206.2(a)(17))

FEMA

Declarations & Requests

Three Types of Requests:

- Major
- Expedited Major*
- Emergency (EM)

} Standard Request or Verbal

**For those catastrophes of unusual severity and magnitude when field damage assessments are not necessary to determine the requirement for supplemental Federal assistance, the Governor or Acting Governor may send a written request...for a declaration of a major disaster. (44 CFR § 206.36(d))*

FEMA

Request Forms

Preliminary Damage Assessment Request Letter

Example Preliminary Damage Assessment Request

[Date]

John Doe, Regional Administrator
Federal Emergency Management Agency-Region V
536 South Clark Street, 6th Floor
Chicago, IL 60605

Dear Mr. Doe:

Communities in [state] experienced extensive damage as a result of [event] that lasted from [Day, Month, Year] to [Day, Month, Year] Based upon information collected during our local assessments, it is clear that the following counties/tribal governments sustained enough damage to warrant joint FEMA state Preliminary Damage Assessments (PDAs):

[County/Tribe A, B, C, etc]

At this time I am requesting [number of teams and program] to conduct joint FEMA/state PDAs beginning on [date and time]. The PDA organizational meeting will be held at [location and time].

Thank you for your consideration and please let me know if you require additional information.

Respectfully,

Jane Doe
Director

cc: Recovery Division Director
FCO (if applicable)

FEMA

Request Forms

Preliminary Damage Assessment Request

- Requested through the Regional Administrator
- Can be verbal, but needs to be followed up with a written request before PDAs begin
- Requests need to include:
  - Date(s) and type of event
  - Areas impacted
  - Program(s) and number of teams requested
  - Anticipated dates that assessments will occur
  - Day/Time/Location of Organizational Meeting

FEMA

Emergency Declaration Assistance vs. Major Disaster Declaration

Emergency Declaration	Major Disaster Declaration
• Limited to **immediate and short-term assistance**, essential to save lives, protect public health and safety and property	• Declaration may include all programs, Individual Assistance, Public Assistance and Hazard Mitigation; or some of the programs.

• Emergency work
  o Debris removal (Category A)
  o Emergency protective measures (Category B)
• Direct Federal Assistance provided by other Federal agencies with or without reimbursement from FEMA
• Coordination role
• Technical assistance
	• Public Assistance may include all Categories A through G or may be limited to emergency work (Categories A and B)
	• Direct Federal Assistance provided by other Federal agencies with or without reimbursement from FEMA
	• Coordination role
	• Technical assistance

Individual Assistance may include:
• Individuals & Households Program
  o Temporary Housing
  o Repairs
  o Replacement
  o Permanent Housing Construction
  o Medical, dental, funeral expenses
  o Personal property & transportation
• Food Commodities (USDA)
• Direct Federal Assistance provided by other Federal agencies with or without reimbursement from FEMA (not necessary for the delivery of IA and is most often associated with an emergency or major) disaster declaration for Public Assistance
• Small Business Administration low interest loans
• Mass Care and ESF 6 support *see below
	Individual Assistance may include:
	• Individuals & Households Program
	  o Temporary Housing
	  o Repairs
	  o Replacement
	  o Permanent Housing Construction
	  o Medical, dental, funeral expenses
	  o Personal property & transportation
	• Food Commodities (USDA)
	• Direct Federal Assistance provided by other Federal agencies with or without reimbursement from FEMA (not necessary for the delivery of IA and is most often associated with an emergency or major)
	• Crisis Counseling
	• Disaster Unemployment Assistance
	• Food Coupons & Distribution (USDA)
	• Legal Services
	• Small Business Administration low interest loans

• Limited to $5 million • However, if limit is exceeded, the FEMA Administrator must report to the Congress on the nature and extent of continuing emergency assistance requirements	
• Federal share – not less than 75% of the eligible costs for Public Assistance	• Federal share – not less than 75% of the eligible costs for Public Assistance
• Hazard Mitigation Grant Program (HMGP) is not authorized under an EM declaration	• HMGP - Section 404 is usually included in all major disaster declarations.

Mass Care and ESF-6 support in an EM
Under 403, at the State's request, options could include:

Evacuation support at embark and debark - support to tracking and other special needs identification0

Support to State and local sheltering capacity:

- FEMA can augment any type of facility (on a limited scale) or take total management responsibility - Can be managed and/or staffed by State, VOLAG, OFA, FEMA, Contract, or combination
- FEMA can supply shelter supplies through FEMA Logistics (cots, blankets, TP, food, etc)
- FEMA can contract for facilities (State cost share)
- Facilities can include congregate (gyms, arenas, other) or semi-private such as dorms, tent cities, military facilities, or cruise ships
- Health assessment teams can deploy to evaluate special needs requirements

Feeding Operations:

- Contract support to traditional food providers or full operations
- Commodities, consumables, and non-expendable
- USDA can support with commodities - **Not food stamps (Requires IA Major Dec)

Household pets - evacuation and shelter

May 4, 2009

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since April 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would eventually prove to be very challenging to historical central cities—especially Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as Shelley versus Kraemer (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to a dilemma of how to stop such a negative cycle from continuing.

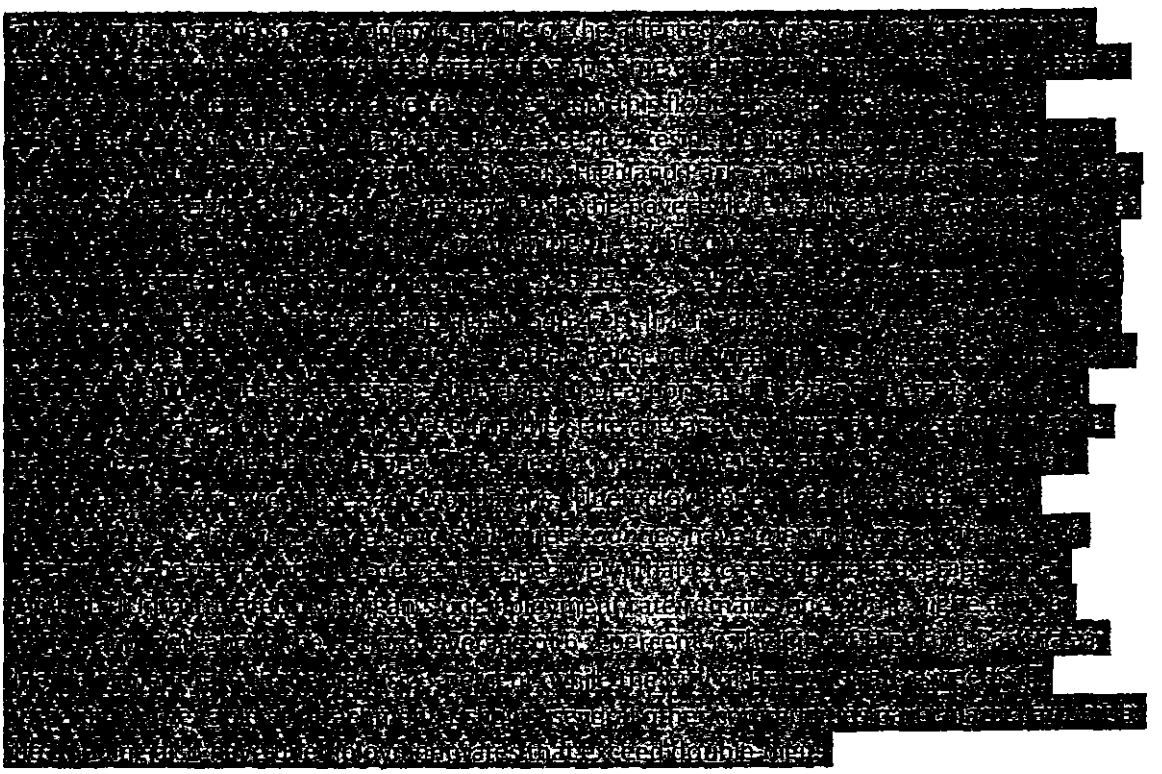
In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,413	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	445,589	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.3%	52.6%	43.4%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an official bankruptcy (declared in 2XXX) appeared to provide one of the clearest means to sort through the many debts and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. A disproportionate number of the city's residents are in poverty. A disproportionate number of the city's residents have disabilities (functional needs).



The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this disaster:

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

ATTACHMENT 2 TO MAJOR DISASTER REQUEST

Significant State and Local Response and Recovery Actions

Search and Rescue. The rapid and severe flash flooding inundated numerous sections of interstate highways, major state highways, and local roadways in the metropolitan Detroit area in the hours immediately after the heavy rainfall on August 11, trapping hundreds of vehicles and motorists in the rising water. Many of these motorists sought refuge on the tops of their vehicles or on nearby high ground and had to be rescued by Michigan State Police officers, *local law enforcement officers, and local fire department personnel.* Michigan State Police resources were particularly valuable to the search and rescue efforts. State Police officers provided direct assistance to stranded motorists, checked the status of abandoned vehicles, and assisted local responders in blocking access to flooded roadways. In addition, divers with the Michigan State Police Underwater Recovery Unit checked more than one hundred submerged vehicles for occupants (fortunately, none were found), and the State Police Aviation Unit conducted aerial fly-overs of the impacted areas to search for additional stranded motorists and to take aerial photographic and video footage of the flood scenes. (Some of those photographs are included at Attachment 3 to provide visual documentation of the scope and magnitude of the flooding.)

Critical Facilities and Infrastructure Restoration. *A number of critical facility and* infrastructure emergency restoration measures were implemented in the affected counties and local communities during the response to the severe flooding. Particularly hard hit were the interstate highways and major state roadways in and around metropolitan Detroit, although roadways in all three counties were heavily impacted by the flooding. Many sections of the affected highways in and around metropolitan Detroit (including interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39) were inundated with flood water, trapping vehicles and motorists who could not make their way through the rapidly-deepening water. This forced the closure of these roadway sections – in some cases for several days – so that crews from the Michigan Department of Transportation, Michigan State Police, and county and local road and law enforcement agencies could oversee the removal of stranded (and generally inoperable) vehicles; assess the physical damage to and conduct safety checks of road, bridge, and related infrastructure; and initiate appropriate facility repair and restoration measures so that the closed sections of roadway could be safely reopened to the motoring public. (Refer to the road closure map found at Attachment 3.)

Repair and restoration measures included but were not limited to: conducting safety checks of and making temporary or permanent repairs to damaged structures; removing water, mud and debris from the roadway, bridges, and rights-of-way; stabilizing banks to prevent further debris flows and physical degradation; repairing signage and electronic signals, where required; repairing pumping equipment and associated facilities to ensure they are operational; and testing the repaired facilities to ensure they will allow for safe travel. In most cases, the dedicated work crews were able to reopen the damaged highway and roadway facilities within 36-48 hours. However, some of the damaged sections of roadway and bridge infrastructure will

require more extensive permanent repairs which will take several weeks to several months to complete once funding is available to finance the repairs.

Uninsured damage to other local public facilities and infrastructure was significant. For example, in the City of Warren in Macomb County, the Police Department and Fire Department incurred nearly $2.8 million in uninsured damage to their police and fire vehicles and associated equipment. This includes 10 fully-equipped Fire Department vehicles and six fully-equipped Police Department vehicles requiring replacement, and another seven fire vehicles and nine police vehicles requiring major repairs. The City of Sterling Heights, also in Macomb County, had nearly $620,000 in insured public utility damage, while in St. Clair Shores, uninsured damage to public buildings and associated equipment totaled $225,000. In the City of Royal Oak in Oakland County, uninsured damage to a local high school and middle school totaled $210,000. Uninsured damage to St. John Providence Hospital in the City of Southfield in Oakland County was $200,000. Uninsured damage to Oakwood Hospital in the City of Dearborn in Wayne County exceeded $1.8 million, while in the City of Highland Park, also in Wayne County, uninsured damage to public utilities, city hall, and the community recreation center totaled in excess of $450,000. In the City of Detroit in Wayne County, uninsured damage to public buildings and equipment was over $930,000, with the majority of that total coming from damage to Police Department facilities. These are just a few instructive examples from the nearly $16.8 million in public damage that occurred in Michigan. Although temporary repair and restoration measures have been put in place in most instances to bring the damaged facilities and infrastructure in the three counties to basic operational status, almost all will still require extensive permanent repairs and restoration to bring them back to their pre-flood condition. That will not occur in a timely or comprehensive manner without federal disaster relief assistance.

Emergency Sheltering and Mass Care. Although the rapid (and unanticipated), heavy rainfall did not allow for preventive evacuations of the public in impacted areas, emergency sheltering and mass care services were required in several instances. For example, on August 11, over 400 stranded motorists had to be temporarily sheltered for the evening in the City of Warren because roadway flooding prohibited further travel and resulted in many areas being inaccessible by vehicle. (Many of these individual's vehicles were deeply submerged in flood water and would not have been able to travel anyway because of the damage to their vehicle.) Along M-10 in Wayne County, approximately 50 motorists were stranded for an extended period from the evening of August 11 through August 13 due to the deep flood water in the walled-in, lower sections of the highway. During this time, the American Red Cross provided these stranded individuals with food, water, and comfort kits until the roadway could be de-watered and reopened for travel. For six days after the flooding occurred, a small number of displaced flood survivors were sheltered and cared for at an American Red Cross shelter in Garden City in Wayne County because their homes were inaccessible and/or incurred sufficient damage to render them unsafe for occupancy. Lastly, the American Red Cross also provided cots and comfort kits to nearly two-dozen displaced residents at two apartment complexes in the cities of Detroit (Wayne County) and Troy (Oakland County) so that the residents could use other (unaffected) vacant units within the respective complexes for shelter, rather than having to be moved elsewhere to a temporary shelter facility.

I must note that these emergency sheltering and mass care figures are somewhat misleading, as we received reports that many more flood survivors were temporarily displaced because of flood damage and/or inaccessibility but sought shelter with nearby family, friends, or in unaffected area hotels and motels. As it is next to impossible to track these "unofficial" evacuations with any accuracy, it is safe to say that the number of temporarily displaced flood survivors is much higher than reported through official channels.

The American Red Cross generally led the organized emergency sheltering and mass care effort, supported by the Michigan Department of Human Services, the Salvation Army, and other community-based relief organizations.

Flood Recovery for Individuals and Families. To assist affected flood survivors in recovering from this devastating disaster, the American Red Cross teamed with the Michigan Department of Human Services, Michigan 2-1-1, the Michigan Community Service Commission, and other community-based relief organizations to establish and operate "Multi-Agency Resource Centers" (MARCs) in 10 different locations over a six-day period in the latter-half of August. (A corresponding map found at Attachment 3 shows the initial locations of these MARCs.) The Multi-Agency Resource Centers, which were visited by several thousand flood survivors, provided a location and means to disseminate information regarding flood recovery and available flood recovery assistance. Through these centers, flood survivors could connect with or be referred to agencies and organizations that could assist them in their recovery – addressing everything from filing insurance claims, to replacing food and clothing, to making repairs to damaged homes. In addition, the Multi-Agency Resource Centers also provided a clearinghouse for the distribution of flood clean-up kits, personal comfort kits, and other recovery supplies to those requiring such items. To date, over 300 referrals for behavioral health assistance have been made through the centers and other involved agencies.

In addition to the Multi-Agency Resource Centers, flood survivors also have the opportunity to request flood recovery information and/or assistance via the Internet or Michigan 2-1-1 telephone system. These options were widely disseminated to the public and the media in various information releases. For the internet options, affected individuals could register directly with the Recovery Coordination Center (discussed in "Management of Emergency Volunteers" below) operated by Michigan Voluntary Organizations Active in Disasters, at www.bit.ly/floodcleanupsemi, or they could register via a specially-designated web page (www.michigan.gov/miflood) at the Michigan State Police Emergency Management and Homeland Security web site, which provides a link to the Recovery Coordination Center registration form. Either option results in a referral for recovery assistance to one of the Michigan Voluntary Organizations Active in Disasters member organizations providing assistance through the Recovery Coordination Center.

(I must note that, although the Multi-Agency Resource Centers, Michigan 2-1-1, and the aforementioned web sites have been tremendously successful to date in identifying and addressing both short- and longer-term recovery needs of the affected flood survivors in this disaster, it is clear that even these collective efforts are not going to be sufficient to identify and address all of the unmet needs of the thousands of flood survivors. This is particularly true with regard to home rebuilding and restoration efforts to ensure safe re-occupancy of damaged

structures. Because over 80-percent of the affected households in the three-county area did not have insurance in place to address the damage incurred in this flash flood, it is very likely that many will be forced to occupy their homes with potentially dangerous and/or unhealthy conditions present due to damaged electrical and mechanical systems and/or the presence of black mold or other contaminants on building materials not properly dried out and restored. Simply put, the long-term unmet needs of the flood survivors far outstrip the combined resources of the involved voluntary organizations, volunteers, and existing human service programs to remedy those needs. Clearly, federal disaster relief assistance is required to enable these flood survivors to fully recover from this devastating flood and allow them to make their dwellings safe and sanitary for re-occupancy.)

Without significant relief assistance from the federal government, these individuals will not have the resources necessary to fully repair and restore their damaged homes and mechanical systems, ensure their homes are free of mold and other health hazards, and replace damaged essential household items such as appliances, clothing, food, medications, and furniture and bedding. Without federal relief assistance, it is an almost certainty that many individuals will continue to struggle to recover and be forced to live in unhealthy conditions due to mold, contact with contaminated materials, and substandard (and likely unsafe) mechanical systems that they could not afford to have properly repaired by licensed professionals.

Management of Emergency Volunteers. To date, hundreds of emergency volunteers have been mobilized through the collective efforts of the American Red Cross, Michigan Voluntary Organizations Active in Disasters, Michigan Community Service Commission, Michigan Department of Human Services, local and state emergency management offices, and community-based organizations, to assist in the recovery from this flood disaster. In fact, volunteers have been and continue to be the lifeblood of the flood recovery effort. The aforementioned agencies and organizations have done a tremendous job in managing these volunteer resources and ensuring their timely and effective use. As I previously indicated, several Multi-Agency Resource Centers have been established and successfully operated in the affected counties to allow for the distribution of clean-up and personal comfort kits, and to facilitate the connection of those in need with the agencies and organizations that can provide recovery and relief information and/or assistance.

Central to the disaster volunteer management effort has been the establishment of a Recovery Coordination Center (RCC) to provide a means to coordinate the efforts of organizations that provide volunteer assistance to flood survivors needing help in repairing and restoring their home. The majority of the volunteers providing assistance are working under the framework of Michigan Voluntary Organizations Active in Disasters, and in coordination with state and local emergency management agencies, Michigan 2-1-1, the American Red Cross, the Michigan Department of Human Services, and other community-based organizations. The Recovery Coordination Center helps identify flood survivors requiring recovery assistance and determines the nature and scope of their recovery needs. The center provides ongoing case management for individual recovery and rebuilding/restoration efforts, ensuring that no one "falls through the cracks" and does not receive the assistance they need. Affected individuals are identified and referred to the Recovery Coordination Center by Michigan 2-1-1, local and state emergency management offices, Michigan Department of Human Services county offices,

the Michigan Community Service Commission, churches and other faith-based organizations, or by involved volunteers themselves. Once a flood victim is registered with the Recovery Coordination Center, their recovery needs are referred to the appropriate agency or volunteer organization for follow-up action. Through the center, voluntary organizations can also track their recovery efforts, thus ensuring an accurate accounting of the volunteer hours spent with each flood victim. Currently, over 4,000 homeowners have requested clean-up and restoration assistance through the Recovery Coordination Center. To date, over 250 homes have been completed using volunteers coordinated through the center.

However, as I indicated earlier, even with these outstanding volunteer efforts in place the collective capabilities of volunteers can only go so far in meeting the more difficult long-term recovery needs aimed at ensuring safe and sanitary conditions in flood-damaged homes. Because of the lack of adequate insurance (less than one in five households was adequately insured) to help pay for potentially-expensive repair and restoration activities required to make home structural elements and mechanical systems safe and functional, and to fully-remove the presence of black mold and other contaminants in flood-damaged building materials, it is essential that federal disaster relief assistance be provided. Absent this assistance, affected flood survivors will, in many cases, be forced to live in potentially-dangerous and/or unsanitary conditions because they do not have the financial resources necessary to fully restore their dwellings to pre-flood condition in a timely manner – or at all.

Debris Removal to Protect Public Health and Safety. Debris management was a critically important recovery issue in the days and weeks immediately following this flood disaster. Throughout the affected counties and communities, extensive and rapid debris operations were required to clear and remove flood-damaged building materials and personal property from curbsides and roadway rights-of-way in residential and commercial areas in order to protect public health and safety and enable the continuing use of adjacent roadways, sidewalks, and fire hydrants. The wet, heavy, contaminated flood debris from tens-of-thousands of flood-damaged homes and businesses, coupled with the hot and humid weather conditions that occurred in the days that immediately followed the flood disaster, set the stage for potentially-dangerous and unsanitary conditions in these densely-populated and heavily-developed urban areas. Because of the very real potential for a public health emergency, it was necessary for the affected local communities to muster all of the private and public debris clearance and removal resources they could to ensure rapid and environmentally-compliant removal and disposal of this debris.

In that regard, the affected local jurisdictions did an exemplary job in rapidly managing this difficult and potentially life-threatening recovery issue. With the assistance of various state agencies working out of the State Emergency Operations Center, the local jurisdictions were able to identify sufficient resources to address their debris removal and disposal needs in a rapid and environmentally-compliant manner. All of the affected local communities effectively worked with the Michigan Department of Environmental Quality to obtain required emergency waivers for temporary debris storage and transfer centers, and for emergency transportation of flood debris to approved landfill facilities. These debris removal efforts, however, came at a collective $7 million cost to the affected local jurisdictions in the three counties – a cost which

these jurisdictions are not in a position to bear without significant cuts to other essential programs and services.

Emergency Public Information. During the first hours and days after the flash flooding occurred, the affected local jurisdictions and several Michigan state agencies undertook a comprehensive emergency public information campaign to warn residents of the health and safety risks posed by the flooding and flood-related damage, and to provide updates on recovery issues and concerns. Of particular concern initially were the health and safety risks associated with structural damage, damaged electrical and mechanical systems, and contaminated flood debris. Later, the public information focus shifted to address longer-term recovery issues such as use of licensed and reputable contractors, price-gouging, scam avoidance, and home restoration best practices. This public information campaign continues today, in both English and appropriate non-English languages, and will so for the foreseeable future until all recovery-related issues and concerns have been effectively dealt with. All appropriate media sources have been utilized in this campaign, including television, radio, print media, and web and social media sites. Although there were two incident-related deaths in the early days after the flooding, since that time this campaign has been largely successful in minimizing flood-related injuries and health and safety problems.

The Michigan United Way 2-1-1 telephone referral system has been a tremendously successful means of disseminating important recovery-related information and making referrals to agencies and organizations that can provide recovery assistance. To date, Michigan 2-1-1 has fielded nearly 10,000 calls from individuals seeking flood recovery information and/or referrals. Michigan 2-1-1 has been instrumental in connecting individuals in need with the appropriate resources to enable them to recover from this flood disaster. Despite its success, Michigan 2-1-1 also had one potential downside, that is, the large number of "abandoned" calls from callers that chose to hang up rather than utilize the call-back option when lines were busy. Telephone logs show that over 3,100 calls were abandoned between mid-August and the first week of September. This is disturbing to me because there is no way to track with certainty whether or not these individuals actually did receive the information and/or assistance they were seeking when they initially called Michigan 2-1-1. My hope is that they did, but I suspect a portion of these callers simply gave up and did not further seek recovery information and/or assistance.

(I must note that my concerns in this regard are not necessarily limited to Michigan 2-1-1. Reports received from state and local staff that participated in the Preliminary Damage Assessment indicate that a potentially large number of affected individuals may not have sought assistance due to a number of reasons, including but not limited to: a general distrust of or frustration with government; language and/or cultural barriers; technology barriers, i.e., do not regularly monitor media reports, the internet, or social media; or a lack of understanding regarding available resources and the means for accessing those resources. If federal disaster relief assistance is granted based on this request, we may find many additional individuals that may seek to apply for federal assistance – over and above those estimates developed in the Preliminary Damage Assessment.)

State Response and Recovery Assistance Efforts. Michigan's state departments and agencies and nongovernmental partner organizations have provided whatever appropriate resources they had at their avail to assist the affected counties and local jurisdictions in responding to and recovering from this flood disaster. Although the following is by no means an all-inclusive accounting of all response and recovery efforts, it does provide brief synopses of some of the more noteworthy efforts:

The **Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD)** began to monitor the incident in the early evening of August 11, after reports of flash flooding were first received from the affected local emergency management officials and the National Weather Service. Immediate communications were established with the local emergency management officials to assess the nature, scope, and magnitude of the incident and to help coordinate the provision of state resources as needed. This monitoring continued through the evening hours of August 11. When reports from the affected local jurisdictions and the Michigan Department of Transportation indicated that metropolitan Detroit interstate highways and major roadways had suffered major flooding, the MSP/EMHSD notified key staff to report to the State Emergency Operations Center (SEOC). The SEOC was in partial activation status for several hours, and then went to full activation status at 10:00 AM on August 12. Numerous departments, agencies, and nongovernmental partners responded and reported to the SEOC for duty.

The MSP/EMHSD coordinated SEOC operations at full activation status for the next 14 days, operating 24 hours a day, 7 days a week, on 12-hour shifts. On August 25, the overnight shift was terminated and the operational hours were changed to 8:00 AM till 8:00 PM. The SEOC remained on that schedule for two days, until August 27, when the hours were changed to 8:00 AM till 5:00 PM to more closely align with the Preliminary Damage Assessment operations ongoing in the three-county impact area. On September 8, the SEOC went to a weekly operational period.

Throughout the SEOC activation, the MSP/EMHSD staffed command, operations, logistics, planning, public information, mapping and technical support positions to keep the SEOC functioning at full capability and to fully support the state department/agency and nongovernmental partner representatives present in the facility. During this period, the MSP/EMHSD coordinated all resource requests received from the affected local jurisdictions, ensuring that each request was appropriately addressed in a timely manner. The MSP/EMHSD also coordinated the collection, compilation, review, analysis, synthesis, and reporting of damage and impact assessment information received from the affected jurisdictions and state departments/agencies. The MSP/EMHSD also conducted several briefings daily for local officials, state departments/agencies and nongovernmental partners, and other interested parties, to keep all stakeholders apprised of ongoing or planned activities and areas of concern. Daily incident management plans were developed by SEOC command staff to focus SEOC activities on planned incident management objectives and to ensure that state resources were being appropriately utilized to address the most pressing issues during the operational period. In addition, the MSP/EMHSD developed numerous daily written situation status reports and public information releases to keep SEOC staff, state government executive and legislative

leadership, local officials, our emergency management partners, and the public informed of ongoing issues, concerns, activities, and opportunities for coordination and/or involvement.

From August 25 to September 9, the MSP/EMHSD worked closely with Federal Emergency Management Agency officials to coordinate and conduct Preliminary Damage Assessments for both Individual Assistance and Public Assistance in the three-county impact area. The MSP/EMHSD was instrumental in the set-up of and conduct of the Preliminary Damage Assessment, handling all administrative and logistical aspects of the operation from the SEOC and an on-site coordination center established at the Double Tree Inn in Dearborn. Lastly, using the assessment information and findings from the Preliminary Damage Assessment, the MSP/EMHSD provided considerable technical assistance to me and my staff in the drafting of this request letter and in compiling the supporting information found in the various Attachments and Enclosures.

In addition to the MSP/EMHSD contributions, the **Michigan State Police (MSP)** also deployed considerable resources during the flood response to assist local officials in controlling access to flooded areas, conducting underwater search and rescue in flooded areas, and assisting with security and traffic control as required. Early in the response, the MSP Aviation Unit also flew aerial reconnaissance and assessment missions over the affected areas to search for additional stranded motorists on flooded highways, to aid local and state officials in determining the scope and magnitude of the flooding, and to take aerial photographs and video footage of flooded areas for damage and impact assessment purposes. (Some of those photographs appear in this letter at Attachment 3.) The MSP Special Operations Division also assisted at the SEOC, and the Michigan Intelligence Operations Center (MIOC) continuously monitored the flooding conditions and sent out situational awareness bulletins on the weather and flooding to all stakeholder partners through the duration of the response and recovery.

The **Michigan Department of Agriculture and Rural Development (MDARD)** made available flood clean-up (to include sewage) guidance to affected food establishments in the three-county impact area. This guidance was provided in English, Spanish, Arabic, and Mandarin languages. In addition, the MDARD and the U.S. Food and Drug Administration (FDA) Detroit District Office coordinated with various food industry associations in Michigan to assess the impact of the flooding on the food and agriculture sector and to determine appropriate follow-up measures necessary to protect public health. (Providing the clean-up guidance to food establishments was one of the necessary measures.) During this outreach process, the MDARD focused on food warehouses and retail establishments while the FDA focused on food processors and other regulated firms (e.g., drug, biologics, medical devices, etc.) within the local jurisdictions most heavily impacted by the flooding. (Those jurisdictions included but were not limited to: Warren, St. Clair Shores, and Clinton Township in Macomb County; Madison Heights, Ferndale, and Royal Oak in Oakland County; and Dearborn, Dearborn Heights, and Detroit in Wayne County.) In addition, the MDARD also reached out to the affected health departments (county and City of Detroit) who license and inspect restaurants, and with major grocery store chains and trade associations. MDARD personnel also inspected a number of gasoline stations in the affected area to determine if any had issues with flood water in their gasoline storage

tanks. (One did, but the issue was satisfactorily resolved by the state inspectors.)

The **Michigan Department of Community Health (MDCH)** coordinated with affected local health departments regarding the provision of disaster behavioral health resources; monitored and coordinated with local hospitals and the Region 2 Health Care Coalition regarding flood-related damage and the resultant impacts on hospital operations; and worked closely with the SEOC Public Information Officer to disseminate appropriate and timely health-related information to flood survivors.

The **Michigan Department of Environmental Quality (MDEQ)** coordinated extensively with local officials involved in debris management operations to ensure compliance with federal and state environmental laws and regulations; issued timely emergency approvals of sites designated for use as temporary debris storage and transfer sites; issued other emergency authorizations and waivers where appropriate; provided technical assistance to local officials and private debris management firms regarding issues pertaining to the collection, storage, transport, and disposal of flood-related debris; assisted in the identification of supplemental debris management resources for local officials in need of such resources; and monitored flood-related impacts on local drinking water treatment plants and operations in the affected area.

The **Michigan Department of Human Services (MDHS)** coordinated with involved voluntary relief organizations, community-based organizations, MDHS County Offices and the Michigan Community Service Commission, Michigan 2-1-1, and other human service providers to identify, assess, and attempt to meet the recovery needs of flood survivors. The MDHS undertook a number of activities during the response and recovery phases of this disaster to meet this broad mission, including but not limited to: coordinating with the American Red Cross, Michigan Voluntary Organizations Active in Disasters, and other voluntary relief organizations to establish and operate two temporary emergency shelters, 10 Multi-Agency Resource Centers, and a Recovery Coordination Center; coordinating the distribution of thousands of clean-up and personal comfort kits; coordinating with the SEOC Public Information Officer and other public information officials regarding the dissemination of appropriate and timely recovery information using all available means (e.g., Michigan 2-1-1, web and social media sites, television, radio, etc.); registering eligible flood survivors for the limited MDHS emergency relief assistance available; coordinating the receipt and use of donated goods for the recovery effort; resolving debris management issues for volunteers providing clean-up and/or repair assistance through the Recovery Coordination Center; assisting with volunteer recruitment through the Michigan Community Service Commission and other means; procuring needed supplies for volunteer repair/clean-up teams; and addressing recovery-related issues for various functional needs populations affected by the flooding.

The **Michigan Department of Licensing and Regulatory Affairs (MDLARA)** monitored incident-related energy disruptions and energy supply issues related to the storms and flooding; monitored the operations of regulated health care facilities affected by the flooding; provided (through the Michigan Occupational Safety and Health Administration – MIOSHA) worker safety information to emergency responders and workers, as appropriate; and provided (through the

Bureau of Construction Codes) information to citizens in the City of Highland Park and other communities on mandated building, mechanical, electrical and plumbing inspections.

The **Michigan Department of Technology, Management and Budget (MDTMB)** monitored the impacts of the flooding on state owned and operated facilities and state government operations in the three-county area; assisted in obtaining needed resources for emergency operations and/or flood recovery through standing vendor contracts and/or the state's emergency procurement process; identified and procured office space and coordinated information technology installation for needed emergency facilities; and assisted in transporting recovery supplies to Multi-Agency Resource Centers and other distribution facilities.

The **Michigan Department of Transportation (MDOT)**, assisted by local public works and law enforcement personnel and the Michigan State Police, managed the closure of several sections of interstate and state highways in and around metropolitan Detroit that were inundated by flood water. This included several sections interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39. The MDOT also monitored and reported on closures of local roads and bridges by local officials; reported on the scope and magnitude of road and bridge damage in the affected counties; coordinated with the Federal Highway Administration (FHWA) regarding implementation of its Emergency Relief Program; and participated in the Public Assistance Preliminary Damage Assessment for road and bridge damage.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK.

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date _____

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206 35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of *Indian tribal government's damaged* area(s).
3. Governor's or Tribal Chief Executive's Name	4 Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec 401) ☐ Emergency (Stafford Act Sec. 501(a))

7. Incident Period Beginning Date _____ End Date _____ or ☐ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☐ Other (please specify) _____

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

10. Joint Preliminary Damage Assessment*

☐ Individual Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Individual Assistance Accessibility Problems (Areas that could not be accessed, and why)

☐ Public Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☐ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

For States, identify Federally-recognized Tribes in the requested counties (if applicable).

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☐ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☐ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☐ I request direct Federal assistance for work and services to save lives and protect property, and

a. I request the following type(s) of assistance.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☐ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☐ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date _____ b. Type of Plan ☐ Enhanced ☐ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☐ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☐ I certify the following:

a. I have determined that this incident is of such seventy and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on _____ in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☐ Cover Letter ☐ Enclosure A (Individual Assistance)* ☐ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation _____

_____ _____

Governor's or Tribal Chief Executive's Signature Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

Not Required for Emergency Declaration Request

Good afternoon, Pam.
Per our conversation, I was in attendance at the SEOC from 11:03a to 3:45p. With the recent transition of these responsibilities at MTED, I have not been trained on/logged in to the SIMs system to date. Therefore, this message contains the report from Michigan Department of Talent and Economic Development (MTED), due by 4:30p:

MSHDA

1. Allowable: Pay for the costs of water quality analysis of all MSHDA backed mortgages in Flint.
2. Allowable: Pay for the replacement of water lines owned by residents with MSHDA mortgages within the city that need to be replaced or lines to homes with MSHDA backed mortgages or incomes less than 50% AMI.
3. Allowable: Pay for a percentage of the reconnection fee to acquire water from Detroit up to an amount not to exceed the % of MSHDA financed homes or low income households in the city (50% AMI).
4. Allowable: Pay for the replacing the city's municipal water line infrastructure associated with water lines being replaced to homes in the city with MSHDA backed mortgages or those household at or below 50% AMI.
5. Allowable: Pay for a percentage of any new infrastructure costs associated with the build out of a new water supply system so long as the amount doesn't exceed the % of MSHDA financed homes or low-income households in the city (50% AMI).
6. Allowable: Purchase of water for low income households (50% AMI).
7. Allowable: Purchase of water filters for any low income households (50% AMI).
8. Allowable: public awareness through HDF grants

The grants staff team is already drafting the necessary background materials for a potential grant application request. We would just need to know the recipient of the grant and purpose (allowable uses).

We are exploring CDBG grant funds or other assistance from HUD.

MSF/MEDC

MSF/MEDC had offered low interest loans as part of the deep freeze crisis. While this would require legislative action to authorize, it is something that could be considered in this scenario. It would require re-purposing any remaining funds.

Please let me know if there is additional information required. I am receiving the SEOC emails/voicemails.
As a side note, Melanie Brown has been temporarily reassigned to DEQ during the Flint Water Crisis. Jeremy Hendges will be acting as PIO for TED (cc'd on this message).

Thank you for your assistance, Pam.

Best regards,

Subject: RE: Draft Recovery Objective/Tasks

A few edits

From: MSP-SEOC5
Sent: Friday, January 08, 2016 10:21 AM
To: MSP-SEOCOPSC
Cc: Pepper, Joel (MSP)
Subject: Draft Recovery Objective/Tasks

Here is what I see and who should be assigned based on the information we have discussed in the last couple days and what should be accomplished over the coming week. Let me know if you have any questions, concerns or additions to the list. I'm sure something is missing, so please don't be afraid to change things.

Thanks,
Bri

Draft Objective

- Establish teams and process for distribution and collection of water sampling kits; distribution of water filters, replacement cartridges and information.

Tasks

- Establish teams to be comprised of at least 2 volunteers and 1 plain clothes officer for deployment early next week (DHHS/MSP).
- Create door hanger with information on filters, water distribution, blood lead level testing, and water sampling (JIC).
- Print door hanger for distribution (DTMB).
- Obtain list of affected homes/businesses with names and addresses from the local equalization department (RBD).
- Establish protocol and language for teams in the field, to include safety concerns and protocol (RBD).
- Create a database with the information obtained from the local equalization department to track who receives filters, sampling kit and/or door hanger (RBD).
- Update GIS data daily with the distribution of filters, sampling kits, and/or door hanger information (RBD/GIS).

Recovery Branch:

Paul and Linda sat down and put together two things for me: one is a list of IDEAS of ways in which they and other voluntary organizations might be able to provide assistance going forward. These are ideas, so any that seem needful would need additional discussion/researching. The other is a list of local agencies in Genesee County that have been contributing so far. There is going to be a meeting next week of voluntary organizations for coordinating activities. The Genesee EOC is aware of this meeting.

Subject: damage assessment

Henrik,

Here are some items to consider for the Damage Assessment. I'm also copying Brianna and Joel. Brianna for her role as Recovery Branch Leader/Director and Joel as our very own damage assessment SME:

The form in MICIMS is geared really toward physical damages. This is not going to be adequate for this emergency as the impacts are so broad. We recommend not using the DA forms in MI CIMS.
A more informative way to look at this will be "impact assessment" as the impacts themselves are extensive and often not easily quantifiable.
As you said, you felt that the county has a good handle on infrastructure impacts. Here are some ideas on other impacts:

Look at EACH federal ESF which could be impacted and identify ways in which the county (Flint's water also serves three townships I understand) is impacted in each of those ESFs. Even such things as "lack of awareness" under external affairs, etc.

Pull in all the SMEs you need to conduct the impact survey: county health, county equalization; WIC; human services, education, water department; community and economic development, etc. You need all the local SMEs contributing.

Identify the life, health and safety impacts.
How many elevated blood lead level (EBL) cases are reported?
What is the at risk population in the affected area?
How many have been tested; how many have EBLs out of the at risk populations?
How many people are served by WIC or other human services programs in the impacted area?
How many water hookups are there by type? Residential, restaurants, industrial, businesses, hospitals (how many beds), schools (how many students?), non-profits, childcare/preschools, etc.
How many filters have been distributed? And how many households do not yet have them (as far as we know)?
Coordinate with GIS; they have been working on many of these questions and may be able to provide answers and/or contacts.

Measure magnitude/impact/footprint, not dollars (unless dollars are easily and readily identifiable).

Again, the MI CIMS board is not really set up for this, so create your own reports/spreadsheets. The Recovery Branch and Joel can help with suggestions if needed.

Do your best to discover unmet needs that may exist. They would fall in many categories: how many elderly or functional needs need filters/installation?

I know this is sort of a laundry list, but hopefully it helps. Joel, any thoughts/changes?

Again, get the SMEs involved, especially county health and human services. They'll have assessments of impacts.

Let me know if there's anything else we can help with at the moment.

V/R,
Tom

From: Mona Hanna-Attisha [mailto:MHanna1@hurleymc.com]

Subject: Update from Hurley Flint Research Group

Please do not publicly share the below information and attached map. It is only meant as a FYI for resource prioritization.

Last Friday afternoon, we finally did receive the raw blood lead level data from MDHHS. We geocoded the data to focus on the Flint city limits and analyzed it identically to our first study with Hurley-processed labs. As the state mentioned at their press conference, the results are consistent with our initial findings. Our team did share our geocoded results with MDHSS Dr Wells and her team yesterday.

Some details:
No CHANGE in the Elevated Blood Lead Level % **outside of Flint**
Pre-Switch EBL% (n=2970) 2.2%
Post-Switch EBL% (n=2142) 2.3%

Focus on high risk **ZIP CODES** (48502-48504) where the highest water lead levels were seen
Pre-Switch EBL% (n=584) 5.2%
Post-Switch EBL% (n=427) 9.2%

Focus on high risk **WARDS** (5, 6, 7) where the highest water lead levels were seen
Pre-Switch EBL% (n=408) 6.6%
Post-Switch EBL% (n=291) 9.6%

Take home message: The focus on resource delivery should continue to be ALL flint, and if possible a focus on Zip 48503 and 48504 and wards 5, 6, 7. A downside to using zips and/or wards is that is misses another cluster seen at the merger of wards 3, 4, 5 and zips 05 and 06. See attached map.

Lastly, the geocoded Hurley results were more pronounced, but in the exact same hot spots. We think the Hurley data captured a greater % of post-switch EBL kids because of the population that Hurley serves - more underserved and thus less able to afford water alternatives (when others may have already switched). And once again, blood data underestimates risk because we do not screen lead for infants which are most at risk.

We look forward to overlaying the GIS Lead Service Line map on this data once that is digitized. If anyone would like further info regarding the above, please do not hesitate to contact me.

Subject: IAP objectives and command emphases

Draft objectives, please edit as needed and respond by 12:30

I've compiled them all here. Feel free to address/edit any, but of course you only need to be concerned about those specific to your area of responsibility.

Objectives

Activate the State Recovery Task Force
Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
Obtain and maintain situational awareness and common operating picture of all activities.
Establish operational period and hours of operations.
Investigate and identify available programs, including the federal Lead Pipe Replacement Program.
Develop a comprehensive GIS strategy
Identify critical resources for acquisition and allocation.
Coordinate response and recovery activities and identify mission areas with MIVOAD.
Facilitate and coordinate technical assistance among state agencies and to local agencies.
Provide technical assistance and facilitate the local Damage Assessment.
Establish a Joint Information Center and identify a public information strategy.
Monitor MI CIMS for resource requests and address as appropriate.
Establish and disseminate cost center information for the incident.

Command Emphasis

Provide regular technical briefings
Identify life safety issues.
Identify priorities.
Provide policy direction by observance of SEOC SOPs.
Coordinate with FEMA.
Provide regular legislative/congressional briefings.

Thanks in advance!!

Planning Group Chief, State Emergency Operations Center
Michigan State Police/Emergency Management and Homeland Security

To: MSP-EMHSD-Division
Subject: URGENT - SEOC Activation

On January 4, 2016, Genesee County requested that a "State of Emergency/Disaster" be issued by Governor Snyder. Today, the Governor issued a State of Emergency declaration. EMHSD will **activate the SEOC tomorrow at 0800** and will conduct a briefing at 0900 on the event. All state agencies will be represented. I ask that only those personnel requested to play SEOC roles and section managers attend the 0900 briefing due to space constraints. The initial focus of the SEOC will be to:

- Identify and implement any needed protective actions to protect public health and safety;
- Develop situational awareness;
- Develop understanding of technical aspects;
- Coordinate damage assessment;
- Coordinate public information; and
- Identify programs to assist in remediating damage.

If you have any questions, please let me know.

Joel/Zach,

Cap would like this by ... well, the Governor's office wants it by 3, so if you could get it to me in the next half hour or so, that would be great.

Just give it a review. Zach, if you could look for any specificity on dates, that would help.

Subject: Damage Assessment Process

Importance: High

Lt. Roach,
As a follow-up to our conversation earlier today regarding the damage assessment process, I would like to offer the following ideas for consideration when gathering data to support damage assessment.

1. Since damage to infrastructure is being considered, the city needs to provide the supporting ordinance(s) that identify who owns what portion of the infrastructure (private property owners versus the city).
2. The data must be segregated by ownership (private property owners versus the city). I would recommend separate spreadsheets for each category.
3. The damage must be defined and quantifiable. The amount, type and cost for the infrastructure and the cost to replace/repair the infrastructure must be included. For example, it will take 35 feet of 2 inch plastic pipe at a cost of $X.XX per foot to replace the service line to the residence; and a cost of $X.XX per foot to remove and replace 35 feet of service line to the residence.
4. In addition to the key positions staffed in the EOC, it is critically important to have all subject matter experts involved in the collection and analysis of the data to make sure that all relevant information is used in the damage assessment process. For instance, how will we you ascertain which infrastructure is affected? How will the determination be made to ascertain whether the infrastructure can be repaired or must it be replaced?
5. Someone at the EOC needs to be identified as the point of contact for the damage assessment process, for both the county and the state.

Let me know if you any additional questions.

Tom-following is what Lt. Roach and I discussed in our brief conversation this afternoon. Let me know what you think.

Lt. Roach,
As a follow-up to our conversation earlier today regarding the damage assessment process, I would like to offer the following ideas for consideration when gathering data to support damage assessment.

1. Since damage to infrastructure is being considered, the city needs to provide the supporting ordinance(s) that identify who owns what portion of the infrastructure (private property owners versus the city).
2. The data must be segregated by ownership (private property owners versus the city). I would recommend separate spreadsheets for each category.
3. The damage must be defined and quantifiable. The amount, type and cost for the infrastructure and the cost to replace/repair the infrastructure must be included. For example, it will take 35 feet of 2 inch plastic pipe at a cost of $X.XX per foot to replace the service line to the residence; and a cost of $X.XX per foot to remove and replace 35 feet of service line to the residence.
4. It is critically important to have all subject matter experts involved in the collection and analysis of the data to make sure that all relevant information is used in the damage assessment process. For instance, how will we you ascertain which infrastructure is affected? How will the determination be made to ascertain whether the infrastructure can be repaired or must it be replaced?
5. Someone at the EOC needs to be identified as the point of contact for the damage assessment process, for both the county and the state.

Let me know if you any additional questions.

Subject: Urgent: Review of Draft Declaration Request Letter and Accompanying Template

All – see attached are the draft of the federal declaration request letter and accompanying (non-saveable) OMB form 1660-0009 (printed in PDF format) for your review. The letter is 41 pages long and the OMB form is 4 pages long so you have 45 pages of enjoyment to consume over the next day or so. At this late date, I think we are only looking for a review of the facts and the overall tone (i.e., consistency with how Governor Snyder would phrase something). Although the impact information we received from the locals was somewhere south of **terrible** in terms of detail, and we generally had a lack of useable (i.e., not copyrighted or embedded in Flickr and non-retrievable today) photos with a "wow" factor, I tried to make the best presentation possible. If anyone out there has better material to use, your assignment is to **DEVELOP** that material into presentable format in time for rapid integration into the document on Monday. We are not looking for comments like ("Perhaps we should include something about...") or similar at this

juncture; just take that thought, fully develop it into a product, and have it ready for incorporation by Monday. We don't need ideas now; only **PRODUCTS READY TO GO!**

I know this is a lot to digest in a short time period, but that is the nature of this process. Sorry in advance...☺

Hopefully these will make it through to your devices in good order. Sorry, but the letter had to be in PDF. The Word file for the letter is nearly 23 megs in size. Also, you may not be able to read all of the text in the OMB form boxes so I have also attached a Word version of the narrative that goes on the OMB form to see what you are missing. We can simply cut and paste the Word narrative onto the OMB form to create the final version, once we collectively decide the narrative is okay.

Thanks again for your collective review eyes. Happy reading!

FLINT, MI -- The federal government may have never recognized a man-made water crisis like Flint's as a disaster before, but asking for the assistance has been Mayor Karen Weaver's plan since before she was elected Nov. 3.

"Our city is in a crisis -- a water crisis," Weaver said. "So far, what we've had are Band-Aid fixes, (and) it's not enough ... I don't see any other option."

On Monday, Dec. 21, the mayor plans to meet with Genesee County Board of Commissioners Chairman Jamie Curtis and others involved in emergency planning to discuss the city's incident response plan, a step-by-step outline aimed at addressing the water crisis.

"Things are falling together nicely," she said Friday, Dec. 18. "(The plan) is going to say, 'We need this, this and this,' and attach numbers where we can."

The Michigan Emergency Management Act outlines the process for seeking federal disaster assistance, which starts with the local declaration of a state of emergency. In that statement, a local jurisdiction says it has sustained widespread or severe damage, injury or loss of life.

Communities that have typically been granted disaster aid have suffered from natural disasters such as severe storms, flooding and fires, but Weaver believes that Flint's disaster with lead in its water is just as devastating.

There are cases in which less-common disasters have been recognized with federal aid, including one for severe hardship to the salmon industry in Alaska in 1953, a chlorine barge accident in Louisiana in 1962 and dam failure in Colorado in 1973, according to FEMA records.

"The president can declare an emergency or major disaster for any natural or manmade event that the president determines has caused damage of such severity that it is beyond the combined capabilities of state and local governments to respond," FEMA spokesman Mark J. Peterson said in an email to The Flint Journal-MLive

"We're being positive and optimistic" with Flint's application, Weaver said.

The city's state of emergency says, "Flint children have experienced increased blood lead levels since the switch to the Flint River, and this damage to children is irreversible and can cause effects to a child's IQ ... (resulting) in learning disabilities and the need for special education and mental health services and an increase in the juvenile justice system."

Weaver has so far not assigned a dollar figure to damage done to children who drank Flint River water since April 2014, and she said this week that Flint's old water distribution system was also damaged by corrosive river water. "So that's where we are (also) going to need some help."

Although Flint City Council members have been generally supportive of Weaver seeking the disaster declaration, and the Michigan Legislative Black Caucus is supporting the request, Flint City Councilman Josh Freeman said he doesn't believe it will be granted.

"It's giving false hope to people that the problem is going to fixed" with a disaster declaration, Freeman said. "At some point we have to stop playing politics and start governing."

The councilman said state and federal officials are unlikely to send disaster relief to Flint because other parts of the county and the state have childhood blood lead levels -- from all sources -- that are similar to children in Flint.

"Maybe I'm wrong. Hopefully I'm wrong," he said.

FEMA's Web site shows 77 disaster declarations nationwide so far in 2015 and eight current disasters.

The current declarations cover damage caused by fire in California; severe storms and flooding in Wyoming; straight-line winds, flooding and severe storms on the Pine Ridge Indian Reservation in South Dakota; severe storms, tornadoes, straight-line winds and flooding in Texas; severe storms, tornadoes, straight-line winds and flooding in Oklahoma; severe storms, tornadoes, straight-line winds and flooding in Arkansas; and severe storms and flooding in South Carolina.

To reach the desk of President Obama, Weaver's disaster declaration must be approved by county Chairman Curtis and both officials must determine that the disaster is beyond the capabilities of the city or county to handle. Curtis has said he is "fully on board" to do whatever he can to help the city of Flint.

In Michigan, all requests for assistance are channeled through the Michigan State Police, Emergency Management and Homeland Security Division. The MSP reviews requests and makes recommendations to the governor, according to Ron Leix, a spokesman for the division.

The governor has the authority to mobilize state agencies to provide assistance, and if the state cannot cope with the disaster, Gov. Rick Snyder could request assistance through FEMA.

The federal agency makes disaster recommendations to the president.

State Rep. Sheldon Neeley, D-Flint, urged Snyder to get Flint's application for help to the president as quickly as possible.

"Issuing a health emergency is the most responsible thing to do," Neeley said in a news release. "This is a public health crisis, and our children are most at-risk. A state-declared health emergency will allow the city to access federal funding."

Brainstorm Ideas for Possible VOAD/NGO Support in Flint Water Contamination 1/06/16 Version

The MSP/EMHSD planners asked the Red Cross [ARC] to brainstorm and come up with possible ways in which MI-VOAD, the Red Cross and other NGOs might be able to assist in the response and recovery phases of the Flint Water Contamination. When reviewing the ideas which follow, please keep in mind these considerations:

1. We cannot speak for MI-VOAD and recommend that MI-VOAD be convened so that the members can be briefed and discuss these ideas.
2. NGOs seek funding to implement programs which align with their missions. None of them are funded to conduct recovery efforts for the Flint Water Contamination and would likely need financial support to do so.
3. These ideas are not task assignments or commitments.

POSSIBLE NGO SUPPORT ACTIVITIES

a) NGOs can help educate Flint residents about water filters and ways to mitigate lead exposure in children through nutrition and early childhood education. (Leveraging the Red Cross' Home Fire Prevention Campaign, ARC volunteers could provide education materials, water filters and replacement cartridges when they visit homes to install smoke alarms. Discussions are currently underway to do this.)

b) The ways in which educational information is disseminated may provide an opportunity to rebuild trust in government. If those efforts engage trusted organizations such as faith-based groups and the Red Cross, the positive perceptions may be extended to government.

c) NGOs' places of business could be used as points of distribution for water and filters. In addition to space, the NGOs may be able to provide people to staff them. Perhaps some NGOs could provide the water and filters, but not all. Such arrangements would need to be time limited.

d) Some NGOs can provide language interpretation and translation for those residents who need it and for translation of educational materials.

e) In Flint, Child Care Network trains providers of early childhood education.

f) Some Flint residents affected by the water contamination may benefit from crisis counseling. People who work on the recovery (agency staff and volunteers) may also. There are NGOs which provide such counseling.

g) Some homes contain lead pipes, faucets or related infrastructure. Perhaps some NGOs (Habitat for Humanity?) could install new ones. However, this may require specific licenses or permits.

h) If it's determined that food will be distributed to improve nutrition, NGOs may be able to assist.

i) There may be NGO services available directly to those children who evidence disabilities as a result of lead exposure.

j) There are local agencies which have been and continue to address the needs of Flint residents. Because the recovery may be long term, the capacity of these agencies may be taxed. It's possible that NGOs could support them by providing workers (staff and/or volunteers) to help, depending on their needs (including answering phone calls and responding to email.)

k) Some of the MI-VOAD member agencies may be able to act as liaisons with local government and non-profit agencies.

PROCLAMATION

DECLARATION OF DISASTER

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, under the Emergency Management Act, Act No. 390 of the Public Acts of 1976, as amended, MCL 30.401 to 30.421, the Governor is responsible for coping with dangers to this state or the people of this state presented by a disaster or emergency or threat thereof, and may issue executive orders, proclamations, and directives having the force and effect of law to implement the Act; and

WHEREAS, under Section 3 of the Emergency Management Act, 1976 Public Act 390, MCL 30.403, the Governor shall, by executive order or proclamation, declare a state of disaster if the Governor finds that a disaster has occurred or that the threat of a disaster exists; and

WHEREAS, over the course of 2014 and 2015, the deleterious effects of corrosive water struck the City of Flint, Michigan's water infrastructure, causing significant leeching of lead into the water, causing extensive damage and negative health impacts; and

WHEREAS, the area affected include the entire City of Flint, within the county of Genesee; and

WHEREAS, the damaged water infrastructure and unleashing of toxic lead into the city's water caused widespread and severe damage to public and private water infrastructure, elevated blood lead levels in humans and potentially pets, especially in the population of children and pregnant women, and causing an immediate threat to public health and safety and disrupting vital community services; and

WHEREAS, from October 1, 2015 to this date, the County of Genesee and the City of Flint have taken a number of actions to cope with the situation, including but not limited to declaring local states of emergency and a public health emergency, activating the disaster response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information; and

WHEREAS, local resources have been insufficient to address the situation, and additional assistance from voluntary organizations and the state is required to protect public health, safety, and property, and to lessen or avert the threat of more severe and long lasting impacts to the community;

NOW, THEREFORE, I, RICHARD D. SNYDER, Governor of the State of Michigan, pursuant to the Constitution of the State of Michigan and provisions of Act No. 390 of the Public Acts of 1976, as amended, do hereby proclaim that a state of disaster exists in the aforementioned county and municipality; and

FURTHER, the Emergency Management and Homeland Security Division of the Department of State Police shall coordinate and maximize all state efforts, and may call upon all state departments to utilize resources at their avail to assist in the disaster area pursuant to the Michigan Emergency Management Plan; and

FURTHER, termination of this disaster will occur at such time as the threats to public health, safety, and property caused by the disaster no longer exist and appropriate programs have been implemented to recover from the effects of this disaster, but in no case longer than February 3, 2016, unless extended as provided by Act No. 390.

Given under my hand and the
Great Seal of the State of Michigan this
6th day of January in the Year of Our
Lord, Two Thousand and Sixteen.

RICHARD D. SNYDER
GOVERNOR

BY THE GOVERNOR:

SECRETARY OF STATE

STATE OF WEST VIRGINIA
OFFICE OF THE GOVERNOR
1900 KANAWHA BOULEVARD, EAST
CHARLESTON, WV 25305
(304) 558-2000

EARL RAY TOMBLIN
GOVERNOR

March 21, 2014

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20472

Through: Ms. MaryAnn Tierney
Regional Administrator
FEMA Region III
One Independence Mall, Sixth Floor
615 Chestnut Street
Philadelphia, PA, 19106-0444

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, please accept this letter as a formal request that you declare a major disaster for the State of West Virginia as a result of a severe water outage due to contamination from a chemical spill beginning January 9, 2014 and ending January 20, 2014.

The flooding of the chemical Crude MCHM into the water supply of 300,000 customers was unprecedented, and received national and international attention. The threats to health and safety were immediate, and the impact of the spill has been continuous. Several hundred people reported being affected by the water and at least 20 were hospitalized for observation. This event caused damage of sufficient severity to warrant major disaster assistance to supplement the efforts and resources of our state.

On January 9, 2014, I declared a State of Emergency in areas of Boone, Cabell, Clay, Jackson, Kanawha, Lincoln, Logan, Putnam and Roane Counties. After initial reports of the spill into the Elk River, state agencies with statutory authority responded to locate and contain the spill. As it became clear that the water supply for approximately one-sixth of the state's population could

not be consumed, I recognized that supplemental federal assistance would be necessary to meet the immediate needs of those affected by these limitations. You also recognized the significance of this event when you granted my request for an emergency declaration for West Virginia.

In the days and weeks immediately following the event, our response was a true partnership. At my request, FEMA supplied water and food that was distributed and delivered to citizens in need by state and local agencies, as well as volunteers. The whole community, especially the Voluntary Organizations Active in Disaster (VOAD), responded admirably with donations of water, food, other resources, and time. It is reported that the member agencies of VOAD donated over $689,000.00 worth of items including water, food, hand sanitizer, and paper products to assist those in need. Food was also prepared and delivered to groups who could not prepare food due to the lack of potable water.

State and local agencies coordinated with FEMA personnel to distribute the water and food brought into the state to locations where individuals could use it. In addition, these agencies made certain that those with special needs were identified and their needs met. While these typical disaster response activities were being conducted, a key initial effort was the partnership of private, state and federal officials determining an acceptable threshold level of Crude MCHM that must be achieved before the water was deemed acceptable for potable use. As noted above voluntary agencies responded in admirable fashion to the identified needs.

The results of our evaluation of the direct and indirect costs of this event are attached. These costs are documented, and we have attempted to be conservative in our estimates regarding eligible reimbursement costs under Category B of the Public Assistance program. At this time, estimated losses to the economy of the affected counties are estimated at $61,000,000. The total economic impact will likely be greater.

- The sectors of the economy primarily affected included restaurant and hotel businesses that were forced to close until alternate sources of potable water could be provided. Many employees of these businesses earn low wages, and, in the case of restaurant servers, depend on tips to make a living wage. In an effort to support those who lost income due to this event, the United Way collected and distributed over $112,000 in assistance to more than 600 families to help them pay utility bills they could not otherwise pay.

- Businesses that temporarily closed due to the lack of potable water showed remarkable determination to reopen as soon as possible, and incurred additional costs in order to meet the standards set by health officials to reopen using alternate sources of water. To this day many businesses, especially those serving food, are incurring additional costs to provide assurance to their customers that no tap water is being used in the food preparation or cleansing of the silverware, plates or glasses. The losses were severe enough to warrant a Small Business Administration Economic Injury Disaster Loan Program for the affected area, but this support traditionally covers only a small portion of the total business losses in a disaster.

- Hospitals and medical facilities had to cancel elective and non-emergency services. Nursing homes and other long-term care facilities had to develop alternatives to caring for their patients, and local health departments were faced with a considerable increase in responsibilities and workload.

- The education community was also impacted by the water outage. While this unusually harsh winter caused students to miss several instructional days, this event has caused schools in the affected areas to close for no less than a week, and in some cases, longer. Kanawha County and Putnam County estimate they have lost over $5,500,000 in instructional time because of the water outage.

As the urgency of the situation eased, it became clear that certain ongoing aspects of the emergency would continue to demand public assistance. The Centers for Disease Control (CDC) issued statements regarding safe levels of the chemicals involved in the spill, and tests were necessary to ensure that the water was meeting those standards. Even after flushing procedures were implemented, there were surges of chemical presence in various areas, requiring more testing. Because of the strong odor of the chemicals, the water was objectionable long after the spill was contained. Accordingly, testing continued at significant expense to the state and local agencies. This testing was necessary to lessen the immediate threats to public health and safety posed by the mass exposure to a relatively unknown chemical. Additionally, I approved the engagement of independent environmental consultants to confirm the health screening standards of the chemicals, and to develop a home testing protocol that will account for adverse variables in homes that could increase harmful effects of the chemicals. The CDC provided useful guidance on the safe levels of these chemicals, and the public required assurance that these levels are being met. Thorough information about the consequences of the spill in home water systems is essential to coping with this threat. Finally, I ordered the demolition of the facility that stored the chemicals involved in the spill, which is necessary to lessen the possibility for the leaked chemical to wash into the river. This a precise process in light of the environmental concerns associated with hazardous sites, and it has the potential to be another significant expense to the state.

The expenses incurred by state and local agencies after federal assistance ended were necessary and responsible. Since the attack of September 11, 2001, the protection of our country's water supply has been an issue of targeted concern and national discussion. Our ongoing response to the spill, continuous studies, and test results will serve as future guidance not only for exposure to the specific chemicals involved in the spill, but for any water system contamination. The work

we are funding will fill a void in the scientific and public health knowledge base with much-needed information. West Virginia and its subdivisions lack the resources to cover 100% of the costs expended to eliminate the threats to public safety caused by the chemical spill. The possibility of collecting costs from the company responsible for the spill is unlikely, considering the company's bankruptcy posture.

The last major disaster in West Virginia prior to this event occurred last summer. It was a flooding event that was designated FEMA-4132-DR, and included Roane and Mason Counties. In addition to Public Assistance and Hazard Mitigation, the United States Small Business Administration declared Roane County eligible for Disaster Loan assistance. To date, over $4,440,000 in Project Worksheets have been written. The state will pay the non-federal share for itself and the other eligible applicants. This will be approximately $1,100,000.

The attached "EM-3366 – Category B Assessment – as of 3/7/14" was developed with the assistance of experienced FEMA Public Assistance staff who scrutinized the data provided by state and local agencies to determine costs eligible for Stafford Act Public Assistance. Their conclusions are based on much more careful analysis of the provided information than is normally done during the Preliminary Damage Assessment process, and the figures may be exceeded when actual Project Worksheets are developed. Their estimate of over $1,500,000 in probable eligible traditional Public Assistance costs plus the $1,325,503.90 in non-federal share for the Direct Federal Assistance exceeds our Public Assistance impact indicator for a Major Disaster Declaration of $2,575,661.66 by nearly $250,000. I firmly believe it is reasonable in light of the extraordinary character of this event to combine these figures so that the maximum assistance can be provided not only to the citizens but to the agencies who aided those citizens. Historically, actual Project Worksheets have significantly exceeded Preliminary Damage Assessment estimates.

The initial response to the flood of contaminants into the Elk River was a community effort aided greatly by public assistance. I am committed to continuing to alleviate the results of this disaster through the expenditure of recourses as described herein. A declaration of a major disaster and associated further assistance will lessen our significant financial burden, and will enable us to continue to respond to each new aspect of this event as it arises.

Thank you for your consideration. Any questions regarding this appeal or requests for additional documentation should be directed to Mr. James J. Gianato whom I have appointed as State Coordinating Officer for this disaster recovery operation.

Sincerely,

Earl Ray Tomblin

FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2015

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date March 20, 2014

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C F.R.. §§ 206.35 and 206 36 Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U S.C. § 5122) or Indian tribal government requesting declaration.	2b Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
West Virginia	1,852,994

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Earl Ray Tomblin	Jimmy J. Gianato (304) 558-5380

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Jimmy J. Gianato (304) 558-5380

6. Declaration Request For: ☒ Major Disaster (Stafford Act Sec 401) ☐ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: *Beginning Date* Jan 9, 2014 *End Date* Jan 20, 2014 or ☐ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lighting) ☐ Snowstorm (Must Include Enclosure D- Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) *Water outage due to contamination from a chemical spill*

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

Beginning on January 9, 2014, a spill of Crude MCHM forced the West Virginia American Water Company to issue an order to approximately 100,000 customers in a nine (9) county area to not use tap water for drinking, food preparation, bathing or cleaning. The only authorized uses were for sanitary flushing and fire fighting This affected approximately 300,000 residents in addition to hospitals, extended care facilities, schools and businesses. The order was gradually lifted in stages as testing indicated the level of Crude MCHM in the lines was within acceptable limits This process was initially completed approximately one week after the event began. However, concerns about the presence of Crude MCHM continue until this day, and have had a negative impact on the residents and businesses in the affected area.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

From the first reports of a chemical spill into the Elk River the appropriate state agencies responded in accordance with their statutory authorities. As the impact on the water supply became known I directed the execution of the state emergency plan and declared a State of Emergency existed in the nine (9) affected counties. The State Emergency Operations Center was activated, and I requested an Emergency Declaration from the President which was granted on January 10, 2014. State and local agencies as well as members of the Voluntary Organizations Active in Disaster worked with FEMA to distribute water and food to the affected citizens, and we worked with private and federal agencies to determine acceptable limits of Crude MCHM in tap water and test that water to determine when it would be possible to lift the "do not use" order. Businesses worked with local health departments to develop acceptable alternative water sources so they could reopen as soon as possible. In response to my request, the United States Small Business Administration made an Economic Injury Disaster Loan Program declaration on January 29, 2014.

10. Joint Preliminary Damage Assessment*

☐ Individual Assistance Dates Performed Requested Jan 16, 2014 Start Jan 17, 2014 End Mar 7, 2014

Individual Assistance Accessibility Problems (Areas that could not be accessed, and why)

☒ Public Assistance Dates Performed Requested Jan 16, 2014 Start Jan 17, 2014 End Mar 7, 2014

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☐ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

For States, identify Federally-recognized Tribes in the requested counties (if applicable).

*Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.*

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, *independent cities; for Indian tribal government*, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Boone County, Cabell County, Clay County, Jackson County, Kanawha County, Lincoln County, Logan County, Putnam County and Roane County

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ *I request direct Federal assistance for work and services to save lives and protect property, and:*

a. I request the following type(s) of assistance:
Water and food.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.
The immediate needs of the citizens could best be met using available stocks of water and food. This prevented unnecessary suffering on the part of the effected population while contracts could be let and supplies of the needed commodities could be transported into the affected area.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☐ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☒ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date October 17, 2016 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see Enclosure C: Requirements for Other Federal Agency Programs for additional information in support of this request.*

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 9, 2014 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☒ Cover Letter ☐ Enclosure A (Individual Assistance)* ☒ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation

September ??, 2014

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of severe flash flooding that struck the counties of Macomb, Oakland, and Wayne, including metropolitan Detroit, on August 11-12, 2014.

The flash flooding was caused by a low pressure storm system that moved across southeast Lower Michigan in the early evening hours of August 11. This storm system produced historically heavy rainfall – four to six inches in less than four hours in parts of Macomb, Oakland, and Wayne counties – resulting in severe flash flooding and widespread sewer back-ups in many communities. Officials from the National Weather Service indicate that existing one-day rainfall totals were broken or nearly broken in several areas. For example, at 4.57 inches of rainfall, metropolitan Detroit experienced its second highest rainfall total ever recorded in a single day, falling just short of the all-time record of 4.74 inches set back on July 31, 1925.

According to the National Weather Service, the City of Dearborn in Wayne County received the highest rainfall total for the storm, 6.31 inches, during a 12-hour period. In the City of Southfield in Oakland County, 6.25 inches of rainfall occurred during a 12-hour period, while in the City of Berkley, also in Oakland County, 6.00 inches of rainfall occurred in a 9-hour period. In the City of Troy in Oakland County, the rainfall total for the storm measured 5.46 inches. In the City of Warren in Macomb County, particularly hard-hit in this flood disaster, 5.20 inches of rainfall was recorded in a 13-hour period. Three other Macomb County communities (i.e., the cities of Fraser and Rochester, and Shelby Township) exceeded four inches of rainfall for the storm. In Wayne County, a total of 14 communities, including the aforementioned City of Dearborn, received four inches or more of rainfall during the storm. The City of Dearborn Heights, immediately adjacent to the City of Dearborn, was also particularly hard-hit, at 4.97 inches of rainfall over a 12-hour period. A summation of the rainfall totals for these and other affected local communities can be found at Attachment 3 at the end of this letter.

Across the area, the heavy rainfall overwhelmed creeks and tributaries, municipal and county storm drains, and pumping stations for area roadways; caused flash flooding and sewer back-ups that flooded thousands of homes and businesses; stranded hundreds of motorists in up to head-deep water; and forced the closure of major sections of area interstate and state highways for several days. The National Weather Service reported that at least three bodies of water in the impacted counties flooded in the hours and days immediately after the August 11 heavy rainfall: the lower Rouge River in the City of Dearborn in Wayne County; Ecorse Creek in

the City of Dearborn Heights, also in Wayne County; and the Clinton River in Clinton Township and the City of Sterling Heights, in Macomb County. In fact, the Clinton River set an all-time record with a crest of 20.8 feet on August 12, eclipsing the previous record crest of 20.0 feet set 67 years ago on April 5, 1947.

Damage to flooded homes and businesses was particularly severe. The damage typically resulted from a few inches to several feet of water in basements, to water above the first finished floor causing significant damage to foundations and other structural elements. In addition, water on the first finished floor damaged interior finishes and personal property. Many basements incurred substantial damage to the foundation walls and footings, to electrical and mechanical systems, to finished living spaces, and to personal property. A significant number of the homes that incurred substantial basement damage had finished essential interior living spaces in the basement, such as an occupied bedroom, a bathroom, or in some cases the home's only kitchen and food storage area.

Any discussion of damage related to this flood disaster must be coupled at this point with a corresponding discussion related to the uniform lack of insurance for flood hazards in the affected area. Our initial assessments, confirmed later by federal damage survey teams, show that more than 80-percent of the affected households do not have flood insurance or sewer back-up insurance policies in place that would have covered the damage most commonly incurred in this disaster, that being: structural damage to walls and foundations; damage to electrical and mechanical systems; damage to home furnishings, wall treatments, and flooring; loss of appliances such as washers and dryers; and loss of televisions, computers, clothing, and other personal belongings. Even if these affected households had full-coverage flood insurance policies in place, the losses they incurred are far greater, on average, than the maximum coverage provided by flood insurance policies under the National Flood Insurance Program.

Additionally, flood damage caused by sewer back-ups into basements is not covered under a standard flood insurance policy. Rather, a separate sewer back-up rider must be purchased (where available) as part of a homeowner's home insurance policy. Unfortunately, damage surveys indicate that more than 80-percent of households in the affected area do not have such coverage and therefore are left to absorb whatever losses they incurred out-of-pocket. For most affected households, sewer back-ups resulting from the historic rainfall caused the majority of the flood damage to their homes. Although some households may potentially be eligible for limited financial compensation for sewer back-up damage under Michigan's Governmental Liability of Negligence Act (1964 Public Act 170, as amended, MCL 691.1401 to 691.1419), the amount received, in most cases, will not begin to cover the entirety of their losses.

Damage surveys indicated that many homes are in areas that have experienced repetitive flooding, and this factor coupled with the age and condition of the dwellings means that many flooded homes may have incurred damage that meets or exceeds federal and state substantial damage criteria. An instructive example of this was found in the City of Dearborn Heights in Wayne County, where a damage survey conducted by a team of Michigan Department of Environmental Quality and Federal Emergency Management Agency flood specialists identified an area of older homes particularly hard-hit by flooding of Ecorse Creek

caused by the unusually heavy rainfall. This team identified at least 84 damaged homes in one neighborhood that exceed federal and state substantial damage criteria for flood-damaged structures, meaning that these homes will likely have to be demolished or entirely rebuilt to meet Michigan Construction Code and floodplain protection provisions. Unfortunately, the percentage of households in this area with flood insurance is low (just slightly over 40-percent), and the area was characterized as lower income where most residents are older and have limited financial resources. Although this was just one neighborhood in one community, this situation is not uncommon throughout the three-county area. Without significant assistance from the federal government, these and other households like them will experience severe financial hardship for years as they attempt to recover from this flood disaster.

Although numerous local jurisdictions in the three-county area were severely impacted by the flooding and over 118,000 homes and businesses were damaged or affected in some significant way, damages were particularly concentrated in the cities of Warren, Sterling Heights, and Centerline, and Clinton Township in Macomb County; the cities of Oak Park, Royal Oak, and Southfield in Oakland County; and the cities of Dearborn, Dearborn Heights, and Detroit in Wayne County. These areas had particularly notable concentrations of public and/or private damage. For example, in the City of Warren in Macomb County, nearly 23,000 homes incurred damage, representing approximately 40-percent of the city's housing stock. In the City of Dearborn, over 7,600 homes incurred damage, representing approximately 20-percent of that city's nearly 38,000 housing units. The City of Detroit suffered damage to 7-percent of its housing stock. Similar concentrations of damage were experienced in the other aforementioned communities.

The concentration of damage within these small geographic areas magnifies the impact of this flood disaster considerably on the affected communities, and on the three counties as a whole. The collective economic toll to these communities and the region is astronomical. Assessments of private damage conducted by county and local assessors estimated that total residential and commercial flood damage exceeded $1.1 billion in the three-county impact area. Unfortunately, as I previously pointed out, these areas of concentrated damage also have some of the highest concentrations of residents who do not have flood insurance or sewer back-up coverage on their homeowner's insurance policy. Across the three-county impact area, damage surveys indicated that less than 20-percent of flood-damaged homes were covered by flood insurance and sewer back-up insurance. In some of the communities, the percentage of coverage is lower than 20-percent.

Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically-distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23-percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25-percent. In the City of Highland Park, the poverty level is closer to 50-percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17-percent and its median household income, at $44,982,

also lags nearly 8-percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6-percent, 8.4-percent, and 11.1-percent, respectively) that exceed the state average of 7.7-percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation, and well-above the national average of 6.2-percent.) The City of Highland Park has an unemployment rate that exceeds 23-percent, while the City of Detroit's rate exceeds 17-percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double-digits.

By far the most tragic aspect of this flood disaster is that two confirmed deaths have been directly attributed to the flooding conditions, despite the generally-excellent efforts of the affected local jurisdictions and the Michigan State Police in preventing access to flooded areas and in disseminating warnings and emergency public information about the flooding. The warnings and emergency public information were largely followed; however, the rapidly-rising flood waters trapped numerous individuals in their vehicles or home basements, which directly contributed to the two deaths. In addition, flood warnings and emergency public information developed and disseminated by the National Weather Service office in Detroit also contributed positively to this public safety effort, although the historic nature and rapid rise of the flood waters caught even them off-guard.

In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals; assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship; and taking appropriate actions to keep those affected facilities, infrastructure, and services operational.

The response by our partner voluntary relief organizations to the severe flooding has been both timely and appropriate. From the outset, the American Red Cross, the Michigan Voluntary Organizations Active in Disasters, and volunteers arranged through the Michigan Community Service Commission have actively provided relief assistance to those in need in the affected areas. Activities undertaken by these organizations during the flood response and early phases of recovery included but were not limited to:

- Providing food and water to emergency responders and flood survivors;

- Establishing and operating emergency shelters for flood survivors left homeless or stranded due to flood conditions;
- Establishing and operating 10 "Multi-Agency Resource Centers" (MARCs) in several communities;
- Distributing personal care items and clean-up kits to flood survivors;
- Providing basic health assessments and first aid services for flood survivors in emergency shelters;
- Providing direct recovery assistance in the form of in-kind materials and/or purchase vouchers for immediate needs items and certain essential household items;
- Providing flood survivors with counseling services and/or referrals to other community-based behavioral health service providers; and
- Assisting elderly and other functional needs individuals in cleaning up their flood-damaged homes, including the removal of flood-soaked building materials, furniture, appliances, and other damaged items.

In some jurisdictions, Community Emergency Response Teams (CERTs) and other community-based volunteer organizations (e.g., local civic/service clubs, church groups, etc.) provided supplemental assistance with response and/or recovery efforts by conducting damage and impact assessments; aiding in debris removal and clearance from public and private property; assisting homeowners in cleaning-up, restoring, and repairing their flood-damaged homes; and helping affected functional needs individuals in coping with their specific individual circumstances and directing them to appropriate resources to help facilitate or aid their recovery.

Despite the valiant efforts of these voluntary organizations and volunteers, they have not been enough to meet all of the recovery needs of all affected individuals and families. As a result, significant unmet needs still exist in the areas of: debris removal on private property; housing repair and restoration; replacement of essential household items; mold and other contaminant abatement; and temporary housing assistance. If this request for federal disaster assistance is granted, these needs could most appropriately be met through several federal Individual Assistance programs, including implementation of the U.S. Small Business Administration disaster loan program. (A separate request for a Small Business Administration Disaster Declaration will be forwarded to their regional office in Atlanta, Georgia, to activate the disaster loan program, in the event my assistance request contained in this letter is not granted.)

The affected local governments also took appropriate action under state law in response to this flood disaster. Pursuant to the Emergency Management Act, No. 390 of the Michigan Public Acts of 1976, as amended, Michigan Compiled Laws (MCL) 30.410 (b), a total of three counties and 19 local political subdivisions declared a "state of emergency" in response to the severe flooding affecting their jurisdiction. Those counties and local political subdivisions included:

- Wayne County on August 12, 2014;
- The City of Berkley on August 12, 2014;
- The City of Ferndale on August 12, 2014;
- The City of Hazel Park on August 12, 2014;
- The City of Huntington Woods on August 12, 2014;
- The City of Madison Heights on August 12, 2014;
- The City of Troy on August 12, 2014;
- The City of Royal Oak on August 12, 2014;
- Royal Oak Township on August 12, 2014;
- The City of Oak Park on August 12, 2014;
- The City of Warren on August 12, 2014
- Oakland County on August 13, 2014;
- Macomb County on August 13, 2014;
- The City of Dearborn on August 13, 2014;
- The City of Center Line on August 13, 2014;
- The City of Roseville on August 13, 2014;
- The City of Highland Park on August 13, 2014;
- The City of Southfield on August 13, 2014;
- Canton Township on August 15, 2014;
- The City of St. Clair Shores on August 15, 2014;
- Clinton Township on August 15, 2014; and
- The City of Dearborn Heights on August 18, 2014.

These jurisdictions implemented the response and recovery elements of their Emergency Operations Plans in a timely manner, in accordance with state law and associated administrative procedure. They also took a number of other appropriate actions to cope with the situation, including but not limited to: marshaling required resources; issuing emergency warnings and public information; taking emergency protective measures to preserve life and/or property; clearing roadways and other public spaces of debris; and limiting access to flooded areas. Generally speaking, the affected local governments took all actions required of them by state law and procedure, and dictated by incident circumstances. Their response was outstanding, given the unusually rapid and severe nature of the flooding and the significant threats to public health and safety created by the tremendous quantities of water-laden and contaminated debris collected from damaged homes and businesses. Refer to Attachment 3, "Significant State and Local Response and Recovery Actions," for more detailed information pertaining to specific response and recovery actions taken by the State and the affected local jurisdictions.

Unfortunately, this flood disaster is just the latest in a string of major incidents that have occurred in Michigan. Over the past 12 months, Michigan has experienced three incidents (including this flood disaster) which resulted in the declaration of a disaster or emergency by me under the Emergency Management Act, No. 390 of the Public Acts of 1976, as amended. The other incidents included an April 17, 2014 declaration of emergency for a widespread underground deep freeze affecting nine counties in Michigan's Upper Peninsula and extreme

northern Lower Peninsula, and an April 17, 2014 declaration of disaster for severe flooding in eight central Lower Michigan counties. Collectively, a total of 20 counties have been included in these declarations over the past 12 months. (Going back four months further, federal disaster 4121-DR-MI, declared in April 2013, involved a total of 16 counties – many of which were also impacted by the two incidents described above.) These incidents have stretched Michigan's relief and recovery resources to their limits. While we were fortunate to receive federal funding for disaster 4121-DR-MI, the other two state-declared incidents above did not qualify for federal relief assistance under the Stafford Act because incident response and recover costs did not meet the established per capita threshold levels required for Public Assistance funding consideration. As a result, the State and the affected local governments have been forced to absorb these costs, reducing our collective ability to fund other essential programs and services in the process.

Although Michigan has a Disaster and Emergency Contingency Fund under 1976 Act No. 390 for counties and local political subdivisions for partial reimbursement of eligible public damage and response costs, it has limited funding which must be replenished every budget cycle by the Michigan Legislature. By state law, these funds can only be provided to eligible public entities and certain volunteer organizations supporting incident response operations. Funds cannot be used to reimburse individual citizens for damages to their home, business, or property, and the state currently does not have another funding mechanism in place dedicated to the provision of post-incident assistance for all individuals and families with unmet needs. Although there are relief programs available through the Michigan Department of Human Services, eligibility is generally limited to low and moderate income individuals or households that incur extraordinary incident-related expenses. To meet the needs of most of our disaster survivors who are not insured or are under-insured against natural hazards such as severe winds or flooding, we must rely upon supplemental relief assistance provided by the federal government and/or voluntary organizations. As I previously indicated, our volunteer relief partners have done an exemplary job in addressing many of the needs stemming from this flood disaster. However, the scope and magnitude of this incident is beyond even their collective capability to provide necessary recovery services. Federal relief assistance is definitely needed to address the unmet needs of those most severely affected by the flooding.

In addition to the aforementioned gubernatorially-declared incidents, the affected local emergency management program jurisdictions have experienced numerous smaller-scale incidents for which they did not seek a gubernatorial declaration or state assistance but which had significant local impacts to residents, businesses, public facilities and infrastructure, and essential services. Individually and collectively, these incidents created significant burdens for the affected local governments, requiring the expenditure of resources (physical and financial) which in many cases had to be diverted from other community programs and services.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all of the affected local jurisdictions that are the subject of this request either have in place, or are actively working toward developing or updating, a current Disaster Mitigation Act of 2000-compliant hazard mitigation plan. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards – particularly flooding hazards – and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA

on April 23, 2014, as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000. If appropriate funding can be secured, this disaster will provide an opportunity to implement hazard mitigation projects identified in these plans, in order to reduce the impact of future disasters of this nature.

On August 22, 2014, I requested a joint federal, state, and local Preliminary Damage Assessment for both Individual Assistance and Public Assistance to survey the affected areas in Macomb, Oakland, and Wayne counties. That survey was conducted in two phases over a two and one-half week period, beginning on August 26 and concluding on September 9, 2014. The Preliminary Damage Assessment was conducted by teams consisting of representatives from the Federal Emergency Management Agency, the Michigan State Police Emergency Management and Homeland Security Division, and the affected local jurisdictions. The U. S. Small Business Administration participated in the Individual Assistance phase of the Preliminary Damage Assessment. In addition, representatives of the Michigan Department of Transportation participated in the Public Assistance phase of the Preliminary Damage Assessment in those jurisdictions in which damage occurred to public roadways and transportation infrastructure.

The Individual Assistance Preliminary Damage Assessment was conducted from August 26 through August 29, 2014, in the three affected counties. Federal Emergency Management Agency representatives met with state and local officials at the Double Tree Inn in Dearborn on the morning of August 26 for the Preliminary Damage Assessment organizational/kick-off meeting. Field evaluations began at the conclusion of that meeting, in the early afternoon of August 26. A total of six teams worked for the next four days to verify locally-reported damage and impact information related to homes and businesses affected by the flooding. The Individual Assistance Preliminary Damage Assessment identified a total of 243 homes that were verified as having been destroyed or that incurred major damage; 991 homes that incurred minor damage and 1,035 that were affected that may be eligible for federal assistance; 498 households that are potentially eligible for temporary housing funding; 1,640 households that are potentially eligible for housing repair assistance; one household that is potentially eligible for housing replacement assistance; and 1,871 households that are potentially eligible for "Other Needs Assistance" funding for essential household items and services.

This joint Preliminary Damage Assessment process confirmed three conditions related to the impacts on communities and individuals that must factor prominently in the analysis of this disaster, namely: the concentration of the most severe flood damage in a few communities; the lack of insurance to help offset the cost of recovering from this disaster; and the distressed economic status of many of the affected communities. (I have discussed each of these conditions in depth earlier in this letter. Supporting data related to those discussions can be found at Attachments 1 and 2.)

The second phase of the Preliminary Damage Assessment, for Public Assistance, consisted of four teams and was conducted from September 3 through September 9, 2014, also out of the Double Tree Inn in Dearborn. Teams consisted of representatives from the Federal Emergency Management Agency, the Michigan State Police Emergency Management and Homeland Security Division, the Michigan Department of Transportation, and the affected local jurisdictions that had reported debris removal, emergency protective measure, and public

facility and infrastructure damage costs (Public Assistance Categories A-G) related to the flooding.

The Public Assistance Preliminary Damage Assessment identified a total of $16,778,074 in eligible public damages and related costs – $7,007,477 in Wayne County, and $5,220,091 and $4,514,429 in Macomb and Oakland counties, respectively. An additional $36,078 in eligible state agency public damage costs was verified by the PDA teams. The vast majority of the public damage was for debris removal ($7,030,709) and damage to public buildings and equipment ($6,834,015), with these two damage categories representing 83-percent of the overall public damage total. Public utility damage and emergency protective measure costs were also significant, at $1,234,314 and $773,933, respectively. Those two categories represent 12-percent of the public damage. At $644,713, damage to roads and bridges constitutes 4-percent of the damage total.

The $16,778,074 statewide public damage figure represents a per capita loss of $1.70, well-exceeding the $1.39 per capita federal statewide threshold impact indicator for Public Assistance consideration. In addition, all three of the surveyed counties had per capita public damage losses that exceed the $3.50 per capita federal county-level threshold impact indicator for Public Assistance consideration. Macomb County's per capita loss, at $6.21, is close to double the federal threshold amount. Wayne County's per capita loss of $3.85 exceeds the federal threshold by 10-percent, while Oakland County's per capita loss of $3.75 exceeds the federal threshold by 7-percent.

Even though these counties have relatively large populations, the fact that their per capita losses exceed federal thresholds is indicative of the severity of the flooding. These jurisdictions do not have the financial resources to fully recover from this this flood disaster in a timely manner, or at all in some cases, without supplemental assistance from the federal government. The State of Michigan is able to provide limited financial assistance, in the form of cost-share participation for Individual Assistance, but does not have the funding to address these public damage losses in whole without supplemental federal assistance available through the Public Assistance program under the Stafford Act. By state law, Michigan's Disaster and Emergency Contingency Fund is capped at $4,500,000 and grants to individual jurisdictions cannot exceed $100,000. In all cases, this will not begin to cover the damages incurred by the affected counties in this flood disaster. More detailed impact and cost information related to the Preliminary Damage Assessment-verified public damages can be found at Enclosure B.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively.

Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps, weather and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs."

I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Rick Snyder
Governor

ATTACHMENT 2 TO MAJOR DISASTER REQUEST

Significant State and Local Response and Recovery Actions

Search and Rescue. The rapid and severe flash flooding inundated numerous sections of interstate highways, major state highways, and local roadways in the metropolitan Detroit area in the hours immediately after the heavy rainfall on August 11, trapping hundreds of vehicles and motorists in the rising water. Many of these motorists sought refuge on the tops of their vehicles or on nearby high ground and had to be rescued by Michigan State Police officers, local law enforcement officers, and local fire department personnel. Michigan State Police resources were particularly valuable to the search and rescue efforts. State Police officers provided direct assistance to stranded motorists, checked the status of abandoned vehicles, and assisted local responders in blocking access to flooded roadways. In addition, divers with the Michigan State Police Underwater Recovery Unit checked more than one hundred submerged vehicles for occupants (fortunately, none were found), and the State Police Aviation Unit conducted aerial fly-overs of the impacted areas to search for additional stranded motorists and to take aerial photographic and video footage of the flood scenes. (Some of those photographs are included at Attachment 3 to provide visual documentation of the scope and magnitude of the flooding.)

Critical Facilities and Infrastructure Restoration. A number of critical facility and infrastructure emergency restoration measures were implemented in the affected counties and local communities during the response to the severe flooding. Particularly hard hit were the interstate highways and major state roadways in and around metropolitan Detroit, although roadways in all three counties were heavily impacted by the flooding. Many sections of the affected highways in and around metropolitan Detroit (including interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39) were inundated with flood water, trapping vehicles and motorists who could not make their way through the rapidly-deepening water. This forced the closure of these roadway sections – in some cases for several days – so that crews from the Michigan Department of Transportation, Michigan State Police, and county and local road and law enforcement agencies could oversee the removal of stranded (and generally inoperable) vehicles; assess the physical damage to and conduct safety checks of road, bridge, and related infrastructure; and initiate appropriate facility repair and restoration measures so that the closed sections of roadway could be safely reopened to the motoring public. (Refer to the road closure map found at Attachment 3.)

Repair and restoration measures included but were not limited to: conducting safety checks of and making temporary or permanent repairs to damaged structures; removing water, mud and debris from the roadway, bridges, and rights-of-way; stabilizing banks to prevent further debris flows and physical degradation; repairing signage and electronic signals, where required; repairing pumping equipment and associated facilities to ensure they are operational; and testing the repaired facilities to ensure they will allow for safe travel. In most cases, the dedicated work crews were able to reopen the damaged highway and roadway facilities within 36-48 hours. However, some of the damaged sections of roadway and bridge infrastructure will

require more extensive permanent repairs which will take several weeks to several months to complete once funding is available to finance the repairs.

Uninsured damage to other local public facilities and infrastructure was significant. For example, in the City of Warren in Macomb County, the Police Department and Fire Department incurred nearly $2.8 million in uninsured damage to their police and fire vehicles and associated equipment. This includes 10 fully-equipped Fire Department vehicles and six fully-equipped Police Department vehicles requiring replacement, and another seven fire vehicles and nine police vehicles requiring major repairs. The City of Sterling Heights, also in Macomb County, had nearly $620,000 in insured public utility damage, while in St. Clair Shores, uninsured damage to public buildings and associated equipment totaled $225,000. In the City of Royal Oak in Oakland County, uninsured damage to a local high school and middle school totaled $210,000. Uninsured damage to St. John Providence Hospital in the City of Southfield in Oakland County was $200,000. Uninsured damage to Oakwood Hospital in the City of Dearborn in Wayne County exceeded $1.8 million, while in the City of Highland Park, also in Wayne County, uninsured damage to public utilities, city hall, and the community recreation center totaled in excess of $450,000. In the City of Detroit in Wayne County, uninsured damage to public buildings and equipment was over $930,000, with the majority of that total coming from damage to Police Department facilities. These are just a few instructive examples from the nearly $16.8 million in public damage that occurred in Michigan. Although temporary repair and restoration measures have been put in place in most instances to bring the damaged facilities and infrastructure in the three counties to basic operational status, almost all will still require extensive permanent repairs and restoration to bring them back to their pre-flood condition. That will not occur in a timely or comprehensive manner without federal disaster relief assistance.

Emergency Sheltering and Mass Care. Although the rapid (and unanticipated), heavy rainfall did not allow for preventive evacuations of the public in impacted areas, emergency sheltering and mass care services were required in several instances. For example, on August 11, over 400 stranded motorists had to be temporarily sheltered for the evening in the City of Warren because roadway flooding prohibited further travel and resulted in many areas being inaccessible by vehicle. (Many of these individual's vehicles were deeply submerged in flood water and would not have been able to travel anyway because of the damage to their vehicle.) Along M-10 in Wayne County, approximately 50 motorists were stranded for an extended period from the evening of August 11 through August 13 due to the deep flood water in the walled-in, lower sections of the highway. During this time, the American Red Cross provided these stranded individuals with food, water, and comfort kits until the roadway could be de-watered and reopened for travel. For six days after the flooding occurred, a small number of displaced flood survivors were sheltered and cared for at an American Red Cross shelter in Garden City in Wayne County because their homes were inaccessible and/or incurred sufficient damage to render them unsafe for occupancy. Lastly, the American Red Cross also provided cots and comfort kits to nearly two-dozen displaced residents at two apartment complexes in the cities of Detroit (Wayne County) and Troy (Oakland County) so that the residents could use other (unaffected) vacant units within the respective complexes for shelter, rather than having to be moved elsewhere to a temporary shelter facility.

I must note that these emergency sheltering and mass care figures are somewhat misleading, as we received reports that many more flood survivors were temporarily displaced because of flood damage and/or inaccessibility but sought shelter with nearby family, friends, or in unaffected area hotels and motels. As it is next to impossible to track these "unofficial" evacuations with any accuracy, it is safe to say that the number of temporarily displaced flood survivors is much higher than reported through official channels.

The American Red Cross generally led the organized emergency sheltering and mass care effort, supported by the Michigan Department of Human Services, the Salvation Army, and other community-based relief organizations.

Flood Recovery for Individuals and Families. To assist affected flood survivors in recovering from this devastating disaster, the American Red Cross teamed with the Michigan Department of Human Services, Michigan 2-1-1, the Michigan Community Service Commission, and other community-based relief organizations to establish and operate "Multi-Agency Resource Centers" (MARCs) in 10 different locations over a six-day period in the latter-half of August. (A corresponding map found at Attachment 3 shows the initial locations of these MARCs.) The Multi-Agency Resource Centers, which were visited by several thousand flood survivors, provided a location and means to disseminate information regarding flood recovery and available flood recovery assistance. Through these centers, flood survivors could connect with or be referred to agencies and organizations that could assist them in their recovery – addressing everything from filing insurance claims, to replacing food and clothing, to making repairs to damaged homes. In addition, the Multi-Agency Resource Centers also provided a clearinghouse for the distribution of flood clean-up kits, personal comfort kits, and other recovery supplies to those requiring such items. To date, over 300 referrals for behavioral health assistance have been made through the centers and other involved agencies.

In addition to the Multi-Agency Resource Centers, flood survivors also have the opportunity to request flood recovery information and/or assistance via the Internet or Michigan 2-1-1 telephone system. These options were widely disseminated to the public and the media in various information releases. For the internet options, affected individuals could register directly with the Recovery Coordination Center (discussed in "Management of Emergency Volunteers" below) operated by Michigan Voluntary Organizations Active in Disasters, at www.bit.ly/floodcleanupsemi, or they could register via a specially-designated web page (www.michigan.gov/miflood) at the Michigan State Police Emergency Management and Homeland Security web site, which provides a link to the Recovery Coordination Center registration form. Either option results in a referral for recovery assistance to one of the Michigan Voluntary Organizations Active in Disasters member organizations providing assistance through the Recovery Coordination Center.

(I must note that, although the Multi-Agency Resource Centers, Michigan 2-1-1, and the aforementioned web sites have been tremendously successful to date in identifying and addressing both short- and longer-term recovery needs of the affected flood survivors in this disaster, it is clear that even these collective efforts are not going to be sufficient to identify and address all of the unmet needs of the thousands of flood survivors. This is particularly true with regard to home rebuilding and restoration efforts to ensure safe re-occupancy of damaged

structures. Because over 80-percent of the affected households in the three-county area did not have insurance in place to address the damage incurred in this flash flood, it is very likely that many will be forced to occupy their homes with potentially dangerous and/or unhealthy conditions present due to damaged electrical and mechanical systems and/or the presence of black mold or other contaminants on building materials not properly dried out and restored. Simply put, the long-term unmet needs of the flood survivors far outstrip the combined resources of the involved voluntary organizations, volunteers, and existing human service programs to remedy those needs. Clearly, federal disaster relief assistance is required to enable these flood survivors to fully recover from this devastating flood and allow them to make their dwellings safe and sanitary for re-occupancy.)

Without significant relief assistance from the federal government, these individuals will not have the resources necessary to fully repair and restore their damaged homes and mechanical systems, ensure their homes are free of mold and other health hazards, and replace damaged essential household items such as appliances, clothing, food, medications, and furniture and bedding. Without federal relief assistance, it is an almost certainty that many individuals will continue to struggle to recover and be forced to live in unhealthy conditions due to mold, contact with contaminated materials, and substandard (and likely unsafe) mechanical systems that they could not afford to have properly repaired by licensed professionals.

Management of Emergency Volunteers. To date, hundreds of emergency volunteers have been mobilized through the collective efforts of the American Red Cross, Michigan Voluntary Organizations Active in Disasters, Michigan Community Service Commission, Michigan Department of Human Services, local and state emergency management offices, and community-based organizations, to assist in the recovery from this flood disaster. In fact, volunteers have been and continue to be the lifeblood of the flood recovery effort. The aforementioned agencies and organizations have done a tremendous job in managing these volunteer resources and ensuring their timely and effective use. As I previously indicated, several Multi-Agency Resource Centers have been established and successfully operated in the affected counties to allow for the distribution of clean-up and personal comfort kits, and to facilitate the connection of those in need with the agencies and organizations that can provide recovery and relief information and/or assistance.

Central to the disaster volunteer management effort has been the establishment of a Recovery Coordination Center (RCC) to provide a means to coordinate the efforts of organizations that provide volunteer assistance to flood survivors needing help in repairing and restoring their home. The majority of the volunteers providing assistance are working under the framework of Michigan Voluntary Organizations Active in Disasters, and in coordination with state and local emergency management agencies, Michigan 2-1-1, the American Red Cross, the Michigan Department of Human Services, and other community-based organizations. The Recovery Coordination Center helps identify flood survivors requiring recovery assistance and determines the nature and scope of their recovery needs. The center provides ongoing case management for individual recovery and rebuilding/restoration efforts, ensuring that no one "falls through the cracks" and does not receive the assistance they need. Affected individuals are identified and referred to the Recovery Coordination Center by Michigan 2-1-1, local and state emergency management offices, Michigan Department of Human Services county offices,

the Michigan Community Service Commission, churches and other faith-based organizations, or by involved volunteers themselves. Once a flood victim is registered with the Recovery Coordination Center, their recovery needs are referred to the appropriate agency or volunteer organization for follow-up action. Through the center, voluntary organizations can also track their recovery efforts, thus ensuring an accurate accounting of the volunteer hours spent with each flood victim. Currently, over 4,000 homeowners have requested clean-up and restoration assistance through the Recovery Coordination Center. To date, over 250 homes have been completed using volunteers coordinated through the center.

However, as I indicated earlier, even with these outstanding volunteer efforts in place the collective capabilities of volunteers can only go so far in meeting the more difficult long-term recovery needs aimed at ensuring safe and sanitary conditions in flood-damaged homes. Because of the lack of adequate insurance (less than one in five households was adequately insured) to help pay for potentially-expensive repair and restoration activities required to make home structural elements and mechanical systems safe and functional, and to fully-remove the presence of black mold and other contaminants in flood-damaged building materials, it is essential that federal disaster relief assistance be provided. Absent this assistance, affected flood survivors will, in many cases, be forced to live in potentially-dangerous and/or unsanitary conditions because they do not have the financial resources necessary to fully restore their dwellings to pre-flood condition in a timely manner – or at all.

Debris Removal to Protect Public Health and Safety. Debris management was a critically important recovery issue in the days and weeks immediately following this flood disaster. Throughout the affected counties and communities, extensive and rapid debris operations were required to clear and remove flood-damaged building materials and personal property from curbsides and roadway rights-of-way in residential and commercial areas in order to protect public health and safety and enable the continuing use of adjacent roadways, sidewalks, and fire hydrants. The wet, heavy, contaminated flood debris from tens-of-thousands of flood-damaged homes and businesses, coupled with the hot and humid weather conditions that occurred in the days that immediately followed the flood disaster, set the stage for potentially-dangerous and unsanitary conditions in these densely-populated and heavily-developed urban areas. Because of the very real potential for a public health emergency, it was necessary for the affected local communities to muster all of the private and public debris clearance and removal resources they could to ensure rapid and environmentally-compliant removal and disposal of this debris.

In that regard, the affected local jurisdictions did an exemplary job in rapidly managing this difficult and potentially life-threatening recovery issue. With the assistance of various state agencies working out of the State Emergency Operations Center, the local jurisdictions were able to identify sufficient resources to address their debris removal and disposal needs in a rapid and environmentally-compliant manner. All of the affected local communities effectively worked with the Michigan Department of Environmental Quality to obtain required emergency waivers for temporary debris storage and transfer centers, and for emergency transportation of flood debris to approved landfill facilities. These debris removal efforts, however, came at a collective $7 million cost to the affected local jurisdictions in the three counties – a cost which

these jurisdictions are not in a position to bear without significant cuts to other essential programs and services.

Emergency Public Information. During the first hours and days after the flash flooding occurred, the affected local jurisdictions and several Michigan state agencies undertook a comprehensive emergency public information campaign to warn residents of the health and safety risks posed by the flooding and flood-related damage, and to provide updates on recovery issues and concerns. Of particular concern initially were the health and safety risks associated with structural damage, damaged electrical and mechanical systems, and contaminated flood debris. Later, the public information focus shifted to address longer-term recovery issues such as use of licensed and reputable contractors, price-gouging, scam avoidance, and home restoration best practices. This public information campaign continues today, in both English and appropriate non-English languages, and will so for the foreseeable future until all recovery-related issues and concerns have been effectively dealt with. All appropriate media sources have been utilized in this campaign, including television, radio, print media, and web and social media sites. Although there were two incident-related deaths in the early days after the flooding, since that time this campaign has been largely successful in minimizing flood-related injuries and health and safety problems.

The Michigan United Way 2-1-1 telephone referral system has been a tremendously successful means of disseminating important recovery-related information and making referrals to agencies and organizations that can provide recovery assistance. To date, Michigan 2-1-1 has fielded nearly 10,000 calls from individuals seeking flood recovery information and/or referrals. Michigan 2-1-1 has been instrumental in connecting individuals in need with the appropriate resources to enable them to recover from this flood disaster. Despite its success, Michigan 2-1-1 also had one potential downside, that is, the large number of "abandoned" calls from callers that chose to hang up rather than utilize the call-back option when lines were busy. Telephone logs show that over 3,100 calls were abandoned between mid-August and the first week of September. This is disturbing to me because there is no way to track with certainty whether or not these individuals actually did receive the information and/or assistance they were seeking when they initially called Michigan 2-1-1. My hope is that they did, but I suspect a portion of these callers simply gave up and did not further seek recovery information and/or assistance.

(I must note that my concerns in this regard are not necessarily limited to Michigan 2-1-1. Reports received from state and local staff that participated in the Preliminary Damage Assessment indicate that a potentially large number of affected individuals may not have sought assistance due to a number of reasons, including but not limited to: a general distrust of or frustration with government; language and/or cultural barriers; technology barriers, i.e., do not regularly monitor media reports, the internet, or social media; or a lack of understanding regarding available resources and the means for accessing those resources. If federal disaster relief assistance is granted based on this request, we may find many additional individuals that may seek to apply for federal assistance – over and above those estimates developed in the Preliminary Damage Assessment.)

State Response and Recovery Assistance Efforts. Michigan's state departments and agencies and nongovernmental partner organizations have provided whatever appropriate resources they had at their avail to assist the affected counties and local jurisdictions in responding to and recovering from this flood disaster. Although the following is by no means an all-inclusive accounting of all response and recovery efforts, it does provide brief synopses of some of the more noteworthy efforts:

The **Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD)** began to monitor the incident in the early evening of August 11, after reports of flash flooding were first received from the affected local emergency management officials and the National Weather Service. Immediate communications were established with the local emergency management officials to assess the nature, scope, and magnitude of the incident and to help coordinate the provision of state resources as needed. This monitoring continued through the evening hours of August 11. When reports from the affected local jurisdictions and the Michigan Department of Transportation indicated that metropolitan Detroit interstate highways and major roadways had suffered major flooding, the MSP/EMHSD notified key staff to report to the State Emergency Operations Center (SEOC). The SEOC was in partial activation status for several hours, and then went to full activation status at 10:00 AM on August 12. Numerous departments, agencies, and nongovernmental partners responded and reported to the SEOC for duty.

The MSP/EMHSD coordinated SEOC operations at full activation status for the next 14 days, operating 24 hours a day, 7 days a week, on 12-hour shifts. On August 25, the overnight shift was terminated and the operational hours were changed to 8:00 AM till 8:00 PM. The SEOC remained on that schedule for two days, until August 27, when the hours were changed to 8:00 AM till 5:00 PM to more closely align with the Preliminary Damage Assessment operations ongoing in the three-county impact area. On September 8, the SEOC went to a weekly operational period.

Throughout the SEOC activation, the MSP/EMHSD staffed command, operations, logistics, planning, public information, mapping and technical support positions to keep the SEOC functioning at full capability and to fully support the state department/agency and nongovernmental partner representatives present in the facility. During this period, the MSP/EMHSD coordinated all resource requests received from the affected local jurisdictions, ensuring that each request was appropriately addressed in a timely manner. The MSP/EMHSD also coordinated the collection, compilation, review, analysis, synthesis, and reporting of damage and impact assessment information received from the affected jurisdictions and state departments/agencies. The MSP/EMHSD also conducted several briefings daily for local officials, state departments/agencies and nongovernmental partners, and other interested parties, to keep all stakeholders apprised of ongoing or planned activities and areas of concern. Daily incident management plans were developed by SEOC command staff to focus SEOC activities on planned incident management objectives and to ensure that state resources were being appropriately utilized to address the most pressing issues during the operational period. In addition, the MSP/EMHSD developed numerous daily written situation status reports and public information releases to keep SEOC staff, state government executive and legislative

leadership, local officials, our emergency management partners, and the public informed of ongoing issues, concerns, activities, and opportunities for coordination and/or involvement.

From August 25 to September 9, the MSP/EMHSD worked closely with Federal Emergency Management Agency officials to coordinate and conduct Preliminary Damage Assessments for both Individual Assistance and Public Assistance in the three-county impact area. The MSP/EMHSD was instrumental in the set-up of and conduct of the Preliminary Damage Assessment, handling all administrative and logistical aspects of the operation from the SEOC and an on-site coordination center established at the Double Tree Inn in Dearborn. Lastly, using the assessment information and findings from the Preliminary Damage Assessment, the MSP/EMHSD provided considerable technical assistance to me and my staff in the drafting of this request letter and in compiling the supporting information found in the various Attachments and Enclosures.

In addition to the MSP/EMHSD contributions, the **Michigan State Police (MSP)** also deployed considerable resources during the flood response to assist local officials in controlling access to flooded areas, conducting underwater search and rescue in flooded areas, and assisting with security and traffic control as required. Early in the response, the MSP Aviation Unit also flew aerial reconnaissance and assessment missions over the affected areas to search for additional stranded motorists on flooded highways, to aid local and state officials in determining the scope and magnitude of the flooding, and to take aerial photographs and video footage of flooded areas for damage and impact assessment purposes. (Some of those photographs appear in this letter at Attachment 3.) The MSP Special Operations Division also assisted at the SEOC, and the Michigan Intelligence Operations Center (MIOC) continuously monitored the flooding conditions and sent out situational awareness bulletins on the weather and flooding to all stakeholder partners through the duration of the response and recovery.

The **Michigan Department of Agriculture and Rural Development (MDARD)** made available flood clean-up (to include sewage) guidance to affected food establishments in the three-county impact area. This guidance was provided in English, Spanish, Arabic, and Mandarin languages. In addition, the MDARD and the U.S. Food and Drug Administration (FDA) Detroit District Office coordinated with various food industry associations in Michigan to assess the impact of the flooding on the food and agriculture sector and to determine appropriate follow-up measures necessary to protect public health. (Providing the clean-up guidance to food establishments was one of the necessary measures.) During this outreach process, the MDARD focused on food warehouses and retail establishments while the FDA focused on food processors and other regulated firms (e.g., drug, biologics, medical devices, etc.) within the local jurisdictions most heavily impacted by the flooding. (Those jurisdictions included but were not limited to: Warren, St. Clair Shores, and Clinton Township in Macomb County; Madison Heights, Ferndale, and Royal Oak in Oakland County; and Dearborn, Dearborn Heights, and Detroit in Wayne County.) In addition, the MDARD also reached out to the affected health departments (county and City of Detroit) who license and inspect restaurants, and with major grocery store chains and trade associations. MDARD personnel also inspected a number of gasoline stations in the affected area to determine if any had issues with flood water in their gasoline storage

tanks. (One did, but the issue was satisfactorily resolved by the state inspectors.)

The **Michigan Department of Community Health (MDCH)** coordinated with affected local health departments regarding the provision of disaster behavioral health resources; monitored and coordinated with local hospitals and the Region 2 Health Care Coalition regarding flood-related damage and the resultant impacts on hospital operations; and worked closely with the SEOC Public Information Officer to disseminate appropriate and timely health-related information to flood survivors.

The **Michigan Department of Environmental Quality (MDEQ)** coordinated extensively with local officials involved in debris management operations to ensure compliance with federal and state environmental laws and regulations; issued timely emergency approvals of sites designated for use as temporary debris storage and transfer sites; issued other emergency authorizations and waivers where appropriate; provided technical assistance to local officials and private debris management firms regarding issues pertaining to the collection, storage, transport, and disposal of flood-related debris; assisted in the identification of supplemental debris management resources for local officials in need of such resources; and monitored flood-related impacts on local drinking water treatment plants and operations in the affected area.

The **Michigan Department of Human Services (MDHS)** coordinated with involved voluntary relief organizations, community-based organizations, MDHS County Offices and the Michigan Community Service Commission, Michigan 2-1-1, and other human service providers to identify, assess, and attempt to meet the recovery needs of flood survivors. The MDHS undertook a number of activities during the response and recovery phases of this disaster to meet this broad mission, including but not limited to: coordinating with the American Red Cross, Michigan Voluntary Organizations Active in Disasters, and other voluntary relief organizations to establish and operate two temporary emergency shelters, 10 Multi-Agency Resource Centers, and a Recovery Coordination Center; coordinating the distribution of thousands of clean-up and personal comfort kits; coordinating with the SEOC Public Information Officer and other public information officials regarding the dissemination of appropriate and timely recovery information using all available means (e.g., Michigan 2-1-1, web and social media sites, television, radio, etc.); registering eligible flood survivors for the limited MDHS emergency relief assistance available; coordinating the receipt and use of donated goods for the recovery effort; resolving debris management issues for volunteers providing clean-up and/or repair assistance through the Recovery Coordination Center; assisting with volunteer recruitment through the Michigan Community Service Commission and other means; procuring needed supplies for volunteer repair/clean-up teams; and addressing recovery-related issues for various functional needs populations affected by the flooding.

The **Michigan Department of Licensing and Regulatory Affairs (MDLARA)** monitored incident-related energy disruptions and energy supply issues related to the storms and flooding; monitored the operations of regulated health care facilities affected by the flooding; provided (through the Michigan Occupational Safety and Health Administration – MIOSHA) worker safety information to emergency responders and workers, as appropriate; and provided (through the

Bureau of Construction Codes) information to citizens in the City of Highland Park and other communities on mandated building, mechanical, electrical and plumbing inspections.

The **Michigan Department of Technology, Management and Budget (MDTMB)** monitored the impacts of the flooding on state owned and operated facilities and state government operations in the three-county area; assisted in obtaining needed resources for emergency operations and/or flood recovery through standing vendor contracts and/or the state's emergency procurement process; identified and procured office space and coordinated information technology installation for needed emergency facilities; and assisted in transporting recovery supplies to Multi-Agency Resource Centers and other distribution facilities.

The **Michigan Department of Transportation (MDOT)**, assisted by local public works and law enforcement personnel and the Michigan State Police, managed the closure of several sections of interstate and state highways in and around metropolitan Detroit that were inundated by flood water. This included several sections interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39. The MDOT also monitored and reported on closures of local roads and bridges by local officials; reported on the scope and magnitude of road and bridge damage in the affected counties; coordinated with the Federal Highway Administration (FHWA) regarding implementation of its Emergency Relief Program; and participated in the Public Assistance Preliminary Damage Assessment for road and bridge damage.

To: MSP-EMHSD-Division
Subject: RE: Coding for City of Flint Water Contamination incident
Attachments: DCDS Hours Entry by Coding Block.docx

Good Morning,

Attached are the guidelines for entering your time in DCDS by coding block for those of you that are working **overtime** for the City of Flint Contamination/Shortage event. Please use **Index 28900 with PCA 28670** for overtime worked for this event. Do not use these codes for your regular hours.

Please contact one of the division timekeepers if you need additional guidance in entering the special codes for recording your overtime worked on this special event. Division timekeepers are Michelle Gilsdorf, Richard Sheaffer, and Nancy Downs.

Thank you,
Nancy

Subject: Coding for City of Flint Water Contamination incident

Good Afternoon:

For any **overtime hours** spent working in the SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:

Index 28900 with PCA 28670

Any **non-payroll** costs (travel, SEOC meals during activation, etc.) should be coded to:

Index 28900 with PCA 28671.

These codes are not yet active in DCDS but will be by the end of the week. Please let me know if you have any questions.

Thanks,
Penny

Subject: Flint JIC

June,

I was wondering would you be able to go to the JIC in Flint Friday January 29, 2016 – Monday February 1, 2016.

Here are the responsibilities....

Role will be Web EOC/JIC Planning and Logistics. Does not have to be a trained PIO. They need to be familiar with Web EOC and help with lunches, daily situation report, and any other assigned tasks.

Would you be available to do this?

Thanks
Tonya

Tonya,

I just stopped in to the office for a brief time this morning. I've been working out at our new facility all week. Sorry, I am unable to be in Flint on Friday or Sunday. I could help out on Saturday, if help is still needed.

Subject: SEOC Assistance- Situation Unit

Good Morning,

We are looking for help filling either the 8-2 or 2-8 shift in the situation/documentation unit in the SEOC. This would mean you would work 6 hours in the SEOC and 2 hours in the office daily. These positions would assist in taking notes during meetings and developing the daily situation report. The planning section will train you ahead of time. Please let me know your availability for the next couple weeks. We are also looking to fill 12 hour shifts on the weekend.

Please call me if you have any questions- 517-242-2527.

Thanks!
Amanda

Hi Amanda,

I just noticed that you wanted to know our availability during the next couple of weeks. I can work the morning shift any day, but only have a couple of evenings open. I am available on Saturdays, Feb. 13 & Feb. 20; Sunday, Feb. 28 and can be available Sunday, Feb. 21 (if given advance notice, if needed).

Please let me know if you have any other needs.

Subject: Additional DCDS Coding - City of Flint
Attachments: Activity Tab DCDS.png

Good Afternoon:

The State Budget Office (SBO) has requested some additional coding in DCDS for staff that work on the City of Flint Water Emergency. We will still be coding all overtime costs to PCA 28670. But at their request, we will also be utilizing the "Activity" code in DCDS.

To enter Activity Code

- Open Employee Data Collection
- Click on **Activity Tab** of DCDS timesheet
- On the Unit Entry tab, under Activity column at left, enter F in drop down box and select **FDWP** when it appears.
- Enter total of "**regular and overtime hours**" related to the Flint Water emergency in cell for each date worked.
- These hours should match the total hours for each day you have entered into your timesheet.
- Save when you have entered your activity hours.

Again, this is only for hours spent working on the City of Flint Emergency and should begin with this current pay period. Please let me know if you have questions.

Thanks,
Penny

Subject: Revised: Volunteers needed for water resource teams in Flint

Note: Dates are January 14 and January 15.

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on Thursday, January 14 and Friday, January 15. Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

This email was sent to alimoa1@michigan.gov using GovDelivery, on behalf of: Michigan State Police 333 S Grand Ave · P.O. Box 30634 Lansing, MI 48933

Subject: UPDATE: Flint JIC Parking

Fellow Flint Joint Information Center PIOs,

DTMB Facilities Management has asked that those working in the Flint Joint Information Center to begin parking at any of the following spaces in the Flint State of Michigan Office Building parking garage:

Assigned Spaces

- Level 3
  - 67
  - 115
  - 117
  - 123
  - 125

- Level 4
  - 144
  - 146
  - 148
  - 150
  - 151
  - 153
  - 154
  - 155
  - 157
  - 158
  - 159
  - 160
  - 161
  - 162
  - 163
  - 164
  - 165
  - 166

- 167
- 168

- Level 5 (Roof)
  - Any Space

To get to these spots, use the parking garage entrance on Harrison Street. Continue up the ramp until you reach the State of Michigan security gate. Beginning at 6:30 a.m., a security guard will be stationed at the gate to ensure nobody has any trouble getting through to our spots.

JIC Location

More than 176,100 Cases of Water Provided to Flint Residents to Date

FOR IMMEDIATE RELEASE
January 25, 2016

For more information contact:
Joint Information Center
888-EMD-TODAY (888-363-8632)
Release #: 17

FLINT, Mich. – In just over a two-week time period, 176,118 cases of water and 93,048 water filters have been provided to Flint residents, both at water resource sites and by water response teams.
Water response teams comprised of city, county and state personnel, American Red Cross and volunteers continued their door-to-door efforts, today visiting another 2,596 homes providing free bottled water, filters, water replacement cartridges and water testing kits.

Now that water response teams have completed two canvasses of the city providing water resources, the Michigan National Guard has scaled back their commitment from approximately 270 soldiers and Airmen to 70 soldiers who continue to staff water resource sites.

Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

- 176,118 cases of water
- 93,048 water filters

•29,320 water testing kits

Water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Road
Flint, MI 48506

Fire Station #6
716 West Pierson Road
Flint, MI 48505

Fire Station #8
202 East Atherton Road
Flint, MI 48507

The State of Michigan continues to coordinate response efforts in partnership with the city of Flint, Genesee County and local community organizations.

Additional information is available at www.michigan.gov/flintwater, by calling 211 or visiting www.helpforflint.com.

Fellow PIOs,

It appears the Joint Information Center in Flint will remain operational through the next two weeks. With that, I am asking for any PIOs with availability to please respond by the end of the day today with your availability. We will not be staffed during the weekends.

This operation is a true State of Michigan team effort and I thank you for your continued support and assistance.

Please reach out if you have any questions.

Sincerely,

Shanon Banner
Manager, Public Affairs Section
Michigan State Police

Hi Kevin,

You have been tremendously beneficial to us and I would love to have you back. There's a chance we'll be back in Lansing by Feb 8. If that's the case, we won't need someone at the PIO desk in the SEOC. Can I pencil you in tentatively and let you know next week? I'd work around your two appointments if I end up needing you.

Subject: RE: URGENT: Flint JIC Staffing - Two Weeks

Shanon-

As you know I am out of state next week.

I could come back the week of Feb 8 - 12, but have two things I really need to attend. Those are:

Monday Feb 8 (need to leave at 4pm)
Wednesday Feb 11 (need to leave for two hours - 12pm - 2pm)

If we are able to work around those two things, I could be back

Please advise as there are several other meetings I will have to cancel out of

Thanks
K

Fellow PIOs,

It appears the Joint Information Center in Flint will remain operational through the next two weeks. With that, I am asking for any PIOs with availability to please respond by the end of the day today with your availability. We will not be staffed during the weekends.

This operation is a true State of Michigan team effort and I thank you for your continued support and assistance.

Please reach out if you have any questions.

Sincerely,

Shanon Banner

Jen,
Can you have someone (an expert with the NSF/ANSI standards) call the centers and explain that they are not filtering the lead out?

Kevin,
Is this something the JIC should push out like Michelle mentioned below?

Gabe

Have Someone that can speak to the specifics of the NSF/ANSI standards call the centers and explain.

Yes, also send to the JIC so that they can put messaging out warning people to watch out for vendors selling equipment that doesn't meet the standards identified by the (state, feds, etc.?).

From: MSP-SEOCOPSC

Subject: FW: Bluewater water purifiers help Flint

Michelle,
Who should look into this, I don't know where to ship this? PIO as an FYI? Shouldn't someone call the folks that bought the system?
Quick summary:

- This company has a water filter system
- They have sold to "two" places in Flint *"Community Center at Catholic Charities of Shiawassee and Genesee Counties, where they serve 1,000 meals every day to local residents. The other unit was installed at Shelter of Flint, the largest shelter at Flint. "*

- DEQ checked them out and the Bluewater filters are not NSF/ANSI 53 for lead reduction.

I don't just want it to sit in my inbox...

Could we have someone look into the water purifier (attached) to see if it meets NSF standards? The unit was already installed in a couple locations within Flint (below) and would like to make sure the unit will not need to be replaced.

Thank you –

Jeanette

Jeanette

As we previously discussed, you are my contact to triage and route external inquiries. Bluewater called me this morning, and I requested an email with more information.

It is unclear to me whether this unit meets the standards used for the faucet water filter sourcing. Can a resource be identified to check? If not, someone may want to consider reaching out to the two locations that received donated units.

Thanks for routing this into the correct hands.

Rebecca

Subject: Bluewater water purifiers help Flint

Hi Rebecca,

It was nice talking to you this morning, we will appreciate if you can read this email and forward to related team who in charge of procurement for Flint water crisis.

Bluewater is a Swedish company that has innovated a patented second-generation reverse osmosis technology which turns tap water into healthier drinking water by removing up to 99% of almost all known water-borne contaminants; plus, cuts the water wastage common to traditional reverse osmosis systems by up to 82%.

Bluewater has been selling in the USA for the past 18 months, based out of Overland Park, Kansas, where we also have our warehouse that serves customers across the United States. We are a sister company to Blueair, which is one of the major air purifier companies in the United States, based out of Chicago.

Last week saw us donate and install two of our high performance water purifiers in Flint, Michigan, in response to their crisis as our water purifiers excel at removing lead and other toxic metals from residential drinking water. While we applaud people donating water bottles, it is only a short term solution, whereas as water purifiers are both a short-term and a long term solution.

One Bluewater Pro machine was installed at the Community Center at Catholic Charities of Shiawassee and Genesee Counties, where they serve 1,000 meals every day to local residents. The other unit was installed at Shelter of Flint, the largest shelter at Flint.

Both units were installed by Bluewater's Product Manager who traveled to Flint personally. FYI, many bottled water brands in the USA use reverse osmosis to purify their water. Using a Bluewater unit is a cheaper long-term option that also contributes to a better environment because they negate the need for plastic bottles as they deliver purifier water 'on demand'. (a side note, as you may already know, "Pepsi Admits That Its Aquafina Bottled Water is Just Tap Water, Coca-Cola's Dasani Is Next" see news of today http://healthycures.org/pepsi-admits-that-its-aquafina-bottled-water-is-just-tap-water-coca-colas-dasani-is-next

The Bluewater Pro400 reverse osmosis water purifiers we donated to Flint can produce 52 gallons of purified water per hour, which means we can supply 2,700 people a total of two liters of clean water free of lead and other toxic metals every day. This translates into saving 4,800 one-liter bottles being put into the environment every day!

The compact Pro is designed for professional use, in restaurants, hotels, schools, hospitals and laboratories. Installing just 38 of our units in Flint would deliver the 100,000 residents two liters of totally clean water every day - meeting their basic daily human health need for drinking water.

Bluewater harnesses our own patented second-generation reverse osmosis technology, which removes practically all toxic contamination from tap drinking water including lead. The other contaminates we remove include other heavy metals, pesticides, medical residues, and dioxins and petro chemicals.

What also makes our water purifiers unique is that our unique technology ALSO radically increases the efficiency of water treatment, which translates into a Bluewater unit using 82% less water to generate clean water than a traditional reverse osmosis unit.

Reverse osmosis technology purifies water by forcing untreated water through a semi-permeable filter or 'membrane'. Bluewater membranes will block toxic metals and chemicals down to 0.0001 micron (that's 500,000 times smaller than a human hair). Our technology also delivers water 'on-demand', which means no need for a holding tank

As a business, we cannot afford to donate an endless number of units free to Flint, but due to the special nature of the situation (and the fact that most of us are parents of small children and have huge sympathy for those impacted by the crisis) we want to step up even more by offering Michigan State prices that are very substantially discounted. In fact, we want to offer you a one-off purchase opportunity that sees us offering you our products at the manufacturing price (i.e. we make no margin on the deal).

This would see the products we recommend you consider coming in at:

Pro 400C-HF(high flow) (this is the model we donated to Flint) $1920 + shipping
(suitable for professional use, hospitals, labs, restaurant, coffee shop, office building)
- Superior Osmosis Technology
- Direct flow, no need of tank
- Capacity up to 52 gallon per hour
- Clean water delivery rate of 52 gallon per hour
- Cleaning brackish water, up to 7500 ppm
- water quality monitor
- Calibration of cleanliness
- Advanced leak protection system
-Clean water per kWh: 433L/kWh (114.3gallon/kWh)
-Clean water rate: 222L/hour (58.6 gallons/hour)
-Dimensions: 225 x 466 x 460mm (8.9 x 18.3 x 18.10 inch)
-Weight: 29kgs (64lb)
-Water recovery rate: 60-70%

<u>The other two models we could consider as an alternative (the only difference is that the water flow is less powerful) are:</u>

Spirit 300-HF(high flow) $1350 + shipping
Compact design that fits into any contemporary kitchen
- Designed for Municipal water
- Superior Osmosis Technology

- Capacity up to 43.2 gallon per hour
- Director Flow, no need of tank
- Extra compact Design
- Advanced leak protection system
- Clean water per KWh: 377L/kWh (99.5 gallons/kWh)
- Clean water rate: of 99L/hour (26.2 gallons/hour)
- Dimensions: 150 x 462 x 365 mm(5.9 x 18.2 x 14.4 inches)
- Weight: 15 kgs (33lb)
- Water recovery rate: 40-60%

Spirit 300Cp-HR(high rejection) $1500 + shipping
Compact design that fits into any contemporary kitchen, can connect to dish washer, coffee maker, ice machine/refrigerator
- Designed for Municipal water
- Superior Osmosis Technology
- Capacity up to 43.2 gallon per hour
- Director Flow, no need of tank
- Extra compact Design
- Advanced leak protection system
- Clean water per KWh: 377L/kWh (99.5 gallons/kWh)
- Clean water rate: of 99L/hour (26.2 gallons/hour)
- Dimensions: 150 x 462 x 365 mm(5.9 x 18.2 x 14.4 inches)
- Weight: 15 kgs (33lb)
- Water recovery rate: 40-60%

Please do not hesitate to get back if there is anything additional information you need from us. Attached is our catalog and photo how it looks in the kitchen.

Here are two reference you can contact at Flint, they are using our donated water purifiers now for producing pure water

PHOTO/VIDEO OPPORTUNITY TODAY

January 28, 2016

****NEW TIME****

Lt. Gov. Brian Calley to participate Community Coalition kicks off water bottle recycling program

Who:
Lt. Gov. Brian Calley will join a coalition of public-private partners including the State of Michigan, City of Flint, Genesee County, Schupan Recycling, Republic Services, Young's Environmental Cleanup, Keep Genesee County Beautiful and UM-Flint

Speakers include:

- Lt. Governor Brian Calley
- Matt Flechter, Recycling Market Development Specialist, State of Michigan
- Heather Griffin, Waste Services Coordinator, City of Flint
- Shane Kelley, Planner, Genesee County Metropolitan Planning Commission

What:
Will host a media event to announce Flint's coordinated recycling program in place for empty water bottles and used water filter cartridges

When:
Thursday, January 28, 2016
NOON

Where:

Fire Station #1
310 E. 5th St., Flint

- The press conference will take place behind the fire station near the water distribution station

Details:
Public and private partners will detail the collaborative short- and long-term recycling efforts for water bottles and filter cartridges.

###

NOTE:
ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632).

Subject: THANK YOU: Flint JIC Staffing

Fellow PIOs,

Thank you for providing staffing for the Flint Joint Information Center. We have attached the latest two-week staffing roster.

Please note that we still need staff to help during the week of Feb. 1-5.

No prior experience is required to work in the Flint JIC. Lunch is provided. Hotels rooms are available upon request.

If you have any questions, please let me know.

Thanks,

Ron

STATE OF MICHIGAN
JOINT INFORMATION CENTER

NEWS RELEASE

FOR IMMEDIATE RELEASE
January 29, 2016
Release #: 23

Gov. Snyder Approves $28 Million in Immediate Aid for City of Flint

Appropriation will fund several programs to address Water Crisis

Flint, Mich. – Gov. Rick Snyder today, signed a $28 million budget supplemental which assists Flint residents by addressing the city's on-going water crisis. The supplemental, which Snyder called for in his State of the State Address January 19th, was approved by the legislature Thursday and signed by the governor this morning.

"I thank the Legislature for their quick action to make this additional $28 million a reality. It is a necessary next-step in ongoing recovery efforts for the city," Snyder said. "We know that more money will be needed to address long-term concerns and I want to reassure the families of Flint that I remain dedicated to fixing this problem,"

House Bill 5220, approved unanimously in both the House and Senate, will help ensure Flint residents have access to safe, clean drinking water in addition to the following:

- Supply free bottled water, faucet filters, and testing kits for Flint residents;
- Put nine nurses in local schools to monitor student health and well-being;
- Provide better nutrition for students and infants through WIC and in-school nutrition programs;
- Replace fixtures in schools, daycares, nursing homes and hospitals;
- Provide for an infrastructure study using independent experts;
- Treat any children who have high lead levels in the blood, using diagnostic testing, nurse visits and environmental assessments in the home;

Gov. Snyder will propose a long-term funding solution to address the ongoing needs of Flint in his Feb. 10 formal budget recommendation to the legislature.

In the continuing effort to identify the location of lead pipes and other components of Flint's water infrastructure, Geographic Information Systems (GIS) experts from the

MORE

Release #: 22

City of Flint, State of Michigan, the University of Michigan–Flint, and Federal Emergency Management Agency (FEMA) have translated hundreds of hand-drawn plat maps and hand-written notes from the 1980's into digitized maps. The maps are helping the State target its response and determine where safe water is needed.

"Since most of the water system infrastructure is underground, we can't simply walk out and survey it," said Capt. Chris A. Kelenske, deputy state director of emergency management and homeland security and commander of the Michigan State Police Emergency Management and Homeland Security Division. "This mapping will be a critical component of the State's coordinated response in Flint."

Once maps are fully digitized, they will be synched with 2015 parcel data and can then be overlaid with Census and infrastructure information which will allow analysts to pinpoint which inhabited homes have lead service lines.

Additionally, efforts continue to ensure city-wide distribution of bottled water, filters, water replacement cartridges and water testing kits.

Water response teams continue door-to-door delivery efforts with American Red Cross and other volunteers visiting 1,768 Flint homes today. Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

- 207,055 cases of water
- 97,342 water filters
- 30,801 water testing kits

Additionally, water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1 (also a water bottle recycling site)
310 East 5th St.

Fire Station #3
1525 Martin Luther King Ave.

Fire Station #5 (also a water bottle recycling site)
3402 Western Rd.

Fire Station #6
716 West Pierson Rd.

MORE

Release #: 22

Fire Station #8 (also a water bottle recycling site)
202 East Atherton Rd.

Due to an overwhelming response from individuals donating water and other items, a new office has been set-up to assist with donations and inquiries on how individuals can assist. Please direct future inquiries to:

FlintDonations@michigan.gov

517-420-4162

Additional information is available at www.michigan.gov/flintwater, by calling 211 **or 844-875-9211** or visiting www.helpforflint.com

###

NOTE: ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632). FOR FLINT WATER EMERGENCY DONATION INFORMATION, GO TO www.helpforflint.com.

Amanda

Can you please print the attached press release, staple it to the cover sheet I gave you and give it to Kim Richmond for review and approval. This is of course pending the final numbers being plugged in.

I have reviewed the press release and see no errors with it. If there are any questions please feel free to call me at

Thanks you for your extra help!

Hi Mr. Kelley, I went in and copied the script from the video, so the formatting is a little odd, but all the words should be there. Eric had already used the English closed captioning, but we had a newer video that was uploaded. This is the link to the updated video...

https://www.youtube.com/watch?v=Y0hfK6E8R18

Attached is the script.

Hi Dan,

Too funny, I believe they were just talking about this yesterday. I've cc'd F/Lt. Kevin Sweeney who is our SEOC PIO. I believe he knows more about the video than I do.

Thanks,

Wendy

Wendy:

MSP, Emergency Management and Homeland Security Division posted this video about Flint water filters on the agency's YouTube site.

https://www.youtube.com/watch?v=979YIP4KoZ8

Could you put me in touch with whoever is responsible for this? We'd like permission to open caption this video in spanish to help the spanish-language population in Flint?

Let me know...and thanks.

Today we are going to demonstrate how to install the Brita faucet mounted water filter system. This system is the unit that is being provided, at no charge to the citizens of Flint, by the Michigan Department of Health and Human Services. As I mentioned it is the Brita Faucet Mounted Filter and it is NSF53 certified to reduce lead. Once opening the package you will notice that it comes with an instruction manual, the faucet system itself, the filter, as well as a package of adaptors. On this actual unit you will notice that there is a turn style knob located on the side of the unit. In the up position your water will be running through the filter, exiting right here, ensuring that you are having filtered water. If you'd like to run your water without going through the filter, you will simply turn this knob to the left and that will bypass the filter, giving you straight water from your tap. The first time you install this filter you'll want to ensure that you run cold water only for a matter of 5 minutes. That ensures that the system is completely flushed out and ready for use. As you are utilizing the filter throughout the day you'll

want to only run cold water as hot water will damage the filter itself. On the filter you will notice a light indicator in between the faucet and the actual filter, which when initially installed will be solid green. As you are utilizing this filter you'll notice approximately three -quarters of the life of the filter it will start to turn green and red. That signifies that you only have 20 gallons of water remaining. Once that light indicator turns to a solid red that notifies you that it is time to replace the filter.

What we have here is a standard kitchen sink faucet. What you're going to want to do is to take off the lower portion of the faucet. If you are unable to loosen that by hand, obtain a paid of channel locks or pliers, put and little wrap around that, lightly grip that portion and ever so slightly loosen until you are able to hand untighten that unit. You'll want to then remove this completely, taking off with it the washer and the screen that's included. As you will notice the Brita filter system does screw on to your faucet. In the particular case we'll need to use one

of the included adapters for it to fit. So we have selected this adapter, as you will notice it will fit into here. You'll also want to install with it the rubber washer so that you can avoid any leaks. Installing the rubber washer is fairly easy. You'll notice a lip here, and you'll set that on top of it, making sure that you press into place, like so. You will then hand tighten this to your kitchen sink faucet. Once tightened, go a quarter turn past tight to ensure a proper fit. You'll then take your Brita faucet filter placing it up to there and hand tightening the unit to the faucet. Being careful not to over tighten with pliers or channel locks. Once that is installed take your filter, lining up the tabs, gently insert that into the housing and snap into place. Once the unit is installed ensure that the tab is in the upright position. That will ensure that the water will be running through the filter itself. You'll want to then run the faucet using cold water only for a period of 5 minutes to ensure that all the contaminants are flushed out of the filter itself.

Gov. Snyder Approves $28 Million in Immediate Aid for City of Flint
Appropriation will fund several programs to address Water Crisis

FOR IMMEDIATE RELEASE
January 29, 2016
Release #: 23

Flint, Mich. – Gov. Rick Snyder today, signed a $28 million budget supplemental which assists Flint residents by addressing the city's on-going water crisis. The supplemental, which Snyder called for in his State of the State Address January 19th, was approved by the legislature Thursday and signed by the Governor this morning.

"I thank the Legislature for their quick action to make this additional $28 million a reality. It is a necessary next-step in ongoing recovery efforts for the city," Snyder said. "We know that more money will be needed to address long-term concerns and I want to reassure the families of Flint that I remain dedicated to fixing this problem."

House Bill 5220, approved unanimously in both the House and Senate, will help ensure Flint residents have access to safe, clean drinking water in addition to the following:

- Supply free bottled water, faucet filters, and testing kits for Flint residents;
- Put nine nurses in local schools to monitor student health and well-being;
- Provide better nutrition for students and infants through WIC and in-school nutrition programs;
- Replace fixtures in schools, daycares, nursing homes and hospitals;
- Provide for an infrastructure study using independent experts;
- Treat any children who have high lead levels in the blood, using diagnostic testing, nurse visits and environmental assessments in the home.

Gov. Snyder will propose a long-term funding solution to address the ongoing needs of Flint in his Feb. 10 formal budget recommendation to the legislature.

In the continuing effort to identify the location of lead pipes and other components of Flint's water infrastructure, Geographic Information Systems (GIS) experts from the

City of Flint, State of Michigan, the University of Michigan–Flint, and Federal Emergency Management Agency (FEMA) have translated hundreds of hand-drawn plat maps and hand-written notes from the 1980's into digitized maps. The maps are helping the State target its response and determine where safe water is needed.

"Since most of the water system infrastructure is underground, we can't simply walk out and survey it," said Capt. Chris A. Kelenske, deputy state director of emergency management and homeland security and commander of the Michigan State Police Emergency Management and Homeland Security Division. "This mapping will be a critical component of the State's coordinated response in Flint."

Once maps are fully digitized, they will be synced with 2015 parcel data and can then be overlaid with Census and infrastructure information which will allow analysts to pinpoint which inhabited homes have lead service lines.

Additionally, efforts continue to ensure city-wide distribution of bottled water, filters, water replacement cartridges and water testing kits.

Water response teams continue door-to-door delivery efforts with American Red Cross and other volunteers visiting 924 Flint homes today. Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

- 216,605 cases of water
- 98,641 water filters
- 31,111 water testing kits

Additionally, water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1 (also a water bottle recycling site)
310 East 5th St.

Fire Station #3
1525 Martin Luther King Ave.

Fire Station #5 (also a water bottle recycling site)
3402 Western Rd.

Fire Station #6
716 West Pierson Rd.

Fire Station #8 (also a water bottle recycling site)
202 East Atherton Rd.

Due to an overwhelming response from individuals donating water and other items, a new office has been set-up to assist with donations and inquiries on how individuals can assist. Please direct future inquiries to:

Insp. Bolger and Lt. Sweeney,

Just an FYI. Jim T was just telling me about his conversation with the Detroit Free Press reporter this afternoon. Jim said while he was speaking to the reporter he did not have a good feeling based on the questions the reporter asked. He got the impression that the reporter wanted to paint a picture that the state is behind the ball. Jim ensured that he turned all the reporter questions for the positive. We just wanted to make sure you had a heads up prior to the story coming out.

Feel free to follow up with Jim further if you have any questions.

Amanda

American Red Cross and United Way Play Crucial Role Coordinating Volunteer Efforts in Flint

FOR IMMEDIATE RELEASE
February 9, 2016
Release #: 32

FLINT, Mich. – Since early January, over 2,000 volunteers have volunteered their time to assist Flint residents during the water emergency. Volunteers are coordinated through the Volunteer Reception Center, operated jointly by the American Red Cross and United Way of Genesee County. These volunteers have performed numerous tasks throughout the community from delivering water resources door-to-door to assembling water test kits.

"We have had volunteers of all ages from all different backgrounds come forward to help," stated Sarah Lewan, community volunteer manager. "We have processed more than 200 groups of varying sizes, including corporate groups, social groups and concerned citizens."

Volunteers are utilized at a variety of community organizations to provide assistance with water distribution, warehousing, data entry and assembly of water test kits. The volunteers give whatever time they can, whether it is a couple of hours or availability for several days.

There are opportunities for additional groups and individuals to volunteer. To learn more or sign-up to volunteer, visit www.flintvolunteer.com.
The State of Michigan continues to coordinate response efforts in partnership with the City of Flint, Genesee County and local community organizations.

Additional information about water response efforts is available at www.michigan.gov/flintwater, by calling United Way's 211 or visiting www.helpforflint.com.

Outreach to Flint's Blind Community Helps Ensure Access to Information and Resources

FOR IMMEDIATE RELEASE
February 9, 2016
Release #: 33

Flint, Mich. – The Bureau of Services for Blind Persons (BSBP) is working to ensure Flint's blind community has access to all information and resources related to the Flint water emergency.

"We have made direct contact with all of the bureau's blind clients who live in Flint to ensure they have the resources they need and we will continue to provide assistance to any Flint resident who is blind or visually impaired," said BSBP Director Edward Rodgers.

Bureau staff contacted nearly 40 BSBP clients living in Flint by either home visit or phone to ensure they had access to all health-related water emergency information and to offer assistance in obtaining bottled water, filters, water replacement cartridges and water testing kits.

Information is available in braille by contacting the bureau. Flint residents who are blind or visually impaired and need further assistance or information should contact Sue Luzenski at the BSBP at Luzenskis@michigan.gov or 517-335-4265.

The State of Michigan continues to coordinate response efforts in partnership with the City of Flint, Genesee County and local community organizations. Additional information about water response efforts is available at www.michigan.gov/flintwater, by calling United Way's 211 or visiting www.helpforflint.com.

For more information about the BSBP, visit www.michigan.gov/bsbp or call 1-800-292-4200, TTY 888-864-1212.

Insp and Shannon-

Below are the dates and times that F/Lt Bowman and I will be working in the SEOC-PIO position over the next two weeks. Please add this to the schedule/calendar. There is one date, Friday February 26th that both of us have outstanding commitments. I have hiring interviews scheduled for a vacant sergeant position at the Lakeview Post. I would really like to keep this date/time as this position has been vacant since December 1. I can cancel/postpone it if needed however.

Do you have someone that could work in the SEOC-PIO position on Friday February 26th? Maybe bring Jane back in for the day? I have asked a few other PIO's, but have struck out with finding someone else to assist in this capacity.

Monday Feb 15th – Presidents Day
Tuesday Feb 16th – F/Lt Sweeney
Wednesday Feb 17th – F/Lt Sweeney
Thursday Fe 18th – F/Lt Bowman
Friday Feb 19th – F/Lt Bowman

Monday Feb 22nd – F/Lt Sweeney (8a – 4pm); F/Lt Bowman (4pm – 8pm)
Tuesday Feb 23rd – F/Lt Bowman
Wednesday Feb 24th – F/Lt Bowman
Thursday Feb 25th – F/Lt Sweeney
Friday Feb 26th - ????????

Thanks

SUPPORT TO GENESEE COUNTY HEALTH DEPARTMENT

MDHHS Flint Water Emergency Public Hotline

Background
The CHECC phone bank was set up on January 14 to respond to health-related phone calls from residents to the GCHD and MI-211. DEPR, BDCPE, and BOL personnel have staffed the hotline from 8:00 AM through 5:00 PM daily, in alternating morning and afternoon shifts. To assist hotline personnel, the Communications Section of the CHECC has developed a listing of frequently asked questions call manual to assist hotline personnel during operations.

As of February 7, the CHECC hotline had received a total of 160 calls since initial activation on January 15. Fifty hotline inquiries were referred to personnel assigned to the CHECC Epi Desk, eight of which required the deployment of a Rapid Response Team. Questions directed to the hotline focused largely on lead testing and bathing considerations, noted below.

	7-Feb	8-Feb	9-Feb	10-Feb		12-Feb	13-Feb
Total # of Calls	0	10	6	5	11		
Referred to Epi Desk	0	8	4	1	5		
Rapid Response Requests	0	0	1	0	0		

February 8, 2016

The GCHD EPC requested the MDHHS Telephone Bank Call Scripts to ensure consistent messaging. The phone bank staff don't use scripts. There is a binder with information from the LHD and fact sheets that are used to help callers get answers to their questions. Matt Cook sent the documents in a Zip file and explained to April Swartout the process used.

February 10, 2016

- A caller was referred to the LEOC via Mary Macqueen to follow up on a flyer the resident received at their house from an unknown source.
- Received one call today regarding *E. Coli* rumor in Niagara bottled water. This issue has not been raised in a couple of weeks. The call handler was able to respond to the questions.
- Received a couple calls related to boil water advisory

Communications

February 8, 2016

The JIC approved the Re-Tweet of the 211 video. This went out under the BETP twitter feed this morning. It was also sent out to all BETP staff via email, to include Richard Thelen and Jennifer Lixey Terrill for their knowledge.

Angela Minicuci requested the Wednesday Webinar, hosted by Dr. Wells to be accessible on MI-TRAIN. Craig Henry provided the MI-TRAIN web address, Course ID and updated PDF of the PowerPoint presentation to Angela to forward and post as needed, by reporters.

February 10, 2016

Contacted Dr. McFadden about the American College of Obstetrics and Gynecology request for payment for their contact list. Requested assistance in working around the payment issue. Dr. McFadden looked into it and was able to get the fees waived. The application form was sent in to receive the contacts.

February 11, 2016

- **The DTMB printed 2,000 copies of the Pregnant Women Lead Information (English version) fact sheet and will be delivering to GCHD.**
  - **Working with the JIC to verify accuracy of Spanish translation of Pregnant Women Lead Information fact sheet**
  - **200 copies of the Spanish version will be printed once verification is received from the JIC**
- **GovDelivery announcement was sent for the Feb 17 Flint Water Response Healthcare Provider Webinar – 50 recipients have responded so far.**

Bureau of Disease Control, Prevention, and Epidemiology

Background

The CDC's Epidemiology and Surveillance Team arrived on February 5th to assist with data analysis and state surveillance planning. Focus is specific to Flint lead water response and the development of longer terms strategies for use of blood lead laboratory data to identify at-risk populations.

Skin Rash/Irritation Complaint Tracking

Background

On January 24, the MDHHS Emergency Management Coordinator requested MDHHS hotline and GCHD data for any residents with complaints of skin rashes and/or irritations due to contaminated water. Anecdotal reports of skin rashes have been documented, though follow-up from MDHHS or MDEQ had not occurred.

On January 29, a MDHHS team of epidemiologists deployed to visit homes of persons reporting rashes to look for possible sources. Homeowners were administered a brief questionnaire, which will be analyzed by the Bureau of Epidemiology during the week of February 1, 2016.

February 5, 2016

The phone bank was instructed to track all rash-related calls and forward the information to the CHECC Epi Desk via email at checcepi@mihcigan.gov. In addition, the database categories were modified to all rash-related calls could be tracked.

Plan for Lead Testing All Children Ages 0-6

Background

The Michigan Department of Health and Human Services (MDHHS) has been tasked with coordinating a plan to provide blood-lead testing services to all children ages 0-6 residing in the affected Flint area. Sue Moran, Eden Wells, Jackie Scott, and Linda Scott met to strategize initiatives to meet federal mandate on testing children less than 6 years of age.

February 10, 2016

A preliminary discussion was held in collaboration with the Michigan Pharmacy Association (MPA) on the opportunity to integrate Flint area pharmacists and pharmacies into the blood lead level community testing strategy. Preliminary information from the call confirms that there are pharmacies that currently utilize Clinical Laboratory Improvement Amendments (CLIA) waived testing for other health initiatives. Issues associated with the cost of equipment and testing supplies would need to be identified to support participation.

Oral Health Fact Sheet

February 8, 2016

The Oral Health Fact Sheet was also further distributed through the Oral Health Program, Chris Farrell.

MI-Volunteer Registry: Identifying Additional Potential Volunteers, if Needed

Background

The CHECC continues to query the Michigan Volunteer Registry (MVR) for potential general volunteers. These potential volunteers are queried to gauge the availability to support ongoing response efforts, if needed. As of January 25, MVR and MRC response results were the following: 6 volunteers available to assist, 35 volunteers with limited availability, and 22 responses from individuals who are not available to assist.

On January 29, the MVR Coordinator from the CHECC visited the Volunteer Reception Center (VRC) currently being operated by the American Red Cross. Following this visit, the MVR Coordinator issued a statewide request to MRC Coordinators asking for support of VRC operations.

On January 31, the MVR Coordinator and GCHD EPC identified volunteer needs for 1) community clinics and 2) community outreach. Currently, the GCHD does not need assistance for either. MDHHS has offered the assistance of personnel (V. Zimmerman and R. Thelen) to the Flint VRC. The MVR Coordinator has provided considerations for

GCHD support and coordination of volunteers. Considerations are in draft form, requiring additional follow up on prospective volunteer management activities.

February 11, 2016

- **Wayne County will be helping support the Flint VRC (EPC, Health Officer, and volunteers).**
- **MDHHS volunteers are being scheduled through Sunday, Feb 21 to provide health information to residents of Flint during the home visits in collaboration with DEQ.**

Finance

Background

The CHECC Finance Section Chief queried GCHD on the anticipated review of its first quarter financial status report (FSR) to evaluate possible support needs. Acknowledgement from GCHD was confirmed with the anticipated submission of its first quarter financial status report to occur by January 31, 2016. To date, non-payroll costs since January 11 have totaled $2,612. The Finance Section Chief has drafted guidance for CHECC personnel related to payroll and overtime consistent with Civil Service policy, *Premium Payment of Overtime, On-Call Compensation and Callback Compensation.*

February 8, 2016

- Non-payroll costs since activation 1/11/16 total $3,756. This includes travel costs for staff assignment to the Unified Coordinating Group (UCG) in Flint ($770 for one person, for one full week).
- Submitted CHECC payroll guidance document for managers to review.
- Attended conference call with Genesee Health System Community Mental Health to discuss SERG grant budgeting.
- Positions for staffing support proposed; awaiting salary, fringe, and indirect costs from CMH.
- Notified MDHHS Budget regarding anticipated request from the GCHD for additional blood lead testing kits. Contacted CDC/ASPR on delaying BP5 application packet due to emergency; awaiting guidance from them. Reviewed Activity Prioritization draft created by CHECC Planning Section.

February 9, 2016

- Distributed CHECC payroll guidance document to staff.
- Calculated estimate of blood lead test kit cost for 9,000 samples at $105,000 based on prior purchase. Request for additional kits not received yet.
- Drafted formal request letter to CDC/ASPR to delay BP5 application packet 3 months due to emergency.

February 10, 2016

- Continue to track costs. Non-payroll costs including travel since activation 1/11/16 total $3,756.
- Finalized formal request letter to CDC/ASPR to delay BP5 application packet 3 months due to emergency, to be sent today.
- Assisted Logistics Section with procurement of CHECC supplies.

February 11, 2016

- **Continue to track costs. Non-payroll costs including travel since activation 1/11/16 total $4,024.**

SUPPORT TO HEALTHCARE AGENCY PARTNERS AND PROVIDERS

Constituent Correspondence to the Governor's Office

Background

On January 14, the checcepi@michigan.gov mailbox was established to receive forwarded calls and emails from constituents to the Governor's Office. This mailbox is currently being monitored by pre-identified CHECC personnel and responded to as needed. As of February 7, a total of 15 inquiries have been registered to the constituent correspondence email. Breakdown includes the following:

Bathing: 1
Water Filters: 1
Legionnaires Disease: 1
Other Lead Concerns: 6
Other/Unrelated: 6.

Provider Outreach: Pregnant and Nursing Mothers Fact Sheet

Background

Communications personnel coordinated the development of a fact sheet that advises both pregnant and nursing mothers of the potential risks of lead in water, as well as tips to reduce exposure. Drafts were submitted to leadership are under review and pending approval. Final drafts of the fact sheet will be provided to the Joint Information Center for dissemination.

On February 2, additional were made to the pregnancy fact sheet in coordination with Dr. Wells and CDC, including removal of reference to "nursing mothers," focusing solely on pregnant women. Blood lead level testing recommendations were also simplified to indicate that *'Blood lead testing is available. Talk to your doctor or local health department to learn more."*

On February 3, Pregnancy and Lead fact sheet was approved by the CHECC with minor edits from GCHD. The fact sheet was finalized and approved by the JIC. Posted to the JIC communication board 2/5/16 in both in Spanish and English.

Chief Medical Executive Wednesday Webinars

Background

On February 1, sent MDHHS CME Wednesday webinar announcement flyer to April Swartout, EPC at GCHD to distribute to healthcare providers. Flyer was distributed to GCHD's Vaccines For Children (VFC) provider contact list, OB/GYN contact list (this in not all OB/GYN providers), non-VFC provider (mostly family practice and pediatric providers) contact list from GCHD Immunization program, Head of the Genesee County Medical Society for distribution, and ID staff at hospitals. Sent MDHHS CME Wednesday webinar announcement flyer to Debbie Eggleston, MDHHS to distribute to health plan medical directors in Genesee County.

On February 2, the Communications Section personnel sent MDHHS CME Wednesday webinar announcement flyer to Michigan Primary Care Association to distribute to FQHCs in Genesee County.

On February 3, Dr. Wells recorded the first of a series of webinars on lead and health for healthcare providers. The webinar was recorded and has been posted to MI-TRAIN the course ID is 1062012. Ten locations signed in to the live webinar. E-mails were sent to the American Association of Pediatrics and the American College of Ob/Gyn to get a list of contacts to send the flyers for future webinars.

On February 4, a communications strategy was created for notifying providers of the Wednesday webinars:

- Get the topic of the next week's webinar before the current week. This will aid in locating providers to target if necessary.
- Ensure the flyer is updated and sent out every Thursday to give ample notice for providers. If waiting for a list, will send to that list ASAP.

- Distribute the new webinar information via GovDelivery.

February 8, 2016
Content for the Wednesday webinars was reviewed and approved by Dr. Eden Wells
1. Pregnancy and Breastfeeding 2/10/2016
2. Mitigating Lead Exposure 2/17/2016
3. Nutrition 2/24/2016
4. Educational Interventions in Children exposed to lead 3/2/2016
5. Healthcare Access and Screening of children exposed to lead 3/9/2016

February 9, 2016
The CHECC Communications Section reached out to the Michigan State Medical Society for a contact that can send out the weekly webinar notices to general practitioners and family practice physicians. Awaiting a response.

The flyer for Dr. Wells' next Wednesday Webinar is ready for distribution utilizing the GovDelivery list. The next notification will go out on Thursday, February 11.

These Wednesday Webinars will be posted on MI-TRAIN for healthcare providers to view and use for continuing education credits. The CHECC Communication section also provided a direct link to the JIC to distribute to the media as requested.

February 10, 2016
Dr. Wells held her Wednesday Webinar today on pregnancy and breastfeeding. The peak number of people/sites in attendance was 42. Positive feedback was received, particularly on the discussion portion of the webinar. The recording was sent to Angela Minicuci for posting, and will be available on the flint water website and in MI-TRAIN.

SUPPORT FOR FLINT COMMUNITY AND THE PUBLIC

Nutritional Planning Assistance for Genesee County

Background
A CHECC nutrition SME continues to coordinate with MDE, MDARD, WIC representatives and Michigan State University Extension (MSUE). Coordination for the identification of short, medium, and long term nutrition goals for the City of Flint through the development of a white paper highlighting strategies is ongoing. Next steps beyond the development of the nutrition white paper include continued coordination of the Nutrition Efforts in the Flint Response, working with MDE, MDARD, and MDHHS (WIC, MSU-Extension, Michigan Fitness Foundation, SNAP and SNAP-ED, Local Liaison to Flint) USDA Food and Nutrition Services Office, and others such as United Dairy Industry of Michigan and Flint Community Foundation, in the future. Partners are working on short and long term goals, preparing for meeting with State Senator and developing education materials, identifying funding for future efforts.

February 9, 2016
SME attended a food co-op meeting in Flint at which the feasibility of starting a food co-op was discussed. She then updated some of the members of the Nutrition Task Force about the food co-op initiative.

SME requested permission from the California state health department to use its "Well Fed = Healthy Lead" tag template with modifications for use in Michigan. The health department in California has attached several stipulations they wish met before they will give permission to use or modify the template. The SME is in discussions with California on this issue. In the interim, the SME has developed a draft nutrition document. Once this document has been finalized, the SME will work with the JIC for approval and distribution.

Community Behavioral Health Assessment/State and Federal Support

Background

To date, the CHECC has partnered with GCHD and Genesee Health Services (CMH) to determine available resources and existing gaps in behavioral health resources to support mobilization if requested.

- Obtained community behavioral health assessments conducted in the past two years in Genesee County.
- Identified 381 volunteers trained in Physiological First Aid through Volunteer Registry and MITRAIN queries.
- Behavioral health liaison in the CHECC is working on obtaining information on potential SAMHSA grant opportunities which include a Crisis Counseling Assistance and Training Program (CCP), SAMHSA Emergency Response Grant (SERG) and SAMHSA Emergency Response to Violence (SERV) in collaboration with MDE.
- Obtained gross estimate of the costs of the additional case management demands for GHS for next 5 years.
- Mailed approximately 500 SAMHSA Disaster Distress Helpline pamphlets to GHS for distribution to Flint residents.

In coordination with SAMHSA representatives, a meeting was held with the Genesee Health System and community partners on January 26. This provided the opportunity to identify resources that can leverage behavioral health services, and determine strategies to develop a short, intermediate, and long-term recovery plans. *CDR Jamie* Seligman, Program Project Officer, in SAMHSA's Center for Mental Health Services arrived on Monday 2/1/2016 to continue SAMHSA's support for behavioral health initiatives. Barbara Reynolds, CDC Senior Advisor for Crisis and Emergency Risk Communication, provided risk communication technical assistance to Genesee community partners that have a role in behavioral health. SAMSHA confirmed 8 behavioral health officers for deployment to Flint.

On February 2, The CRG second meeting had a very high turn-out rate with over 150 participants representing diverse community partners including local behavioral health providers, human service providers, community and faith based organizations, universities (MSU/UM) and Flint school district members and private businesses. LT Governor Brian Calley, Tim Becker DHHS Chief Deputy, and Dr. Mona Hanna Attisha and medical community members.

On February 5, SAMSHA Commander Jamie Seligman ends SME support in the CHECC.

February 8, 2016

Collaborated with Alice Hoffman from the MDHHS, Disabilities Unit. Further local organizations will be identified that may help assist in outreaching to vulnerable populations to ensure information and resources are reaching this group in Flint. The Children's data collection tool and Recovery Assistance Resource List was provided to Alice to cross-reference previously identified organizations and to track any new identified resources.

A coordination meeting was held with Genesee Health System (GHS) to clarify the role of Children's Healthcare Access Program (CHAP) in long-term recovery efforts. CHAP can be utilized to outreach to the Flint families as part of the GHS proposal for Targeted Case Management. If awarded, the SAMSHA Emergency Grant Fund, can be utilized to help augment CHAP in the intermediate term to assist in outreach to Flint families.

The next Flint Community Resilience Group meeting is scheduled on Tuesday, February 16 at 11am, in the Riverfront Banquet Center. The CHECC is working with GHS to retrieve a status update from the seven behavioral health focus area workgroups.

February 9, 2016

Captain Jeff Coady (SAMHSA) will return to Flint February 10 thru 11 to assist in coordination of the Public Health Service (PHS) mental health teams.

A preliminary behavioral health outreach model was submitted to Genesee Health System for review and to project the cost of the service in preparation for the SERG application.

February 10, 2016

For additional SERG application support, the CHECC behavioral health team is coordinating a meeting with a point of contact from Colorado that applied for and was awarded the SERG grant.

February 11, 2016

- **The 7 behavioral health community working groups formed by the Flint Community Resilience Group (FCRG) with TA from the U.S. Public Health Service (PHS) mental health team are now defined as 4 mission groups and 3 significant interest groups:**
  - **Psychological First Aid (PFA) – Train the Trainer (mission)**
  - **Force Health Protection (mission)**
  - **Planning/Gap Analysis (mission)**
  - **Data and Surveillance (mission)**
  - **Underserved Populations (interest)**
  - **Faith-Based Communities (interest)**
  - **Access to Care (interest)**

CHECC ACTIVITIES – COMPLETE

Start Date	Completion Date	Activity Name	Activity Summary
1/11/16	1/11/16	Public Information Support: Legionella	Provided talking points for use by MI-211, the CHECC Hotline, and the SEOC/JIC on legionella in anticipation of potential questions from the public.
1/15/16	1/15/16	SAMHSA Disaster Distress Hotline Activated for Flint Residents	Activated the SAMHSA Disaster Distress hotline, a toll-free hotline dedicated to providing immediate disaster crisis counselling. Hotline operates 24-hours a day, 7-days a week and is coordinating with Genesee CMH and the Genesee Health System.
1/16/16	1/21/16	Research Potential Recovery Assistance Programs	Listing of potential assistance programs for medical and public health community recovery through Community Service and Social Service Block Grants. Listing submitted to SEOC 1/21/16.
1/19/16	1/19/16	Provider Outreach: Enhanced Guidelines for Lead Testing	Developed by MDHHS Medical Director and sent to healthcare providers via Medscape-WebMD. Message recipient stats: MD – 16,052; healthcare personnel in MI – 64,414.
1/23/16	1/27/16	Obstetrician Contact List	Region 3 HCC Regional Coordinator provided contact list for 107 obstetric providers (i.e., physicians, nurse practitioners, midwives)
1/24/16	1/29/16	Blood Lead Level Testing Supplies Request	Approximately $56,000 was identified for the procurement of 100 Lead Care II Kits for GCHD.
1/25/16	1/25/16	Translation Services for JIC	Provided JIC with contract information for Linguistica International for the translation of press releases, web material and fact sheets. The JIC was provided information on translation services through arrangement with MDEQ and University of Michigan.
1/13/16	1/21/16	emPOWER data	emPOWER information requested data from CMS for 16 area zip codes for Flint who rely on electrically powered medical equipment. Information was obtained and de-identified by Bureau of EPI, approved and supplied to SEOC for GIS mapping. 1/21/16 GIS map overlay was completed to ensure all home of at-risk individuals were included for door-to-door distribution efforts of the Flint Water Response Team. An additional zip code 48502, was added to the data set and was de-identified and added to GIS map.
2/2/16	2/5/16	Fluoride, Bottled Water, and Oral Health Prevention document	At the request of the CME, the Communication Section created a "Fluoride, Bottled Water, and Oral Health Prevention" FAQ document for distribution through the JIC. Contents have been approved within the CHECC, and will be routed to the JIC for approval once it has had a final review by MDHHS/Oral Health SME. On February 5, the oral health fact sheet originally requested by Dr. Eden Wells on February 2 was approved by the JIC. Dr. Wells had asked for this material to be distributed to the public through the JIC.

Insp and Shanon-

As we discussed, Lt Bowman and I have spoken to Lt Kevin Caldwell. He is willing to assist Kyle and I in the SEOC in the role of PIO. Between the three of us I feel confident that we will be able to staff the 12 hour shifts for the next several weeks.

If approved, Lt Caldwell's first day in the MSP-SEOC will be February 26th from 8a- 8p. He will come into the SEOC on either the 24th or 25th for training.

Please run this through the chain of command to Insp O'Neil for approval of this request

Kevin-

Welcome to the club! My cell is and Kyle's cell is

Your first work date is Friday Feb 26th at 8:00am. What day and time did you want to do your training? I would suggest a four hour block of time to be trained.

Thanks and I look forward to talking with you soon.

Working on a training date is tight until the 26th; however, either the 16th or the 18th are open next week if that works. I am waiting to hear from a prior commitment but one of those dates will be open to come up for training. The 22nd - 25th is solid on Fair and Impartial Policing instructor training.

Hope that helps,

Kevin

Importance: High

Fellow PIOs,

Thank you for helping staff the Flint Joint Information Center (JIC) during the Flint water emergency. Without your help, we couldn't make this operation happen.

We are still trying to fill the following shifts (see attached document):

Feb. 16 – 1 person
Feb. 18 – 2 people
Feb. 19 – 1 person
Feb. 22 – 1 person
Feb. 23 – 1 person
Feb. 24 – 2 people
Feb. 25 – 2 people
Feb. 26 – 2 people

Please evaluate your staffing and let us know if you have someone available to work any of these shifts by 5 p.m. today. When possible, with the reduced staffing, we prefer PIOs who are already trained to work in the Flint JIC.

Thank you for your consideration. We can't make this operation happen without your partnership.

Best regards,

Ron

To: MSP-SEOCPIO
Cc: Kuzera, Michelle (MSP)
Subject: Chamber of Commerce in the JIC

Good afternoon,
Michelle Kuzera met with the Flint chamber of commerce today and they wanted to be more involved as well as get information about things faster. They asked, and we have agreed to have a liaison from the chamber in the local EOC. They would also like to have one in the JIC. We think it would be a great opportunity to help move donations and assistance in a more efficient way. Do you folks have any objection to this idea?
Thanks,
Gabe

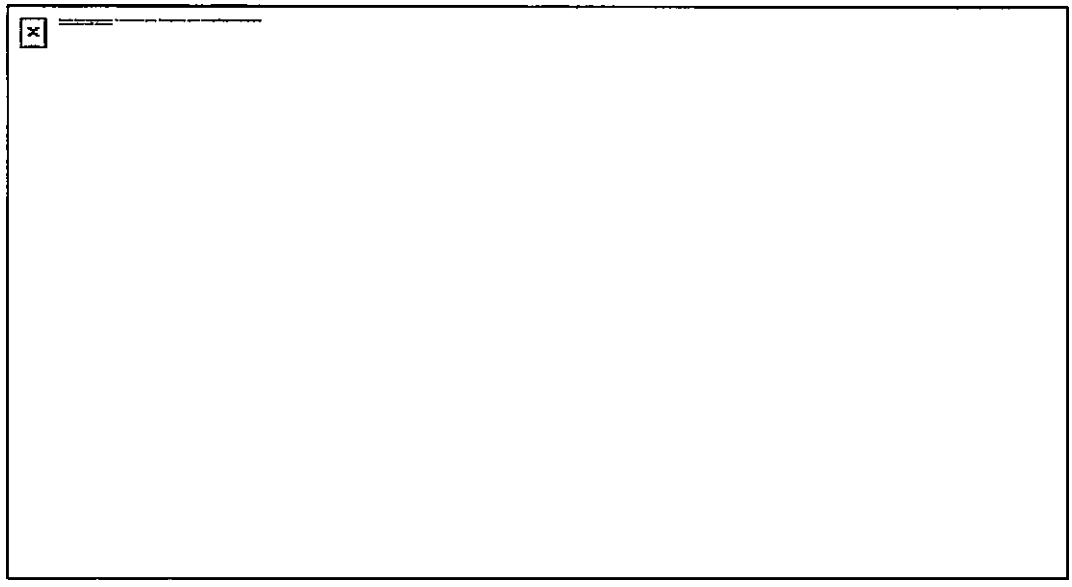
VIDEO: What Governor Snyder's FY17 budget means for Michigan



Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. **Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.**

Click a tweet to tweet it out:

The #MIBudget @OneToughNerd proposed yesterday makes key investments to strengthen Michigan for all families --> www.mi.gov/MIBudget

--> @OneToughNerd's #MIBudget includes $72 million a year for Detroit Public Schools. It is time to act now -- > www.mi.gov/MIBudget

--> @onetoughnerd's significant investment in #Flint families is the right thing to do. #FlintFWD #MIBudget www.mi.gov/MIBudget

> FLINT, Mich. - In just over a two-week time period, 176,118 cases of water and 93,048 water filters have been provided to Flint residents, both at water resource sites and by water response

teams.
Water response teams comprised of city, county and state personnel, American Red Cross and volunteers continued their door-to-door efforts, today visiting another 2,596 homes providing free bottled water, filters, water replacement cartridges and water testing kits.

Now that water response teams have completed two canvasses of the city providing water resources, the Michigan National Guard has scaled back their commitment from approximately 270 soldiers and Airmen to 70 soldiers who continue to staff water resource sites.

Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

*176,118 cases of water
*93,048 water filters
*29,320 water testing kits

Water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Road
Flint, MI 48506

Fire Station #6
716 West Pierson Road
Flint, MI 48505

Fire Station #8
202 East Atherton Road
Flint, MI 48507

The State of Michigan continues to coordinate response efforts in partnership with the city of Flint, Genesee County and local community organizations.

Additional information is available at www.michigan.gov/flintwater, by calling 211 or visiting www.helpforflint.com.

Subject: RE: URGENT: Flint JIC Staffing - Two Weeks

Shanon-

As you know I am out of state next week.

I could come back the week of Feb 8 - 12, but have two things I really need to attend. Those are:

Monday Feb 8 (need to leave at 4pm)
Wednesday Feb 11 (need to leave for two hours - 12pm - 2pm)

If we are able to work around those two things, I could be back

Please advise as there are several other meetings I will have to cancel out of

Thanks
K

Fellow PIOs,

It appears the Joint Information Center in Flint will remain operational through the next two weeks. With that, I am asking for any PIOs with availability to please respond by the end of the day today with your availability. We will not be staffed during the weekends.

This operation is a true State of Michigan team effort and I thank you for your continued support and assistance.

Please reach out if you have any questions.

Sincerely,

Shanon Banner
Manager, Public Affairs Section

> Hi Jennifer, and SEOC team:

Attached are the documents I have right now in Word form, to be translated:

Under the "In Your Body Tab":
-Letter for Flint Parents
-Letter for Healthcare Providers
-Letter to Food Establishments

Still waiting to track down these:
-Adding Phosphate to Water
-Blood Lead Level Quick Reference for Primary Care Providers

Would be great if we could move forward with the first three.

Hi Kevin,

You have been tremendously beneficial to us and I would love to have you back. There's a chance we'll be back in Lansing by Feb. 8. If that's the case, we won't need someone at the PIO desk in the SEOC. Can I pencil you in tentatively and let you know next week? I'd work around your two appointments if I end up needing you.

Shanon-

As you know I am out of state next week.

I could come back the week of Feb 8 - 12, but have two things I really need to attend. Those are:

Monday Feb 8 (need to leave at 4pm)
Wednesday Feb 11 (need to leave for two hours - 12pm - 2pm)

If we are able to work around those two things, I could be back

Please advise as there are several other meetings I will have to cancel out of

Thanks
K

Fellow PIOs,

It appears the Joint Information Center in Flint will remain operational through the next two weeks. With that, I am asking for any PIOs with availability to please respond by the end of the day today with your availability. We will not be staffed during the weekends.

This operation is a true State of Michigan team effort and I thank you for your continued support and assistance.

Please reach out if you have any questions.

Sincerely,

Shanon Banner

Insp-

Hoping all is well. So I was able to work out a more manageable schedule with F/Lt Bowman. My plan the week of Feb 8 – Feb 12 is to work three 12/13 hour days in the SEOC. I will work Wed – Fri that week. Couple that with travel on both ends and I will hit my 40 hour work week in those three days. I will be taking Monday and Tuesday off.

Have a good weekend

K

NEWS RELEASE

FOR IMMEDIATE RELEASE
January 29, 2016
Release #: 23

Gov. Snyder Approves $28 Million in Immediate Aid for City of Flint

Appropriation will fund several programs to address Water Crisis

Flint, Mich. – Gov. Rick Snyder today, signed a $28 million budget supplemental which assists Flint residents by addressing the city's on-going water crisis. The supplemental, which Snyder called for in his State of the State Address January 19th, was approved by the legislature Thursday and signed by the governor this morning.

"I thank the Legislature for their quick action to make this additional $28 million a reality. It is a necessary next-step in ongoing recovery efforts for the city," Snyder said. "We know that more money will be needed to address long-term concerns and I want to reassure the families of Flint that I remain dedicated to fixing this problem,"

House Bill 5220, approved unanimously in both the House and Senate, will help ensure Flint residents have access to safe, clean drinking water in addition to the following:

- Supply free bottled water, faucet filters, and testing kits for Flint residents;
- Put nine nurses in local schools to monitor student health and well-being;
- Provide better nutrition for students and infants through WIC and in-school nutrition programs;
- Replace fixtures in schools, daycares, nursing homes and hospitals;
- Provide for an infrastructure study using independent experts;
- Treat any children who have high lead levels in the blood, using diagnostic testing, nurse visits and environmental assessments in the home;

Gov. Snyder will propose a long-term funding solution to address the ongoing needs of Flint in his Feb. 10 formal budget recommendation to the legislature.

In the continuing effort to identify the location of lead pipes and other components of Flint's water infrastructure, Geographic Information Systems (GIS) experts from the

MORE

Release #: 22

City of Flint, State of Michigan, the University of Michigan–Flint, and Federal Emergency Management Agency (FEMA) have translated hundreds of hand-drawn plat maps and hand-written notes from the 1980's into digitized maps. The maps are helping the State target its response and determine where safe water is needed.

"Since most of the water system infrastructure is underground, we can't simply walk out and survey it," said Capt. Chris A. Kelenske, deputy state director of emergency management and homeland security and commander of the Michigan State Police Emergency Management and Homeland Security Division. "This mapping will be a critical component of the State's coordinated response in Flint."

Once maps are fully digitized, they will be synched with 2015 parcel data and can then be overlaid with Census and infrastructure information which will allow analysts to pinpoint which inhabited homes have lead service lines.

Additionally, efforts continue to ensure city-wide distribution of bottled water, filters, water replacement cartridges and water testing kits.

Water response teams continue door-to-door delivery efforts with American Red Cross and other volunteers visiting 1,768 Flint homes today. Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

- 207,055 cases of water
- 97,342 water filters
- 30,801 water testing kits

Additionally, water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1 (also a water bottle recycling site)
310 East 5th St.

Fire Station #3
1525 Martin Luther King Ave.

Fire Station #5 (also a water bottle recycling site)
3402 Western Rd.

Fire Station #6
716 West Pierson Rd.

Joel-

Hoping all is well. F/Lt Bowman and I have been working in the SEOC the last three weeks helping out with the Flint Water Crisis. The talk/feeling at this time is that this operation will be up and running for a few more weeks, at least. We are trying to find a third person to help us in this role. Basically someone that can work one to two days a week in the SEOC (we would take turns alternating)

We need someone that is a Department PIO. Would you be interested in helping with this?

Thanks

Got it. I can for certainly work the 25th and most of the 22nd. I teach a night class on the 22nd, and would have to leave the SEOC at 4:00pm. Would you be able to work on the 22nd from 4pm - 8pm.

Schedule would like this:

Monday Feb 22 - Kevin (8am - 4pm); Kyle (4pm - 8pm)

Tuesday Feb 23 - Kyle

Wednesday Feb 24 - Kyle

Thursday Feb 25 - Kevin

Friday - Feb 26 -

I can do Friday if I have to, but would have to reschedule my hiring interviews for our vacant sergeant position. I'm hoping I can find our third person today and they could take that day.

Does the rest look ok?

Thanks
K

Insp and Shannon-

Below are the dates and times that F/Lt Bowman and I will be working in the SEOC-PIO position over the next two weeks. Please add this to the schedule/calendar. There is one date, Friday February 26th that both of us have outstanding commitments. I have hiring interviews scheduled for a vacant sergeant position at the Lakeview Post. I would really like to keep this date/time as this position has been vacant since December 1. I can cancel/postpone it if needed however.

Do you have someone that could work in the SEOC-PIO position on Friday February 26th? Maybe bring Jane back in for the day? I have asked a few other PIO's, but have struck out with finding someone else to assist in this capacity.

Monday Feb 15th – Presidents Day
Tuesday Feb 16th – F/Lt Sweeney
Wednesday Feb 17th – F/Lt Sweeney
Thursday Fe 18th – F/Lt Bowman
Friday Feb 19th – F/Lt Bowman

Monday Feb 22nd – F/Lt Sweeney (8a – 4pm); F/Lt Bowman (4pm – 8pm)
Tuesday Feb 23rd – F/Lt Bowman
Wednesday Feb 24th – F/Lt Bowman
Thursday Feb 25th – F/Lt Sweeney
Friday Feb 26th - ????????

Thanks
K

Kevin-

I'm here on the 16th and Kyle is here on the 18th. Let us know which date and what time and we will look for you.

FYI that a nice lunch is served around 11:30am and a nice dinner around 5:00pm. I would suggest planning your visit around one of those time slots.

Thanks
K

All,

Glad to be part of the team - thank you for thinking of me for this very important work. The 26th is on my schedule.

Working on a training date is tight until the 26th; however, either the 16th or the 18th are open next week if that works. I am waiting to hear from a prior commitment but one of those dates will be open to come up for training. The 22nd - 25th is solid on Fair and Impartial Policing instructor training.

Hope that helps,

Kevin

Welcome to the club! My cell is and Kyle's cell is

Your first work date is Friday Feb 26th at 8:00am. What day and time did you want to do your training? I would suggest a four hour block of time to be trained.

Thanks and I look forward to talking with you soon.

Insp and Shanon-

As we discussed, Lt Bowman and I have spoken to Lt Kevin Caldwell. He is willing to assist Kyle and I in the SEOC in the role of PIO. Between the three of us I feel confident that we will be able to staff the 12 hour shifts for the next several weeks.

If approved, Lt Caldwell's first day in the MSP-SEOC will be February 26th from 8a- 8p. He will come into the SEOC on either the 24th or 25th for training.

Please run this through the chain of command to Insp O'Neil for approval of this request

Thank you

Fellow PIOs,

Thank you for helping staff the Flint Joint Information Center (JIC) during the Flint water emergency. Without your help, we couldn't make this operation happen.

We are still trying to fill the following shifts (see attached document):

Feb. 16 – 1 person
Feb. 18 – 2 people
Feb. 19 – 1 person

Feb. 22 – 1 person
Feb. 23 – 1 person
Feb. 24 – 2 people
Feb. 25 – 2 people
Feb. 26 – 2 people

Please evaluate your staffing and let us know if you have someone available to work any of these shifts by 5 p.m. today. When possible, with the reduced staffing, we prefer PIOs who are already trained to work in the Flint JIC.

Thank you for your consideration. We can't make this operation happen without your partnership.

Best regards,

Ron

Budget recommendation will include $30 million request for Flint water bill repayments

"I agree with Flint residents, that they should not have to pay for water they cannot drink.

My budget recommendation will include the request for the state to make payments to the city's water system for residential bills going back to April 2014."

— Rick Snyder

www.mi.gov/FlintWater | www.HelpForFlint.com

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a $30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly

65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

Click here to learn more about the budget request.

LEARN MORE

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

How we are fixing the Flint water crsis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

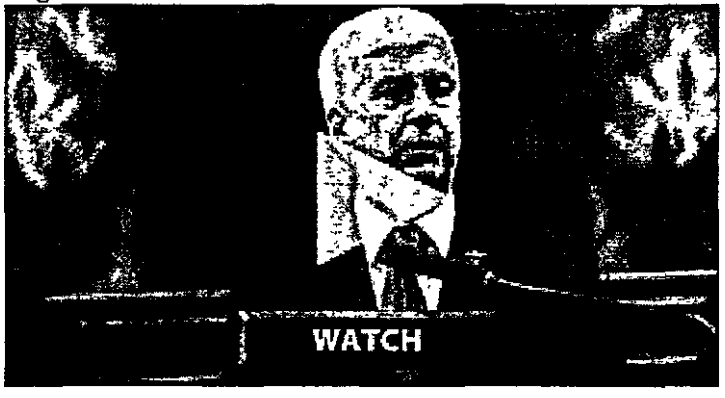
Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.



Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." **Click here to read the Governor's full op-ed.**

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. **Click here to read the full story in the Washington Post.**

Michigan State Police Looking To Hire Women
CBS Detroit
1.21.16

DETROIT (WWJ) – Michigan State Police are looking for women to join the department.

An informational recruiting seminar for potential female troopers is scheduled for 10 a.m. on Saturday, March 19 at Schoolcraft College in Livonia.

Why women, specifically?

"Well, I think you need to be a diverse organization to match the entire state of what our population is," MSP First Lt. Mike Shaw. "Roughly, about 10 percent of our department are women now. We'd like to increase that."

State police recruiters will be showing off many of the department's specialty units including K-9, special investigations, computer crimes and the gaming section.

Some of the minimum requirements include being at least 21 years of age and a U.S. citizen, having a high school diploma or G.E.D., "good moral character," and no felony convictions.

The starting salary at the beginning of the 21-week recruit school is $44,000 annually with a $7,800 raise upon the completion of one year.

"I think there is an old myth that women didn't belong in law enforcement, or that they weren't suited for it," Shaw said. "But I think it goes by an individual, not necessarily a gender."

Shaw said more than a dozen female troopers will be on hand at the event to answer any questions women may have about the job.

Those interested in attending should email Tpr. Marjorie Richardson at richardsonm2@michigan.gov. Please arrive by 9:45am. The attire for this event is business casual.

City turns down $1M grant after GRPS declines cops in schools
MLive
Monica Scott
1.21.16

GRAND RAPIDS, MI -- A $1 million grant that would have put eight police officers in public and faith-based schools has been declined by Grand Rapids after the public school system pulled out of the deal.

Once Grand Rapids Public Schools decided it would not participate, the program soon lost its appeal, despite interests from the Kent Intermediate School District and Grand Rapids Christian Schools, officials said.

The district, which has a public safety department, was to receive four officers, the largest allotment among those who were initially interested. School and police administrators said last year the idea was to improve relationships and to fuel future for recruitment in addition to safety concerns.

Related: Grand Rapids police seeking $1M grant to put officers on school campuses

"Parents and other community stakeholders said they weren't comfortable having police officers inside our schools," said John Helmholdt, the district spokesman. "The timing wasn't right."

Helmholdt said incidents occurring nationally fueled that sentiment, including a black female student's violent classroom arrest by a school resource officer in South Carolina. That interaction was captured on video, went viral and sparked widespread outrage.

"We will continue to work on building relationships between our students and schools and the police department," he said, noting the contentious elements between minority students and police officers that may not be as prevalent in Grand Rapids.

Capt. Pete McWatters, who worked on the grant, said the resource officer program was always about outreach and collaboration to improve relationships with young people. He said historically, the department has had not officers in schools.

The program would have put as many as eight officers in five school systems, including the KISD and Grand Rapids Christian Schools. That fell to six when National Heritage Academies, the for-profit charter school management company, and NorthPointe Christian Schools weren't interested.

"We remained very interested in participating and we were disappointed to learn that the city was unable to revise the grant," said Kent ISD Superintendent Ron Caniff, who oversees a campus with about 3,000 students at the Kent Career Tech Center and Kent Innovation High School.

"Having an officer definitely enhances safety, and of equal importance, is the element of prevention. Having an officer present was intended to be a proactive approach based on the positive relationships the officer is able to establish with students," Caniff said.

The federal government would have paid for approximately 50 percent of the cost for officers. The city and schools would split the other half equally. Officers would have had to be maintained at least one additional year after the grant funding was completed.

The grant was through the Office of Community Oriented Policing Services (COPS), a component within the U.S. Department of Justice dedicated to community policing.

Steve Guitar, the city's spokesman, said the city didn't feel it could support the matching grant without better school participation.

Tom DeJonge, superintendent of Grand Rapids Christian Schools, said it had already budgeted around $30,0000 and created space for the officer at the high school. He said he never received official word that the city was declining the grant.

"I think it could have been a very positive experience for our students," said DeJonge. "The program had a lot of promise."

Resource officers have been very successful in multiple districts. The Kent County Sheriff's Office has six officers in the following districts: Kent City, Byron Center, Kenowa Hills, Forest Hills, Lowell, and Northview. City departments have officers in Grandville, Kentwood and Wyoming.

Police-clergy relations key to preventing Ferguson-like problems, chief says
MLive
John Tunison
1.21.16

GRAND RAPIDS, MI -- When riots and protests engulfed Ferguson, Mo., in 2014, there was a breakdown in communication and trust between authorities and the public.

Grand Rapids Police Chief David Rahinsky thinks a better relationship between police and clergy might have helped stem the tide of discontent.

Rahinsky is now championing a local effort to foster better relations and communication between Grand Rapids police and clergy.

"We recognize there's a level of mistrust with some sectors of the community and our law enforcement," he said.

"It's our opinion there's really no better conduit to reach out to that group than the clergy," he said Thursday, Jan. 21.

Rahinsky and Patrick Miles, U.S. District Attorney for the Western District of Michigan, will gather at 3 p.m. Friday, Jan. 22 at Grand Rapids City Hall to talk about building community relationships.

The discussion, part of a "Coffee with Clergy" event titled Advocates and Leaders for Police and Community Trust, is expected to draw attendance from many clergy.

Those looking to attend should contact city offices at 456-3364.

Rahinsky said clergy can help bridge any communication gaps between police and a disaffected public.

Mother sues Lansing and police for releasing man who then killed her daughter
MLive
Andy Hoag
1.21.16

SAGINAW, MI — The mother of Angelica Olivarez, a Saginaw woman murdered by her child's father Michael Lawrence, has filed a federal lawsuit against the city of Lansing and 15 of its police officers.

Lawrence strangled Olivarez inside her home April 15, 2013, less than two months after Lansing police released Lawrence while he was at-large and wanted for another murder in Saginaw.

Olivarez's mother, Theresa Medel, through her Rochester Hills attorney Shawn Cioffi, filed the complaint on Wednesday, Jan. 20, in U.S. District Court in Detroit. It lists the officers only as John Does.

"The acts of (the defendants) ... deprived Angelica Olivarez of her constitutional and statutory rights and caused her death," the lawsuit states.

The lawsuit alleges wrongful death, gross negligence, and violations of the 14th Amendment of the U.S. Constitution as it relates to life and liberty under due process of law.

"As a result of the defendants' grossly negligent acts, failure to follow the proper procedures and in complete disregard of local, state, and federal law and constitutional protections that should have been afforded to (Olivarez), she died, and thereby her family has been deprived of her love, companionship, and support for the remainder of their natural lives," the lawsuit states.

The lawsuit seeks more than $75,000 in compensatory damages as well as punitive damages.

Lawrence, whom police ultimately arrested in August 2013 in Las Vegas, is serving two sentences of life without parole for Olivarez's murder as well as the drive-by murder of 6-year-old Lay'la Jones on Saginaw's northeast side.

Lawrence, now 26, strangled Olivarez, 23, inside her home while their now 6-year-old son was in another room in the home. The boy was the focal point of Lawrence's trial, as he told multiple people, including his great-grandparents who ultimately adopted him, in the hours after his mother's death that his dad killed her. He was 3 years old at the time.

About seven weeks earlier, on Feb. 24, Lawrence was in the custody of Lansing police, who had detained him during the arrest of a woman with whom he was found, according to Lansing Police Public Information Officer Robert Merritt.

Merritt told MLive in 2013 that Lawrence gave police a false name that had an open warrant associated with it. When police told Lawrence they were arresting him on that warrant, he gave another name, Dominique Saxton, and police arrested him for providing false information to police, a 90-day misdemeanor under a Lansing city ordinance.

Merritt said the arresting officer confirmed the date of birth and physical descriptions of Dominique Saxton with the man he was placing under arrest. Lawrence matched the information on Saxton in the Law Enforcement Information Network, Merritt said. Police did not fingerprint Lawrence because it is not required with 90-day misdemeanors, Merritt said.

Lawrence was jailed at the Lansing Police Department's detention center for about an hour and then released on a bond, Merritt said.

"Had Michael Lawrence been fingerprinted," the lawsuit states, "the fingerprints would have revealed that the person held under the name 'Dominique Saxton' was actually Michael Lawrence, and the Lansing Police Department could have arrested Michael Lawrence in connection with the murder of Lay'la Jones."

Merritt said the release of Lawrence was "tragic."

"He slipped through our fingers," Merritt said. "As a department, we take responsibility and hold ourselves to a high standard. But our policies and procedures, we followed them to a tee."

The lawsuit also seeks a declaratory judgment "to redress (the defendants') ... ongoing deliberate indifference in policies, practices, habits, customs, usages, training, and supervision ... which (the defendants) have no intention of voluntarily correcting, despite obvious need for such correction."

Lawrence, meanwhile, is imprisoned at the Cotton Correctional Facility in Jackson. The Michigan Court of Appeals in September upheld his conviction for the Jones murder and has yet to hear arguments for his appeal of his conviction for the Olivarez murder.

Still work to do to distribute water resources to Flint residents, state says
MLive
Molly Young
1.22.16

FLINT, MI -- All areas of the city, but not every home, was visited by a water response team as of Thursday evening, Jan. 21, according to Michigan's Joint Information Center.

According to a news release from the center, 30,770 homes have water resources, gathered either by visiting a water resource center or because it was visited by a response team, a news release from the JIC says. Response teams are comprised of city, county and state personnel, American Red Cross and volunteers, and National Guard soldiers and airmen.

Capt. Chris Kelenske, commander of the Michigan State Police Emergency Management and Homeland Security division, says there's still work to do.

"While we have visited every part of the city, we know we have not yet reached every home, so our work is not done," Kelenske said. "Water response teams will continue door-to-door visits until we are sure every Flint resident has the safe water resources they need.

As of Thursday evening, Jan. 21, the following resources were distributed and how many of that resource was purchased by the state since Jan. 5.

More than 105,091 cases of water of 124,398 cases purchased were distributed.
79,571 water filters of 115,700 purchased.
21,625 water testing kits of 61,161 purchased.

Water response teams may ask residents questions, like what type of filters they are using and if they need help installing a filter. According to the JIC, it helps them collect information for long-term recovery and make sure they are distributing the right amount of supplies.

People on the teams wear their credentials with state of Michigan seal hologram so they can be easily identified, according to the JIC. They will, at no time, enter a resident's home or request payment for services or supplies.

Here is a list of the water resource sites, which remain open daily from 9 a.m. to 9 p.m.:

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Road
Flint, MI 48506

Fire Station #6
716 West Pierson Road
Flint, MI 48505

Fire Station #8
202 East Atherton Road
Flint, MI 48507

EPA Orders State, Flint To Fix Water; Obama Sending $80M; Regional EPA Chief Resigns
Gongwer
1.21.16

The U.S. Environmental Protection Agency is ordering the state and city of Flint to take a series of immediate actions to address the city's drinking water crisis, declaring the state and city "have failed to take adequate measures to protect public health."

Additionally, in a series of rapid developments Thursday evening, President Barack Obama said the federal government would send $80 million to the state to assist with the drinking water crisis in Flint, and the director of the EPA region that covers Michigan, Susan Hedman, tendered her resignation effective February 1.

"Our children should not have to worry about the water they're drinking in American cities," Mr. Obama said in a speech to the nation's mayors in which he announced the $80 million.

No further detail was available on what, specifically, the money would go toward, but Mr. Obama expected it to be transmitted next week. Governor Rick Snyder had requested $96 million in federal disaster assistance. Mr. Obama had denied the governor's request for a major disaster declaration although he has declared a state of emergency.

U.S. Rep. Dan Kildee (D-Flint) said the money, new for the state and not previously planned to be appropriated, would go toward a state revolving fund. Mr. Kildee, in an interview, said the funds are not specifically earmarked for Flint, but that's how the state should use them. He also urged a sizeable portion of the aid to go to Flint in forgivable loans.

"This is an opportunity for the state to put their money where their apologies are and fund this in a more robust way than the $28 million appropriation," he said, referring to the bill moving through the Legislature with emergency aid for the city. Mr. Snyder has said the aid is a first step.

Senate Minority Leader Jim Ananich (D-Flint) praised the news of the federal aid.

"This is the type of leadership and action my community deserves," he said in a statement. "These resources will help with immediate health and safety needs while we continue to push for the long-term support the state must provide."

Ms. Hedman had emerged as one of the central figures in the scandal. Experts and advocates for Flint residents said she could have alerted the public to worries EPA staff had about the DEQ's decision not to require Flint to add corrosion control treatment to the water once the city began drawing water from the Flint River.

The more corrosive river water caused lead service lines to leach into the drinking water. Had the water contained the necessary treatment, the lead lines would have retained a protective layer.

The Detroit News reported this week that Ms. Hedman, rather than airing her concerns publicly or having the EPA take action, waited for a legal opinion on what the EPA could do. An EPA water expert, Miguel Del Toral, had discovered the problem in February and grew so frustrated at the agency's unwillingness to act that he leaked his memo about the problem to some residents and broke agency policy by speaking on the record about his concerns to the American Civil Liberties Union of Michigan's investigative journalist, Curt Guyette.

In a statement, the EPA said Ms. Hedman offered to resign and "EPA Administrator Gina McCarthy has accepted given Susan's strong interest in ensuring that EPA Region 5's focus remains solely on the restoration of Flint's drinking water."

Of the resignation, Mr. Ananich said: "We've said since day one everyone at every level needs to be held accountable for whatever role they had in this crisis. It's unfortunate the Legislature and state aren't moving nearly as swiftly as the federal government now appears to be."

Meanwhile, the EPA order issued to the state outlines sweeping oversight from the federal agency and follows a phone conversation between Governor Rick Snyder and Ms. McCarthy.

"There continues to be inadequate transparency and accountability with regard to provision of test results and actions taken and those are critical for the people of Flint," Ms. McCarthy said in a letter to Mr. Snyder. And "there is an increasing concern about capacity to carry out the recommended actions to safely manage Flint's drinking water system."

The order requires the state to within five days create a public website where it will post all reports, sampling results, plans, weekly status reports on progress toward all requirements and other documents.

The order further mandates the state and city respond in writing within 10 days to all of the EPA Flint Task Force's requests and recommendations made on November 25, 2015, and subsequent dates. The state and city also within 10 days must provide water quality measurements on things like pH, total alkalinity, chloride, temperature and other data), all lead in water testing results for the city since January 2013 and identification of areas in the city with elevated blood lead levels.

The state and city also must provide within 10 days an inventory of homes with lead service lines, addresses of homes that have had water service interruptions or street disturbances in the past year and the addresses of currently unoccupied homes.

The EPA also has ordered the state and city to add corrosion inhibitors at levels sufficient to re-optimize corrosion control.

Within 14 days, the state and city must submit to the Department of Environmental Quality and post to the new website several items, including a sampling plan for daily monitoring of water quality parameters and an operations plan for corrosion control equipment.

The order further bars the city from switching to the new Karegnondi Water Authority, expected to come online this summer, until the state and city submit a plan, subject to public comment, demonstrating the city has the technical, financial and managerial capacity to operate the water system in compliance with relevant laws.

Within seven days, the DEQ, with the city's concurrence, must engaged a panel of independent experts on drinking water treatment and Flint community members to make public recommendations on the steps needed to "mitigate the imminent and substantial endangerment to the health of persons" and the general operation of the city's water system.

To help ensure transparency and accountability, Ms. McCarthy said in her letter to Mr. Snyder that the agency would work with the city in the near-term to oversee and participate in the collection of Lead and Copper Rule drinking water samples by Flint residents and would have those samples analyzed in a "certified laboratory," with results available to the public.

But the EPA's ability to help is limited in scope, she said, and eventually the state will have to step up to continue restoration of safe drinking water in Flint.

"The EPA underscores that the state and city ultimately will need to work with independent recognized experts to undertake a broader effort to fully assess and verify the safety of Flint's drinking water system-wide," the letter said.

Snyder Press Secretary Dave Murray, responding to the EPA's actions, said in a statement: "The state of Michigan stands ready to work with the U.S. Environmental Protection Agency and all agencies to fix the water crisis in Flint. As Governor Snyder said in his State of the State Address earlier this week, government at all levels failed the people of Flint. He accepted accountability for that, and noted that federal, state, and local leaders broke the trust of the people. We should all focus on the needs of Flint - both immediate and long-term. Making the city whole again must be our top priority."

Of the $80 million, Mr. Murray said the state is grateful for the assistance.

U.S. Sen. Gary Peters (D-Bloomfield Township) praised the president's decision on the funding and called Ms. Hedman's resignation appropriate. He also commended the EPA for stepping into the situation.

"For months, the state of Michigan and MDEQ failed to take the necessary steps to ensure Flint residents had clean, safe drinking water," he said in a prepared statement. "I am pleased the EPA has announced it is stepping in and taking immediate action to protect the public health and increase transparency."

Subject: Flint Water Detail

Attached is a list containing the names of those approved to participate in the Flint Water detail. In order to minimize travel time, location of the volunteers was considered.

Attire: Appropriate attire for the weather conditions. Jeans are allowable. MSP uniforms including fatigue uniforms are prohibited. Military Surplus attire or attire that could be mistaken as that of the National Guard shall not be worn.

All individuals assigned to work as the Water Response Team in Flint shall report to the Genesee County EOC by 9 am on Thursday and/or Friday.

Location:
Genesee County Administration Building
1101 Beach St
Flint, MI 48502
In the basement or level "G" if someone used the elevator
Parking is available at Trinity Church, on the corner of Beach and Eighth. It is two blocks southeast of the Admin Building.

Lunch will be served at the EOC, Genesee County Admin. Building.

Each enforcement member should bring their assigned radio.
G Event 9 (primary) and G Event 10 (secondary) have been set up for 800 MHz communications.

Subject: Revised: Volunteers needed for water resource teams in Flint

Note: Dates are January 14 and January 15.

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on Thursday, January 14 and Friday, January 15. Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

This email was sent to vetterk@michigan.gov using GovDelivery, on behalf of: Michigan State Police · 333 S. Grand Ave · P.O. Box 30634 · Lansing, MI 48933

Michigan State Police Delivering Water Door-to-Door in Flint
FOX News Radio
By: Jeff Monosso
1.11.16

Michigan State Police and other state employees will go door-to-door in Flint beginning tomorrow to hand out bottled water.

Water testing kits, water filters, and replacement cartridges to families affected by the city's water crisis. Flint switched its drinking water source from the Detroit system to the Flint River in April 2014 to save money, but tests would later show that the Flint River was leaching lead from old plumbing, showing high levels of lead in Flint residents.

The city returned to Detroit water last October. Michigan which has declared a state of emergency for the city, says it'll work with the federal government to determine what additional resources are available.

Saginaw crime down 13 percent, homicides down 38 percent in 2015, police say
MLive
By: Andy Hoag
1.7.16

Overall crime in the city of Saginaw dropped 13 percent in 2015, according to statistics compiled by the Saginaw Police Department.

Saginaw Police Chief Bob Ruth, flanked by numerous officials from the law enforcement community, presented those statistics Thursday, Jan. 7, to media members.

"Our stats are tremendous," Ruth said. "It's a lot of hard work and dedication that the officers did to get to that level."

The city saw a reported 1,666 crimes last year, which was down from 1,922 in 2014. Key among that, Ruth said, was the decline in homicides — eight in 2015, down 38 percent from the 13 recorded in 2014.

"I wish we could eliminate all homicides," Ruth said. "But with the level of crime we have here in the city, the level of gang violence, drugs, it's going to be a very difficult task to ever obtain."

The city's homicide count reached a 20-year high in 2012 with 30, including three that were ruled justified and one that was ruled non-criminal. That was a nearly four-fold spike from 2010, when there were eight homicides.

Ruth expressed optimism in avoiding another spike after the effort to bring the number below double digits.

"We have to keep doing what we're doing," the chief said. "You have to keep the criminals on the run. ... You can't let go. The drug dealers and the gangbangers will take over if you don't stay on them."

The number of shootings, which includes fatal and non-fatal incidents, increased from 36 to 38. Ruth was quick to compare those two numbers to those of other recent years, including 76 in 2013 and 109 in 2012.

Ruth, Michigan State Police 1st Lt. and Tri-City Post Commander David Simon, and Saginaw County Prosecutor John McColgan all credited the collaboration between the city police and state police, among other factors. Gov. Rick Snyder's "Secure Cities Partnership" in 2011 brought additional state police troopers to patrol Saginaw and other cities with violence issues, and state police and city police detectives work together in the Major Crime Unit.

"It makes me proud, when I'll go to a scene of a crime, and I see a trooper and a city police officer working hand in hand on a case, for the citizens of Saginaw, to solve that crime," Ruth said. "We work together as a team."

Teamwork was the focus of McColgan's speech.

"My goal is to get Saginaw back to the community it was when I was growing up, so our children today are allowed to grow up in a safe place," McColgan said. "We are getting there, and it's because of the team, the team, the team."

Ruth and McColgan also pointed to the impact of the community and its neighborhood associations, the number of which now has reached 16, he said. Ruth said he sometimes has as many as 75 people present for his monthly chief's meetings.

"The citizens are sick and tired of the crime that we have dealt with for years," Ruth said. "The citizens are taking the streets back. They're doing it on their own; they're doing it through the neighborhood associations, working with SCENIC, fighting blight within the city. As our city is becoming cleaner, and we're getting rid of the houses that are decaying, our city is getting safer."

McColgan also credited the impact of his office's Saginaw Witness Assistance Program, or SWAP, which recently received a $10,000 contribution from Consumers Energy.

"I believe that citizens are recognizing that they need to come forward and are doing so in the effort to not have to live in fear," McColgan said.

Ruth also spoke highly of citizen cooperation, including individuals who listen to police radio scanners and call 911 to aid in the search for suspects.

"They're being cooperative; that's where it's at," Ruth said. "That's how we're solving crime. When people see things within their neighborhoods, they're telling us."

In addition to a decline in homicides, the city also saw a 30-percent decline in robberies, an 18-percent decline in felonious assaults, a 15-percent decline in forced-entry burglaries, and a 12-percent decline in larcenies.

"I can't praise law enforcement enough," McColgan said. "The job everyone in the various departments is doing is outstanding. ... We in this community are truly indebted to you."

Michigan State Police tell people how to identify, report stalkers
MLive

By: Cole Waterman
1.8.16

Troopers at the Michigan State Police Tri-City Post in Williams Township want people to know how to identify and report stalking.

"Unfortunately, victims of stalking are often afraid to come forward," said Trooper Michael Darrow, the post's community service trooper. "It is important for victims of stalking to report this crime to law enforcement so we have a better opportunity to protect victims and help prevent future stalking encounters."

According to the Bureau of Justice Statistics, 6.6 million adults in the U.S. were stalked in a one-year period. Three-fourths of those people know their stalker.

Michigan law defines stalking as "a willful course of conduct involving repeated or continuing harassment of another individual that would cause a reasonable person to feel terrorized, frightened, intimidated, threatened, harassed or molested and that actually causes the victim to feel terrorized, frightened, intimidated, threatened, harassed or molested."

Stalking of an adult is a misdemeanor punishable by up to one year in jail and a fine of $1,000. Stalking a minor is a felony punishable by up to five years imprisonment and a $10,000 fine.

The National Center for Victims of Crime provides a comprehensive list of resources available to stalking victims on their website at www.victimsofcrime.org.

If you believe you are being stalked, seek help as soon as possible by notifying police.

Schloegl takes over for Perison as Camp Grayling commander
Petoskey News
By: Kurt J. Kolka
1.11.16

GRAYLING — Camp Grayling bid farewell to one garrison commander and welcomed another at a special change of command ceremony Sunday.

Col. Thomas C. Perison of Gaylord was honored for his many contributions to the camp during his tenure. Perison has had a distinguished career. During the 9/11 attacks he was one of the soldiers rescuing personnel from the Pentagon. At Camp Grayling, his time as commander will be remembered for putting the camp on the map for top military leaders.

In a speech, Perison acknowledged that what was accomplished was the result of a team effort. He paid special tribute to his wife, retired Lt. Col. Amy Perison, who served with him.

Brig. Gen. Michael Stone praised Perison's accomplishments while commander.

"We have videos made here which have been shown to four-star generals and the governor," Stone said. "And who are in those videos? Our commander and Lt. Maj. Clare Knox. They're out in the exercises, doing 14 jobs at once. And it's stressful.

"About four years ago, we brought in some of the senior leadership of the Army to look at Camp Grayling and help us. And they had never even heard of Camp Grayling. The last couple years, Tom has been able to bring in some top senior leaders – the Chief of the National Guard Bureau, who is on the Joint Chiefs of Staff. We are at the point now where the senior-most leadership of the Army is telling our story for us."

Perison plans to stay in the area. He will now be serving as deputy to the installations commander.
Col. Lawrence E. Schloegl was then welcomed to his new position as commander and given a chance to speak.

"I am truly honored to be given this opportunity," Schloegl said. "I am very happy and excited to be back in Camp Grayling."

Schloegl is not a new face to the camp. He spent some of his early military career working there in the 1990s and 2000s.

"Some of my most favorite times in the military were spent in Camp Grayling," he said. "I treasure the relationships I've made here."

He served in both Kuwait and Iraq. Schloegl is a Michigan State Police trooper and commander of the Michigan State Police Mount Pleasant Post.

His awards and decorations include the Bronze Star Medal, Army Meritous Service Medal, Army Commendations Medal 4th award, Army Achievement Medal, National Defense Service Medal (two Bronze Stars), Global War on Terror Expeditionary Medal, Global War on Terror Service Medal and the Michigan Legion of Merit Medal.

"I know that it has not been easy the past few years with personnel and budget cuts," Schloegl said. "But I am awestruck by what all of you have accomplished — all the facilities upgraded, new ranges and tremendous support. Your commitment and teamwork is what allows this installation to be so successful."

Schloegl's brief speech as incoming commander can be seen on video at the Gaylord Herald Times website, www.gaylordheraldtimes.com.
http://www.petoskeynews.com/gaylord/featured-ght/top-gallery/schloegl-takes-over-for-perison-as-camp-grayling-commander/article_c8707045-4b24-5402-a9e5-dc61aef7803f.html

Meet the newest troopers
Livingston Daily
1.9.16

Ah the New Year! Full of resolutions and commitments to do better, change behaviors and start new ones. Did you know though, according to some scientists, it takes about 60 days to change a behavior? That takes some effort — especially if you're trying to change a habit or start a new one.

The Michigan State Police runs a recruit school for approximately 21 weeks. After the recruit school, they are assigned to the field where they are then evaluated for another 17 weeks in a field officer training program. From day one, the Michigan State Police start training recruits to have good police habits. They teach recruits the proper techniques to be a law enforcement officer. Recruits receive over 1,000 hours of training to become a Michigan State Trooper. In the spirit of the New Year, I would like to tell you about two of our newest troopers here at the Michigan State Police Brighton Post, Trooper Derek Miller and Trooper Zachary Reaume.

Trooper Reaume was born in Monroe County and is a graduate of Monroe High School. He went on to earn a criminal justice degree from Monroe County Community College. After obtaining his degree, he completed basic training in Cape May, New Jersey, and became a member of the U.S Coast Guard Reserve. Additional training led him to specialize in

maritime law enforcement, and he currently serves as a petty officer third class at Port Security Unit 309 in Port Clinton, Ohio. This background served as his inspiration to pursue a career with the Michigan State Police. He became a member of the Michigan State Police Brighton Post on July 24, after successful completion of the 128th Trooper Recruit School.

Trooper Miller is originally from the Upper Peninsula and a graduate of Lake Superior State University. He has a degree in criminal justice and a minor in fire science. He attended Northern Michigan University Regional Police Academy out of college, and soon after graduation was hired by the Michigan Department of Natural Resources Law Enforcement Division. Trooper Miller said he has always wanted to be a trooper with the Michigan State Police, and after eight years of service with the Department of Natural Resources, he decided to follow his dream of becoming a trooper. Trooper Miller said he has always respected the image and professionalism of every trooper and decided it was time to do the job he always wanted to do. He became a member of the 128th Trooper Recruit School with hopes of someday being assigned to our very post, the Brighton Post.

In speaking with both Troopers Miller and Reaume, the process of becoming a trooper has been the most difficult and rewarding experience of their lives. Every aspect of their journey to becoming a trooper has been centered on the desire to help others; to promote justice and protect others. They both expressed honor in being able to carry on a long tradition of excellence the Michigan State Police has displayed for almost one-hundred years. Each day they put on the uniform, they are able to make an impact on the lives of others. You might say they formed some pretty good habits.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

JOIN THE MSP

From: Colonel Etue [mailto:MichStatePolice@govsubscriptions.michigan.gov]
Sent: Tuesday, January 12, 2016 4:25 PM
To: Leduke, Roxanne (MSP)
Subject: Volunteers needed for water resource teams in Flint

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

This email was sent to leduker@michigan.gov using GovDelivery, on behalf of: Michigan State Police · 333 S. Grand Ave · P.O. Box 30634 · Lansing, MI 48933

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

From: Colonel Etue [mailto:MichStatePolice@govsubscriptions.michigan.gov]
Sent: Tuesday, January 12, 2016 4:39 PM
To: Becker Bennett, Nancy (MSP)
Subject: Revised: Volunteers needed for water resource teams in Flint

Note: Dates are January 14 and January 15.

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on Thursday, January 14 and Friday, January 15. Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one

or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

This email was sent to beckern@michigan.gov using GovDelivery, on behalf of: Michigan State Police · 333 S. Grand Ave · P.O. Box 30634 · Lansing, MI 48933

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

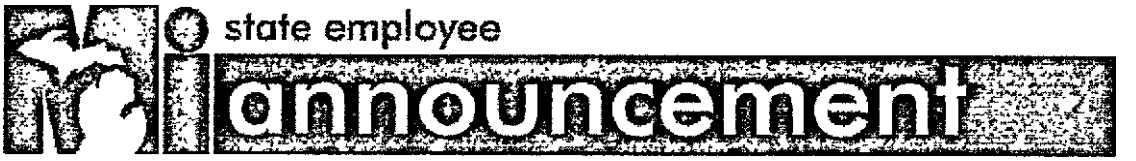
Subject: Volunteer Opportunity in Flint



The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, https://www.surveymonkey.com/r/28NVJBL

To volunteer on Sunday, January 17, https://www.surveymonkey.com/r/26NMJKK

To volunteer on Monday, January 18, https://www.surveymonkey.com/r/26P7P5G

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9

Good Morning Keith,

The best thing to do is get in contact with our donations management staff assigned to this incident. I've cc'd their email address here and they will be able assist you.

We appreciate the water donations and are actually setting up a warehouse specifically for public donations!

Thank you so much for your interest and support in helping the City of Flint!

Good Morning Michelle,

I just received a phone call from Trooper Cecil Vashaw, the CST at the Wayland Post. He manages an Explorer's group and they have expressed interest in collecting water for Flint for their community service project. I wanted to check with you for your advice on how to best accomplish this. I don't want them to do something out in the public that wasn't consistent with MSP's mission in regards to Flint water. Can you please advise your thoughts and advice for Tpr. Vashaw to move forward with something?

Thanks
Keith

Subject: Belanger/Kramer MONDAY TRAINING

Hi Keith,

Per the state of emergency declared by the Governor, we need to specifically tap the services of Troopers Belanger and Kramer for a detail in the City of Flint on Monday and Tuesday (1/11-1/12). I understand that they have previously scheduled training, however this particular detail is a request as a part of the Incident Command System via the SEOC and the services of CSTs have been specifically identified for completing this task.

Sorry for the late cancellation, if you have any questions, please let me know or feel free to call my cell phone at

Thanks,

Amy

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

From: Colonel Etue [mailto:MichStatePolice@govsubscriptions.michigan.gov]
Sent: Tuesday, January 12, 2016 4:25 PM

To: Leduke, Roxanne (MSP)
Subject: Volunteers needed for water resource teams in Flint

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Volunteers will begin their assignment in Flint at 9 a.m and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

This email was sent to leduker@michigan.gov using GovDelivery, on behalf of: Michigan State Police · 333 S. Grand Ave · P.O. Box 30634 · Lansing, MI 48933

Subject: SIGNAL 1 MOBILIZATION - FLINT PROTESTS

Lt. Col. Sands has authorized a Signal One in preparation for the potential of civil unrest for planned protests in the City of Flint today, February 3, 2016, and potentially through the remainder of the week. The Signal One will be for on-duty regularly scheduled patrols for Third District posts. Would please send out the notification as outlined in Official Order #4:
Signal One – Third District posts

A Signal One is in effect immediately for scheduled on-duty Third District post patrols.

The Signal One is in preparation for the potential of civil unrest resulting from planned protests in the City of Flint today, February 3, 2016, and potentially through the remainder of the week.

Impacted personnel are to take the appropriate actions in response to the Signal One, as outlined in Official Order #4. The MIOC and Third District command will continue to monitor events for public safety and situational awareness recognizing that all citizens have a constitutionally protected right to assemble.

Authority: Lt. Col. W. Thomas Sands, Deputy Director, Field Services Bureau

FOIA and Records Retention

Michigan's Freedom of Information Act Act 442 of 1976

"It is the public policy of this state that all persons, except those persons incarcerated in state or local correctional facilities, are entitled to full and complete information regarding the affairs of government and the official acts of those who represent them as public officials...The people shall be informed so that they may fully participate in the democratic process."

Michigan's Freedom of Information Act General Provisions

Sec. 2(e)

"Public record" means a writing prepared, owned, used, ***in the possession of***, or retained by a public body in the performance of an ***official function*** ..

Michigan's Freedom of Information Act General Provisions

A Public Record is broadly defined as any writing that is prepared, owned, used, in the possession of, or retained by a public body in the performance of an official function, from the time it is created.

Michigan's Freedom of Information Act General Provisions

Writing means handwriting, typewriting, printing, photostatting, photographing, photocopying, and every other means of recording, and includes letters, words, pictures, sounds, or symbols, or combinations thereof, and papers, maps, magnetic or paper tapes, photographic films or prints, microfilm, microfiche, magnetic or punched cards, discs, drums, or other means of recording or retaining meaningful content.

Records Include

- Email
- Text messages

Retention Schedule

- Management and Budget Act, MCL 18.1284
- Destruction/disposal of records must be consistent with an approved retention schedule

Plan Timelines

- Estimates to the Governor's staff by COB on February 12, 2016
- Documents to the FOIU by COB on February 19, 2016
- Reviewed documents to Governor's staff by COB on February 29, 2016

Gackstetter, Lance (MSP)

From: State of Michigan <MISOM@govsubscriptions.michigan.gov>
Sent: Monday, January 25, 2016 11:38 AM
To: Gackstetter, Lance (MSP)
Subject: State cybersecurity is up to you

You have likely seen the media reports regarding the threats being made through Twitter and YouTube to attack and take down Michigan.gov and other websites related to state government and the City of Flint. The State of Michigan team consisting of DTMB, MSP and the National Guard is working closely with our federal and private partners to identify any threats and mitigate any potential attempts to interrupt our services.

Effective cybersecurity is a complete team effort. It is imperative that every one of us, as state employees and general citizens, are following proper security protocols in order to stay safe. Recent data shows that 95 percent of cyber breaches are caused by human error such as emailing sensitive documents, clicking on phishing scams and inappropriately using flash drives.

You have learned about the ways that cyber criminals attempt to gain access through your Security Mentor training. Here are a few tips to serve as a reminder on how to protect you both personally and professionally.

- Choose strong passwords and change them often. A strong password uses a combination of letters, numbers, and symbols (when allowed) and does not include a person's name or other commonly known information such as their children's or pet's names.
- Do not use the same password for multiple accounts.
- Be aware of possible phishing attacks. If you receive an email claiming to be from an email provider, bank, or other frequented website that asks you to change your account password or update account information, make sure the email is legitimate. To be safe, go directly to websites to change your password, and type the link yourself rather than clicking on links embedded in emails.
- Be on the lookout for other people accessing your personal accounts. Monitor email and social media accounts for suspicious messages or messages appearing from you, but that you did not send. Monitor bank and credit card accounts for unauthorized charges.
- Be observant in state office buildings for anything unusual. Do not let in anyone without a valid state ID. If you see any unusual behavior contact central control at 517-373-0196.

As always, if you receive an email or a phone call that seems unusual, please report it to 517-335-1722 or abuse@michigan.gov.

This e-mail was sent to gackstetterl1@michigan.gov using GovDelivery on behalf of: the State of Michigan, 111

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Subject: URGENT - Records Request

Dear Staff:
Please see the below urgent email regarding documents relating to the Flint Water Issue. If you have any emails or documents in your possession, we need to get the number of those documents Lori Hinkley by today. Then submit those documents to Legal Resources by February 18th. That includes any emails in which you may have exchanged regarding the volunteer efforts.
If you have any documents responsive to this request in your possession please get your estimates to Lori Hinkley and cc me please.
Thanks you!
Katie

From: Zarotney, Greg (MSP)
Sent: Thursday, February 11, 2016 5:01 PM
Subject: URGENT - Records Request
Importance: High

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than 2:00 PM on Friday, February 12, 2016.

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on Thursday, February 18, 2016.

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is two years. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

Subject: Flint water drive?

Good morning Larry,

So, I was thinking about how we can help with the Flint water situation... Maybe we can have our own little water drive as a section & have everyone bring in a case or two of water and then we can donate that to the efforts? I realize not everyone has time to donate, but maybe we could start our own? And then we could get our section credit for volunteer work?

Just a suggestion.

MICHIGAN STATE POLICE
EXECUTIVE COUNCIL MEETING
February 2, 2016

A meeting of the Executive Council was called to order at 9:00 a.m. at State Police Headquarters with the following persons in attendance:

Col. Kriste Kibbey Etue, Director
Lt. Col. Richard Arnold, Deputy Director, State Services Bureau
Lt. Col. Gary Gorski, Deputy Director, Specialized Services Bureau
Lt. Col. Thomas Sands, Deputy Director, Field Services Bureau
Mr. Shawn Sible, Deputy Director. Administrative Services Bureau
Capt. Greg Zarotney, Chief of Staff, Office of the Director
Ms. Linda Cwiek, Office of the Director
Ms. Josephine Klotz, Office of the Director

Guests: Ms. Stephanie Horton, Human Resources Division
Ms. Sherri Irwin, Departmental Services Division
Capt. Christopher Kelenske, Emergency Management and Homeland Security Division
Ms. Jacqueline Reese, Internal Auditor
Ms. Shanon Banner, Public Affairs Section
F/Lt. Chris Hawkins, Legislative and Legal Resources Section
F/Lt. Robert Hendrix, Recruiting and Selection Section

1. Legislative Update

F/Lieutenant Hawkins provided an update on pending legislative issues, to include roadside testing of oral fluids, proposed expansion of airport police authority, and critical infrastructure Freedom of Information Act exemptions. The process of soliciting legislative priorities has been changed. Rather than soliciting ideas from employees on an annual basis, the Legislative and Legal Resources Section will accept suggestions at any time. Submissions will be reviewed by the Executive Council as they are received to determine whether they will be added to the department's legislative priority list.

2. Equal Opportunity Employment Plan (EEOP)

As a recipient of federal grant funds, the department is required to collect and maintain extensive employment data by race, national origin, and sex. Ms. Jackie Reese and Ms. Stephanie Horton reviewed with Executive Council members the EEOP Utilization Report prepared for the U.S. Department of Justice, Office of Justice Programs. Following this review, the Executive Council decided on the following action plan:

- The Executive Council will review the department's employment data on an annual basis. This requirement will be added to the department's Official Orders.
- The EEOP Utilization Report will be posted on the department's Human Resources Intranet site, making it available to all employees and for employees to share with members of the public who may request a copy. The Human Resources Division will post a memo on Official Correspondence to notify employees of this report.
- The department will research options for obtaining employment data from all law enforcement agencies in Michigan.
- Further research will be done to determine if the topic of employment data might be appropriate for a future Leadership Development Academy or Staff and Command project.
- The competency "Valuing Diversity and Inclusion" will be added to managers' performance plans in the future.

3. Recruiting

F/Lieutenant Hendrix provided Executive Council members with an update on trooper recruiting activities. Several changes have been made to improve and streamline the steps, without negatively impacting the effectiveness of the process. The entry level exam was updated in July of 2014, resulting in quicker turn-around times to receive scores; the application process was streamlined through use of NEOGOV, resulting in less paperwork and providing applicants the ability to check their status on-line at any time; and the physical agility test is now being offered in multiple areas of the state. In addition, the number of department members participating in pre-screening interviews, background reviews, and hiring panels has been limited to help ensure consistency in the evaluation process. Upcoming trooper recruit school dates are as follows:

- 129th Trooper Recruit School – starts March 27, 2016
- 130th Trooper Recruit School – starts June 5, 2016
- 131st Trooper Recruit School – starts July 17, 2016

4. Chaplain Corp Award

Lt. Colonel Arnold advised that the Chaplain Corp has requested permission to create an award to be granted annually to an enforcement member who displays selfless service traits and is dedicated to bettering the lives of those around them. Colonel Etue approved allowing the Chaplains to move forward with drafting a formal proposal for Executive Council approval.

5. Flint Water Response Efforts

Captain Kelenske and Ms. Banner provided an update on ongoing Flint water response efforts.

6. FY16 Spend Plans

Ms. Sherri Irwin walked Executive Council members through the department's FY16 spend plan and provided updates on the FY16 budget and FY 17 budget plans.

Minutes approved by Col. Kriste Kibbey Etue, Director

Subject: FW: URGENT - SEOC Activation
Attachments: 2016-01-05 Flint Water Governor's Declaration.pdf

Importance: High

FYI ... No action needed. Below contains part of the information sent out to SEMCs.

MICIMS Incident for monitoring: 2015-10-01-City of Flint-Water Contamination / Shortage

---

Subject: URGENT - SEOC Activation

On January 4, 2016, Genesee County requested that a "State of Emergency/Disaster" be issued by Governor Snyder. Today, the Governor issued a State of Emergency declaration.

EMHSD will activate the SEOC tomorrow at 0800 and will conduct a briefing at 0900 on the event. All state agencies are to send a representative to the 0900 briefing. MDHHS and MDEQ have been directed to brief on the situation. Following initial SEOC briefings, each state agency, in consultation with the State Director, must determine if they need to play a role in ongoing SEOC operations to contribute to addressing the problem. At minimum, MDEQ, MDHHS, Education, DTED, DTMB, and MDARD should maintain a presence in the SEOC. The initial focus of the SEOC will be to:

- Identify and implement any needed protective actions to protect public health and safety;
- Develop situational awareness;
- Develop understanding of technical aspects;
- Coordinate damage assessment;
- Coordinate public information; and
- Identify programs to assist in remediating damage.

STATE OF MICHIGAN
EXECUTIVE OFFICE
LANSING

RICK SNYDER
GOVERNOR

BRIAN CALLEY
LT. GOVERNOR

PROCLAMATION

DECLARATION OF EMERGENCY

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, under the Emergency Management Act, Act No. 390 of the Public Acts of 1976, as amended, MCL 30.401 to 30.421, the Governor is responsible for coping with dangers to this state or the people of this state presented by a disaster or emergency or threat thereof, and may issue executive orders and proclamations, having the force and effect of law to implement the Act; and

WHEREAS, under Section 3 of the Emergency Management Act, 1976 Public Act 390, MCL 30.403, the Governor shall, by executive order or proclamation, declare a state of emergency if the Governor finds that an emergency has occurred or that the threat of an emergency exists; and

WHEREAS, on April 25, 2014 the City of Flint, Michigan switched from the Detroit water system to the Flint River as a water source, the harmful effects of untreated water struck the city's water infrastructure, causing leaching of lead into the water which caused damage to the water system and potential negative health impacts to the citizens; and

WHEREAS, the area affected includes parts of the City of Flint, within the County of Genesee; and

WHEREAS, the damaged water infrastructure and leaching of lead into the city's water caused damage to public and private water infrastructure, and has either caused or threatened to cause elevated blood lead levels, especially in the population of children and pregnant women, and causing a potential immediate threat to public health and safety and disrupting vital community services; and

WHEREAS, from October 1, 2015 to this date, the County of Genesee and the City of Flint have taken a number of actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16th, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling

and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, local resources have been insufficient to address the situation, and additional assistance from voluntary organizations and the state is required to protect public health, safety, and property, and to lessen or avert the threat of more severe and long lasting impacts to the community;

NOW, THEREFORE, I, RICHARD D. SNYDER, Governor of the state of Michigan, pursuant to the Constitution of the state of Michigan and provisions of Act No. 390 of the Public Acts of 1976, as amended, do hereby proclaim that a state of emergency exists in the aforementioned county and municipality; and

FURTHER, the Emergency Management and Homeland Security Division of the Department of State Police shall coordinate and maximize all state efforts, and may call upon all state departments to utilize resources at their avail to assist in the emergency area pursuant to the Michigan Emergency Management Plan; and

FURTHER, termination of this emergency will occur at such time as the threats to public health, safety, and property caused by the emergency no longer exist and appropriate programs have been implemented to recover from the effects of this emergency, but in no case longer than February 1, 2016, unless extended as provided by Act No. 390.

Given under my hand and the Great Seal of the State of Michigan this 5th day of January in the Year of Our Lord, Two Thousand and Sixteen.

RICHARD D. SNYDER
GOVERNOR

Subject: Daily Report

This is the first of daily reports from me on activity and issues concerning the Flint water situation.

MONDAY

- The Governor & Flint Mayor Weaver held a press conference in Flint to stress the use of 211 for residents in need of water, detail the water distribution system, and clarify our coordination with FEMA.
- The SEOC is improving its restocking system to make sure no water resource sites run out of supplies. Part of that effort entails the SEOC expanding its partnership with the Red Cross, which is providing expertise on warehousing, inventory and transporting supplies in emergency situations.

- The SEOC began mapping lead service lines.

COMING UP TODAY:

- Home Depot is donating over 12,700 cases of water daily starting today
- Door-to-door teams had a kick off press conference at the Genesee County Community Action Resource Department, and began distributing water resources in neighborhoods.
- A PSA will be submitted to Comcast, with MSP Capt. Kelenske providing water resource information.

Subject: Public Affairs staffing

All,

As Public Affairs continues to support the State of Michigan Joint Information Center (JIC) for the Flint water emergency, below are our staffing commitments through the end of the week:

Name	Wednesday Jan. 13	Thursday Jan. 14	Friday Jan. 15
Shanon Banner	JIC – Flint	JIC – Flint	PA – Lansing
Nicole Lisabeth	JIC – Flint	Pass day	JIC – Flint
Tiffany Brown	JIC - Flint	JIC - Flint	JIC - Flint
Sierra Medrano	PA – Lansing (remote: social media/mm)	PA – Lansing (remote: social media/mm)	Annual leave
Ron Leix	Pass day	JIC Flint	JIC Flint

Note that I am attempting to leave one communications representative in the Public Affairs office on all business days to handle non-Flint MSP issues. Please let me know if you have questions or concerns.

Thanks,
Shanon

Subject: Daily Update

Here is today's report on activity and issues concerning the Flint water situation.

TUESDAY

- The Governor issued an Executive Order to activate the National Guard, and requested FEMA support, which was approved. This was announced late, but digital and broadcast media picked up on it quickly.
- A Red Cross logistics planner from Washington DC has arrived to assist in streamlining the inventory and distribution process.

- Teams started canvassing Flint neighborhoods and handing out water resources and information. Thanks to mapping of households, it appears the number of households to visit has been reduced from 56,000 to 29,000.

- The National Guard will start arriving today, and staff up to about 30 people by Friday. With National Guard personnel handing out bottles of water from the five fire stations, Red Cross personnel will be freed up to go door-to-door in Flint neighborhoods.
- A PSA video was shared widely on social media

COMING UP

- A second warehouse opens today and will start receiving supplies.

Attached is a list containing the names of those approved to participate in the Flint Water detail. In order to minimize travel time, location of the volunteers was considered. Each Bureau is responsible for notifying their respective staff members and arranging for carpooling to Flint.

Attire: Appropriate attire for the weather conditions. Jeans are allowable. MSP uniforms including fatigue uniforms are prohibited. Military Surplus attire or attire that could be mistaken as that of the National Guard shall not be worn.

All individuals assigned to work as the Water Response Team in Flint shall report to the Genesee County EOC by 9 am on Thursday and/or Friday.

Location:
Genesee County Administration Building
1101 Beach St
Flint, MI 48502
In the basement or level "G" if someone used the elevator

Parking is available at Trinity Church, on the corner of Beach and Eighth. It is two blocks southeast of the Admin Building.

Lunch will be served at the EOC, Genesee County Admin. Building.

Each enforcement member should bring their assigned radio.

All individuals assigned to work as the Water Response Team in Flint shall report to the Genesee County EOC by 9 am on Thursday and/or Friday.

Location:
Genesee County Administration Building
1101 Beach St
Flint, MI 48502
In the basement or level "G" if someone used the elevator
Parking is available at Trinity Church, on the corner of Beach and Eighth. It is two blocks southeast of the Admin Building.

Lunch will be served at the EOC, Genesee County Admin. Building.

Each enforcement member should bring their assigned radio.

Thanks,
Jo

Flint Water Emergency Response
Congressional/Legislative Call
Remarks for Capt. Chris Kelenske

NOT INTENDED TO BE DISSEMINATED TO THE MEDIA OR PUBLIC IN THIS FORMAT

Background

- Yesterday, President Obama approved the Governor's request for a federal emergency in Flint. This action will provide emergency relief in the form of bottled water, water filters, filter replacements, and water test kits. The period of assistance is up to 90 days.
    - Under the Stafford Act, resources totaling $5 million can be used for federal emergencies, with a required state match of 25 percent. It's important to note that we shouldn't view this as a $5 million cap on federal assistance, because if the $5 million is exhausted, Congress has the option to approve additional funding.
    - Governor Snyder had also requested a major disaster declaration, which the President denied based on the legal requirement that under the Stafford Act disaster relief is available only for natural events, fires, floods, or explosions. The state is reviewing the process for appealing the disaster declaration denial.
    - Mr. David Samaniego, our Federal Coordinating Officer (FCO) from FEMA is on the call and will give an update next.

Current Status/Update

- Today, which is our 12th day of coordinating this emergency response, we are continuing to bring all state resources to bear to protect public health and safety.
- One of our most important messages and priorities continues to be making sure residents are aware of the information and free resources available to them, which include bottled water, water filters, replacement cartridges, water test kits.

- The one-stop shop for finding all these resources is by visiting www.michigan.gov/FlintWater or calling 2-1-1.

- Including today's activity, water response teams, who are going door-to-door, have distributed resources to nearly 7,000 Flint homes providing residents with free bottled water, filters, replacement cartridges, and water testing kits.

- More than 12,000 homes have been visited by the water response teams, which are a collaborative effort comprised of local and state personnel, American Red Cross personnel, and volunteers.

- The Michigan National Guard has been activated to assist with distribution efforts at the five water resource sites at fire stations in the city. Starting tomorrow, the number of National Guard members will be further increased to approximately 70 National Guard members handing out resources at the fire stations in the city.

- From January 9 - 16, the following resources have been distributed to residents, both at the water resource sites and by the water response teams:

    - Nearly 20,900 cases of water
    - Nearly 48,000 water filters
    - More than 3,300 water testing kits

- To help enhance the water testing process, Flint residents can now drop-off water samples to the five water resource sites at fire stations. Samples will only be accepted by using the official water testing kits provided at the water resource sites and by the water response teams.

- Water resource sites are open daily from 9 a.m. to 9 p.m. and are located at:

    Fire Station #1
    310 East 5th St.
    Flint, MI 48502

    Fire Station #3
    1525 Martin Luther King Ave.
    Flint, MI 48503

    Fire Station #5
    3402 Western Road
    Flint, MI 48506

    Fire Station #6
    716 West Pierson Road
    Flint, MI 48505

Fire Station #8
202 East Atherton Road
Flint, MI 48507

Filters

- When used properly water filters remove 99% of lead in water.
- Residents are urged to use filtered water for drinking, food preparation, brushing teeth and watering pets. Unfiltered water may be used for bathing and cleaning.
- One filter and one replacement cartridge are being provided per household initially. Each filter is good for approximately 100 gallons of water. The filter has an indicator on it that will turn from green to red when it needs to be replaced.
- The filters do have a five-year, non-replaceable battery that operates the indicator light.
- There is a detailed video posted on www.michigan.gov/flintwater that explains how to properly install a water filter cartridge. We are also working to develop an instruction sheet for 211 to walk through with those individuals without internet access.
- Small business owners seeking water filters at the water resource sites should not be turned away.

Resources for homebound individuals

- 2-1-1 is collecting a list of individuals needing home delivery of water resources and is providing that information to the Genesee County Sheriff's Department, who is making these deliveries.
- The Plumbers and Pipefitters Union has agreed to provide free water filter installation to homebound residents needing assistance. This is being coordinated through 2-1-1.

Outside Support Efforts – Volunteers and Donations

- There has been great cooperation on the ground in Flint by many local agencies, from the city and county to churches and public, private, and non-profit groups to help with this effort.
- The American Red Cross, United Way, 2-1-1, and many other organizations have assisted with water resource distribution efforts and the donations management process.

- Volunteers and donations are being coordinated through 2-1-1, in cooperation with the American Red Cross.

- Persons/organizations wishing to donate 100 cases of water or less can be taken to the American Red Cross located at 1401 S. Grand Traverse in Flint.

- Volunteers can also report to the American Red Cross for processing.

National Guard Mobilization

- Governor Snyder issued an Executive Order on January 12, 2016, to activate Michigan National Guard.
    - Currently they are being used to staff water resource sites to support the distribution of bottled watered, water filters, replacement cartridges, and water testing kits
    - National Guard personnel will not be going door to door with the water resource teams, at this time.
    - National Guard is uniquely prepared and trained to respond quickly in emergency situations.
    - First group of National Guard personnel arrived in Flint on Wednesday, January 13 to conduct assessment and get acclimated.
    - more personnel arrived Friday; expansion to approximately personnel by Monday.
    - This is the second time the Governor has activated the National Guard.
        - *Last time was for the Duck Lake Fire in Luce County in May 2012.*
    - Per Michigan Emergency Management Plan, the Michigan State Police Director or designee is responsible for coordinating all state efforts, including the Michigan National Guard.
    - Activation of the Michigan National Guard allows the volunteers from the American Red Cross, who have been staffing the water resource sites, to *join the water distribution teams.*

Water Bills

- The City of Flint is responsible for issuing water shut-off notices for non-payment. Per the Mayor, the city has put a halt on all notices or disconnections. Shut off notices have not been mailed since the beginning of December.

- Water payment inquiries should be referred to the City of Flint.

Attorney General Investigation

- The Michigan Attorney General announced Friday he is investigating whether any Michigan laws were violated in the process that led to this emergency.

Other/Misc.

- Water is being distributed primarily in bottles rather than jugs. The reason for this is that the donations received are largely comprised of bottled water. Requests for water in jugs have been made when donors have inquired about our needs.

- The state recognizes that offering recycling options for empty water bottles is a priority. Measures are being put in place soon.

- Legionnaires disease- related inquiries should be directed to MDHHS and Genesee County Health Department.

- Governor has asked the Receivership Transition Advisory Board to transfer the powers and authority currently vested in the city administrator to the mayor. Any inquiries related to this should be referred to the Governor's office.

State Emergency Operations Center

- The State Emergency Operations Center has been activated since January 5 and continues to be staffed seven days a week by members of state agencies and other partners.

January 18, 2016

Flint Water Emergency Response
Talking Points for Capt. Chris Kelenske
Meeting with Republican Caucus

NOT INTENDED TO BE DISSEMINATED
TO THE MEDIA OR PUBLIC IN THIS FORMAT

Chronology

- October 1, 2015: Public Health Emergency Declaration issued
- December 14, 2015: State of Emergency declared by City of Flint.
- January 4, 2016: Genesee County Board of Commissioners declared a local emergency
    - In a separate document, Genesee County requested a Governor's Declaration of Emergency
- January 5, 2015: Governor declared State of Emergency
    - State Emergency Operations Center activated in Lansing to coordinate state response
    - Joint Information Center (JIC) activated on January 6, 2016 in Lansing; moved to Flint on January 11, 2016
- January 9, 2016: Water resource sites established at fire stations
- January 12, 2016: Water resource teams began going door-to-door
- January 12, 2016: Governor Snyder issued an Executive Order activating the Michigan National Guard
- January 14, 2016: Governor requested Presidential declaration of emergency and expedited major disaster for Genesee County
- January 16, 2016: President Obama approved the Governor's request for a federal emergency in Flint.
    - Denied request for major disaster

Federal Support

- President Obama's approval of a federal emergency in Flint provides emergency relief in the form of bottled water, water filters, filter replacements, and water test kits. The period of assistance is up to 90 days.

- In addition, the state is working with the Federal Emergency Management Agency (FEMA) to coordinate an interagency recovery plan with other federal agencies to provide resources to Flint.

    - Coordination will include identifying federal agencies that have programs, authorities and/or technical expertise that could be utilized in the ongoing response and recovery efforts in Flint to be made available. Such federal agencies may include the Department of Health and Human Services, Environmental Protection Agency, Department of Housing and Urban Development, and Army Corps of Engineers.

Current Status/Update

- We are continuing to bring all state resources to bear to protect public health and safety.

- One of our most important messages and priorities continues to be making sure residents are aware of the information and free resources available to them, which include bottled water, water filters, replacement cartridges, water test kits.

- The one-stop shop for finding all these resources is by visiting www.michigan.gov/FlintWater or calling 2-1-1.

- To date, more than 21,300 homes have been visited by water response teams who are going door-to-door to distribute free bottled water, filters, replacement cartridges, and water testing kits.

    - Water response teams are a collaborative effort comprised of city, county, state personnel, American Red Cross personnel, and volunteers.

- The Michigan National Guard has been activated to assist with distribution efforts at the five water resource sites at fire stations in the city.
    - There are approximately 70 National Guard members handing out water resources at the fire stations in the city.

- Since January 9, the following resources have been distributed to residents, both at the water resource sites and by the water response teams:

    - More than 37,300 cases of water
    - More than 53,700 water filters
    - More than 7,300 water testing kits

- To help enhance the water testing process, Flint residents can now drop-off water samples to the five water resource sites at fire stations. Samples will only

be accepted by using the official water testing kits provided at the water resource sites and by the water response teams.

- Water resource sites are open daily from 9 a.m. to 9 p.m. and are located at:

  Fire Station #1
  310 East 5th St.
  Flint, MI 48502

  Fire Station #3
  1525 Martin Luther King Ave.
  Flint, MI 48503

  Fire Station #5
  3402 Western Road
  Flint, MI 48506

  Fire Station #6
  716 West Pierson Road
  Flint, MI 48505

  Fire Station #8
  202 East Atherton Road
  Flint, MI 48507

Filters

- When used properly water filters remove 99% of lead in water.

- Residents are urged to use filtered water for drinking, food preparation, brushing teeth and watering pets. Unfiltered water may be used for bathing and cleaning.

- One filter and one replacement cartridge are being provided per household initially. Each filter is good for approximately 100 gallons of water. The filter has an indicator on it that will turn from green to red when it needs to be replaced.

- The filters have a five-year, non-replaceable battery that operates the indicator light.

- There is a detailed video posted on www.michigan.gov/flintwater that explains how to properly install a water filter cartridge. An instruction sheet also has been provided to 2-1-1 to share with those individuals without internet access.

Resources for homebound individuals

- 2-1-1 is collecting a list of limited mobility or homebound individuals needing home delivery of water resources and is providing that information to the Genesee County Sheriff's Department, who is making these deliveries.

- The Plumbers and Pipefitters Union has agreed to provide free water filter installation to homebound residents needing assistance. This is also being coordinated through 2-1-1.

Outside Support Efforts – Volunteers and Donations

- There has been great cooperation on the ground in Flint by many local agencies, from the city and county to churches and public, private, and non-profit groups to help with this effort.

- The American Red Cross, United Way, 2-1-1, and many other organizations have assisted with water resource distribution efforts and the donations management process.

- The American Red Cross has established a volunteer reception center for those wishing to assist with ongoing efforts to distribute water, water filters, replacement cartridges and water test kits.
    - The Volunteer Reception Center is located at the Red Cross office at 1401 S. Grand Traverse St. in Flint.
    - This week, the Volunteer Reception Center hours are:
        - Monday - Friday, 9 a.m. to 7 p.m.
        - Saturday, 9 a.m. to 2 p.m.
        - Sunday, 12 p.m. to 5 p.m.

National Guard Mobilization

- Governor Snyder issued an Executive Order on January 12, 2016, to activate the Michigan National Guard.
    - Currently they are being used to staff water resource sites to support the distribution of bottled watered, water filters, replacement cartridges, and water testing kits.
    - National Guard is uniquely prepared and trained to respond quickly in emergency situations.
    - The first group of National Guard personnel arrived in Flint on January 13 to conduct assessment and get acclimated.
    - nore personnel arrived on January 15 and additional soldiers were added on January 18, bringing the current commitment to approximately soldiers.

- This is the second time the Governor has activated the National Guard.
  - Last time was for the Duck Lake Fire in Luce County in May 2012.
- Per the Michigan Emergency Management Plan, the Michigan State Police Director or designee is responsible for coordinating all state efforts, including the Michigan National Guard.
- Activation of the Michigan National Guard allows the volunteers from the American Red Cross, who have been staffing the water resource sites, to join the water distribution teams.

Water Bills

- The City of Flint is responsible for issuing water shut-off notices for non-payment. Per the Mayor, the city has put a halt on all notices or disconnections. Shut off notices have not been mailed since the beginning of December.

- Water payment inquiries should be referred to the City of Flint.

This just passed out of House Approps and is expected on the floor as early as today. Capt. Kelenske did give a brief overview of the process and our efforts to date. No real questions for MSP, though they did ask about whether we were prepared for civil unrest. I'm told Chris gave a great answer about how we're actually seeing nothing but gratitude and support from the people of Flint as we distribute supplies.

Subject: Flint Water Crisis

Linda,

I hope you have been doing well. [redacted]. I'm sure the agency is fully involved in the solution to the water issues in Flint. I see several members, of the agency, on television responding to the water issues. It still makes me proud to have served in an agency that is responsible for the public's safety in so many different ways. Just dropping a line and again hope things are going well.

Importance: High

The State Emergency Operations Center is in immediate need of temporary clerical staff to assist with computer entry of 7,000 records from the water response teams. They have four computers available at the SEOC on Collins Road beginning at 2 p.m. today until the record entry has been completed.

Would you please poll your Lansing area command staff and ask them to contact me immediately if they have administrative staff available to volunteer for this assignment? We'll do an initial schedule of:

2-5 p.m. today (if they are available)
8 a.m. – 5 p.m. Wednesday
8 a.m. – 5 p.m. Thursday

We'll review the status of data entry Wednesday afternoon to determine if we need to extend the schedule beyond this.

Thank you.

Subject: Administrative Support Assistance Needed in SEOC
Importance: High

The State Emergency Operations Center is in immediate need of temporary clerical staff to assist with computer entry of 7,000 records from the water response teams. They have four computers available at the SEOC on Collins Road beginning at 2 p.m. today until the record entry has been completed.

Would you please poll your Lansing area command staff and ask them to contact me immediately if they have administrative staff available to volunteer for this assignment? We'll do an initial schedule of:

2-5 p.m. today (if they are available)
8 a.m. – 5 p.m. Wednesday
8 a.m. – 5 p.m. Thursday

We'll review the status of data entry Wednesday afternoon to determine if we need to extend the schedule beyond this.

Thank you.

Importance: High

The State Emergency Operations Center is in immediate need of temporary clerical staff to assist with computer entry of 7,000 records from the water response teams. They have four computers available at the SEOC on Collins Road beginning at 2 p.m. today until the record entry has been completed.

Would you please poll your Lansing area command staff and ask them to contact me immediately if they have administrative staff available to volunteer for this assignment? We'll do an initial schedule of:

2-5 p.m. today (if they are available)
8 a.m. – 5 p.m. Wednesday
8 a.m. – 5 p.m. Thursday

We'll review the status of data entry Wednesday afternoon to determine if we need to extend the schedule beyond this.

Thank you.

Subject: SEOC Assistance

Thanks to everyone who stepped up to help out in the SEOC. I have enough volunteers to cover tomorrow and Thursday. I will see how tomorrow goes and if it looks like we need to schedule people beyond that, I will get back with you.

With the SEOC move happening on Friday, I'll need to check with them to see when they want to pick this up again if we don't get through the 7,000 by the end of the day tomorrow.

I'll send out a confirming email to everyone shortly.

Subject: SEOC Administrative Assistance

Thank you for volunteering to help the SEOC with their data entry project. Below is the schedule for tomorrow and Thursday. Please report to the SEOC at 4000 Collins Road at your appointed time and ask for F/Lt. Mike Johnson. Please make sure you have your state ID with you.

Wednesday

1. Amy Lowery, SOD (8 a.m. – 5 p.m.)
2. Heather Luebs, SOD (8 a.m. – 5 p.m.)

3a. Lori Higgins, SSB (8 a.m. - noon)
3p. Jo Klotz, OOD (1 – 5 p.m.)
4a. Linda Cwiek, OOD (8 a.m. – noon)
4p. Kit Marks, BID (1 – 5 p.m.)

Thursday

1. Coreen Williams, Communications (8 a.m. – 5 p.m.)
2. Elyce Babcock, IOD (8 a.m. – 5 p.m.)
3. K.C. Gimmey, IOD (8 a.m. – 5 p.m.)

4a. Renae Lugibihl, First DHQ (8 a.m. – noon)
4p. Tammy Stahelin, IOD (1 – 5 p.m.)

If something comes up and you are unable to fill your assigned spot, please email me or call me at 517-282-8875 so I can find a replacement.

We will evaluate our progress tomorrow afternoon and make a determination at that time as to whether we need to schedule additional dates. Thanks again for your willingness to step up and help. It is greatly appreciated.

Good morning!

I will evaluate progress around 1pm this afternoon and should be able to determine if we will need more help. Is that too late? We will be over at the new SEOC tomorrow, so I will also need to ensure there will be available computers!

We appreciate everyone's willingness to help! It has helped tremendously!

Thanks,
Brianna

Subject: Data Entry

Hi, Brianna:

I'm not sure who I should ask about this, so I thought I'd start with you. Inspector Bolger is the one who contacted me about the data entry assistance, but I understand he'll be in Flint for the next few days.

You should have four people in the SEOC all day today doing data entry of the Red Cross sheets. Can someone please let me know when it's determined whether or not you'll need people scheduled for additional days? If you do need more scheduled, I'll just need to know the dates you'll want them and where they need to report.

Thanks.

Subject: URGENT - Records Request

Importance: High

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016.**

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016.**

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years**. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

The attached file is a mock-up of the document that the Col. used in her presentation to the governor modified to use for the legislature. The formatting isn't perfect, but Shanon's group can fix that if we go with this.

Some work still needs to be done on the one-time initiatives added by the Governor.

Sherri,

The DTMB budget office is requesting our department to prepare FAQs for our pending FY 16 supplemental items and FY 17 items. Can you and your staff please assist with preparing this? We need to submit these by close of business Tuesday. You may have already received this email.

Shanon Banner is working in Flint so I am taking the lead on developing the budget presentation for Public Affairs.

Subject: Time Sensitive: FAQs Needed

Good afternoon,

In preparation for announcing additional appropriation measures related to the Flint water emergency in the upcoming FY 17 budget presentation, we'll be preparing a briefing document for legislators. As part of this effort, we want to include a Frequently Asked Questions document. This is where we really need your help.

Your budget staff should have a breakdown of each potential spending item related to your agency (both pending FY 16 supplemental items and FY 17 items). Please work with your budget folks and your communications team to develop any FAQs that you anticipate the public or legislators might ask, related to each item assigned to your agency.

Outreach to the Legislature has already begun, so having these responses back from you quickly is very important. Please send our PIO, Kurt Weiss, and me your FAQ lists no later than 5:00 p.m. this Tuesday, February 2.

Please let me know if you have any questions or concerns, or feel free to have your communications staff touch base with Kurt. I apologize for the short time window, but we really appreciate your help.

Hi Kent,

The $3.87m in funding from the DECF is to support the costs for staffing the State Emergency Operations Center (SEOC) and the Joint Information Center (JIC) by MSP personnel as well as staff from other agencies. Additionally, it is to support MSP's costs in support of the activities of the Flint Water Response Teams, which are distributing water resources (bottled water, filters, replacement cartridges, and water testing kits) to city residents. These resources are provided door-to-door and through five fire stations within the city. These costs cover overtime for personnel, as well as incidentals (meals, lodging, mileage, supplies).

Thank You,

Mark

One more question. I anticipate getting questions from members about the use of the contingency funds, so can you tell me what the department anticipates using the $3.87 million on? Thanks.

Attached is the current draft of the Flint supplemental and summary spreadsheet. The plan is to transmit the supplemental at 10:00am tomorrow(following the Leadership mtg). We may have a couple of minor wording edits in the morning but I do not expect the numbers to change.

Please do not forward until we have the final version. Let me know if you have any questions.

Thanks,

John

It looks like you are correct that the $3.8 M Disaster and Emergency Contingency Fund plus the $100K for the advisory committee would cover our estimated SEOC costs – less water, filters and DMVA – through March. As far as DMVA, the number of troops that will be working in Flint increased today from 35 to 58, so that will short their mission significantly.

I am a little concerned about the $6.275 for water, filters and replacement cartridges; I just saw an order for cartridges, filters and water go out for $1.9 M through DHHS this afternoon. I'll have to take a look at the orders that have gone out since the SEOC was activated to see what kind of costs we are looking at that were not funded with DHHS supplemental from October.

On the bright side, if we end up with a Presidential declaration, we would be turning the water over to FEMA and I believe the National Guard as well. And if we end up with federal funds, we have a lot of volunteers that we could turn into match for the 25% requirement.

I have discussed with Captain Kelenske so he is aware. Please let me know how I can assist with any of this.

Thanks,
Penny

Looking at the chart it seems they are funding through March only at this time. Does the math work out if you pro-rate what we provided?

Subject: Volunteers needed for water resource teams in Flint

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

INVESTMENTS: EMERGENCY MANAGEMENT INITIATIVES

The state must have the capacity to respond to disasters and emergencies to ensure that the state can provide critical support as quickly and effectively as possible.

DISASTER AND EMERGENCY CONTINGENCY FUND

Michigan is vulnerable to a wide range of natural, technological, and human-related hazards. Periodic disasters and emergencies resulting from floods, tornadoes, winter storms, severe thunderstorms and other events often cause injuries and loss of life, service disruptions, and significant property damage. Such events often have negative impacts on affected communities long after the recovery has been completed.

Major incidents such as the 2013-14 deep freeze in the Upper Peninsula, the 2014 Southeast Michigan Flooding, and this most recent emergency with the Flint water supply have heightened our awareness of Michigan's vulnerability to such events, and have highlighted the need to ensure the state has the resources available to respond quickly.

The Emergency Management Act (1976 PA 390) established the Disaster and Emergency Contingency Fund (DECF), which may be used to pay state agency costs incurred and to provide grant assistance, subject to certain limits, to local governments responding to a disaster or emergency.

In FY2014 and FY2015, the legislature deposited more than $6 million GF/GP into the DECF to ensure funding is available immediately when a disaster occurs. These funds have been used in response to flooding in Northern Michigan (Spring 2014), the deep freeze in the Upper Peninsula (Winter 2013-14), flooding in Southeast Michigan (August 2014), Northwest Michigan storms (August 2015), and the Flint water emergency.

INVESTMENT – EXECUTIVE RECOMMEND

The proposed funding includes a one-time deposit of $6 million GF into the Disaster and Emergency Contingency Fund. These funds will be available, upon the declaration of a disaster or emergency by the Governor, to support state agency costs and provides grants to qualifying local governments.

ENERGY ASSURANCE

A significant homeland security concern of the state is ensuring the security and resiliency of the state's critical infrastructure assets. These assets are vital to the state and national security, economic well-being, and public health and safety. These critical assets include energy supply systems, such as electricity power plants, electric grids, and gas pipelines.

Protecting critical energy infrastructure requires public and private partners to assess and analyze threats to, and vulnerabilities of, critical assets and understand the consequences when system integrity is compromised. These consequences can be far reaching, including supply disruptions and widespread power outages. Measures must be taken to secure assets against human, physical, or cyber threats.

It is also important to ensure the resiliency of these critical infrastructure systems by minimizing the adverse consequences of incidents through emergency planning and mitigation efforts, and employing effective response measures to restore system operability.

INVESTMENT – EXECUTIVE RECOMMEND

The proposed one-time FY17 funding totaling $750,000 GF supports the costs to develop a strategy and an implementation plan for energy assurance in coordination with the Michigan Agency for Energy. The strategy and plan will examine the unique requirements to effectively respond to a widespread, long-duration power outage.

MEMORANDUM

TO: Chief Financial Officers and Human Resource Directors
All State Agencies

FROM: Michael J. Moody, Director
Office of Financial Management

SUBJECT: Flint Water Expenditure and Activity Tracking

In order to facilitate the tracking and monitoring of expenditures and activity related to the Flint water emergency, the Office of Financial Management (OFM) has established the following coding and processes. The coding and processes described in this memo will be used to track expenditures in MAIN and state employee activity in DCDS. Separate instructions regarding the tracking of outputs related to the Flint water emergency will be forthcoming.

Expenditure of Funds Appropriated in Public Act 3 of 2016

OFM has established a line item appropriation number (88500) that will be used for all appropriations included in Public Act 3 of 2016 (HB 5520). Each affected agency is responsible for submitting Electronic Budget Adjustment (EBA) documents using the appropriation number established by OFM and providing the necessary D23 coding for the funding source(s) identified in the appropriation act.

In addition to the submitting EBA documents, affected agencies must establish and use Program Cost Account (PCA) coding in MAIN to specify which of the activities identified in the appropriation act boilerplate are supported by expenditures. Each of the established PCA codes must include multipurpose code FNT-WTR. OFM will contact affected agencies within the next week to discuss establishment and use of the needed PCA codes in more detail.

Please note that these instructions apply only to funds appropriated in Public Act 3 of 2016. Additional instructions will be issued when future appropriations related to the Flint water emergency are enacted.

Expenditure of Other Funds

OFM has established MAIN multipurpose code FNT-WTR to be used by agencies to track expenditures of funds not appropriated in Public Act 3 of 2016 that are related to the Flint water emergency. FNT-WTR is a statewide multipurpose code that is available for use with any PCA code.

If your agency already uses multipurpose code in a manner that conflicts with using it as described above, please contact OFM as soon as possible to discuss alternative methods for tracking.

Tracking Time and Activity in DCDS

OFM has established a DCDS activity code (FDWP) that affected state employees should use to record the amount of time spent on activities related to the Flint water emergency. The activity code will be used to track employee hours devoted to activities related to the Flint water emergency. It is separate from and will have no impact on the expenditure tracking that will occur in MAIN. If employees are not familiar with the DCDS activity reporting process, the reporting is done biweekly on the "Activity" tab of the DCDS timesheet.

If you have questions regarding this memo, please contact Lora Mikula at 373-0447 or MikulaL@michigan.gov.

Subject: FW: SEOC MSP Schedule - Overtime
Attachments: Flint Water MSP SEOC Schedule.docx

Categories: Urgent

All,

Please look at the attachment for OT for SEOC staffing for the Flint water activation. In speaking to F/Lt. Johnson, the only days that we need staffed for certain are the 16th, 17th, and 23rd. More information will be learned later this week if additional staffing will be needed on the other dates shown... In the short term however, please feel free to sign up for all of the listed dates that are available.

Email back to Ops with your availability for all listed dates.

Thank you,
Mike

Subject: SEOC MSP Schedule

All,

At this time, the SEOC will need to be staffed with MSP personnel from 8:00-5:00 at least through 1/15/16. This need may be extended beyond and we will know more later this week.

Attached is the schedule for this staffing.

The MICIMS incident is **2015-10-01-City of Flint-Water Contamination/Shortage**
Make sure you are logging into MICIMS in the role of **SEOC OPS Public Safety MSP**

Our assignment at the SEOC is dual at this time.

1) We are in the Ops Section as the Public Safety Coordinator
2) We are also serving as the Safety Officer for the SEOC

Lt. Amy Dehner, MSP Flint, is the MSP Rep (this is her MICIMS role) and the Safetv Officer at the local EOC in Flint. Her cell number is on the schedule.

At the end of each day, do not forget to update the agency situation report. Also, copy and paste that report into an email and send it to Capt. Kelly, me, and F/Lt. Johnson.

For any overtime hours (if we go beyond 1/15, we MAY need to use Ops Lts on OT a few days) spent working in the SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:

Index 28900 with PCA 28670

Lt. Amy Dehner, MSP Flint, is the MSP Rep (this is her MICIMS role) and the Safety Officer at the local EOC in Flint. Her cell number is on the schedule.

At the end of each day, do not forget to update the agency situation report. Also, copy and paste that report into an email and send it to Capt. Kelly, me, and F/Lt. Johnson.

For any <u>overtime hours</u> (if we go beyond 1/15, we MAY need to use Ops Lts on OT a few days) spent working in the SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:

Subject: Survey Monkey Instructions to obtain Volunteer Information

Follow Up Flag: Follow up
Flag Status: Flagged

Categories: Follow-up

All,

Please use the Survey Monkey link below to access the Volunteer information.

https://www.surveymonkey.com

On Saturday, Sunday ,and Monday at 4:30 PM log into the Survey Monkey and check statistics so you can advise on the number of meals needed based on the number of volunteers for the next day. Communicate that to the local EOC (Kish and Dehner at 4:30 PM).

At 5 PM on Saturday, Sunday, and Monday log into Survey Monkey and click on the appropriate link for the specific day you need and click on Analyze Results (top right of field). Then go to the Export All buttons and in the drop down please select all individual responses, then click export to Excel (not advanced), and save to the desktop.

Please provide the Excel spreadsheet for that day to the following email addresses:

MSP-EOC-MDSP
MSP-SEOCOPSC
MSP-seoclgc
FEDERALSEOC
MSP-SEOC5
F/Lt. Tom Kish
Lt. Amy Dehner
Lt. Paul Pummill
Lt. Pat Young
Sgt. Keith Sparks

Please remember to enter this information in the SEOC Agency Situation Report and in the Activity Report.

If you have any questions please call Insp. Bolger or F/Lt. Johnson.

Thank you!

Cc: Sims, Shannon (MSP)
Subject: Re: Vehicle Location - Suburban's and Pickup Trucks

Hi Mardella,

F/Lt Sims is here to observe today, and had not been part of operations until this morning, so he would not have any knowledge of these vehicles. These should be tracked by our EMHSD logistics or operations personnel, not the WRT element as we've not requested or used these vehicles. I believe Jay Eichholdt is checking into the vehicles.

> Thank you,
> Spl/Lt. Mardella Horhn

- Carol Wolfinger advised they may be at the local EOC.
- Wolfinger advised she thinks the vehs were no longer being used & could be returned.

- VEHS ARE BEING RETURNED FROM THE FLINT EOC TO THE HAZMAT TRNG CENTER.
- Should be 1 Back around lunch time

You are scheduled to work the SEOC (25th and 27th). If you want, I would work the last few hours of that shift. 8 to 8 is a long day come dinner time. If you wanted, I could come in the afternoon.

Lt. Johnson, I could come in on the 28th and 29th in the afternoon if needed.

Just let me know.

To all,

The SEOC staffing needs are being extended for another week 1-31-16 thru 2-6-16. The operational hours will remain 8:00 a.m. to 8:00 p.m. I have attached a new schedule with open shifts highlighted in yellow. Please advise what shifts you are available to work by either sending an email to Lt. Valencia Jones (Scheduling Lieutenant) or by signing up on the sheet at the Ops Desk.

The MICIMS incident is **2015-10-01-City of Flint-Water Contamination/Shortage**
Make sure you are logging into MICIMS in the role of SEOC OPS Public Safety MSP

Our assignment at the SEOC is dual at this time.
1) We are in the Ops Section as the Public Safety Coordinator
2) We are also serving as the Safety Officer for the SEOC

We would like to first schedule lieutenants that may be doubled up on a shift. However, if overtime is used to fill a shift please use the following coding:

Index 28900 with PCA 28670

Joshua,

I left three printed documents on your chair in the office you are using at the Collins Road Facility. These emergency documents are for the new SEOC. The documents I left in your office are as follows: Lansing Area DTMB (Department of Management & Budget) Emergency Preparedness Guide, DTMB Facilities-Emergency Information (this document will be printed in orange and posted throughout the facility) and How to respond to an Active Shooter.

I am currently working on getting electronic copies of these documents along with an electronic copy of the floor plan for the facility.

Please let me know if this is the information you needed, once you have had the opportunity to review them.

Thank you,

Subject: MSP Escort

Sgt. Faccio,

Per our conversation, the DMVA is requesting a MSP escort from JFHQ, 3411 North Martin Luther King BLVD, Lansing to the Local EOC in Flint. Departure time is approximately 1200 on 28JAN16. The escorted person is Kim Graham. POC is LT Rogers- This is a cash escort that is being delivered to the soldiers working the Flint Water Crisis.

Local EOC Location: Genesee County Admin Bldg., 1101 Beach Street, Flint, MI

MSP SEOC Contact Person: F/Lt. Michael Johnson,

Please have the person assigned to the escort advise the SEOC when they are en route and when the escort is completed.

Thank you for your assistance.

Joshua,

I left three printed documents on your chair in the office you are using at the Collins Road Facility. These emergency documents are for the new SEOC. The documents I left in your office are as follows: Lansing Area DTMB (Department of Management & Budget) Emergency Preparedness Guide, DTMB Facilities-Emergency Information (this document will be printed in orange and posted throughout the facility) and How to respond to an Active Shooter.

I am currently working on getting electronic copies of these documents along with an electronic copy of the floor plan for the facility.

Please let me know if this is the information you needed, once you have had the opportunity to review them.

Thank you,
Spl/Lt. Mardella Horhn
SEOC Safety Officer

Ma'am,

We have received a FOIA request for "the name of the company and testing results for the testing done in Flint by an outside company (according to Governor Snyder an outside agency was used)." Can you please tell me if you or any other Department member have responsive documents? I will need a response by 2/12/16.

Subject: Water Response Team Plan for Tuesday, February 16, 2016
Auto forwarded by a Rule

Good evening,

Please see the attached Water Response Team Plan for tomorrow 2/16/16. Please note a change in the ARC point of contact to Christina Curtis.

Thanks you,

Recovery Branch

Flint Water Response Team Plan
Monday, 02.16.16 FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Christina Curtis	989-701-0771	christina.curtis@redcross.org

Plan

Agency	Team Types	Mission
ARC	5 Type V	500 HH

Resource Status

ARC

Team Type & Quantity	**Type:** Type V **Quantity:** 5 (5 ERV + 5 Trucks)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	5	5		2/15/16	8:00 pm
ARC ERV	5	5		2/15/16	8:00 pm
ARC ERV Driver	5	5		2/15/16	8:00 pm
Team Member	15-20	15-20		2/15/16	8:00 pm
Team Transport Vehicle for 2-4 Team Members	5	5		2/15/16	8:00 pm
Team Transport Vehicle Driver	5	5		2/15/16	8:00 pm
iPads	5	5		2/15/16	8:00 pm
Hand Warmers	50	50		2/15/16	8:00 pm
Distribution Kit	500	500		2/15/16	8:00 pm

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Water Distribution and other supplies as needed/requested.

Team Priority – Water Distribution – routes TBD by ARC.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC. *It is possible the iPads will not be used due to cold temperatures.*

Hello, please see attached picture of a water bottle with messaging currently at our warehouse facility. This just came to the attention of the EOC due to some cases of this water being delivered to Fire Station 5. We are sending the water back to the warehouse until we determine what our course of action will be. There are several other cases with the same messaging

currently at our Clio Rd warehouse. We are trying to determine how we obtained the water but suspect it may have originally been accepted on a weekend at another facility, possibly by a Red Cross volunteer. Please advise further on this. Thank you, Lt. Roach

Categories: FYI, Follow-up

Sue,

Anonymous caller called ops desk about 2:00pm. Said he's seeing postings on MLIVE calling for hanging the governor. Poster goes by the handle scootertruth.

Caller said comments are connected to article titled Michigan Gov. Rick Snyder faces growing animosity in Ann Arbor.

I couldn't get the comments to come up, guessing DTMB has us blocked?

SEOC FOIA Print Plan
Tips for Printing

Print Plan – Thru Friday, February 19

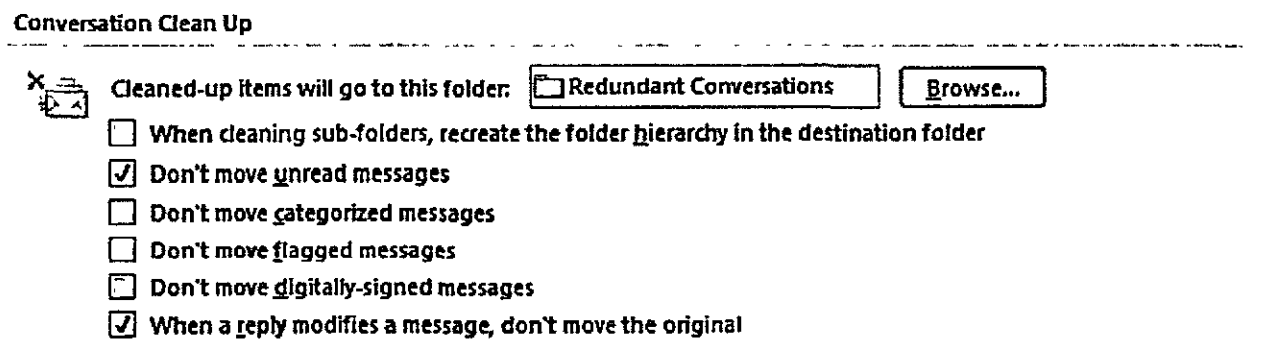
- When printing emails/documents, make sure to **change your default printer** to the following printer:
  - EOC_F1COMM_RI3054 on EOC084M1OAPF502 (located in the Communications Room)
  - Additional helpful hints for each document type below
- SEOC IT staff will set up to "Print to Hold" for each PC in the SEOC.
- Be sure to print/copy all documents **Single Sided**.
- Advise the SEOC Operations Section Chief prior to printing. **Do not interrupt someone else's print job.** The SEOC Operations Section Chief will ensure coordinated printing efforts.
- When at the printer, select Print > Select your agency name > Select All > Print.
- Test printing a couple of emails before printing out a large quantity.
- Once all items have been printed/copied, give all to Oralya Garza or Jodie Frese (daily staff) located just outside Governor's Conference Room A in the SEOC. **Do not go direct to FOIA Unit staff working in the conference room.** *They will reach out if they have any questions.*
- Make sure to clip or rubber band your information to keep separate from others information being turned in.
- Sources: Emails, Documents, S drive, Desktop, Cell phone/text messages, Copies of handwritten notes, DCDS, Invoices, Photos
- SEOC IT Staff will be responsible for printing all documentation from MI CIMS.
- For any IT issues, contact IT Staff in the SEOC. This is usually Jaclyn Barcroft or Rich Law. GIS staff should be contacted only if both of them are unavailable.

How to Recover Deleted Emails

- In Outlook, select the Folder Tab.
- On the top, select Recover Deleted Items.
- Recover any items pertinent to the Flint Water response.
- You may need to select various folders on the left side in order to recover everything possible.

How to Clean up Redundant Email Conversations

- In Outlook, click on the File tab.
- Click Options.
- Click Mail.
- Under the Conversation Clean Up section, change the location where conversations will go. Select Browse. Click on "Cabinet" in the list. Select "New Folder" and name it "Redundant Conversations." Ensure the options are identical to the below:



- In Outlook, on the Home tab, in the Delete group, click Clean Up.
- Select Clean Up Folder. Click Clean Up Folder.

SEOC FOIA Print Plan
Tips for Printing

Tips for Printing Emails

- For State Agency SEOC personnel, **only** print emails from your SEOC email address.
- Print emails by selecting **up to 100 at a time** (select one, hold shift, click on the last one).
    - Select the File Tab > Print > Click Print Options button > Select Memo Style and Check Box for "Print Attached Files" (bottom left corner of pop up) > Select Print
- Attachments will not show up in the preview, but will print out with the emails

Tips for Printing Documents from Desktop, S Drive, My Documents (wherever files are saved)

- *Make sure documents are formatted correctly for printing prior to moving to the next steps (Excel files tend to* be the most troublesome).
- Sort documents in folders by "Type".
- Highlight "like" file types (Adobe Acrobat Document, Microsoft Excel Worksheet, etc.).
- Right click, select Print.

Tips for Printing Text Messages

- Android
- iPhone

Email – After All Your Files are Printed

- Send a CC to the following email address when sending items from the SEOC:
    - MSP-FOIAProject@michigan.gov
    - For State Agency SEOC personnel, **only** CC emails from your SEOC email address
- Send all documents created to the same email address

From: Zarotney, Greg (MSP)
Sent: Thursday, February 11, 2016 5:01 PM
Subject: URGENT - Records Request
Importance: High

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016.**

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016.**

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years**. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

Hi,

Please process the attached EBA.

It allows the department to expend funds from the Disaster and Emergency Contingency Fund in support of the state's efforts in responding to the Flint water emergency.

EBA# 551004
$6,871,100
Disaster Assistance (28190)
Disaster and Emergency Contingency Fund (2880)

Thank You,

Subject: RE: Flint Water Expenditure and Activity Tracking

Importance: High

The intent of the letter is for all agencies impacted by PA3 to submit to the SBO the 20 appropriation mock up for "Flint Declaration of Emergency" using the 88500 code. We still need agency and SBO sign-off to put it in the system. As soon as I receive it, I'll get it in. Has the EBA request been submitted?

RICK SNYDER
GOVERNOR

JOHN S. ROBERTS
DIRECTOR

February 1, 2016

MEMORANDUM

TO: Chief Financial Officers and Human Resource Directors
All State Agencies

FROM: Michael J. Moody, Director
Office of Financial Management

SUBJECT: Flint Water Expenditure and Activity Tracking

In order to facilitate the tracking and monitoring of expenditures and activity related to the Flint water emergency, the Office of Financial Management (OFM) has established the following coding and processes. The coding and processes described in this memo will be used to track expenditures in MAIN and state employee activity in DCDS. Separate instructions regarding the tracking of outputs related to the Flint water emergency will be forthcoming.

Expenditure of Funds Appropriated in Public Act 3 of 2016

OFM has established a line item appropriation number (88500) that will be used for all appropriations included in Public Act 3 of 2016 (HB 5520). Each affected agency is responsible for submitting Electronic Budget Adjustment (EBA) documents using the appropriation number established by OFM and providing the necessary D23 coding for the funding source(s) identified in the appropriation act.

In addition to the submitting EBA documents, affected agencies must establish and use Program Cost Account (PCA) coding in MAIN to specify which of the activities identified in the appropriation act boilerplate are supported by expenditures. Each of the established PCA codes must include multipurpose code FNT-WTR. OFM will contact affected agencies within the next week to discuss establishment and use of the needed PCA codes in more detail.

Please note that these instructions apply only to funds appropriated in Public Act 3 of 2016. Additional instructions will be issued when future appropriations related to the Flint water emergency are enacted.

Expenditure of Other Funds

OFM has established MAIN multipurpose code FNT-WTR to be used by agencies to track expenditures of funds not appropriated in Public Act 3 of 2016 that are related to the Flint water emergency. FNT-WTR is a statewide multipurpose code that is available for use with any PCA code.

If your agency already uses multipurpose code in a manner that conflicts with using it as described above, please contact OFM as soon as possible to discuss alternative methods for tracking.

Tracking Time and Activity in DCDS

OFM has established a DCDS activity code (FDWP) that affected state employees should use to record the amount of time spent on activities related to the Flint water emergency. The activity code will be used to track employee hours devoted to activities related to the Flint water emergency. It is separate from and will have no impact on the expenditure tracking that will occur in MAIN. If employees are not familiar with the DCDS activity reporting process, the reporting is done biweekly on the "Activity" tab of the DCDS timesheet.

If you have questions regarding this memo, please contact Lora Mikula at 373-0447 or MikulaL@michigan.gov.

MEMORANDUM

TO: Chief Financial Officers and Human Resource Directors
All State Agencies

FROM: Michael J. Moody, Director
Office of Financial Management

SUBJECT: Flint Water Expenditure and Activity Tracking

In order to facilitate the tracking and monitoring of expenditures and activity related to the Flint water emergency, the Office of Financial Management (OFM) has established the following coding and processes. The coding and processes described in this memo will be used to track expenditures in MAIN and state employee activity in DCDS. Separate instructions regarding the tracking of outputs related to the Flint water emergency will be forthcoming.

Expenditure of Funds Appropriated in Public Act 3 of 2016

OFM has established a line item appropriation number (88500) that will be used for all appropriations included in Public Act 3 of 2016 (HB 5520). Each affected agency is responsible for submitting Electronic Budget Adjustment (EBA) documents using the appropriation number established by OFM and providing the necessary D23 coding for the funding source(s) identified in the appropriation act.

In addition to the submitting EBA documents, affected agencies must establish and use Program Cost Account (PCA) coding in MAIN to specify which of the activities identified in the appropriation act boilerplate are supported by expenditures. Each of the established PCA codes must include multipurpose code FNT-WTR. OFM will contact affected agencies within the next week to discuss establishment and use of the needed PCA codes in more detail.

Please note that these instructions apply only to funds appropriated in Public Act 3 of 2016. Additional instructions will be issued when future appropriations related to the Flint water emergency are enacted.

Expenditure of Other Funds

OFM has established MAIN multipurpose code FNT-WTR to be used by agencies to track expenditures of funds not appropriated in Public Act 3 of 2016 that are related to the Flint water emergency. FNT-WTR is a statewide multipurpose code that is available for use with any PCA code.

If your agency already uses multipurpose code in a manner that conflicts with using it as described above, please contact OFM as soon as possible to discuss alternative methods for tracking.

Tracking Time and Activity in DCDS

OFM has established a DCDS activity code (FDWP) that affected state employees should use to record the amount of time spent on activities related to the Flint water emergency. The activity code will be used to track employee hours devoted to activities related to the Flint water emergency. It is separate from and will have no impact on the expenditure tracking that will occur in MAIN. If employees are not familiar with the DCDS activity reporting process, the reporting is done biweekly on the "Activity" tab of the DCDS timesheet.

If you have questions regarding this memo, please contact Lora Mikula at 373-0447 or MikulaL@michigan.gov.

Subject: RE: Supplemental

Hi,

See the attached Excel sheet. (I've also included a breakdown of the supplemental in the Fall.)

The current bill is also attached. Funding is provided in a new Flint Declaration of Emergency line in each department. DHHS funding for water purchases was knocked down from $8.0 million to $4.6 million.

In the earlier supplemental, funding was added to existing lines. I started to look for PCA/Index/Proj codes to see how they're tracking expenses. That worksheet is also attached. LARA has an Index Code (02302) for the $200,000 supplemental they already received.

Thank You,

Mark

Subject: RE: Flint Supplemental

Mark,
Thanks for the information.
We had a couple of surges for hotels. Initially we had approximately 34 travel to Flint on January 14 and another 34+ join them on January 17th. Then another 206 Guardsmen came on duty on January 19 and 20th. The ones from the 19th and 20th left on January 25th. At one point we had 279 Guardsmen on State Active Duty. We want to make sure someone is tracking so that hotel rooms not need can be turned back so that we don't continue to get charged for them.

Leadership is asking the question about various costs and that is one area where we just don't know.

Thanks
Al

Subject: Re: Flint Supplemental

Hi Mark

At this point I don't think we have any bills for DMVA for hotels. This got out of hand here in the SEOC. We have staff - both EMHSD and other areas of MSP - in the field for long periods of time so we put them in a hotel that would direct bill us. Then when other agencies started having staff in Flint I let them use our account because in the past those costs always ran through me anyway. Then that changed. But DMVA needed help so Nancy got them like 130 rooms. Some checked out and some are still there.

I will get with Nancy to see what she has and what she knows. We will be working with DMVA for the lodging once their stay is done. That will keep it cleaner.

Hope this helps.

Penny

Hi Al/Christine,

It is our understanding that we (Shawn or Sherri) will take the lead in presenting the Flint supplemental to the legislature this week. Can you provide some supporting documentation for the $2 million figure provided in the supplemental request for DMVA. How many troops is that? Is this a particular unit/platoon activated from wherever? How long will that funding last? Is there a cost per troop or How much are they paid? What sort of activities are they doing?

Thank You,

Mark

Good afternoon all,

Just want to make sure we are on the same page here. So, the Payroll PCA 28670, should only be used for the OT worked on the Flint Assistance (not for regular wages helping SEOC or EOC), correct? Also, I don't anticipate much non-payroll for the City of Flint assistance, but travel, meals, lodging, and/or supplies purchased to assist with Flint should be using PCA 28671?

I told understand Penny, I can get with FSB's folks and make sure we start getting our OT corrected and tracked. I did setup Project # FLTWAT and phase 16, so hopefully that was used and will make it easier for me to make those adjustments.

Thanks,
Dave

I need to get our PCA to Dave. We can work out dcds adjustments for the overtime costs.

Payroll - 28670
Non-payroll 28671

It's been hectic - sorry for not getting it to you sooner Dave.

I was just wondering whether a Flint-specific PCA or project would help them (and us, by extension) make sure everything is accounted for and avoid surprises. (For example if we were to run an expense report in BusObj for Flint-related expenses would we get to the same numbers?) I assume that they would have established a specific coding or comfortable enough with their practices to be able to track things, but with this apparent heightened scrutiny from the SBO on us to track this, we can't be too careful.

EMHSD has a payroll and non-payroll PCA set up specifically for Flint. I have not confirmed with the other agencies how they are tracking costs. I would assume their finance people have a project set up. Do I need to confirm with them?

> > Good Evening:
> >
> > I have attached the current cost information related to the SEOC response for the City of Flint Water Emergency. You will find two tabs in this

workbook. The first tab reflects current actual and estimated costs incurred by state agencies except Corrections who did not get their information turned in this week. The second tab contains detailed information obtained from DHHS purchasing as far as the water resources procured from Home Depot. These numbers are carried over onto the cost spreadsheet; this is just included to show you more of the detail.

The cost report details the current expenditures or estimated costs incurred. I have done this so you are able to see what types of items are being requested for this response. There are various lines within the supplemental appropriation included in this report, such as DMVA and DHHS. Costs so far are approximately $10.2 M with $8.7 M being spent on water resources since the Governor declared a state of emergency.

If I can answer any questions for you, please let me know.

Thanks and have a good evening.

State Agency Costs - Actual and Estimated
City of Flint Water Contamination/Shortage Emergency
as of January 26, 2016

Estimated Staffing Costs:			
Actual EMHSD Overtime PPE 1/16/16 (incl. benefits)	$ 110,042		
Estimated EMHSD Overtime - week of 1/22/16	$ 55,000		
Meals	$ 18,500		
Lodging (MSP Staff)	$ 15,500		
State Agency Staff Lodging	$ 6,500		
DHHS Toxicologist	$ 10,104		
DHHS Epidemiologist	$ 20,611		
DHHS Health Educator	$ 4,481		
ETC Training Services Group (Note 1 below)	$ 275,000		
Genesee County Health Department (Note 2 below)	$ 141,664		
DTMB Staff Overtime - non-drivers	$ 516		
DTMB Drivers Overtime/Benefits (Mail & Delivery)	$ 19,958		
DTMB Truck Usage	$ 4,800		
National Guard lodging (4 nights)	$ 44,200		
National Guard Meal per-diem (est.)	$ 36,828		
National Guard - 279 boots on ground - 5 days	$ 465,000		
		$	1,228,703
Procured Items:			
Faucet Filters	$ 3,064,650		
Replacement Cartridges	$ 4,844,012		
Pitchers and Filters	$ 460,934		
Bottled Water	$ 375,762		
Water Testing Kits	$ 79,961		
Warehouse staff supplies	$ 167		
DTMB Printing Charges	$ 35,084		
iPads, cases and stylis	$ 78,876		
Volunteer Credentialing Badges	$ 1,281		
DTMB Truck Fuel	$ 1,500		
500 Rain Ponchos	$ 895		
Wireless Printer and Router for FEMA	$ 894		
765 Handwarmers	$ 1,000		
TV for JIC	$ 747		
Power Strips	$ 62		
13 rolls of shrink wrap & 10 box cutters	$ 305		
Reflective Vests (volunteers)	$ 2,400		
2 iPhones with cases and chargers	$ 122		
Water Filters-Walmart Foundation to reimburse purchase	$ 17,920		
		$	8,966,572
Rental Items:			
Republic Services - Dumpster Rental at warehouse (DTMB)	$ 600		
Survey Monkey (DTMB)	$ 26		
Arwood Waste - Rental fee (DTMB)	$ 255		
Est. Warehouse Rent (1st month)	$ 45,000		
U-Haul Rentals - 3 trucks	$ 351		
DTMB Vehicle Usage	$ 2,835		
Armed security guard with vehicle overnight at Clio Road warehouse 1/17	$ 9,308		
Additional security guard rover	$ 254		
Additional guard at Flint State Office Building 1/13 25.38 per day	$ 1,256		
5 - 15 foot trucks 1/17 - 1/25/16 $.79 per mile+$32 per day per truck	$ 1,440		
Additional Guards January 22 - February 12	$ 6,472		
		$	67,797
		$	10,263,072

NOTES:

1) Environmental blood lead investigators to conduct home investigations and testing to determine sources of lead exposure and to develop a plan to reduce/mitigate lead exposure.

2) Nurse Case Management of children who have elevated blood levels.

Does not include MDOC costs to date. (Overtime and equipment usage)

Subject: FW: SBO Question on Flint $$

See my original question to Penny at the bottom, and the chain of responses since then.
I'm wondering how much to send to Ryan. Here's what I'm thinking

Currently our finance staff at EMHSD is tracking everything the departments are doing in support of the Flint response effort, with the exception of regular staff time, as that is not reimbursable under federal or state disaster assistance. Items tracked include:

- Overtime (and related benefits) for MSP and other state agencies.
    - This specifically includes DTMB truck drivers, National Guard troops, DHHS specialists (toxicologists, epidemiologists, health educators)
- Water resources purchases (bottled water, testing kits, filters/cartridges, etc). Where purchases are to be reimbursed, such as water purchased from Wal-Mart and reimbursed by the Wal-Mart foundation, they track those as well.
- Travel costs (meals, lodging, vehicles/fuel)
- Water distribution costs (warehouse rental and security, rental trucks, dumpster, etc)
- A range of miscellaneous items (mostly DTMB): reflective vests and poncos for volunteers, I-pads etc, box cutters and shrink wrap.
- Outside responders (GenCo Health Dept and blood level testing investigators).

Departments are working through their emergency management coordinators (in the SEOC) to provide EMHSD with a single point of contact for financial matters. They're working to establish a weekly update schedule (on Monday afternoons) to keep EMHSD apprised of the costs.

Subject: RE: SBO Question on Flint $$

Hi Mark:

Even though the legislature divided the supplemental for Flint up to various state agencies, I am still working with each state agency to gather their costs related to the Flint water emergency. The state agency Emergency Management Coordinators have provided me with a financial point of contact for their agency.

The only item that really isn't being tracked at this time is staff regular time, and that is because regular time isn't eligible for reimbursement under federal or state disaster assistance so I don't track it. But anything else is being tracked – overtime with related benefits, water resource purchases, travel costs for field staff, fuel and vehicle costs, blood lead level testing over the baseline – anything that is directly related to this emergency by any state agency. I am trying to get the state agencies on a weekly schedule for sending in updated information with a target of Monday by 4:00 pm for them to submit a report. As you know, we can only get actual payroll costs bi-weekly and non-payroll costs once they have made their way through MAIN. So I get a lot of estimated amounts that I replace with actuals once they are available.

So I am still getting all related costs because Captain Kelenske and the Governor's office want that information at all times, and it is our role. Hope this answers your questions.

Thanks,
Penny

Subject: SBO Question on Flint $$

Hi Penny,

We received a question from the State Budget Office on tracking expenditures related to the Flint emergency.

They're working with the Legislature to develop some sort of regular report tracking what's been expended across all state departments.

Their specific questions are what are we currently tracking, from which departments, and why? (What do we track for match purposes?) What aren't you tracking?

I indicated to him that normally much of the activities would have gone through EMHSD (water distribution supplies, etc) with us providing reimbursement. But with the supplemental, expenditures are going to be much more diffuse.

Thanks,

The only item that really isn't being tracked at this time is staff regular time, and that is because regular time isn't eligible for reimbursement under federal or state disaster assistance so I don't track it. But anything else is being

tracked – overtime with related benefits, water resource purchases, travel costs for field staff, fuel and vehicle costs, blood lead level testing over the baseline – anything that is directly related to this emergency by any state agency. I am trying to get the state agencies on a weekly schedule for sending in updated information with a target of Monday by 4:00 pm for them to submit a report. As you know, we can only get actual payroll costs bi-weekly and non-payroll costs once they have made their way through MAIN. So I get a lot of estimated amounts that I replace with actuals once they are available.

So I am still getting all related costs because Captain Kelenske and the Governor's office want that information at all times, and it is our role. Hope this answers your questions.

Thanks,
Penny

Hi Mark:

Even though the legislature divided the supplemental for Flint up to various state agencies, I am still working with each state agency to gather their costs related to the Flint water emergency. The state agency Emergency Management Coordinators have provided me with a financial point of contact for their agency.

The only item that really isn't being tracked at this time is staff regular time, and that is because regular time isn't eligible for reimbursement under federal or state disaster assistance so I don't track it. But anything else is being tracked – overtime with related benefits, water resource purchases, travel costs for field staff, fuel and vehicle costs, blood lead level testing over the baseline – anything that is directly related to this emergency by any state agency. I am trying to get the state agencies on a weekly schedule for sending in updated information with a target of Monday by 4:00 pm for them to submit a report. As you know, we can only get actual payroll costs bi-weekly and non-payroll costs once they have made their way through MAIN. So I get a lot of estimated amounts that I replace with actuals once they are available.

So I am still getting all related costs because Captain Kelenske and the Governor's office want that information at all times, and it is our role. Hope this answers your questions.

Thanks,
Penny

Hi Penny,

We received a question from the State Budget Office on tracking expenditures related to the Flint emergency.

They're working with the Legislature to develop some sort of regular report tracking what's been expended across all state departments.

Their specific questions are what are we currently tracking, from which departments, and why? (What do we track for match purposes?) What aren't you tracking?

I indicated to him that normally much of the activities would have gone through EMHSD (water distribution supplies, etc) with us providing reimbursement. But with the supplemental, expenditures are going to be much more diffuse.

Thanks,

Hi Ryan - Do you know the status of this EBA?

From: Wolf, Mark (MSP)
Sent: Friday, January 15, 2016 5:29 PM
To: McNeely, Jacques (DTMB) <mcneelyj@michigan.gov>; Sible, Shawn (MSP) <SibleS@michigan.gov>
Cc: Doll, Ryan (DTMB) <DollR@michigan.gov>; Olney, Robert (MSP) <OlneyR1@michigan.gov>; Irwin, Sherri (MSP) <IrwinS@michigan.gov>
Subject: FW: Disaster Contingency Fund

Attached is an EBA for the DECF using the entire balance. (The appn is rounded up to allow the fund to be fully expended.)

From your questions to Shawn – this would be an "emergency" for which expenditures from the DECF are an appropriate use in support of the state's response to the Flint issue. The statutory definition of an "emergency" is an occasion in which the governor determines state assistance is needed to supplement local efforts and capabilities to save lives, protect property, and the public health and safety, etc. The situation was declared to be an "emergency" by the Governor on 1/5/16.

The Emergency Management Act (MCL 30.418) opens the DECF for expenditure for state agencies in mitigating the effects of, or responding to a disaster or emergency. The act also provides that the fund may be reimbursed for its expenditures by the federal government or another source.

MCL 30.419 opens the DECF for expenditure for direct assistance to local units when federal assistance is not available (i.e. no presidential declaration). Assistance is capped at $100,000.

Thanks,

Mark

Subject: RE: Disaster Contingency Fund

Does the Flint water matter qualify as a "emergency" under the emergency management act?

If so, it would appear that your boilerplate Section 703(7) is an automatic appropriation:

(7) In addition to the funds appropriated in part 1, there is appropriated from the disaster and emergency contingency fund an amount necessary to cover costs related to any disaster or emergency as defined in the emergency management act, 1976 PA 390, MCL 30.401 to 30.421. Funds shall be expended as provided under sections 18 and 19 of the emergency management act, 1976 PA 390, MCL 30.418 and 30.419, and R 30.51 to R 30.61 of the Michigan administrative code.

Hi Mark,

We estimated the number of people that would be working in the SEOC and JIC in Flint at 60. The SEOC was going to be staffed from 8AM to 8PM, so we used 4 hours for the weekdays (20). Then for the weekend I used the same 60 people for 12 hours of Overtime and 10 days. We used $80 for an overtime rate average. 32.5*1.65*1.5 = 80.43

We are incurring and tracking costs for vehicles, fuel, purchase of iPads, delivery services, warehousing, etc. Will this be reimbursed through MSP or need to be provided at some point for a piece of a supplemental? I'm not concerned about a reimbursement at this point (as we are pooling the costs on the non-appropriated side) but wanted to be able to provide information to senior management and to provide direction for the various programs providing the support. No big rush just want to make sure I'm doing things properly. Thanks.

Mark,
Attached is the cost projection.
How many troops is that? - The projection includes 279 Guardsman; 79 for 90 days and 200 for 6 days.
Is this a particular unit/platoon activated from wherever? - There are coming from various locations and units.
How long will that funding last? The funding is expected to last for the 90 day mission.
Is there a cost per troop or How much are they paid? - Please see attached calculation
What sort of activities are they doing? - Distributing water and delivering water filters

Please let me know if you have questions.

Al,

Can you please provide me with a breakdown of the $2M included for DMVA in supplemental 2016-2? Both senate fiscal and MSP have asked for it.

Thanks,
Ryan

To: McNeely, Jacques (DTMB)
Subject: City of Flint Appropriations for DMVA

Jacques,
The supplemental request for DMVA - Michigan National Guard water support effort (3 months)shows $1M. We project that number to be closer to $2M. There will be a total of 69 Michigan National Guard soldiers activated. Thirty-four soldiers have already been deployed and an additional 35 will be deployed reporting to the Saginaw armory on Sunday. We request to have the supplemental increased from $1M to $2M.

Thanks
Al

Hey Mark

Yes, it does include state agencies working overtime in the SEOC. And hotel rooms are for MSP staff working in Flint and need overnight accommodations.

Thanks
Penny

Hi Mark,
I have forwarded the request. Our Public Affairs Office should be able to answer most of the questions.
I received Transfer request 2016-2 which includes the $2.0M for DMVA. Do you know if the other agencies are expected to provide testimony?

Al

Hi Al/Christine,

It is our understanding that we (Shawn or Sherri) will take the lead in presenting the Flint supplemental to the legislature this week. Can you provide some supporting documentation for the $2 million figure provided in the supplemental request for DMVA. How many troops is that? Is this a particular unit/platoon activated from wherever? How long will that funding last? Is there a cost per troop or How much are they paid? What sort of activities are they doing?

Thank You,

Mark

Subject: RE: Flint Supplemental - LARA Background on Fixture Replacement

The cost of Fixture was taking an average cost between industrial fixtures used in health care facilities, regular faucets used in schools and bubblers used in schools. We know that some fixtures will cost more and others will be less, this is merely an average.

Cost of Labor, LARA contacted the local plumbers union in Flint to get an average of what they were paid per hour. To be on the safe side, we made the estimate $90, which was time and a half since services can only be accomplished on weekends.

Estimated Labor hours was estimated at 8 hours. In talking with our Plumbing Division Chief, he estimated a fixture replacement at about 3-5 hours, if there were no complications. We doubled it to account for the more complex job and understanding that in every construction job, there are unexpected issues that must be accounted for.

The estimate attached is based on what we have completed and knew as of Friday.

LARA inspectors are going into the schools and doing sequencing of fixtures. The next day they go back into the schools with DEQ for the testing (sampling) per the sequencing. The order of the review of schools was based upon DEQ's early testing of levels at schools. We are also hindered in sequencing and testing due to school operation hours. Most if not all of this work is being completed on a Fri, Sat, Sun.

Thank you. I've had no questions so far, but I expect things will heat up tomorrow. If we get questions about other agencies and their requests, can you provide a list of contact names/numbers for who gave that info to you?

Can we pull together some bullet points so I have some idea what I'm talking about? Thanks.

Good evening Mr. Sible

Kevin and Nancy pulled together some information to explain the numbers in the spreadsheet, which is attached.

Please let us know if you have any questions or would like to discuss further.

Thanks
Penny

I've attached the most current version of the State Emergency Operations Center estimate of spending by month for the balance of the fiscal year. We are using these numbers, plus input from other affected agencies and local partners, to help craft the supplemental request which should be coming over tomorrow. Obviously, all numbers are very fluid and expenditures will change based on the regular re-assessment of need.

Shawn Sible at MSP is available to help explain the assumptions behind the numbers on the spreadsheet if needed.

Quick technical question. Can you tell me where within your appropriations bill we should insert the $100,000 line item for the Flint Water Interagency Coordination Committee in the FY16 supplemental?

If it turns out they want us to eat this out of the total we've already agreed to, is there enough wiggle room in that number to make it happen?

Sent this to Rob earlier so you may get the question twice, but I need to know when you and Penny say that they are covering the SEOC costs for the first three months, does that include the distribution teams which cover trooper OT? Is there anything we asked for that isn't included?

Yes. Nancy modified the spreadsheet to show the $3.9 M I just didn't attach it because it didn't seem necessary.

Subject: Re: Disaster Contingency Fund

Just as an FYI - we will use this for reimbursing state agencies for response to the emergency - under section 18. There is no limit to state agencies for reimbursement of allowable costs. The maximum allowable amount of $100,000 only applies to payment to locals under section 19.

>
> Attached is an EBA for the DECF using the entire balance. (The appn is rounded up to allow the fund to be fully expended.)
>
> From your questions to Shawn – this would be an "emergency" for which expenditures from the DECF are an appropriate use in support of the state's response to the Flint issue. The statutory definition of an "emergency" is an occasion in which the governor determines state assistance is needed to supplement local efforts and capabilities to save lives, protect property, and the public health and safety, etc. The situation was declared to be an "emergency" by the Governor on 1/5/16.
>
> The Emergency Management Act (MCL 30.418) opens the DECF for expenditure for state agencies in mitigating the effects of, or responding to a disaster or emergency. The act also provides that the fund may be reimbursed for its expenditures by the federal government or another source.
>
> MCL 30.419 opens the DECF for expenditure for direct assistance to local units when federal assistance is not available (i.e. no presidential declaration). Assistance is capped at $100,000.

Subject: *RE: Confidential*

It looks like you are correct that the $3.8 M Disaster and Emergency Contingency Fund plus the $100K for the advisory committee would cover our estimated SEOC costs – less water, filters and DMVA – through March. As far as DMVA, the number of troops that will be working in Flint increased today from 35 to 58, so that will short their mission significantly.

I am a little concerned about the $6.275 for water, filters and replacement cartridges; I just saw an order for cartridges, filters and water go out for $1.9 M through DHHS this afternoon. I'll have to take a look at the orders that have gone out since the SEOC was activated to see what kind of costs we are looking at that were not funded with DHHS supplemental from October.

On the bright side, if we end up with a Presidential declaration, we would be turning the water over to FEMA and I believe the National Guard as well. And if we end up with federal funds, we have a lot of volunteers that we could turn into match for the 25% requirement.

I have discussed with Captain Kelenske so he is aware. Please let me know how I can assist with any of this.

Thanks,
Penny

> From your questions to Shawn – this would be an "emergency" for which expenditures from the DECF are an appropriate use in support of the state's response to the Flint issue. The statutory definition of an "emergency" is an occasion in which the governor determines state assistance is needed to supplement local efforts and capabilities to save lives, protect property, and the public health and safety, etc. The situation was declared to be an "emergency" by the Governor on 1/5/16.
>
> The Emergency Management Act (MCL 30.418) opens the DECF for expenditure for state agencies in mitigating the effects of, or responding to a disaster or emergency. The act also provides that the fund may be reimbursed for its expenditures by the federal government or another source.
>
> MCL 30.419 opens the DECF for expenditure for direct assistance to local units when federal assistance is not available (i.e. no presidential declaration). Assistance is capped at $100,000.

Does the Flint water matter qualify as a "emergency" under the emergency management act?

If so, it would appear that your boilerplate Section 703(7) is an automatic appropriation:

(7) In addition to the funds appropriated in part 1, there is appropriated from the disaster and emergency contingency fund an amount necessary to cover costs related to any disaster or emergency as defined in the emergency management act, 1976 PA 390, MCL 30.401 to 30.421. Funds shall be expended as provided under sections 18 and 19 of the emergency management act, 1976 PA 390, MCL 30.418 and 30.419, and R 30.51 to R 30.61 of the Michigan administrative code.

If we get a declaration from the President the DCF does not apply. It only applies when we do NOT get a Presidential and we have a Governor's dec.

Is that what you are looking for or am I misunderstanding the question?

Chris

Subject: Notification of Additional Expenditure Authorization

Good afternoon:

In accordance with Article XVI, Section 703(7) of 2015 PA 84, the Michigan State Police is notifying the House and Senate appropriations subcommittees with jurisdiction over the MSP budget and the House and Senate fiscal agencies that the State Budget Office has approved the following additional expenditure authorizations in the Michigan Administrative Information Network (MAIN).

FY: 2016
Date of Approval in MAIN: 2/1/2016
Appn: 28190 – Disaster Assistance
Source: Disaster and Emergency Contingency Fund (2880)
Amount: $3,871,100

Projected Use: Costs incurred by the department and other state agencies in responding to the state of Emergency within the City of Flint.

Sincerely,

Ms. Halima el-Sulayman
Executive Secretary
Departmental Services Division
Michigan State Police
P. O. Box 30634
Lansing, MI 48909

Importance: High

The intent of the letter is for all agencies impacted by PA3 to submit to the SBO the 20 appropriation mock up for "Flint Declaration of Emergency" using the 88500 code. We still need agency and SBO sign-off to put it in the system. As soon as I receive it, I'll get it in. Has the EBA request been submitted?

Hi,

See the attached Excel sheet. (I've also included a breakdown of the supplemental in the Fall.)

The current bill is also attached. Funding is provided in a new Flint Declaration of Emergency line in each department. DHHS funding for water purchases was knocked down from $8.0 million to $4.6 million.

In the earlier supplemental, funding was added to existing lines. I started to look for PCA/Index/Proj codes to see how they're tracking expenses. That worksheet is also attached. LARA has an Index Code (02302) for the $200,000 supplemental they already received.

Thank You,

Mark

Mark,
Thanks for the information.
We had a couple of surges for hotels. Initially we had approximately 34 travel to Flint on January 14 and another 34+ join them on January 17th. Then another 206 Guardsmen came on duty on January 19 and 20th. The ones from the 19th and 20th left on January 25th. At one point we had 279 Guardsmen on State Active Duty. We want to make sure someone is tracking so that hotel rooms not need can be turned back so that we don't continue to get charged for them.

Leadership is asking the question about various costs and that is one area where we just don't know.

Thanks
Al

Subject: Re: Flint Supplemental

Hi Mark

At this point I don't think we have any bills for DMVA for hotels. This got out of hand here in the SEOC. We have staff - both EMHSD and other areas of MSP - in the field for long periods of time so we put them in a hotel that would direct bill us. Then when other agencies started having staff in Flint I let them use our account because in the past those costs

always ran through me anyway. Then that changed. But DMVA needed help so Nancy got them like 130 rooms. Some checked out and some are still there.

I will get with Nancy to see what she has and what she knows. We will be working with DMVA for the lodging once their stay is done. That will keep it cleaner.

Hope this helps.
Penny

Hi Mark

At this point I don't think we have any bills for DMVA for hotels. This got out of hand here in the SEOC. We have staff - both EMHSD and other areas of MSP - in the field for long periods of time so we put them in a hotel that would direct bill us. Then when other agencies started having staff in Flint I let them use our account because in the past those costs always ran through me anyway. Then that changed. But DMVA needed help so Nancy got them like 130 rooms. Some checked out and some are still there.

I will get with Nancy to see what she has and what she knows. We will be working with DMVA for the lodging once their stay is done. That will keep it cleaner.

Hope this helps.
Penny

One of the things we don't have visibility on is the lodging cost, (the daily rate and the number of rooms our Guardsmen are occupying on a daily basis). Do you have those numbers.
Are you planning to do an expenditure credit for those costs anytime soon?

Thanks
Al

If you think it would help in terms of your tracking, you can ask.

I was just wondering whether a Flint-specific PCA or project would help them (and us, by extension) make sure everything is accounted for and avoid surprises. (For example if we were to run an expense report in BusObj for Flint-related expenses would we get to the same numbers?) I assume that they would have established a specific coding or comfortable enough with their practices to be able to track things, but with this apparent heightened scrutiny from the SBO on us to track this, we can't be too careful.

EMHSD has a payroll and non-payroll PCA set up specifically for Flint. I have not confirmed with the other agencies how they are tracking costs. I would assume their finance people have a project set up. Do I need to confirm with them?

Good Evening:

I have attached the current cost information related to the SEOC response for the City of Flint Water Emergency. You will find two tabs in this workbook. The first tab reflects current actual and estimated costs incurred by state agencies except Corrections who did not get their information turned in this week. The second tab contains detailed information obtained from DHHS purchasing as far as the water resources procured from Home Depot. These numbers are carried over onto the cost spreadsheet; this is just included to show you more of the detail.

The cost report details the current expenditures or estimated costs incurred. I have done this so you are able to see what types of items are being requested for this response. There are various lines within the supplemental appropriation included in this report, such as DMVA and DHHS. Costs so far are approximately $10.2 M with $8.7 M being spent on water resources since the Governor declared a state of emergency.

If I can answer any questions for you, please let me know.

Thanks and have a good evening.

To: Doll, Ryan (DTMB)
Cc: Irwin, Sherri (MSP); Olney, Robert (MSP)
Subject: Flint Disaster $$ Tracking

Ryan,

Currently our finance staff at EMHSD is tracking everything the departments are doing – at least, everything we're being told - in support of the Flint response effort, with the exception of regular staff time, as that is not reimbursable under federal or state disaster assistance. Items tracked include:

- Overtime (and related benefits) for MSP and other state agencies.
  - This specifically includes DTMB truck drivers, National Guard troops, DHHS specialists (toxicologists, epidemiologists, health educators)
  - They haven't gotten figures yet from DOC, who have recently come on board with the water distribution efforts.
- Water resources purchases (bottled water, testing kits, filters/cartridges, etc). Where purchases are to be reimbursed, such as water purchased from Wal-Mart and reimbursed by the Wal-Mart foundation, they track those as well.
- They're working with FEMA on tracking donations.
- Travel costs (meals, lodging, vehicles/fuel)
- Water distribution costs (warehouse rental and security, rental trucks, dumpster, etc)
- A range of miscellaneous items (mostly DTMB): reflective vests and poncos for volunteers, I-pads etc, box cutters and shrink wrap.
- Outside responders (GenCo Health Dept and blood level testing investigators).

Departments are working through their emergency management coordinators (in the SEOC) to provide EMHSD with a single point of contact for financial matters. They're working to establish a weekly update schedule (on Monday afternoons) to keep EMHSD apprised of the costs.

Let me know if you need anything else,

Here is what I am working on right now. Still info to verify and some adjustments to be made to water purchases, so it's not final. You make some changes and drop out information as you'd like. Probably would be best not to give SBO any numbers before they are finalized and run up to command.

Subject: RE: SBO Question on Flint $$

Hi Mark:

Even though the legislature divided the supplemental for Flint up to various state agencies, I am still working with each state agency to gather their costs related to the Flint water emergency. The state agency Emergency Management Coordinators have provided me with a financial point of contact for their agency.

The only item that really isn't being tracked at this time is staff regular time, and that is because regular time isn't eligible for reimbursement under federal or state disaster assistance so I don't track it. But anything else is being tracked – overtime with related benefits, water resource purchases, travel costs for field staff, fuel and vehicle costs, blood lead level testing over the baseline – anything that is directly related to this emergency by any state agency. I am trying to get the state agencies on a weekly schedule for sending in updated information with a target of Monday by 4:00 pm for them to submit a report. As you know, we can only get actual payroll costs bi-weekly and non-payroll costs once they have made their way through MAIN. So I get a lot of estimated amounts that I replace with actuals once they are available.

So I am still getting all related costs because Captain Kelenske and the Governor's office want that information at all times, and it is our role. Hope this answers your questions.

Thanks,
Penny

Subject: SBO Question on Flint $$

Hi Penny,

We received a question from the State Budget Office on tracking expenditures related to the Flint emergency.

They're working with the Legislature to develop some sort of regular report tracking what's been expended across all state departments.

Their specific questions are what are we currently tracking, from which departments, and why? (What do we track for match purposes?) What aren't you tracking?

I indicated to him that normally much of the activities would have gone through EMHSD (water distribution supplies, etc) with us providing reimbursement. But with the supplemental, expenditures are going to be much more diffuse.

Thanks,

Subject: RE: SBO Question on Flint $$

Hi Mark:

Even though the legislature divided the supplemental for Flint up to various state agencies, I am still working with each state agency to gather their costs related to the Flint water emergency. The state agency Emergency Management Coordinators have provided me with a financial point of contact for their agency.

The only item that really isn't being tracked at this time is staff regular time, and that is because regular time isn't eligible for reimbursement under federal or state disaster assistance so I don't track it. But anything else is being tracked – overtime with related benefits, water resource purchases, travel costs for field staff, fuel and vehicle costs, blood lead level testing over the baseline – anything that is directly related to this emergency by any state agency. I am trying to get the state agencies on a weekly schedule for sending in updated information with a target of Monday by 4:00 pm for them to submit a report. As you know, we can only get actual payroll costs bi-weekly and non-payroll costs once they have made their way through MAIN. So I get a lot of estimated amounts that I replace with actuals once they are available.

So I am still getting all related costs because Captain Kelenske and the Governor's office want that information at all times, and it is our role. Hope this answers your questions.

Thanks,
Penny

Subject: SBO Question on Flint $$

Hi Penny,

We received a question from the State Budget Office on tracking expenditures related to the Flint emergency.

They're working with the Legislature to develop some sort of regular report tracking what's been expended across all state departments.

Their specific questions are what are we currently tracking, from which departments, and why? (What do we track for match purposes?) What aren't you tracking?

I indicated to him that normally much of the activities would have gone through EMHSD (water distribution supplies, etc) with us providing reimbursement. But with the supplemental, expenditures are going to be much more diffuse.

Thanks,

Mark Wolf

EXPLANATION: Per Article XVI, Sec 703(7), 2015 PA 84, the department is requesting authorization support the state's costs in response to the governor-declared State of Emergency within the City of Flint. Section 18 of the Emergency Management Act (MCL 30 418) provides that the DECF may be used, upon appropriation, for necessary and reasonable overtime, travel, and subsistence expenses incurred by an employee of a state agency in response to an disaster or emergency and, with concurrence by the governor, for other needs required for the mitigation of the the effects of, or in response to, a disaster or emergency. The DECF may be credited with any funds from the federal government or other source providing reimbursement for expenditures from the fund.

Boilerplate Appropriation Authority
Sec. 703(7) In addition to the funds appropriated in part 1, there is appropriated from the disaster and emergency contingency fund an amount necessary to cover costs related to any disaster or emergency as defined in the emergency management act, 1976 PA 390, MCL 30 401 to 30 421. Funds shall be expended as provided under sections 18 and 19 of the emergency management act, 1976 PA 390, MCL 30.418 and 30 419, and R 30 51 to R 30 81 of the Michigan administrative code.

Sec. 703(8) Funds in the disaster and emergency contingency fund shall not be expended unless the state budget director approves the expenditure and the department and the state budget office notify the senate and house appropriations committees.

Subject: FW: Disaster Contingency Fund

Attached is an EBA for the DECF using the entire balance. (The appn is rounded up to allow the fund to be fully expended.)

From your questions to Shawn – this would be an "emergency" for which expenditures from the DECF are an appropriate use in support of the state's response to the Flint issue. The statutory definition of an "emergency" is an occasion in which the governor determines state assistance is needed to supplement local efforts and capabilities to save lives, protect property, and the public health and safety, etc. The situation was declared to be an "emergency" by the Governor on 1/5/16.

The Emergency Management Act (MCL 30.418) opens the DECF for expenditure for state agencies in mitigating the effects of, or responding to a disaster or emergency. The act also provides that the fund may be reimbursed for its expenditures by the federal government or another source.

MCL 30.419 opens the DECF for expenditure for direct assistance to local units when federal assistance is not available (i.e. no presidential declaration). Assistance is capped at $100,000.

Thanks,

Mark

Does the Flint water matter qualify as a "emergency" under the emergency management act?

If so, it would appear that your boilerplate Section 703(7) is an automatic appropriation:

(7) In addition to the funds appropriated in part 1, there is appropriated from the disaster and emergency contingency fund an amount necessary to cover costs related to any disaster or emergency as defined in the emergency management act, 1976 PA 390, MCL 30.401 to 30.421. Funds shall be expended as provided under sections 18 and 19 of the emergency management act, 1976 PA 390, MCL 30.418 and 30.419, and R 30.51 to R 30.61 of the Michigan administrative code.

EXPLANATION: Per Article XVI, Sec 703(7), 2015 PA 84, the department is requesting authorization support the state's costs in response to the governor-declared State of Emergency within the City of Flint. Section 18 of the Emergency Management Act (MCL 30 418) provides that the DECF may be used, upon appropriation, for necessary and reasonable overtime, travel, and subsistence expenses incurred by an employee of a state agency in response to an disaster or emergency and, with concurrence by the governor, for other needs required for the mitigation of the the effects of, or in response to, a disaster or emergency. The DECF may be credited with any funds from the federal goverment or other source providing reimbursement for expenditures from the fund.

Boilerplate Appropriation Authority

Sec. 703(7) In addition to the funds appropriated in part 1, there is appropriated from the disaster and emergency contingency fund an amount necessary to cover costs related to any disaster or emergency as defined in the emergency management act, 1976 PA 390, MCL 30 401 to 30 421. Funds shall be expended as provided under sections 18 and 19 of the emergency management act, 1976 PA 390, MCL 30.418 and 30 419, and R 30 51 to R 30 61 of the Michigan administrative code.

Sec 703(8) Funds in the disaster and emergency contingency fund shall not be expended unless the state budget director approves the expenditure and the department and the state budget office notify the senate and house appropriations committees.

Subject: Re: DECF Authorizations

Sensitivity: Personal

Hi Kent,

The $3.87m in funding from the DECF is to support the costs for staffing the State Emergency Operations Center (SEOC) and the Joint Information Center (JIC) by MSP personnel as well as staff from other agencies. Additionally, it is to support MSP's costs in support of the activities of the Flint Water Response Teams, which are distributing water resources (bottled water, filters, replacement cartridges, and water testing kits) to city residents. These resources are provided door-to-door and through five fire stations within the city. These costs cover overtime for personnel, as well as incidentals (meals, lodging, mileage, supplies).

Thank You,

Mark

Amy,

Following up on my voicemail. It is our understanding that we (MSP) may take the lead in testifying before the legislature on the Flint supplemental.

Can you provide background and supporting information for the DEQ items included in the supplemental? Some of the descriptions are short on detail, and some items, I believe, may have been scaled back from earlier versions of the request.

-- How were the cost figures derived?
--Water system needs?
--Potential payment to city to aid utility issues?

For the sake of time, at the very least, information you've previously submitted to the SBO or the fiscal agencies would be helpful.

Thank You,

Cc: Josh Sefton (jsefton@senate.michigan.gov) <jsefton@senate.michigan.gov>
Subject: RE: Flint Supplemental - LARA Background on Fixture Replacement

The cost of Fixture was taking an average cost between industrial fixtures used in health care facilities, regular faucets used in schools and bubblers used in schools. We know that some fixtures will cost more and others will be less, this is merely an average.

Cost of Labor, LARA contacted the local plumbers union in Flint to get an average of what they were paid per hour. To be on the safe side, we made the estimate $90, which was time and a half since services can only be accomplished on weekends.

Estimated Labor hours was estimated at 8 hours. In talking with our Plumbing Division Chief, he estimated a fixture replacement at about 3-5 hours, if there were no complications. We doubled it to account for the more complex job and understanding that in every construction job, there are unexpected issues that must be accounted for.

Subject: RE: Flint Supplemental - LARA Background on Fixture Replacement

The estimate attached is based on what we have completed and knew as of Friday.

LARA inspectors are going into the schools and doing sequencing of fixtures. The next day they go back into the schools with DEQ for the testing (sampling) per the sequencing. The order of the review of schools was based upon DEQ's early testing of levels at schools. We are also hindered in sequencing and testing due to school operation hours. Most if not all of this work is being completed on a Fri, Sat, Sun.

I think 28190 (Disaster Assistance) works just fine. It's a "temporary" line (i.e., one which we don't appropriate in the budget bill), and it seems like it would be easier to keep track of the funding rather than commingling it with other EMHSD lines.

When I re-did their worksheet, I included those costs, which also factored in Project Pay.

Item	Cost	Coverage Quantity	100% January	100% February	75% March	Subtotal Thru Mar
Flint Interagency Adv Committee	$100,000.00	1	$ 100,000	$ -	$ -	$ 100,(
Flint Water Response Team Support	$261,967.00	1	$ 261,967	$ 261,967	$ 261,967	$ 785,!
Overtime SEOC, JIC, Truck Drivers	$ 1,280.00	1,800	$ 1,004,375	$ 960,000	$ 720,000	$ 2,684,:
Meals SEOC and JIC	$ 10.00	3,000	$ 30,000	$ 30,000	$ 22,500	$ 82,!
Hotel 30 staff	$ 80.00	360	$ 28,800	$ 28,800	$ 21,600	$ 79,:
Volunteer Day Meals - 2 days	$ 10.00	480	$ 4,800	$ 4,800	$ 3,600	$ 13,:
Incidentals	$ 5.00	1,500	$ 7,500	$ 7,500	$ 5,625	$ 20,!
Mileage	$ 0.54	1,000	$ 540	$ 540	$ 405	$ 1,(
Subtotal: MSP			$ 1,437,982	$ 1,293,607	$ 1,035,697	$ 3,767,:

Modified Nancy's chart to break out expends among water distribution/DMVA/MSP, showing expends through March and the rest of the year.

Based on that, the MSP/SEOC costs would be just under $3.8 million through March.

Let me know if you need anything else.

Thanks,

Mark

yup. Looks like it.

A quick calculation for SEOC meals/food, etc totals under $3.8 million through March.

Sorry to bug...from this worksheet, are Hotel 30 staff, volunteer day meals, incidentals, and mileage MSP-incurred costs? That is, would they be included in the $3.8 million in the supplemental for SEOC/JIC operations?

Thank You,

Mark

Subject: FW: Disaster Contingency Fund

Attached is an EBA for the DECF using the entire balance. (The appn is rounded up to allow the fund to be fully expended.)

From your questions to Shawn – this would be an "emergency" for which expenditures from the DECF are an appropriate use in support of the state's response to the Flint issue. The statutory definition of an "emergency" is an occasion in which the governor determines state assistance is needed to supplement local efforts and capabilities to save lives, protect property, and the public health and safety, etc. The situation was declared to be an "emergency" by the Governor on 1/5/16.

The Emergency Management Act (MCL 30.418) opens the DECF for expenditure for state agencies in mitigating the effects of, or responding to a disaster or emergency. The act also provides that the fund may be reimbursed for its expenditures by the federal government or another source.

MCL 30.419 opens the DECF for expenditure for direct assistance to local units when federal assistance is not available (i.e. no presidential declaration). Assistance is capped at $100,000.

Thanks,

Mark

Does the Flint water matter qualify as a "emergency" under the emergency management act?

If so, it would appear that your boilerplate Section 703(7) is an automatic appropriation:

(7) In addition to the funds appropriated in part 1, there is appropriated from the disaster and emergency contingency fund an amount necessary to cover costs related to any disaster or emergency as defined in the emergency management act, 1976 PA 390, MCL 30.401 to 30.421. Funds shall be expended as provided under sections 18 and 19 of the emergency management act, 1976 PA 390, MCL 30.418 and 30.419, and R 30.51 to R 30.61 of the Michigan administrative code.

EXPLANATION: Per Article XVI, Sec 703(7), 2015 PA 84, the department is requesting authorization support the state's costs in response to the governor-declared State of Emergency within the City of Flint. Section 18 of the Emergency Management Act (MCL 30 418) provides that the DECF may be used, upon appropriation, for necessary and reasonable overtime, travel, and subsistence expenses incurred by an employee of a state agency in response to an disaster or emergency and, with concurrence by the governor, for other needs required for the mitigation of the the effects of, or in response to, a disaster or emergency. The DECF may be credited with any funds from the federal goverment or other source providing reimbursement for expenditures from the fund.

Boilerplate Appropriation Authority
Sec 703(7) In addition to the funds appropriated in part 1, there is appropriated from the disaster and emergency contingency fund an amount necessary to cover costs related to any disaster or emergency as defined in the emergency management act, 1976 PA 390, MCL 30 401 to 30.421. Funds shall be expended as provided under sections 18 and 19 of the emergency management act, 1976 PA 390, MCL 30.418 and 30.419, and R 30.51 to R 30.61 of the Michigan administrative code.

Sec. 703(8) Funds in the disaster and emergency contingency fund shall not be expended unless the state budget director approves the expenditure and the department and the state budget office notify the senate and house appropriations committees.

Hi Penny,

I received the questions in the email below from the House Fiscal Agency. He indicated that his questions were prompted by a request from a legislator.

When I discussed it with him, I indicated that our basic response about the use of the DECF is still valid, but that I would follow-up to see if we've got any firmer numbers for what is going to be charged to the DECF that we know of at this point. At the time HB 5220 was moving through the process, and they asked about the DECF, we told them this:

The $3.87m in funding from the DECF is to support the costs for staffing the State Emergency Operations Center (SEOC) and the Joint Information Center (JIC) by MSP personnel as well as staff from other agencies. Additionally, it is to support MSP's costs in support of the activities of the Flint Water Response Teams, which are distributing water resources (bottled water, filters, replacement cartridges, and water testing kits) to city residents. These resources are provided door-to-door and through five fire stations within the city. These costs cover overtime for personnel, as well as incidentals (meals, lodging, mileage, supplies).

Do we have "final" figures for what (OT, lodging, meals, etc) and for whom (MSP, DOC, DTMB, DHHS, DEQ) the DECF is going to reimburse for in terms of January expenses? The last I checked, nothing had been charged to the DECF.

We've now been at this for over a month, are we expecting some changes to the original cost estimates? The original estimates indicated that the DECF could support SEOC operations and other incidentals (meals, lodging, etc) through March. That's only a month away....is that still valid? The SBO recently put forward a supplemental request for FY2016. That would be Is OT at the SEOC coming down?

We can discuss with Sherri on Tuesday on how to address these questions, but I thought I give you a heads up for information we may be looking for.

Thank You for all of your help,

Mark

Subject: FW: Disaster Emergency Contingency Fund
Sensitivity: Personal

Hi Mark,

Per our phone conversation, can the MSP provide responses to the following questions:

1) What the operations and staff of the SEOC is broadly doing? That is what aspects of the Flint Water Action Plan and whom from the Flint Water Response Team is the SEOC coordinating? I'm just trying to get an idea of what the MSP means when it says SEOC operations.
2) Approximately how many individuals are and how much overtime is being supported under the SEOC? From what departments and agencies are the individuals supported under the SEOC from and what are their positions?
3) Are all expenses of the SEOC related to the Flint Water Action Plan supported with the DECF? If not, what other funds are being or anticipated expended?
4) Approximately how long does the MSP anticipate that the $3.7 million balance currently within the DECF will support the operations related to the Flint Water Action Plan until the DECF's current balance is exhausted?

I understand that this is an emergency situation, that circumstances are continually developing, and that the MSP may not be able to provide accurate responses to the above questions. If so, could the MSP provide specific explanations of why accurate responses are not available and when the MSP anticipates more information will become so.

Thanks for your help!

American Red Cross

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Audience:

- Individuals or groups of event-based volunteers (EVBs).
- Community partners and stakeholders, (i.e. non-profit and faith-based organizations, businesses and government agencies).

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

Secretary Burwell, Administrator McCarthy, Administrator Fugate and Director Frieden:

Recent developments regarding the level of lead in the water in one of the communities I represent, Flint, Mich., have raised significant concerns about the safety of its drinking water. For this reason, I am requesting immediate resources to provide safe drinking water to the residents of Flint until additional testing can be completed that confirms the water is safe, particularly for young children.

Although the city of Flint and the Michigan Department of Environmental Quality have conducted tests and taken the position that the lead level in the water is safe and below the action level, there are significant questions about the efficacy of their testing. In fact, Dr. Marc Edwards of Virginia Tech University, an established drinking water expert, conducted his own tests as part of a study that determined the water in Flint was above the lead action level.

Additionally, yesterday the Greater Flint Health Coalition, a group of health professionals in the community, released a report showing elevated blood lead levels in residents in Flint, particularly in young children. In response, the Coalition has requested that the Genesee County Health Department release a health advisory indicating that the water in Flint is unsafe to drink.

Thus, I am requesting resources from your agency to provide clean drinking water to the residents of Flint until additional testing can determine when the water will be safe to drink and a long-term solution can be implemented.

This is a serious health issue, particularly for young children, and until the water is demonstrated to be safe, immediate action must be taken to ensure Flint's residents have potable drinking water.

I look forward to working with you and thank you for your immediate attention.

Sincerely,

Dan Kildee

How does lead get into my tap water?

Under typical circumstances, lead will dissolve into the water. The concentration of lead in drinking water can vary greatly, depending on the corrosiveness of the water, the type and age of the plumbing materials and the length of time that the water stands in the pipes. The highest levels of lead occur when very corrosive water stands motionless in lead or lead soldered pipe for long periods of time.

How do I know if my tap water is contaminated with lead?

The only way to know whether your tap water contains lead is to have it tested. You cannot see, taste, or smell lead in drinking water. There are different sampling methods for sampling lead in drinking water. To determine your household risk, it is recommended to take a first draw sample.

Does lead in my tap water cause health effects?

Lead can cause damage to the brain, red blood cells and kidneys. The greatest risk is to young children and pregnant women. Amounts of lead that won't hurt adults can slow down normal mental and physical development of growing bodies. Lead in water can be a special problem for infants, whose diets may be mostly liquids, such as baby formulas or concentrated juices mixed with water. Smaller bodies can absorb lead more rapidly than bigger ones. A child's mental and physical growth can be permanently harmed by too much lead. Risk will vary, depending on the individual, the circumstances, and the amount of water consumed.

What can I do to reduce or eliminate lead in my tap water?

Flush your cold-water pipes by running the water for approximately 5 minutes. The longer the water has been sitting in the pipes, the more lead it may contain. You can fill containers for later use, after the flushing process. Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula. Hot water is likely to contain higher levels because it dissolves more lead.
You may choose to install a water filter that is NSF-certified for lead removal. If a water filter is installed, replace filters at least as often as recommended by the manufacturer.

Buy a lead-free faucet. The legal definition of "lead-free" still allows brass faucets to contain up to 8 percent lead. However, faucets marked with "NSF 61/9" and/or "California Proposition 65" meet stricter limits. Regularly clean particles from faucet aerators.

Is it safe to take a bath or shower, if my water has high lead levels?

Yes. Bathing and showering should be safe for you and your children, even if the water contains lead over EPA's action level. Human skin does not absorb lead in water. This information applies to most situations and to a large majority of the population, but individual circumstances may vary. Some situations, such as cases involving highly corrosive water, may require additional recommendations or more stringent actions.

Who do I contact for more information?

The local water authority is always your first source for testing and identifying lead contamination in your tap water. You can visit the City of Flint Website at www.cityofflint.com or contact the Flint Water Department at 810-787-6537.

For Immediate Release

City of Flint Issues Lead Advisory

Flint, Michigan – September 25, 2015 – The City of Flint is issuing a Lead Advisory for residents to be aware of lead levels in drinking water after hearing concerns from the medical community. While the City is in full compliance with the Federal Safe Drinking Water Act, this information is being shared as part of a public awareness campaign to ensure that everyone takes note that no level of lead is considered safe.

The Genesee County Health Department has issued a fact sheet regarding lead precautions for residents. The fact sheet can be found on their website at www.gchd.us. Here are a few of the suggestions the Health Department recommends:

- Flush your cold-water pipes by running the water for approximately 5 minutes
- Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula.
- Install a water filter that is NSF-certified for lead removal.

Lead contamination can leach into water from a home's lead water service lines, lead solder, and leaded plumbing materials including fixtures, faucets, and fittings. Older service lines with pipes and fixtures installed before 1986 can sometimes be more susceptible to lead issues due to materials used in the home such as lead based paint and lead pipes.

This message is meant as a precaution to residents and does not mean that all homes in the City will experience the same issue. Residents with concerns about lead service lines

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

and lead in home plumbing fixtures are encouraged to contact the City's Utilities Division to schedule a free water testing by calling the Water Treatment Plant at 810-787-6537 and pressing #1 after prompted or by emailing flintwater@cityofflint.com.

The City of Flint is working proactively along with the County Health Department, the Michigan Department of Environmental Quality, and the U.S. Environmental Protection Agency to improve the water system throughout the City. An accelerated plan to add a corrosion control agent to our water within 30 to 60 days with expedited approval from the Michigan Department of Environmental Quality is already underway. This will reduce corrosion which can cause lead in old pipes to leach into the water.

This plan is in addition to Mayor Walling's letter requesting $30 Million in water infrastructure assistance funding from the State of Michigan. $10 Million of that request would be for the replacement of lead service lines in households to ensure that lead no longer presents a danger to the drinking water of our residents. As the letter states, "It is the City's position that the abatement of lead through the removal of lead containing pipes and fixtures in homes is the best long term solution to keeping our residents' water safe."

Mayor Walling further stated: "I am extremely concerned about the risks around lead with Flint's children and I will be working tirelessly to ensure the water is safe and all of our families have the information they need. I also will continue to pursue funding for infrastructure improvements and a comprehensive healthy homes initiative that addresses lead in paint and pipes. We have to get the lead out of our community to eliminate the threat of childhood lead poisoning."

The City of Flint continues working proactively with the County Health Department, the Michigan Department of Environmental Quality, and the U.S. Environmental Protection Agency to improve the water system throughout the City. The City remains committed to working with all of our partners in the Water Technical Advisory Committee to address all

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

issues of public health and quality concerns that face the community. Updates on progress made in addressing this issue will be made during regular public meetings including City Council and other scheduled meetings. Information on this and all related matters will continue to be posted on the City of Flint's website, cityofflint.com.

FEMA

September 28, 2015

The Honorable Dan Kildee
United States House of Representatives
227 Cannon House Office Building
Washington, D.C. 20515

Dear Representative Kildee:

This is in response to your letter of September 22, 2015, to Federal Emergency Management Agency (FEMA) Administrator Craig Fugate, as well as the U.S. Department of Health and Human Services, Centers for Disease Control and Prevention and the Environmental Protection Agency. You requested federal assistance to provide safe drinking water to residents of the City of Flint, Michigan, until additional testing confirms that the water is safe. Administrator Fugate requested that I respond to you because Michigan is within FEMA Region V.

As you may be aware, the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93-288, as amended, authorizes FEMA to provide federal assistance to a state after the governor requests that the president issue a disaster declaration and the president approves the request because it has been determined that the severity and magnitude of the incident exceeds local, tribal and state capabilities. If providing safe water to its residents is beyond the city's capability, the city, through Genesee County Emergency Management, should contact the Michigan State Police Division of Emergency Management and Homeland Security. However, in this situation, it may be more expedient and practical to pursue water sources from other local or private sector entities.

If you have questions or would like additional information, please contact me or have a member of your staff contact my Congressional Affairs Specialist, Dan Shulman, at (312) 408-4427.

Sincerely,

Andrew Velasquez III
Regional Administrator

Pediatric Lead Exposure In Flint, Michigan:
A Failure of Primary Prevention

Mona Hanna-Attisha MD MPH FAAP
Hurley Children's Hospital
Michigan State University Department of Pediatrics and Human Development

Introducing Makayla*

- 12 month old girl (DOB 8/15/2014) presented last week for her 1 year old check up. No concerns.
- Lives with single mom and 2 older siblings in west side (48504). Formula from WIC; powder mixed with warm tap water.
- Physical exam and development are normal. Makayla receives her 1 year old vaccines and routine lead and hemoglobin screening.
- *A couple days later, lead level comes back as 6 ug/dL.*

*Hypothetical scenario

Blood lead level of 6 ug/dL....

- Blood lead levels (BLL) above 5 ug/dL are considered elevated blood lead levels (EBL)
- Just a few years ago (2012), 10 ug/dL was cutoff
- Increasing evidence shows NO safe blood lead level
- Disproportionately impacts low income, minority children
- Primary prevention is most important

Primary Prevention

- "Because no measurable level of blood lead is known to be without deleterious effects, and because once engendered, the effects appear to be irreversible in the absence of any other interventions, public health, environmental and housing policies should encourage PREVENTION of all exposure to lead."

"Low Level Lead Exposure Harms Children: A Renewed Call for Primary Prevention." 2012 CDC Advisory Committee on Childhood Lead Poisoning Prevention.

What will happen to Makayla?

- Vast evidence supports increased likelihood of:
  - Decrease in IQ
    - An increase in BLL from 1 to 4 ug/dL, drops mean IQ -3.7 points
  - Small change in mean IQ, shifts entire population IQ distribution
    - Reduces high achievers IQs (>130) and increases kids with low IQs (<70)
    - Implications for special education services, employment, incarceration, life achievement, etc

Lanphear BP et al., Low-level environmental lead exposure and children's intellectual function: an international pooled analysis. Environ Health Perspect, 2005. 113:894-9.
Fewtrell LJ, Pruss-Ustun A, Landrigan P, and Ayuso-Mateos JL, Estimating the global burden of disease of mild mental retardation and cardiovascular diseases from environmental lead exposure. Environmental Research, 2004. 94:120-33.

Behavioral Burden

- Increased likelihood of :
  - ADHD behaviors
  - Delinquent behaviors and arrests
  - Total arrests and increased rates of arrests involving violent offenses
  - Other health effects: hematologic, cardiovascular, immunologic, endocrine, etc

Wright, JP, KN Dietrich, MD Ris, et al. 2008. Association of prenatal and childhood blood lead concentrations with criminal arrests in early adulthood. *PLoS Med* 5(5): e101

Chen, A, B Cai, KN Dietrich, et al. 2007. Lead exposure, IQ, and behavior in urban 5-7 year-olds: Does lead affect behavior only by lowering IQ? *Pediatrics* 119(3): e650-e658.

Needleman, HL, C McFarland, RB Ness, et al. 2002. Bone lead levels in adjudicated delinquents: A case control study. *Neurotoxicology and Teratology* 24(6):711-717.

The Cost

- "For childhood lead poisoning, $5.9 million in medical care costs, as well as an additional $50.9 billion (sensitivity analysis: $44.8–$60.6 billion) in lost economic productivity resulting from reduced cognitive potential from preventable childhood lead exposure."

- "The present value of Michigan's economic losses attributable to lead exposure in the 2009 cohort of 5 year-olds ranges from $3.19 (using U.S. blood lead levels) to $4.85 billion (using Michigan blood lead levels) per year in loss of future lifetime earnings."

Leonardo Trasande and Yinghua Liu. Reducing The Staggering Costs Of Environmental Disease In Children, Estimated At $76.6 Billion In 2008. *Health Affairs*, 30, no.5 (2011):863-870

The Price of Pollution: Cost Estimates of Environment-Related Childhood Diseases in Michigan. 2010 Report by Michigan Network of Children's Environmental Health

Lead in Water

- Increasing as source of lead, because of success in controlling other sources.
- Increasing due to aging water infrastructures, change in water sources, disinfectant uses, etc
- Disproportionally impacts developmentally-vulnerable formula-fed infants and pregnant mothers
  - For about 25% of infants drinking formula made from tap water at 10 ppb, blood lead would rise above the CDC level of concern of 5 micrograms/deciLiter (or ug/dL).
  - Increase in fetal death and reduced birth weights

Triantafyllidou, S., Gallagher. D. and Edwards, M. Assessing risk with increasingly stringent public health goals: the case of water lead and blood lead in children. Journal of Water and Health. doi: 10.2166/wh.2013.067 58-68 (2014).
Edwards, M. Fetal Death and Reduced Birth Rates Associated with Exposure to Lead-Contaminated Drinking Water. Env. Sci. and Tech. 2013 DOI: 10.1021/es4034952

Preliminary Results

(results removed)

RETAIN THIS IMAGE
RETAIN THIS IMAGE
RETAIN THIS IMAGE

RETAIN THIS IMAGE
RETAIN THIS IMAGE
RETAIN THIS IMAGE

Conclusions from BLL analysis

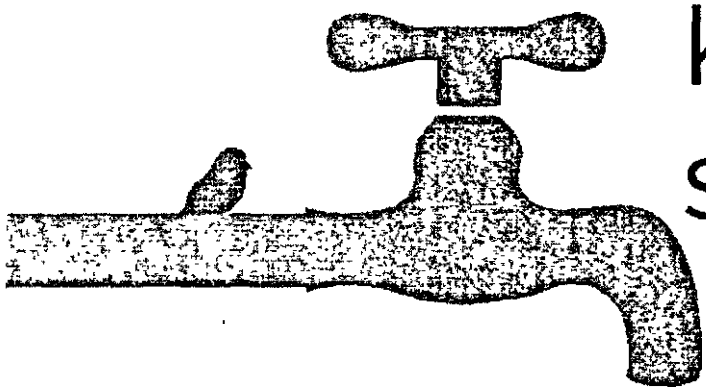
- % of children with EBL in Flint has increased
  - Most striking increase in zip codes with highest water lead levels
- Results underestimate risk: infants not screened for lead and water usage unknown.
  - *Accurate exposure largely unknown since national childhood lead screening focuses on household lead exposure (paint, soil, dust) at later ages (1 and 2 yrs)*
- Results are consistent and concerning. Primary prevention has failed.

Next Steps

- Immediately limit further exposure
  - Encourage breast feeding
  - No tap water for high risk groups: infants on formula & pregnant mothers
  - Declare health advisory: allows WIC to administer water or ready-to-feed formula and other resources (Salvation Army & United Way water supplies)
  - Distribution of lead clearing NSF-approved filters
  - Public education regarding precautions (flushing, etc)
  - Re-connect to Lake Huron water source ASAP

And Makayla…

- Asymptomatic now
- But what will her future hold and an entire generation of Flint children?



Keep your pet safe from lead

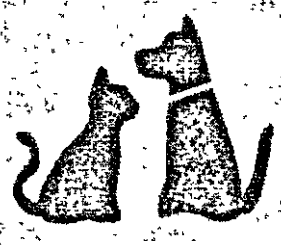
Lead poisoning is a potentially serious condition that calls for veterinary attention.

Things to watch for:

- Vomiting
- Seizures
- Behaviorial changes
- Sleepiness/ fatigue
- Poor appetite
- Weakness
- Extreme anxiety
- Diarrhea
- Blindness
- Belly/stomach ache
- Crying

These changes may develop over time. If animals display any of these signs, please seek veterinary care.

Causes:



Animals can come into contact with lead in a variety of ways:

- Drinking water
- Using improperly glazed ceramic food or water bowls
- Eating or licking paint chips
- Eating lead, like bullets, sinkers and golf balls

Diagnosis and Treatment:

Lead poisoning could be a serious condition.

If you suspect your pet has been exposed to lead, contact a veterinarian to talk about testing and treatment.

Pet safety tips for dealing with water that has lead in it:

- Give your pet bottled or filtered water to drink
- Use bottled or filtered water when making your pet's food
- Keep the toilet seat down! Do not allow pets to drink out of an unfiltered water source
- Remember, this applies to all types of animals

Toxicities are reportable to the State Veterinarian's Office. Any veterinarian that suspects or has confirmed a case of toxicity, is to report the case to the Michigan Department of Agriculture and Rural Development by calling 1-800-292-3939.

Lead Toxicosis & Animal Health: A Guide for Veterinarians in Michigan

February 2016

Background

Lead toxicosis in animals has been tied historically to the use of lead in gasoline and paint, lead-batteries and other sources of environmental contaminants such as certain mining, smelting or recycling operation practices. Animals most often are exposed to lead through eating, drinking, or licking lead objects or objects containing lead such as lead fishing weights, lead shot, lead toys, and lead-batteries. In Michigan, the typical lead toxicity case is cattle that have licked lead-batteries. More recently, concerns have arisen related to pets potentially exposed to lead through the drinking water in Flint.

Signs

Signs can vary by species, age, diet, physiological status (pregnancy, lactation), and duration and amount of exposure. Signs are typically associated with the gastrointestinal (GI) and neurologic system and most commonly include:

- Ruminants:
  - Acute: ataxia, blindness, salivation, and muscle tremors
  - Subacute or chronic: rumen stasis, anorexia, transient constipation which may be followed by diarrhea. GI signs generally precede central nervous system (CNS) signs.
- Horses – laryngeal paralysis, colic and/or seizures
- Dogs – Vomiting, anorexia, diarrhea, abdominal pain, anxiety, hysterical barking, blindness, convulsions, and/or aggression. Weight loss may be seen in chronic cases.
- Cats – anorexia, vomiting, and/or seizures
- Water fowl and raptors – chronic wasting and/or signs of peripheral neuropathy
- Psittacines – regurgitation, anorexia, diarrhea, wasting, ataxia, leg paralysis, blindness, circling, head tilt, and/or seizures. Polyuria and/or hematuria may also be seen.

Diagnostics

The sample of choice for lead analysis in a living animal is a whole blood sample. In parallel with lead analysis, evaluation of a CBC including microscopic evaluation of erythrocyte morphology is recommended. The sample of choice in a deceased animal is fresh or frozen liver. Hematologic and histopathologic examination could reveal the following findings alone or in combination depending on the species affected:

- Non-responsive anemia (chronic exposure)
- Inappropriate number of nucleated red blood cells and basophilic stippling of erythrocytes
- Renal tubular necrosis, sometimes with acid-fast intranuclear inclusions in the kidney
- Alterations in the Myeloid: Erythroid ratio, and evidence of ineffective erythropoiesis in bone marrow (autolysis may impact interpretation)
- Multifocal or laminar neuronal necrosis with edema in the brain

MICHIGAN STATE UNIVERSITY | Extension
Michigan Department of AGRICULTURE & Rural Development
MICHIGAN STATE UNIVERSITY
College of Veterinary Medicine

MICHIGAN STATE UNIVERSITY | Extension

Michigan Department of AGRICULTURE & Rural Development

MICHIGAN STATE UNIVERSITY
College of Veterinary Medicine

The MSU Diagnostic Center for Population and Animal Health (DCPAH) has the following diagnostic tests to aid in the detection of lead toxicosis:

Live Animal

- Lead, Blood (70019) - minimum 0.5 mL whole blood in Lavender Top Vacutainer (EDTA)
- CBC with Differential (11600) – minimum 0.25 mL whole blood in Lavender Top Vacutainer (EDTA) and two direct smears (unstained and unfixed)

Post-Mortem

- Minerals, Tissue (50254) – minimum 50 mg liver, liver biopsy, tissue
- Necropsy is available for farm animals (30003), horses (30002), and companion animals (30001)

For complete details on specimens required, collection protocol, shipping requirements, and any necessary additional information, please visit animalhealth.msu.edu or call 517-353-1683.

Treatment*

- Providing supportive care
- Preventing further lead exposure
- Using chelating agents such as CaEDTA, Succimer, and/or D-Penicillamine**

*Management options in food-producing animals should be evaluated with the Michigan Department of Agriculture and Rural Development (MDARD)

**Not all animals require chelation therapy. The use of chelators requires close monitoring. D-Penicillamine can increase the absorption of lead from the GI tract into the body, causing worsening clinical signs. CaEDTA is not recommended when kidney disease is present. Chelation therapy should be administered only by a veterinarian with an established client-patient relationship.

Regulatory

Lead toxicity in animals is reportable in Michigan. Veterinarians with suspect cases should contact MDARD at 800-292-3939 for possible assistance with diagnostic testing.

Requirements for Licensed Food Establishments Using City of Flint Water

January 13, 2016

Attention: This applies to licensed restaurants, grocery stores, convenience stores, food processors and food warehouses.

- The best way to determine if water contains lead is to have it tested. Safe results can be posted to inform consumers.
- To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939 and state you're a "Flint food establishment requesting a water test." Be prepared to provide a time when your water system can be sampled where water won't have been used for at least 6 hours. Sampling appointments as early as 5 a.m. are available.
- Restaurants with general questions should contact Genesee County Health Department at: 810-257-3612.
- Grocery or Food Processing establishments with general questions should contact MDARD at: 1-800-292-3939.

Unless the water has been tested and found to not have a lead concern, do the following:

- Flush water lines for 5 minutes each day before using or serving water and after 6 hours of no water use. Then flush other equipment such as pop machines for at least 1-2 minutes.
- Install an NSF Standard 53 certified filter on the faucet where drinking/cooking water is obtained from. Approved filter information for faucet or in-line filters can be found at: http://nsf.com/newsroom/statement-regarding-flint-water-system-lead-issue-and-to-certification-nsf. Filters must be changed based upon the manufacturer's recommendations.
- Use cold water and store it for immediate consumption.
- Always use cold water for drinking, cooking and cleaning/rinsing food.
- Hot water must be used for dishwashing.

Other equipment that may use city water:

- Ice machines – Install a water filter on the supply line or use bagged ice in drinking water.
- Pop machines – Flush for 1 minute daily or use bottled beverages.
- Coffee machines or Tea Urns – Flush for 1-2 minutes daily or use filtered water. These products may be very low risk as young children under 6 are not likely to consume these.
- Slush machines – Use filtered water.
- Spray misters – Flush for 1-2 minutes daily or use filtered water.

A licensed plumber can check your plumbing and service lines for lead soldering or lead service lines.

FDA Warns Marketers of Unapproved 'Chelation' Drugs

Federal regulators are warning eight companies to stop selling so called 'chelation' products that claim to treat a range of disorders from autism to Alzheimer's disease.

The Food and Drug Administration (FDA) says the companies have not proven their products are safe and effective in treating autism spectrum disorder, cardiovascular disease, macular degeneration, Parkinson's disease or any other serious illness. Some of the companies also claim their products can detect the presence of heavy metals in the body in an attempt to justify the need for chelation therapy.

FDA compliance expert Deborah Autor says the companies are preying on people made vulnerable because of serious illness.

"These products are dangerously misleading because they are targeted to patients with serious conditions and limited treatment options," says Autor.

In letters dated Oct. 14, FDA warns the companies that they are facing possible legal action if they continue to make unsubstantiated claims. The firms that received the letters (along with the chelation products they market) are:

- World Health Products, LLC: Detoxamin Oral, Detoxamin Suppositories, and the Metal Detector test kit
- Hormonal Health, LLC and World Health Products, LLC: Kelatox Suppositories, and the METALDETECTOR Instant Toxic Metals Test
- Evenbetternow, LLC: Kids Chelat Heavy Metal Chelator, Bio-Chelat Heavy Metal Chelator, Behavior Balance DMG Liquid, AlkaLife Alkaline Drops, NutriBiotic Grapefruit Seed Extract, Natur-Leaf, *Kids Clear Detoxifying Clay Baths*, EBN Detoxifying Bentonite Clay, and the Heavy Metal Screen Test
- Maxam Nutraceutics/Maxam Laboratories: PCA-Rx, PC3x, AFX, AD-Rx, AN-Rx, *Anavone*, AV-Rx, *BioGuard*, *BSAID*, CF-Rx, CreOcell, Dermatotropin, Endotropin, GTF-Rx, IM-Rx, Keto-Plex, Natural Passion, NG-Rx, NX-Rx, OR-Rx, Oxy-Charge, PN-Rx, Ultra-AV, Ultra Pure Yohimbe, and the *Heavy Metal Screening Test*
- Cardio Renew, Inc: CardioRenew and CardioRestore
- Artery Health Institute, LLC: Advanced Formula EDTA Oral Chelation
- Longevity Plus: Beyond Chelation Improved, EndoKinase, Viral Defense, Wobenzym-N
- Dr. Rhonda Henry: Cardio Chelate (H-870)

FDA says consumers should avoid nonprescription products offered for chelation or detoxification. FDA-approved chelating agents are available by prescription only and are approved for use in specific indications such as the treatment of lead poisoning and iron overload. The agency says even the prescription medications carry significant risks, and they should only be used with medical supervision.

The products come in a number of forms, including sprays, suppositories, capsules, liquid drops, and clay baths.

Overall, FDA says there's been an increase in the number of nonprescription, chelation products that claim to cleanse the body of toxic chemicals and heavy metals. Although some of the products are marketed on the Internet as dietary supplements, by law they're unapproved drugs and devices because they claim to treat, mitigate, prevent, or diagnose disease. Flint - Genesee County High Tunnel Initiative

Flint Farmers Market • 300 E 1st Street, Flint

11 a.m., Monday, February 8, 2016

To increase fresh produce availability by connecting, guiding, and coordinating demonstrations, educational workshops, construction, and cost share opportunities for high tunnel systems. Utilizing community resources to their maximum capacity, the initiative will assist in reversing the growth of food deserts through agriculture, while building social capital, supporting economic development, and promoting healthy lifestyles.

- **Dan Kildee - United States Representative**
- **Garry Lee - State Conservationist, USDA Natural Resources Conservation Service**

Partners

- **Genesee Conservation District - Nancy Szikszay, Board Chair**
- **Edible Flint - Terry McLean, MSU Extension**
- **Genesee County Land Bank - Heidi Phaneuf, Community Resource Planner**

Project Partners

USDA Natural Resources Conservation Service

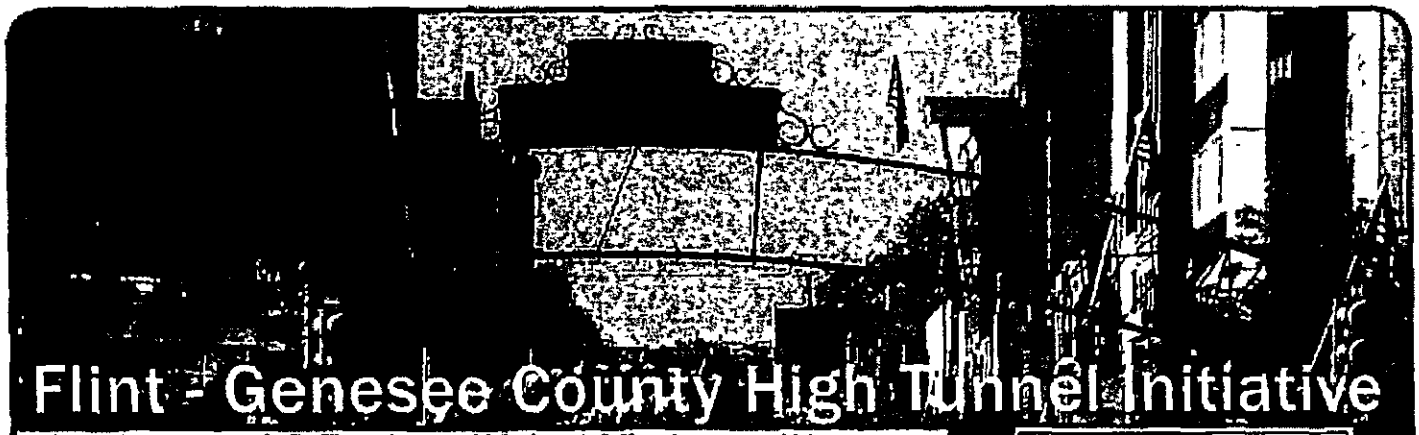
Gensese Conservation District

Gensee County Land Bank

Edible Flint

Concerned Pastors for Social Action

The USDA is an equal opportunity provider and employer.

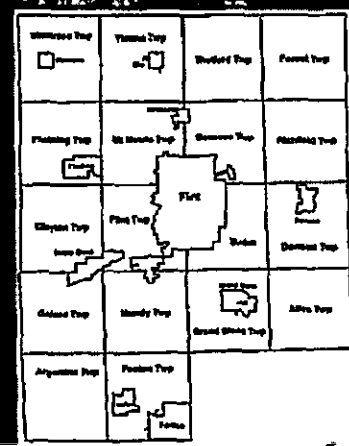


Flint - Genesee County High Tunnel Initiative

The Flint - Genesee County High Tunnel Initiative is a partnership led by the USDA Natural Resources Conservation Service (NRCS) to promote healthy, locally-produced food through the use of high tunnels.

High tunnels, also called hoop houses, are framed structures covered with a layer of plastic used to extend the growing season for vegetable growers. Through the use of high tunnels, growers are able to provide the community with locally-grown food when it would not typically be available.

NRCS is providing $300,000 in funding to provide financial and technical assistance for local growers to purchase and operate high tunnels. The majority of the funding will go directly to producers for the purchase and installation of high tunnels. A portion of the funding will go to local partners for promoting the high tunnel practice and to provide training on high tunnel installation, extended season food production and marketing.



Sign-Up

Producer applications must be submitted to the Flint NRCS office by May 18, to be eligible for funding in 2016.

Initiative Goals

- Expand the availability of healthy, locally-grown food in Genesee County
- Support environmentally sustainable food production
- Introduce young people to opportunities available in agriculture
- Support faith-based organizations in providing healthy food to county residents in need

Initiative Partners

- USDA Natural Resources Conservation Service
- Genesee Conservation District
- Concerned Pastors for Social Action
- Genesee County LandBank
- Edible Flint

USDA Natural Resources Conservation Service
1525 N. Elms Road - Flint, MI
Phone: (810) 230-8766 ext. 3

USDA United States Department of Agriculture
Natural Resources Conservation Service

The USDA is an equal opportunity provider and employer.

Firms are expected to correct any concerns immediately. Re-visits are conducted within 10 days to confirm the establishment has corrected all problems and is now operating in compliance with the requirements. They are not given a ten day period to continue operating out of compliance. That is just the timeframe set for the next visit. If there is a known issue with the water being used, a seizure is placed on their water immediately. The water cannot be used for any food preparation or consumption when there is a known problem with the "in-use" water.

Posting a results list of establishments not in compliance could be misleading. Many of the water samples collected do not represent the water being used for consumption or food preparation. The samples were meant to represent the worst case scenario. The waterline must not be used for six hours prior to the sample being collected and the sample is taken before the firm performs the mitigation steps detailed in the requirements. When testing indicates elevated lead levels in the water, the firms are put on a high priority list and re-visited with "in-use" water samples collected. The water cannot be used for any food preparation or consumption when there is a known problem with the "in-use" water.

The requirements detailed in the attachment give several mitigation steps. Filters certified to NSF Standard 53 are certified to significantly reduce lead. Flushing the lines for five minutes is consistent with direction from the CDC to address concerns.

Potential Assistance Programs –
Compiled by MDARD

Program Name: **USDA Rural Development Business & Industry Loan Guarantee**

Agency Responsible for program – USDA Rural Development

Point of Contact: James Turner, Michigan Director, USDA Rural Development

Type of Support (Individual or Government) – Businesses, Nonprofits, Government loan guarantees

Eligibility Guidelines – Lenders apply for loan guarantees for borrowers. Though most USDA Rural Development programs are limited to rural areas, this program has the authority to fund local food infrastructure in urban areas as long as the project supports farm and ranch income and expands healthy food access in underserved communities.

Benefits Available – Loan guarantees for business development, enlargement, purchase of facilities & upgrades, purchase of equipment.

Application Process – Rolling applications; contact lender or USDA Rural Development Michigan office for more information.

Link: http://www.rd.usda.gov/files/Local_Food_Fact_Sheet_20150401.pdf

Program Name: **USDA Agricultural Marketing Service Farmers Market Promotion Program**

Agency Responsible for program – USDA Agricultural Marketing Service

Point of Contact: FMPP Staff by email at USDAFMPPQuestions@ams.usda.gov or by phone 202-720-0933

Type of Support (Individual or Government) – Grants to Businesses, Nonprofits, Governments

Eligibility Guidelines – Entities that are eligible to apply include:

- Agricultural businesses
- Agricultural cooperatives
- Community Supported Agriculture (CSA) networks
- CSA associations
- Economic development corporations
- Local governments
- Nonprofit corporations
- Producer networks
- Producer associations
- Public benefit corporations
- Regional farmers' market authorities

•*Tribal governments*

All applicants must be domestic entities owned, operated, and located within the 50 United States. State Departments of Agriculture are eligible if the State's regulatory statutes identify the specific State Department of Agriculture as a regional farmers' market authority (need to confirm Michigan status).

Benefits Available – The minimum FY 2015 award per grant was $15,000 and the maximum $100,000.

Application Process – 2015 grant cycle applications were due May 14, 2015; 2016 cycle not yet announced.

Link: http://www.ams.usda.gov/services/grants/fmpp

Program Name: **USDA Agricultural Marketing Service Local Food Promotion Program**

Agency Responsible for program – USDA Agricultural Marketing Service

Point of Contact: LFPP staff by e-mail at USDALFPPQuestions@ams.usda.gov or by phone at 202-720-2731.

Type of Support (Individual or Government) – Grants to Businesses, Nonprofits, Governments

Eligibility Guidelines – The Local Food Promotion Program (LFPP) offers grant funds with a 25% match to support the development and expansion of local and regional food business enterprises to increase domestic consumption of, and access to, locally and regionally produced agricultural products, and to develop new market opportunities for farm and ranch operations serving local markets. There are two types of project applications are accepted under LFPP—planning grants and implementation grants. Applicants can apply for either but will receive only one type of grant in the same grant cycle. Eligible entities may apply if they support local and regional food business enterprises that process, distribute, aggregate, or store locally or regionally produced food products. Such entities may include:

- •Agricultural businesses and cooperatives
- •Producer networks and associations
- •Community supported agriculture networks and associations
- •*Other agricultural business entities (for-profit groups)*
- •Nonprofit and public benefit corporations
- •Economic development corporations
- •Regional farmers' market authorities
- •Local and tribal governments

Benefits Available – The minimum FY 2015 award per grant was $15,000 and the maximum $100,000.

Application Process – 2015 grant cycle applications were due May 14, 2015; 2016 cycle not yet announced.

Link: http://www.ams.usda.gov/services/grants/lfpp

Type of Support (Individual or Government) – Grants to state agencies & universities

Eligibility Guidelines – FSMIP provides matching grant funds to conduct applied research projects that explore new market opportunities for U.S. food and agricultural products and improve the efficiency and performance of the U.S. agricultural marketing system. These grants are awarded on a competitive basis to State departments of agriculture, forestry, natural resources, or energy, as well as other State agencies such as experiment stations, universities, and colleges. Projects can focus on a wide variety of agricultural research goals, including increased sales of value added meat products, aquaculture, fresh and processed products, local and regional food systems, forestry, bioenergy, and horticulture. Proposals that benefit one business or individual will not be considered. Proposals that address issues of importance at the State, multi-State, or national level are encouraged.

Benefits Available – 2015 FSMIP Projects: Total Funding: $1,005,906; Average Grant: $67,060; 15 projects in 14 States.

Application Process – 2015 grant cycle applications were due May 14, 2015; 2016 cycle not yet announced.

ESD Staff has been working with several local entities regarding urban ag/gardening questions related to the Flint Water issue. These groups include Genesee County MSU Extension, Edible Flint (a network with over 250 community and private gardens and hoop houses), Michigan Food and Farming Systems (MIFFS) with Women in Ag project in Flint, a U of M Flint researcher doing urban dessert research, and Genesee Conservation District. Each has a role in the Flint community from gardening assistance and resources to hoop houses to understanding the food dessert and seeking innovative ways to address Flint Residents' access to healthy Food.

ESD staff has scheduled a meeting/conference call Feb. 2nd with these groups and other agency staff to better understand how we can coordinate efforts. For example MSU Extension has produced three (3) articles related to irrigation water and garden soils in January 2016. Staff is working to collect accurate data regarding the garden locations to compare spatially with water test results and the zones of greatest concern for lead in the water maps.

Request/Task Details

Mission Name

MDARD Just In Time Training for Sample Collection

Detailed description

Need to identify space for Just In Time Training on January 20, 2016
from 9:00 a.m. to 12:00 p.m., anywhere in the Flint area.
Space for 16 MDARD staff members and parking for their (16) vehicles.
Need electricity, chairs in room.
Ideally chairs and tables (tables are not required but nice to have).

Requirements for Licensed Food Establishments Using City of Flint Water

January 13, 2016

Attention: This applies to licensed restaurants, grocery stores, convenience stores, food processors and food warehouses.

- The best way to determine if water contains lead is to have it tested. Safe results can be posted to inform consumers.
- To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939 and state you're a "Flint food establishment requesting a water test." Be prepared to provide a time when your water system can be sampled where water won't have been used for at least 6 hours. Sampling appointments as early as 5 a.m. are available.
- Restaurants with general questions should contact Genesee County Health Department at: 810-257-3612.
- Grocery or Food Processing establishments with general questions should contact MDARD at: 1-800-292-3939.

Unless the water has been tested and found to not have a lead concern, do the following:

- Flush water lines for 5 minutes each day before using or serving water and after 6 hours of no water use. Then flush other equipment such as pop machines for at least 1-2 minutes.
- Install an NSF Standard 53 certified filter on the faucet where drinking/cooking water is obtained from. Approved filter information for faucet or in-line filters can be found at: http://nsf.com/newsroom/statement-regarding-flint-water-system-lead-issue-and-to-certification-nsf. Filters must be changed based upon the manufacturer's recommendations.
- Use cold water and store it for immediate consumption.
- Always use cold water for drinking, cooking and cleaning/rinsing food.
- Hot water must be used for dishwashing.

Other equipment that may use city water:

- Ice machines – Install a water filter on the supply line or use bagged ice in drinking water.
- Pop machines – Flush for 1 minute daily or use bottled beverages.
- Coffee machines or Tea Urns – Flush for 1-2 minutes daily or use filtered water. These products may be very low risk as young children under 6 are not likely to consume these.
- Slush machines – Use filtered water.
- Spray misters – Flush for 1-2 minutes daily or use filtered water.

A licensed plumber can check your plumbing and service lines for lead soldering or lead service lines.

DEQ

Michigan Department of Agriculture & Rural Development

FIGHT LEAD WITH NUTRITION

The foods we prepare and serve to our families can help limit the effects of our kids' exposure to lead! Three steps you can take in choosing and preparing food can make a difference:

1. When preparing food, be sure to wash and cook it with filtered water.
2. Serve your kids small, healthy snacks between meals.
3. Serve foods that are high in a few really important nutrients: iron, calcium and vitamin C!

LEAD FACTS

Lead isn't good for anyone's health and is especially bad for small children. Keep your family lead-safe by avoiding contact with it. If you live in the city of Flint, or get water from the city's water system, be sure to use an NSF-certified filter for drinking, cooking and mixing baby formula. Make sure to change the filter cartridge by the date printed on the package. Remember that you and your children can also be exposed to lead from old paint, dust, dirt, pottery, make-up, toys and some home remedies.

If you have any concerns about lead or your child's diet, talk with your doctor.

LEAD-FIGHTING NUTRIENTS

CALCIUM

Calcium keeps your bones strong and the lead out! Calcium-rich foods include:

- Milk and milk products, like cheese and yogurt
- Green leafy vegetables, such as spinach, kale, and collard greens
- Calcium-enriched orange juice
- Tofu
- Canned salmon and sardines (both with the bones in)

IRON

Iron keeps too much lead from getting into your body. Foods high in iron include:

- Lean red meats, fish (tuna and salmon) and chicken
- Green leafy vegetables, such as spinach, kale and collard greens
- Iron-fortified cereal, bread and pasta
- Dried fruit, such as raisins and prunes
- Beans

VITAMIN C

Vitamin C works with iron to keep too much lead from getting into your body. Good sources of vitamin C include:

- Citrus fruits, like oranges and grapefruit and their juices
- Tomatoes and tomato juice
- Peppers
- Other fruits like kiwi, strawberries and melons

MSU is an affirmative-action, equal-opportunity employer, committed to achieving excellence through a diverse workforce and inclusive culture that encourages all people to reach their full potential. Michigan State University Extension programs and materials are open to all without regard to race, color, national origin, gender, gender identity, religion, age, height, weight, disability, political beliefs, sexual orientation, marital status, family status or veteran status. Issued in furtherance of MSU Extension work, acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Jeffrey W. Dwyer, Interim Director, MSU Extension, East Lansing, MI 48824. This information is for educational purposes only. 2P-24M-01.2016-BP-RM/MR. WCAG 2.0

WHERE TO GET HELP

Food Assistance in Genesee County

Commodities Food Program

This supplemental food program is designed to help low-income pregnant or breastfeeding women, new mothers up to one year after birth, infants, children up to age 6, and people aged 60 and up. Food is provided once a month. Call 810-789-3746 or 810-789-4409 for details.

Double Up Food Bucks (DUFB)

The DUFB program matches your SNAP benefits when you buy Michigan-grown fruits and vegetables. For example, if you buy $10 worth of Michigan produce, you'll get an extra $10 to buy more fruits and veggies! You can use this program at:

- Flint Farmer's Market, 300 East 1st Street, Flint, phone 810-232-1399, open year round
- Landmark Food Center (two locations) 206 West Pierson Road, Flint, phone 810-789-7311, OR 4644 Fenton Road, Flint, phone 810-238-2972, call to check dates and hours for both locations

The Emergency Food Assistance Program (TEFAP)

TEFAP provides healthy foods to qualified families and individuals once every 4 months. Call GCCARD at 810-789-3746 or 810-789-4409 for details.

Food Bank of Eastern Michigan

The Food Bank of Eastern Michigan offers many food assistance programs. Call 810-239-4441 for details.

Supplemental Nutrition Assistance Program (SNAP)

The SNAP program (formerly called *food stamps*) provides low-income residents with money to purchase food, including:

- Fruits and vegetables
- Breads and cereals
- Dairy, meat, fish and poultry

You're also allowed to buy seeds and food-producing plants with your SNAP benefits to grow your own food. Apply for SNAP at www.mibridges.michigan.gov or call the Genesee County Department of Health and Human Services (DHHS) at 810-760-2200.

WIC (Women, Infants & Children)

The WIC program supplies extra food for low-income pregnant or breastfeeding mothers, infants and children up to 5 years old who are at nutritional risk. Foods provided through WIC include:

- Infant formula and iron-fortified cereals
- Fruits and vegetables rich in iron, calcium and vitamin C
- Whole grain bread and cereals
- Eggs, milk and cheese

To apply for WIC, call 800-262-4784 (toll-free) or 810-237-4537.

WIC-Project Fresh

If you receive WIC benefits, you're eligible to receive Project Fresh coupons to buy locally grown fruits and veggies! This program runs from June 1 through October 31 each year. For more information contact Genesee County WIC at 810-237-4537 or MSU Extension at 810-244-8500.

Additional Genesee County Resources

211

- Service connects Genesee County residents to community resources including food, transportation, education and health care
- Connects residents to sources of water filters and replacement cartridges
- Locally funded by United Way Genesee County.
- Phone 211
- Web: www.211.org

Flint Water Department

- Offers free or low-cost water testing
- Phone 810-787-6537

Genesee County Community Action Resource Department (GCCARD)

- Offers free water filters
- Phone 810-789-3746 or 810-789-4409

Michigan State University Extension

- Offers free nutrition education classes
- Soil testing for lead
- Phone 810-244-8500

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF AGRICULTURE
AND RURAL DEVELOPMENT

JAMIE CLOVER ADAMS
DIRECTOR

January 14, 2016

Attention: Food Establishments using City of Flint water supply

Dear Food Establishment Operator:

On October 5, 2015, you were sent a document recommending actions to take to avoid the risk of serving lead contaminated water to your customers. Effective immediately, the recommendations have been changed to a legal requirement, and food establishment license enforcement action may be taken if non-compliance is found until the public health emergency declaration has been lifted.

Please see the updated attached requirements sheet. Immediate action may be needed by your establishment to come into compliance.

Your establishment has three options:

1. Demonstrate your establishment is not using the City of Flint water supply for drinking, processing or cooking.
2. Demonstrate your water has been tested and is safe to use. You may request free testing by a regulatory official. To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939, M-F, and state you're a "Flint food establishment requesting a water test". Be prepared to provide a sampling time when your entire water system won't have been used for at least 6 hours. Sampling appointments between 5 a.m. and 4 p.m. are available. State offices are closed on January 18, 2016
3. Install water filters as needed, and do daily flushing of unfiltered faucets and hard plumbed equipment. (Discontinuing use, flushing, etc. will still be needed until a safe water test is obtained).

Michigan Department of Agriculture and Rural Development inspectors are assisting the Genesee County Health Department in conducting sampling and inspections, so you may work with a different person other than your regular food safety inspector. Inspectors will also be making visits to establishments in the coming weeks to provide assistance and verify compliance.

For additional information, call 1-800-292-3939 or for the latest information on the Flint water response visit www.michigan.gov/flintwater. We look forward to assisting you in any way possible.

Sincerely,

Kevin Besey, Director
Food and Dairy Division
Michigan Department of Agriculture and Rural Development

Genesee County Health Department

Mark Valacak, M P.H., Health Officer
Gary K. Johnson, M.D., M.P.H., Medical Director

How does lead get into my tap water?

Under typical circumstances, lead will dissolve into the water. The concentration of lead in drinking water can vary greatly, depending on the corrosiveness of the water, the type and age of the plumbing materials and the length of time that the water stands in the pipes. The highest levels of lead occur when very corrosive water stands motionless in lead or lead soldered pipe for long periods of time.

How do I know if my tap water is contaminated with lead?

The only way to know whether your tap water contains lead is to have it tested. You cannot see, taste, or smell lead in drinking water. There are different sampling methods for sampling lead in drinking water. To determine your household risk, it is recommended to take a first draw sample.

Does lead in my tap water cause health effects?

Lead can cause damage to the brain, red blood cells and kidneys. The greatest risk is to young children and pregnant women. Amounts of lead that won't hurt adults can slow down normal mental and physical development of growing bodies. Lead in water can be a special problem for infants, whose diets may be mostly liquids, such as baby formulas or concentrated juices mixed with water. Smaller bodies can absorb lead more rapidly than bigger ones. A child's mental and physical growth can be permanently harmed by too much lead. Risk will vary, depending on the individual, the circumstances, and the amount of water consumed.

What can I do to reduce or eliminate lead in my tap water?

Flush your cold-water pipes by running the water for approximately 5 minutes. The longer the water has been sitting in the pipes, the more lead it may contain. You can fill containers for later use, after the flushing process. Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula. Hot water is likely to contain higher levels because it dissolves more lead.
You may choose to install a water filter that is NSF-certified for lead removal. If a water filter is installed, replace filters at least as often as recommended by the manufacturer.

Buy a lead-free faucet. The legal definition of "lead-free" still allows brass faucets to contain up to 8 percent lead. However, faucets marked with "NSF 61/9" and/or "California Proposition 65" meet stricter limits. Regularly clean particles from faucet aerators.

Is it safe to take a bath or shower, if my water has high lead levels?

Yes. Bathing and showering should be safe for you and your children, even if the water contains lead over EPA's action level. Human skin does not absorb lead in water. This information applies to most situations and to a large majority of the population, but individual circumstances may vary. Some situations, such as cases involving highly corrosive water, may require additional recommendations or more stringent actions.

Who do I contact for more information?

The local water authority is always your first source for testing and identifying lead contamination in your tap water. You can visit the City of Flint Website at www.cityofflint.com or contact the Flint Water Department at 810-787-6537.

January 4, 2016

Honorable Rick Snyder
Governor
Office of Governor
State of Michigan
P.O. Box 30013
Lansing, MI 48909

SUBJECT: REQUEST FOR GOVERNOR'S EMERGENCY/DISASTER DECLARATION

Dear Governor Snyder:

On January 4, 2016 pursuant to Section 10 of Act 390, P.A. 1976, as amended, I declared that a "State of Emergency" exists in Genesee County due to the introduction of lead into the public water system and subsequently elevated blood lead levels exceeding governmental standards. The response and recovery aspects of the Genesee County emergency operations plan have been activated, and local resources are being utilized to the fullest extent practicable. Despite these efforts, local resources are not sufficient to cope with the situation.

Therefore, in accordan ce with Section 12 of Act 390, P.A. 1976, as amended, I deem this incident to be beyond the control of Genesee County, and I respectfully request, for and on behalf of the citizens of Genesee County that the Governor declare a "State of Emergency/Disaster" exists therein and that consideration be given, if conditions warrant, to petitioning the President of the United States for assistance provided by Public Law 93-288, as amended. In support of this request, we will submit specific damage assessment data through official channels and in accordance with the guidance in EMD PUB-901 (*Damage Assessment Handbook)* within three (3) days of this disaster, unless circumstances dictate an earlier submittal as requested by the Emergency Management Division, Department of State Police. Furthermore, I understand that this request will not be acted upon without sufficient damage assessment data to substantiate the need for assistance.

Specifically, I request the following assistance:

ESF #3 / Infrastructure Systems Recovery Support Function support to include but not limited to:

- Post-incident assessments of public works and infrastructure
- Executing emergency contract support for life-sustaining services

- Providing technical assistance to include engineering expertise, construction management, contracting, and real estate services
- Providing emergency repair of damaged public infrastructure and critical infrastructure

ESF #8 support to include but not limited to:

- Assessment of public health/medical needs
- Health surveillance
- Medical care personnel
- Patient care
- Behavioral health care
- Public health and medical information
- Potable water

ESF #11 support to include but not limited to:

- Provision of nutritional assistance
-

Accordingly, be advised that Christopher DeVriendt, Interim Genesee County Emergency Management Manager will provide liaison and coordination with State and Federal authorities for assistance related to this disaster, and in accordance with Section 14 of Act 390, P.A. 1976, as amended, he is directed to transmit this request to the appropriate State Police Emergency Management Division (EMD) District Coordinator by the most expeditious means.

Authorized By:

Jamie Curtis - Chairperson
Genesee County Board of Commissioners

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

From: Zarotney, Greg (MSP)
Sent: Thursday, February 11, 2016 5:01 PM
Subject: URGENT - Records Request
Importance: High

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016.**

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016.**

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms.

Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years**. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

Subject: Hamilton Dam questions

Luke,

As we just discussed, Matt Schnepp at State Police would like a few items to help assess Flint's eligibility for a FEMA Hazard Mitigation Grant:

Contact information for the DDA person who is the lead on the current project to address the hazards with the dam. We have been working with Ms. Janet Van De Winkle, Director of the Flint River Corridor Alliance. She set up the meeting with DEQ, project designers, DDA, Consumers Energy, etc. and is, presumably, working on behalf of the City of Flint to help manage the project. Janet's contact info is as follows:

Janet Van De Winkle

Director, Flint River Corridor Alliance

400 N. Saginaw St Suite 233

Flint, MI 48502

T: (810) 241-6966

- The cost for a project addressing the hazard and while maintain the water level needed for the water plant intake. You probably ought to also give him the cost of complete dam removal since one of the things they're apparently considering is using DWSD water as a backup rather than the river. If we have a digital version of a report outlining the options and cost estimates, sending that might be ideal. I have attached a 2008 study performed by Stantec which outlines 3 options for reconstruction of the dam. Starting on page 13 of the PDF, you'll see those 3 options and costs. Keep in mind this report was completed prior to the current drawdown of the impoundment. Probably the closest to what you've described is option 3, which proposed removal of the current gates and superstructure and replacement with a fixed concrete overflow spillway which would maintain a minimum pond elevation of 706.0 feet. This would ensure that the water plant could still pump from the Flint River. The cost of this project was estimated at roughly $3.7 million. Please also keep in mind that the City subsequently performed a pump test at the WTP and I believe that the water level in the pond can be maintained slightly below the assumed 706.0 feet and still retain the ability to pump from the Flint River. So, this might have a slight impact on cost of such a project. This estimate should be in the ballpark, though. I'm not sure what the current proposal (with the whitewater structures) is estimated to cost. The cost for partial removal, as estimated in the attached report, was over $13 million since it would require reconstruction of the WTP intake. Cost for replacing the dam as-is was around $5 million.

- A dam failure inundation map. We were in the process of working with Genesee County to update the EAPs for City of Flint owned dams, but only got through the EAP for the Holloway Dam to date. I believe the 1994 version of the Hamilton Dam EAP does contain inundation maps. However, these are generally paper copies and not of the greatest quality. I'll see if I can dredge up an electronic copy of the 1994 paper maps.

His e-mail address is SchneppM1@michigan.gov

Thanks.

Subject: RE: Dam Question

I've done some follow up on this. There is a possibility that hazard mitigation funding could help but it is a bit of a long shot. As with all things mitigation the initial hurdle is the benefit-cost analysis. Byron Lane from DEQ is gathering some info for me help with a determination on that. Once I receive it I'll have another conversation with FEMA and let you know what I find.

Matt Schnepp

Subject: RE: Dam Question

Jen,

As requested, attached is the most recent inspection report for the Hamilton Dam in Flint. We have rated it *unsatisfactory* which means, "A dam safety deficiency is recognized that requires immediate or emergency remedial action for problem resolution." We issued an order to the city in 2004 which required among other things, that they lower the water level behind the dam to reduce the chance of failure and to minimize any downstream damage if it does fail.

Subject: Additional DCDS Coding - City of Flint
Attachments: Activity Tab DCDS.png

Good Afternoon:

The State Budget Office (SBO) has requested some additional coding in DCDS for staff that work on the City of Flint Water Emergency. We will still be coding all overtime costs to PCA 28670. But at their request, we will also be utilizing the "Activity" code in DCDS.

To enter Activity Code

- Open Employee Data Collection
- Click on **Activity Tab** of DCDS timesheet
- On the Unit Entry tab, under Activity column at left, enter F in drop down box and select **FDWP** when it appears.
- Enter total of "**regular and overtime hours**" related to the Flint Water emergency in cell for each date worked.
- These hours should match the total hours for each day you have entered into your timesheet.
- Save when you have entered your activity hours.

Again, this is only for hours spent working on the City of Flint Emergency and should begin with this current pay period. Please let me know if you have questions.

Thanks,
Penny

Subject: RE: Question from Capt...

Like most things hazard mitigation, it depends... The answer used to be a strict "no" but FEMA's recent guidance opens the door a little. Here is the language: "Modifications must be for the purpose of increasing risk reduction capabilities of the existing structures and cannot constitute only repairs." I don't think FEMA would allow for the removal of a dam with HM money but we could ask if that is what is being sought. We did remove a dam in the UP under 1346 HMGP but we submitted another similar project more recently and it was denied (but this guidance change came out after our denial).

This is a simple answer and a complex answer, all at the same time...

The simple answer – I have no meetings scheduled during this time period and am available to work in the SEOC whenever needed, including weekends. I realize that some members of this division have worked extensive hours in the SEOC and wish to "do my share" to assist.

The complex answer – I was hired to work on the 4195 Hazard Mitigation Grants. All applications must be complete and submitted to FEMA in six weeks. There is a great deal of work to do and $25 million in grant funding at risk. I don't know how many hours I can give to the SEOC without putting my primary obligations at risk. I am forwarding this email to my unit manager to give guidance to the complex side of this answer.

Subject: Bill for the $80 million

Christine,

The $80 million pledged came out of the bipartisan budget that gives the EPA administrator the ability to award grants for water infrastructure programs.

This is completely separate from Emergency or Mitigation funds. The state will have to decide how much of the $80 million will go to Flint, because I'm sure that isn't the only city with infrastructure problems.

Here is my take on the letter. I have made comments and some suggested revisions all in "blue" text. Consider the source and take it for what it is worth.

Subject: CRITICAL NEED from MI VOAD and Partners: Door-to-Door Work in Flint

Importance: High

There is an urgent need for up to 200 volunteers a day to support door-to-door delivery of water, test kits, and filters in Flint. **This is a critical provision of water necessities for the residents of Flint.** And we need your help!

Individual volunteers will need to go to the VRC directly. People coming to the Volunteer Reception Center will receive a brief training and orientation. Volunteers should plan on being available for a minimum three-hour assignment. While many assignments will occur on the same day the person registers at the Volunteer Reception Center, some assignments for tasks such as data entry, warehousing, operations support, and water testing kit assembly (kid and family friendly) may begin on later dates.

For groups/VOADs only, please contact Victoria Fryer (see cc'ed email: victoria.fryer@redcross.org). To engage in this opportunity, please reach out to her to determine how your organization can plug-in.

Registering through the VRC will occur at the Red Cross building on 1401 S. Grand Traverse Street in Flint, before you start work in the community. The Volunteer Reception Center is open on Monday, January 18, Martin Luther King Day, from 9:00 a.m. to 7:00 p.m and throughout the week (7 days/week).

For additional details or questions, *please call Justin Bays, cell number: (justin.bays2@redcross.org)*. The United Way of Genesee County along with its partners, 211, and with support from the Michigan Community Service Commission, continue to partner with the Red Cross to stand up this Community VRC, and you may also inquire w/ 211 directly for additional details re: the Flint Water Recovery.

Thank you!

Subject: Appeal Letter
Attachments: Appeal Letter forPresidentialDeclarationDenial_Flint_DRAFT.doc

Tom,

Attached is the beginnings of a draft of the disaster denial appeal letter. It is based off from a 2003 appeal that we did (all of the red font is from the old letter). I wanted to at least get it started so you have a format to work with. The Captain reviewed the first paragraph (the black font) and confirmed that is the approach he wants to take.

I created an "Appeal of Disaster Denial" folder under S:\DISASTER\2015-10 Flint Water. It contains this draft, the president's denial letter, our original request documents, and FEMA's summary of the emergency assistance they granted. . The Captain wants to focus on "what we are not getting because of the denial and why we need it." Basically I think that means reiterating the original request (since there isn't much new information to base the appeal upon). Cap said he is going to talk to Tony about it in the morning so they may have some additional direction for you after that.

I placed a copy of CFR on your desk with the appeal section highlighted in case you need it (its only one paragraph). Contained in the CFR is West Virginia's appeal in case you want it.

Sorry, there isn't a lot to go on here. Call me if you need anything.

Good Morning,

Attached are the guidelines for entering your time in DCDS by coding block for those of you that are working **overtime** for the City of Flint Contamination/Shortage event. Please use **Index 28900 with PCA 28670** for overtime worked for this event. Do not use these codes for your regular hours.

Please contact one of the division timekeepers if you need additional guidance in entering the special codes for recording your overtime worked on this special event. Division timekeepers are Michelle Gilsdorf, Richard Sheaffer, and Nancy Downs.

Thank you,
Nancy

Subject: Coding for City of Flint Water Contamination incident

Good Afternoon:

For any **overtime hours** spent working in the SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:

Index 28900 with PCA 28670

Any **non-payroll** costs (travel, SEOC meals during activation, etc.) should be coded to:

Index 28900 with PCA 28671.

These codes are not yet active in DCDS but will be by the end of the week. Please let me know if you have any questions.

Thanks,
Penny

To: Katarsky, Anthony (MSP)
Cc: Weber, Thomas (MSP); Schnepp, Matt (MSP); Pepper, Joel (MSP); Burger, Penelope (MSP)
Subject: FW: Flint Water Declaration of State of Emergency

(Update items from Joel)

Following is a recap of our discussions today:

- December 14, 2015 - City of Flint declared a State of Emergency citing Public Act 390
- December 15, 2015 – Tony Katarsky located the Declaration on the Blog of Dave Bondy
- The Declaration sites a "manmade disaster" by switching to the use of Flint River
- The declaration requests the Genesee County Board of Commissioners take action
- Per PA390, Genesee County would be responsible to declare a State of Emergency and seek assistance from the state if it met the requirements
    - No definitive incident period has been noted in the declaration
    - No specific requests for resources have been requested
    - No indication of disaster expenses have been noted
- This does not reflect the true purpose of PA 390
- This would not be considered for assistance from FEMA under the Stafford Act
- IF Section 19 were to be provided, the jurisdiction would receive a maximum of $100,000
- Recommendations for options include:
    - HUD/CDBG
    - CDC
    - EPA
    - Legislative Action

The GCHD Fact Sheet is posted on our website. The other attachments and email below is from the City.

- Jamie Gaskin, United Way CEO, told Mark and I today that he could provide 5-10K in the near future, for assistance with purchasing products relative to our most urgent concerns. We very briefly discussed water filtration and/or bottled water for infants, children and pregnant women. Also, that GCHD would need to procure any products and the United Way would help communicate the availability. Maybe providing products through WIC? Let me know your thoughts. I can make arrangements to have further discussions with United Way.

- Mark mentioned at the press conference that blood testing is available through our office, but people need to first check with their primary care. We may see an increase demand.

Subject: Re: Technical Advisory Meeting

Technical Advisory Team,

Today the City of Flint along side of the Genesse County Health Department issued a lead advisory at a well attended press conference. The press conference lasted over an hour and a half with both the Health Department and the City answering numerous questions. I have included the documents that were released at the news conference and will continue to provide everyone with additional information as it becomes available. We will be coordinating closely with the health department to provide consistent information to the public and intend to increase our awareness campaign.

There is growing anticipation of our next Technical Advisory Meeting on October 7th and we are working to determine the best possible venue based on the attention that we expect. Jamie Gaskin, the United Way CEO has joined the team and I have also included Andy Leavitt of State Senator Ananich's office along with Amy Hovey from U.S. Congressman Kildee's team. We are developing a quarterly mailer that we will distribute to all water customers that will look a lot like our annual consumer confidence report and we intend to have input from the TAC team meeting to be included in the report. The mailer will go to the printer within days following our meeting.

Please look for location and agenda items to come next week, please feel free to email the group or me directly if there are any questions,

Thank you,

On Wed, Sep 23, 2015 at 3:52 PM, Howard Croft <hcroft@cityofflint.com> wrote:

Technical Advisory Team,

I am writing to inform everyone that we have scheduled the next Technical Advisory Committee meeting to be Wednesday October 7th, 2015 from 2:00 – 4:30 pm. We are extending invitations to Marc Edwards of Virginia Tech along with two lead experts from the EPA (Darren Lytle & Michael Schock) to become a part of the technical team and we are hopeful that they will all be present at the upcoming meeting.

At the meeting we will discuss an overview of the City water system, compliance with the Safe Drinking Water Act, lead concerns, corrosion control, water testing, public education, capital improvement plans, the KWA pipeline, and next steps.

I will forward a specific location and agenda in the near future but we are firmly committing to the time and date. As with previous meetings we look forward to this group having positive dialogue that will benefit the community.

Thank you,

Subject: US Representative Kildee Correspondence

Attached are two documents for your information: 1) A letter from US Representative Kildee to Craig Fugate of FEMA, HHS, EPA, and CDC and 2) a PowerPoint on Flint water concerns. Essentially, Representative Kildee is requesting FEMA take action to resolve potable water quality issues associated with the Flint water system. FEMA Region V intends to formally refer the letter to EMHSD for resolution.

1.0 INTRODUCTION

1.1 PURPOSE

The City of Flint contracted with Stantec Consulting Michigan Inc. (Stantec) to provide an engineering feasibility study of alternatives to be considered for repairing/reusing or removal and reconstruction of the Hamilton Dam located on the Flint River near downtown Flint, Michigan. The feasibility study will be used by the City to assist in determination of the desired development option for remediation of existing structural deficiencies within the dam facility.

1.2 SCOPE

Based on a preliminary analysis of site conditions and critical issues, it has been determined to concentrate study efforts on three development options. The first option chosen is to replace the spillway similar to its original design intent i.e. replace floodgates (6) and superstructure. Based on a past condition assessment, the assumption is made that the spillway foundation is suitable for reuse, thus the proposed spillway would be constructed at the existing location.

The second option consists of partial removal of the spillway. The superstructure including piers, bridge, floodgates and gate operators would be demolished and removed leaving the foundation slab and gate ogee sill in place. This option would reduce the normal impoundment elevation by approximately 6.5 feet and thus improvements to the Water Treatment Plant (WTP) raw water intake system would be required.

The third option chosen for study consists of a modification to the existing spillway concept to minimize both initial capital cost and future annual operation and maintenance costs. This option includes removal of the existing superstructure similar to the previous options; however the spillway would be replaced with a gravity concrete overflow section. The normal impoundment elevation would be set at the minimum elevation to provide a reliable raw water source for the existing Water Treatment Plant (WTP) intake.

Each option is evaluated as to their technical feasibility. Issues studied include public health, welfare and safety, environmental management (permitting), hydraulics and hydrology i.e. capability to pass the design flood, pedestrian accessibility, WTP raw water intake reliability, aesthetics, initial capital cost, operational efficiency and cost, constructability and schedule.

A comparative discussion of the various options is made to identify the pros/cons of each option. A recommendation is made with regard to the preferred development option and lastly an implementation strategy is outlined.

1.3 EXECUTIVE SUMMARY

A comparative evaluation of the three study options results in the recommendation that the City of Flint undertake OPTION 3 – Overflow Spillway, Lowered Impoundment for redevelopment of the Hamilton Dam. This option is recommended because it represents a cost effective means of improving the facility integrity and thus will provide the required protection to public health, welfare and safety.

This Option consists of replacing the existing gated spillway with a concrete overflow spillway. The crest of the overflow spillway would be set at elevation 705.8 NGVD or two feet below the existing normal impoundment elevation. This elevation has been theoretically determined to be the minimum impoundment elevation at which the existing City of Flint Water Treatment Plant can reliably operate.

The new spillway would be constructed at the same location as the existing spillway. It is envisioned that the existing spillway foundation slab, abutments and gate ogee section may be reused. Further detailed condition assessment of these components is required to confirm this assumption. The existing spillway piers, bridge, floodgates and gate operators would be demolished and removed. An earthen berm or retaining wall (± 3 ft. high) would need to be constructed along the upstream right streambank to afford proper overtopping protection.

The existing fish ladder would be decommissioned and replaced by a bypass fish sluice. This sluice could be constructed on either side of the dam. An in channel fish passage facility is deemed problematic due to the low gradient requirement of the targeted fish species (walleye). Construction of the bypass fish sluice could be performed independent of the spillway replacement, perhaps at a later date when and if grant funding is made available.

Under this option the resultant maximum impoundment elevation for the design flood (200-year frequency – 13,000 cfs) will be equal to or less than that which currently exists, however it will be greater than that used by FEMA in their flood insurance program. Therefore, prior to implementation of this option, further investigation is needed into flood impacts and FEMA flood insurance.

Inclusion of recreational, aesthetic improvements in the project concept warrant further study. It is envisioned that the river downstream of Hamilton Dam could be "naturalized" to create a series of riffles and pools for both passive and active recreational use. Similar to the fish bypass these improvements could be constructed independent from the spillway replacement.

Due to both flood related and public health welfare and safety liabilities, it is recommended that disposition of the Utah Dam be considered concurrent with the Hamilton Dam.

The estimated project cost for OPTION 3 is $3,705,000 or $4,205,000 if the Utah Dam disposition is included. This compares to $4,901,000 ($5,401,000) and $13,494,000 ($13,994,000) for OPTIONS 1 and 2 respectively. The chosen option will also provide ongoing benefit due to reduced annual operation and maintenance cost.

Implementation of this option will require additional detailed study of certain issues prior to finalizing the basis of design and beginning detailed design work. These items include:

- WTP low service pump performance test
- Existing facility condition survey
- Further study into FEMA flood insurance impacts
- Confirmation of survey vertical datum
- Perform topographic survey of upstream right embankment
- Finalize fish passage concept
- Obtain a legal opinion of Consumers Energy contamination
- Perform more detailed study of Utah Dam disposition

A more detailed discussion of these items can be found in **SECTION 4.3** of this report.

Project construction could possibly be phased with the basic dam reconstruction performed in the first phase followed by recreational, aesthetic, and fish passage enhancements in the second phase. The phased construction approach may be a benefit in that it will allow more time to better plan and fund the proposed Phase Two improvements.

The proposed schedule to undertake the spillway reconstruction is as follows:

Preliminary Design	1/1/2009 through 6/1/2009
Final Design and Permitting	6/1/2009 through 2/1/2010
Bidding	2/1/2010 through 5/1/2010
Construction	6/1/2010 through 12/1/2010

2.0 BACKGROUND

2.1 DESCRIPTION OF EXISTING FACILITY

Hamilton Dam is located on the Flint River in downtown Flint, Michigan near the Flint Branch of the University of Michigan campus, and approximately 800 ft. upstream from the Saginaw Street Bridge.

Plans for the current dam are on file with the City of Flint, but original design data is not available. The dam was designed by Fargo Engineering Company of Jackson, Michigan, and was constructed about 1920 by Price Brothers Company of Lansing, Michigan on the site of a previous mill dam. The dam was constructed to sustain a head for the upstream water treatment plant intake.

The existing structure is a reinforced concrete gravity dam with six gated spillway bays. Each bay has a tainter gate on the fixed crest of a concrete spillway. The six bays, each 33 ft. long, and the five piers, each four feet thick, make a total length of 218 ft. There is an end sill below the spillway and an 18 ft. concrete apron beyond the end sill. The gates are operated during flood flows.

The original 1920 dam had seven bays with tainter gates. In 1964, the southern most gate, its spillway and headrace were removed.

A fish ladder was constructed through the right abutment sidewalls in 1978. Also in 1978, the right concrete abutment was modified to install an Archimedean screw pump.

Repairs to Hamilton Dam were carried out in the summer of 1992. Steel sheet piling was placed just upstream of the gates for Bays 1, 2 and 6 because of the deteriorated condition of the gates. The sheet piles were to maintain the headpond in case of gate failure. The top elevation of the sheet piles was placed near the top of the tainter gates (Elev. 707.8 ft.) in a closed position. Gate repairs were completed in Bays 3, 4, and 5. These repairs included the complete removal of the existing gates and replacement with new gates, repair of buttress and sill concrete, repair of gate trunnions, replacement of lift chains, and painting of all exposed gate steel.

The top deck of the structure is divided lengthwise into a pedestrian walkway and the gate hoist rails for the two gate hoists. The hoist rails consist of two "I" beams (18 inch and 15 inch) that are supported by the piers. The two hoists for raising the spillway tainter gates are driven by attached electric motors.

A U.S. Army Corps of Engineer's bronze disk is set flush with the bridge deck in the walkway at the second pier from the right end. Unless otherwise noted, data given in this report is based on

the assumption that the E1 715.06 ft. elevation given for this benchmark is on National Geodetic Vertical Datum (NGVD).

The terrain near the dam and reservoir is urban and gently rolling. Five borings from the original plans show sand with an occasional pocket of clay or gravel in the soils overlying a soft sandstone which is 40 or 50 ft. below ground surface.

Six spillway bays and tainter gates make up the structure. Only Gates 3, 4 and 5 are currently operable. Photos, sketches and pertinent data about Hamilton Dam is shown in **Appendix A, Figures 2.1, 2.2, 2.3, 2.4, and 2.5.**

2.2 HAZARD CLASSIFICATION

Hamilton Dam was classified by the U.S. Army Corp of Engineers as High Hazard in the 1980 Phase I Inspection Report. This classification remains in effect to date.

The hazard potential classification refers to the potential for loss of life or property damage in the area downstream of a dam in the event of its failure. This classification does not reflect on *the structural integrity of the dam. Dams conforming to criteria for the low hazard potential* category generally are located in an area where failure may cause damage limited to agriculture, uninhabited buildings, structures, or township or county roads, where environmental degradation would be minimal and danger to individuals is slight or nonexistent. A significant hazard potential dam means a dam located in an area where its failure may cause damage limited to isolated inhabited homes, agricultural buildings, structures, secondary highways, short line railroads, or public utilities, where environmental degradation may be significant, or where danger to individuals exist. A high hazard potential means a dam located in an area where a failure may cause serious damage to inhabited homes, agricultural buildings, campgrounds, recreational facilities, industrial or commercial buildings, public utilities, main highways or Class I carrier railroads, or where environmental degradation would be significant, or where danger to individuals exists with the potential for loss of life.

Hamilton Dam was classified as having a high hazard potential because of the possibility of considerable economic loss as a result of potential damage to downstream bridges and riverside facilities and because of the threat of loss of life to many users in the downstream area.

The dam is regulated under State of Michigan P.A. 451 Part 315 statute. Guidelines that accompany this statute require high hazard potential dams with heights less than 40 ft. to be capable of passing a 200-year flood or the flood of record whichever is greater. For the Hamilton Dam, the 200-year flood controls and has been computed by the Michigan Department of Environmental Quality to be 13,000 cfs.

The computed maximum impoundment elevation for the 200-year flood event varies dependent on assumptions made with regard to the number of floodgates that are operative. In 1981, calculations were performed by the United States Geologic Survey and form the basis for the FEMA Flood Insurance mapping that is used to this day. The USGS assumed that all six floodgates were operational. The USACE also computed the maximum impoundment elevation in their 1981 National Dam Safety Inspection Report. They assumed that just two gates were operational due to the fat that the gates could not be locked in an open position and only two operators existed. In 1993 after decommissioning of Gates 1, 2 and 6, Acres International Cooperation computed the maximum headwater elevation assuming that gates were operational in Bays 3, 4 and 5.

The results of these various studies is as follows:

Source	Estimated 200-year Impoundment Elevation NGVD Datum
1981 F.I.S. (U.S.G.S.)	709.05*
1981 Dam Safety Inspection Report (USACE)	711.6
1993 Dam Safety Inspection Report (ACRES)	712.8

** USGS added 0.95' to the computed impoundment elevation for the purpose of floodplain mapping. Therefore the floodplain mapping indicates a 200-year flood elevation of approximately 710.0 NGVD.*

It should be noted that there is uncertainty as to whether or not adequate freeboard exists at this site. The Acres report indicates that freeboard is sufficient based on the fact that the upstream right streambank area was raised in the mid 1980's. However, a recent survey conducted as part of this report indicates the elevation of this area to be similar to that shown in the 1981 USCE report i.e. ± 711.5 NGVD. Thus, it would appear that inadequate freeboard currently exists.

2.3 SUMMARY OF PREVIOUS REPORTS/DOCUMENTS

Plans for the original Dam construction in 1920 and plans for repairs performed in 1992 are on file with the City of Flint. Past inspection reports on file include the following:

- 1980 USACE, Phase I, National Dam Safety Program Report
- 1986 Ayres, Lewis, Norris & May, Inc. (ALNM) and Sublakes Diving Inspection Report
- 1988 MDNR Inspection Report
- 1989 Ayres, Lewis, Norris & May, Inc. (ALNM) Structural Evaluation and Reconstruction of Hamilton Dam Report
- 1993 Acres International Corp., Dam Inspection Report
- 1996 Ayres, Lewis, Norris & May, Inc. (ALNM) Inspection Report
- 1999 Paul C. Rizzo Associates, Inc. Dam Inspection Report
- 2000 USACE Hamilton Dam Condition Survey
- 2005 Soil & Materials Engineers, Inc. Dam Inspection Report

These reports have been consistent in their recommendations to undertake corrective action to address structural deficiencies within the facility. The 1989 Ayres, Lewis, Norris & May, Inc. (ALNM) and 2000 USACE Reports included estimated costs of $3,830,000 and $5,588,000 respectively to make the necessary improvements to insure dam safety and integrity.

2.4 ANCILLARY ITEMS

In addition to dam safety concerns there are numerous other related issues that pertain to this site. Although these issues may not directly relate to the objective of insuring public health, welfare and safety, they are of critical importance and thus require consideration during evaluation of redevelopment options. It should be noted that some of these issues fall outside the scope of this study and thus are not evaluated in detail. These ancillary issues are summarized as follows:

Water Treatment Plant – the existing City of Flint Water Treatment Plant serves as an emergency back-up source of drinking water for the City. As such a reliable source of raw water is required. The Hamilton Dam impoundment serves as this source and thus the integrity of the dam is critical to achieve the desired level of raw water intake reliability. Should the dam no longer be able to perform this function a new intake and low service pump station would need to be constructed at the Water Treatment Plant.

Pedestrian Access – the Hamilton Dam is located in the center of the University of Michigan's Flint campus. Historically, the bridge over the dam has provided a means for pedestrians to cross over the Flint River. Due to the deteriorating condition of the dam this bridge was closed to pedestrian traffic several years ago. While the pedestrian bridge may not need to be

replaced to meet the basic objective of public health, safety and welfare it is highly desired from both a public and U of M pedestrian accessibility standpoint.

Fish Passage – the Michigan Department of Natural Resources (MDNR) has gone on record strongly suggesting that some means of improved fish passage be incorporated into the redevelopment concept. While the existing dam has a fish ladder it does not function properly for warm water fish specifies such as those that frequent the Flint River. The MDNR is specifically interested in passage of walleye during the Spring spawning season. Per conversation with the MDNR the requirement for fish passage will not be mandated, but is highly recommended. The MDNR further stated that grant funds may be available to assist in funding fish passage improvements.

Downstream Inflatable Dam – an inflatable dam was installed downstream of Hamilton Dam as part of the Riverfront Park improvements. The Inflatable Dam purpose is largely aesthetic and passive recreational. The dam serves the function of maintaining water in the reach downstream from Hamilton Dam and provides a source and headlead for water sluiceways within the Riverfront Park. The dam is typically inflated from May through October each year. The MDNR Fisheries Division has expressed concern about this dam from a fish passage standpoint and has requested that any study of fish passage opportunities at the Hamilton Dam also include the same at the downstream Inflatable Dam.

Utah Dam – the Utah Dam is located upstream from the Hamilton Dam and was originally constructed to serve the same purpose as the Hamilton Dam i.e. storage and supply of raw drinking water. Since its function is redundant to the Hamilton Dam it has been decommissioned for a number of years. The dam consists of six vertical lift gates which have been decommissioned by locking in place at various heights. While the bottom of the gates are above the normal impoundment water level, they do restrict flows under increased flood flows and impoundment elevations. Past inspection reports have therefore recommended removal of the gates. The Utah Dam bridge deck does serve as a means of pedestrian access across the Flint River so removal may be limited to the floodgates and gate operating superstructure. While this work is not directly related to the Hamilton Dam it is necessary from a flood management standpoint and thus should be considered.

Consumers Energy Contamination – Consumers Energy is currently evaluating remediation methodologies for cleanup of contaminated soils and groundwater at a site immediately upstream and left of the Hamilton Dam. A manufactured gas plant (MGP) existed on this site which resulted in hydrocarbon contaminants within the soil and groundwater. Studies performed to date have indicated the groundwater gradient to drop with distance from the impoundment. Any reduction in the permanent impoundment level may impact this gradient and possibly result in contaminated groundwater moving toward and entering the impoundment. The MDEQ has reviewed this issue with regard to legal liability related to potential reverse

groundwater flow as has determined that Consumers Energy is responsible for all liabilities related to the contamination.

Recreational Opportunities – both the City and various stakeholder groups have expressed a desire to see recreational opportunities enhanced as part of the Hamilton Dam redevelopment effort. Most concepts that have been envisioned to date involve installation of natural rock riffles and pools downstream of the dam to provide canoe/kayak opportunities. This concept could also be multi-purpose as fish passage could possibly be incorporated into the design concept. There is strong support for naturalization of the river channel through the City so this work could possibly be part of a larger overall redevelopment project. Since this work is outside the scope of this study, it has not been evaluated in detail, however preliminary indications are that whatever redevelopment option is chosen could easily accommodate future recreational enhancements.

2.5 MDEQ CONSENT ORDER

On March 14, 2008, acting under the authority of Part 315, Dam Safety of the Natural Resources and Environmental Protection Act, 1994 P.A. 451 as amended, the Michigan Department of Environmental Quality issued an order to the City of Flint to drawdown the Hamilton impoundment 3.25 ft. to an elevation not greater than 705.25 NGVD for the purpose of public health, welfare and safety protection. The depth of necessary drawdown was computed by the MDEQ to eliminate the danger of loss of life downstream in the event of a sudden dam failure.

A permit under Part 301, Inland Lakes and Streams was issued for this activity on September 30, 2008. The City of Flint has subsequently abided by the conditions of this permit and has lowered the normal impoundment elevation to the prescribed elevation. It should also be noted that the MDEQ permit requires permanent deflation of the Obermeyer (Inflatable) Dam.

3.0 DESCRIPTION OF OPTIONS

3.1 OPTION NO. 1 – REPLACE DAM

Under this option, the existing dam would be replaced with a similar structure. Critical features are described as follows (refer to **Appendix B – Figures 3.1 and 3.2** for plan and section views of the propose spillway):

- The normal impoundment elevation would be set at NGVD 708.0 similar to the existing condition.
- The dam could consist of either a fully gated spillway or a combination of half gated and half gravity concrete overflow sections. For the purpose of this study, a fully gated section has been assumed.
- The maximum (design flood condition) impoundment elevation will be equal to or less than the existing computed elevations from the 1981 USGS (FIS), 1981 USACE National Dam Safety Report and 1993 Acres Report.
- The proposed floodgates will be hydraulically actuated with automated controls.
- The existing foundation, including base slab, support piles, ogee section should be considered for reuse. The same is true for the abutments and retaining walls. Further condition survey (concrete corings) will be required to confirm this assumption. All other existing components i.e. piers, superstructure gates and gate operating mechanisms will be demolished and replaced.
- Floodgates would be replaced with new taintor or crest gates. For the purpose of this study, crest gates are assumed.
- A prefabricated steel pedestrian bridge/walkway is proposed to provide cross river accessibility.
- The existing fish ladder will be decommissioned in place by filling with concrete.
- The existing Archimedean screw can either be decommissioned or reactivated. For the purpose of this study, decommissioning by constructing an upstream wall across its face is assumed. The wall will be constructed to an elevation to provide adequate flood protection to the right (looking downstream) embankment area.
- The proposed spillway would be constructed to accommodate future recreation, environmental, and fish passage improvements. Further study will be required to determine the scope and concepts relative to downstream recreational and environmental enhancements. Some ideas considered to date include streambed

naturalization through installation of a series of rock ramps, removal of the downstream inflatable dam and installation of a pump system for flow maintenance in the Riverfront Park sluiceways, canoe/kayak opportunities and last but not least installation of a fish/canoe/kayak bypass channel which could be located on either side of the dam.

- The existing abutments will be repaired in place to provide a 50 year life extension. Further detailed study is required to determine the extent of repair, however, for the purpose of this study, installation of a new concrete face (1 foot thick) is assumed.

- The Utah Dam, which is located upstream of Hamilton Dam, restricts flow during high flood flow conditions. As a minimum the existing gates should be removed as part of the Hamilton Dam reconstruction effort. A line item allowance for this work has been included in the preliminary estimate of probable cost for this option.

PRELIMINARY ESTIMATE OF PROBABLE COST
OPTION NO. 1 – REPLACE DAM

	ITEM		ESTIMATED COST	
1.	Mobilization/General Conditions (8%)		$ 270,000	
2.	Sitework/Soil Erosion Control (3%)		$ 100,000	
3.	Dewatering			
	Temporary Steel Sheeting	$ 200,000		
	Miscellaneous Bulkheads, etc.	$ 50,000		
	Maintenance Pumping	$ 80,000		
	Subtotal		$ 330,000	
4.	Demolition			
	Concrete	$ 600,000		
	Gates and Gate Operators	$ 50,000		
	Subtotal		$ 650,000	
5.	Concrete Work			
	Abutments	$ 150,000		
	Piers	$ 200,000		
	Miscellaneous	$ 100,000		
	Subtotal		$ 450,000	
6.	Floodgates			
	Supply (6 crest gates)	$1,050,000		
	Install (6 crest gates)	$ 300,000		
	Electrical/Instrumentation	$ 100,000		
	Subtotal		$1,450,000	
7.	Pedestrian Bridge			
	Supply	$ 360,000		
	Install	$ 60,000		
	Subtotal		$ 420,000	
8.	Abandon Fish Ladder/ & Archimedean Screw		$ 100,000	
	Estimate Of Probable Construction Cost			$ 3,770,000
	Indirect Cost (30%)			$ 1,131,000
	ESTIMATE OF TOTAL PROJECT COST			**$ 4,901,000**
	OPTION: Utah Dam Gate & Superstructure Removal			$ 500,000

3.2 OPTION NO. 2 – PARTIAL REMOVAL

Under this option, the existing dam would be largely removed and the upstream reach of the Flint River allowed to return to its natural state. A summary description of proposed work is as follows (refer to **Appendix B – Figures 3.3 and 3.4** for plan and section views of the proposed spillway):

- The existing piers, superstructure, gates and gate operating mechanisms would be demolished and removed similar to Option No. 1.
- The existing base slab and foundation piling would be decommissioned in place.
- The existing ogee spillway section would be decommissioned in place to minimize downstream passage of upstream sediments. The resultant structure may not be exempt from Michigan P.A. 451 Part 315 Dam Safety requirements. The proposed impoundment election would be lowered 6.5 feet to NGVD 701.5 ±.
- A rock ramp could be designed to accommodate fish passage recreational and aesthetic needs. It is estimated that the rock would extend downstream to the first bridge crossing (± 300 feet). Extension of the rock ramp downstream from the dam could be performed as part of future phase work including naturalization of the downstream channel, removal of the inflatable dam and installation of a pump system for the Riverfront Park sluiceways.
- The abutments would be abandoned in place with the intent to partially or totally remove them under a future phase stream naturalization project.
- Intermediate piers would be installed to serve as foundations for a pedestrian bridge. The bridge could be installed as part of the dam reconstruction or at a later date.
- The existing fish ladder would be demolished.
- The existing Archimedean screw area would be abandoned in place. The area could serve as a future intake for the Riverfront Park sluiceway pump station (right side).
- Streambank restoration will be required upstream of the dam to protect newly exposed areas from erosion. A detailed inventory of these areas will need to be performed to evaluate the extent and type of stabilization techniques.
- A scour analysis of all upstream bridges within the impoundment area will need to be performed to confirm scour resistance under the revised conditions.
- As a minimum removal of the gates at the Utah Dam should be considered.

- A new raw water intake will be required at the Water Treatment Plant including either replacement of the low service pump station or addition of a separate pumping system to pump in series with the existing low service pump station. For the purpose of this study a new low service pump station is assumed.
- A FEMA Letter of Map Amendment (LOMA) will be required for the impoundment area.
- Consumer Energy's contamination at the abandoned East Manufactured Gas Plant (MGP) may be impacted by the lowered impoundment elevation.

PRELIMINARY ESTIMATE OF PROBABLE COST
OPTION NO. 2 – PARTIAL DAM REMOVAL

	ITEM			ESTIMATED COST	
1.	Mobilization/General Conditions (4%)			$ 400,000	
2.	Sitework/Soil Erosion Control (3%)			$ 290,000	
3.	Dewatering				
	Temporary Steel Sheeting		$ 200,000		
	Miscellaneous Bulkheads, etc.		$ 50,000		
	Maintenance Pumping		$ 40,000		
		Subtotal		$ 290,000	
4.	Demolition				
	Concrete		$ 600,000		
	Gates and Gate Operators		$ 50,000		
		Subtotal		$ 650,000	
5.	Concrete Work				
	Abutments		$ 150,000		
	Piers (2)		$ 80,000		
		Subtotal		$ 230,000	
6.	Pedestrian Bridge				
	Supply		$ 360,000		
	Install		$ 60,000		
		Subtotal		$ 420,000	
7.	Abandon Fish Ladder/ & Archimedean Screw			$ 100,000	
8.	Streambank Restoration (Allowance)			$ 500,000	
9.	WTP Intake & Low Service Pump Station			$ 7,500,000	
	Estimate Of Probable Construction Cost				$10,380,000
	Indirect Cost (30%)				$ 3,114,000
	ESTIMATE OF TOTAL PROJECT COST				**$13,494,000**
	OPTION: Utah Dam Gate & Superstructure Removal				$ 500,000

3.3 OPTION NO. 3 – OVERFLOW SPILLWAY – LOWERED IMPOUNDMENT

This option will provide for continued operation of the existing WTP low service pumps while improving operational efficiency and related costs associated with the dam. It is further described as follows (refer to **Appendix B – Figures 3.5 and 3.6** for plan and section views of the proposed spillway):

- A preliminary analysis of the WTP low service pumps indicates that the normal impoundment elevation could be lowered 2 feet without negatively impacting the pump's ability to perform. This is therefore a first guess as to the proposed normal impoundment elevation i.e. 706.0 NGVD.

- Replacement of the dam with an overflow concrete spillway will result in a significant reduction in ongoing operation and maintenance costs.

- The existing piers, superstructure, gates and gate operating mechanisms will be demolished and removed similar to Options 1 and 2.

- The existing foundation including base slab, support piles and ogee section will be considered for reuse dependent on further condition assessment.

- The existing ogee section will be enlarged by adding a new reinforced concrete section immediately above and downstream. The top elevation of the new crest would be set 2 feet below the existing top of gates i.e. elevation 705.8 NGVD.

- The existing fish ladder and Archimedean screw would be abandoned similar to Option 1.

- Intermediate piers would be installed to serve as foundations for a pedestrian bridge. The bridge could be installed as part of the dam reconstruction or at a future date.

- The abutments would be repaired similar to Option 1 i.e. new concrete facing to provide a 50 year life extension.

- The overflow spillway option will require construction of additional flood protection along the upstream right embankment. This could consist of an earthen berm or wall similar to the left upstream bank. The top of berm/wall elevation should be designed to allow a minimum of 1 foot of freeboard. For preliminary planning this is estimated to be elevation 714.0 NGVD which means that the berm/wall will be maximum 2.5 feet above the existing conditions. It is estimated that the berm/wall will extend approximately 300 feet upstream.

- The maximum impoundment elevation will increase above that included in the F.I.S. therefore a FEMA Letter of Map Amendment (LOMA) will be required. The maximum impoundment elevation will remain equal to or lower than those shown in the 1981 USACE and 1993 Acres Reports.

- Recreation, environmental and fish passage improvements can be incorporated into the dam at a future date. The design of the replacement spillway will facilitate these items.

- Consideration should be given to installation of a means to lower the impoundment for maintenance purposes. This could be in the form of gated drain sluices or possibly a single floodgate. A line item allowance has been included for this item.

- Removal of the Utah Dam gates is needed to address high flow restrictions. An optional allowance has been included for this item.

PRELIMINARY ESTIMATE OF PROBABLE COST
OPTION NO. 3 – OVERFLOW SPILLWAY, LOWERED IMPOUNDMENT

	ITEM		ESTIMATED COST	
1.	Mobilization/General Conditions (11%)		$ 270,000	
2.	Sitework/Soil Erosion Control (4%)		$ 100,000	
3.	Dewatering			
	Temporary Steel Sheeting	$ 200,000		
	Miscellaneous Bulkheads, etc.	$ 50,000		
	Maintenance Pumping	$ 80,000		
	Subtotal		$ 330,000	
4.	Demolition			
	Concrete	$ 600,000		
	Gates and Gate Operators	$ 50,000		
	Subtotal		$ 650,000	
5.	Concrete Work			
	Abutments	$ 150,000		
	Piers	$ 80,000		
	Spillway	$ 400,000		
	Miscellaneous	$ 100,000		
	Subtotal		$ 730,000	
6.	Pedestrian Bridge			
	Supply	$ 360,000		
	Install	$ 60,000		
	Subtotal		$ 420,000	
7.	Abandon Fish Ladder/ & Archimedean Screw		$ 100,000	
8.	Upstream Right Berm/Retaining Wall		$ 50,000	
9.	Drain Gate/Sluice (Allowance)		$ 200,000	
	Estimate Of Probable Construction Cost			$ 2,850,000
	Indirect Cost (30%)			$ 855,000
	ESTIMATE OF TOTAL PROJECT COST			**$ 3,705,000**
	OPTION: Utah Dam Gate & Superstructure Removal			$ 500,000

3.4 DISCUSSION/COMPARISON OF OPTIONS

General – In development of the various repair/replacement removal options numerous issues/criteria have been considered. The decision as to a preferred option will be dependent on City of Flint prioritization of evaluation criteria. Basic issues that have been considered are as follows:

1. Public Health, Welfare and Safety
2. Initial Capital Cost
3. Annual Operation and Maintenance Costs
4. Floodzone – FEMA Flood Insurance
5. Environmental Impacts
6. Aesthetics
7. Recreational Opportunities
8. Pedestrian Accessibility
9. Fisheries
10. WTP Source Water Reliability
11. CPCo Contamination
12. Inflatable Dam Disposition
13. Utah Dam Disposition
14. Project Schedule
15. Constructability

A brief discussion of each issue follows:

Public Health, Welfare and Safety – as previously indicated the existing dam is classified as high hazard by the MDEQ. Per P.A. 451 Part 315, a high hazard potential dam is defined as "a dam located in an area where a failure may cause serious damage to inhabited homes, agriculture buildings, campgrounds, recreation facilities, industrial or commercial buildings, public utilities, main highways, or Class I carrier railroads, or where environmental degradation would be significant, or where danger exists with the potential for loss of life". This hazard classification mandates utmost importance with regard to public health, welfare and safety. The options considered will all be developed to afford the necessary protection to the public. Of the three options considered the partial removal option (No. 2) would provide the greatest benefit as the impoundment depth and storage would be greatly reduced and downstream consequences from a dam failure would be minimized. Depending on the extent of impoundment elevation reduction the proposed facility, options, may or may not be regulated under P.A. 451 Part 315. The structural height of the facility would need to be less than six feet to be exempt from regulation. Further investigation is required to determine if this statute will continue to apply. As a minimum under Option 2 the hazard classification would most likely be reduced to low hazard. It is envisioned that the hazard classification under both Options 1 and 3 will remain as currently

classified, i.e. high hazard. Health, welfare and safety also performs to a reliable raw water source of the WTP intake. All options provide this reliability.

Initial Capital Cost – the preliminary estimate of probable cost for each of the three options is included in the previous section. As can be seen, these vary from a low for Option 3 of $3,705,000 to a high for Option 2 of $13,494,000. Option 1 is estimated cost $4,901,000. The option 1 cost can be compared to the 1989 estimate prepared by Ayres, Lewis, Norris & May, Inc. (ALNM). The 1989 estimate was for replacement of the existing structure in like kind similar to Option 1. In 1989 the estimated cost was $3,830,000. An estimated cost for replacement in like kind was also developed by the US Army Corp of Engineers in 2000. That estimated project cost was $5,588,000. It should be noted that this cost included replacement of the dam foundation. The Corp made the assumption that the dam would be replaced in its entirety including foundation and foundation piles. Taking into consideration time related construction cost increases as well as variations of scope, the three estimates compare quite favorably. It should be noted that the estimates for all options include the basic facility necessary to address the objective of meeting public health, welfare and safety, both with regard to dam safety considerations as well as provision of a reliable source of raw water to the water treatment plant. Furthermore, it should be emphasized that the Options considered will all allow for future improvements such as recreation enhancements and fish passage. In addition, an optional line item has been included for disposition of the Utah Dam. This item is discussed in greater detail later in this section. The impact of the water treatment plant intake and low service pump station is readily evident on review of the Option 2 cost breakdown. While inclusion of this cost appears to make this Option non-feasible with regard to capital cost, it should be noted that construction of the new intake and low service pump station at the water treatment plant may serve some benefit to that facility and as such all or a portion of that cost may not need to be allocated to Option 2 for comparison purposes.

Annual Operation and Maintenance Cost – the annual operation maintenance costs associated with Option 1 will be considerably greater than that for both Options 2 and 3. The reason for this is the cost associated with both operation and maintenance of the floodgates. Both Options 2 and 3 include passive overflow spillway which will require minimal annual operation and maintenance. Option 3 will have a slightly greater annual operation and maintenance cost than Option 2 as it includes a lake drain valve or sluice which will need to be maintained. All annual operation costs remain relatively constant for dam facilities. Annual maintenance costs can vary significantly. For this reason, both Options 2 and 3 have significant benefit over Option 1 from an ongoing operation and maintenance cost standpoint.

Flood Elevation/FEMA Flood Insurance – each option considered will result in varied maximum flood elevations upstream of the dam. Before discussing the proposed options some discussion of existing conditions is appropriate. Currently, three of the six floodgates are operative. The other three have been decommissioned by placing steel sheet piling across their face. This was performed in 1991 as a temporary measure to protect the downstream from damage caused by failure of one of the gates. The 1993 Dam Safety report prepared by Acres International shows the computed headwater elevation for the 200-year flood event to be approximately 712.8 NGVD datum. In 1981 the dam was studied by both the United States Geological Service (USGS) as part of the flood insurance study for the Federal Emergency Management Agency (FEMA) and US Corp of Engineers as part of the National Dam Safety report. These studies varied in their assumptions as to the number of gates operative to pass flood flows. USGS assumed that all six gates would be operative in developing the headwater rating curve for the flood insurance study. As a result, the computed 200-year headwater elevation was 709.05 NGVD. The USGS then added 0.95 ft. to this figure for the purpose of floodplain mapping and management. Thus, the flood insurance mapping shows an approximate elevation of 710.0 for the 200-year flood condition. The Corp of Engineers computed elevation is 711.6 assuming that only two gates were operative. The 200-year flood elevation for the proposed Options have been computed to be 709.4 for Option 1 and 712.6 for Option 3. Option 2 is not computed as it will result in a reduction of the upstream flood elevation. Both Options 2 and 3 will require preparation of a letter of map amendment LOMA to the FEMA flood insurance study. In the case of Option 2, the amendment will show lowered flood elevations upstream of Hamilton Dam and thus is a reduced floodway/floodplain area. In the case of Option 3, the floodplain/floodway will be increased due to an increase in computed 200-year flood elevation. It should be noted and emphasized that while Option 3 will increase the 200-year headwater elevation above that utilized in the flood insurance study it will not increase it above current conditions as identified in the Acres Report. It should also be noted that for Option 3, a detailed survey of the impacted areas will need to be performed to evaluate risks related to the increased headwater elevation.

Ecological Impact – the ecological benefits of dam removal have been well documented. Returning a stream to its natural habitat will typically benefit aquatic habitat and water quality. This is also true for the Hamilton Dam. These benefits should be weighed against the increased capital cost for Option 2 related to provision of a new water treatment plant intake and low service pumping station. Downstream disbursal of sediment is always a concern when removing dams. It should be noted that upstream sediment was dredged in the area immediately upstream of the dam by the U.S. Army Corp of Engineers approximately 10 years ago. At that time, the sediment was determined to be contaminated with arsenic and therefore was disposed in a landfill as cover. Primary sediment soundings indicate that a minimum of sediment has reaccumulated in this area. The majority of sediment is deposited in the upper reaches of the impoundment with sediment depths typically being 2 to 4 ft. In order to contain as much sediment as possible within the impoundment, it is common to consider a partial dam removal similar of that envisioned in Option 2. Under Option 2 the normal impoundment

elevation would be reduced by 6.5 ft. The existing ogee section would remain in place, thereby creating a minimal backwater pool for sediment containment. A more detailed study of sediment characteristics erosion and mobility will need to be performed to determine potential impact for this Option. It is envisioned that some stream bank erosion will occur as a result of the lower impoundment. This erosion can be minimized by establishment of natural erosion protection measures.

Aesthetic Considerations – it is the general consensus of both the city and associated stakeholders that aesthetics of the general area could be improved by installation of a rock ramp concept. The rock ramp which provides for a series of riffles and pools that would result in a more natural setting. All options being considered will be able to accept future aesthetic improvement without significant modifications or cost to the spillway.

Pedestrian Accessibility – the Hamilton Dam is located in the center of the University of Michigan's Flint campus. As such it is a preferred location for linking pedestrian traffic between the left and right banks of the river. Due to the poor condition of the existing bridge crossing, it has been closed to pedestrian traffic for several years. This has been an inconvenience to U of M staff and students. All options being considered include a prefabricated steel pedestrian bridge over the dam. It should be noted that this pedestrian bridge is not required for operation and maintenance of dam facility. That will benefit both the public in general as well as the U of M campus in specific.

Recreational Opportunities – the City of Flint and associated project stakeholders have the desire to see recreational opportunities developed as part of the dam reconstruction. It is envisioned that these recreational opportunities could take the form of canoeing, kayaking, and streambank fishing. It is further envisioned that the aforementioned rock ramp would provide whitewater recreational opportunities. Again, due to cost and schedule considerations, these improvements are not being considered as part of this report of the basic repair/replacement reuse options. If desired, the rock ramp options can easily be installed in a cost effective manner at a future date.

Fisheries – the Michigan Department of Natural Resources (MDNR) has gone on record indicating that fish passage should be considered in any modification to the Hamilton Dam. A major concern to the MDNR is passage of walleye during spring spawning season. Since walleye require a relatively flat (maximum one foot vertical to forty foot horizontal) channel scope, it will be difficult to include an in-channel bypass for both Options 1 and 3. Therefore, it is envisioned that a bypass channel would be constructed around the dam either in the left or right bank. It is believed that an in-channel bypass could be provided for Option 2 since the impoundment is lowered and the resultant elevation differential is minimized. The MDNR has indicated that while the fish passage is highly desirable it will not be mandated as part of the reconstruction permit. Therefore, depending on the Option chosen it may be desirable to defer construction of the fish passage facility until a future date. This will be the case for both Options

1 and 3. Under Option 2, it is believed that the in-channel fish passage facility could be incorporated into the partial dam removal option. The MDNR has also indicated that the City should apply for a grant through the Inland Fisheries Trust Fund to assist in constructing a fish bypass. This application is typically due by March 1st of the year with a funding decision made by October. This study assumes that a fish bypass will be included as a future phase effort. This will allow for a more balanced cost comparison among the proposed Options. It should be noted, that the future costs for construction of a fish passage facility will be considerable less for Option 2 than Option 1 and 3. This is particularly true if the rock ramp envisioned can serve multi-purposes i.e. recreational, fisheries and aesthetics.

Consumers Energy Contamination – Consumers Energy is currently remediating a contaminated site located near the left river bank immediately upstream of the dam. This site was the past location of a manufactured gas plant. Soil and groundwater are contaminated with hydrocarbon related contaminates at this site. Consumers Energy is currently evaluating the extent of the contamination plume and treatment methodologies. As of this date, a schedule for commencement of cleanup activities has not been prepared. In general the existing groundwater gradient is away from the impoundment. This is believed to be driven by the increased water elevation within the impoundment. There is some concern that should the impoundment be lowered the groundwater gradient will be reversed and contaminates allowed to move back toward the river with potential of eventually outletting into the river. The Michigan Department of Environmental Quality (MDEQ) has evaluated the liability associated with this site and determined that all liability for contaminate impacts and cleanup is the responsibility of Consumers Energy. It is the MDEQ's position that lowering the impoundment elevation will not relieve Consumers Energy of this liability. It is recommended that the City perform their own legal due diligence to confirm the MDEQ's finding in this regard. Should the City's investigation confirm this fact then the Consumers Energy contaminate impact should not be considered and all options would appear to be equal in this regard.

Water Treatment Plant Intake and Low Service Pumping – the City of Flint currently purchases water from the City of Detroit. Water is delivered through a single pipeline. A backup pipeline from the City of Detroit is currently being discussed. To provide a backup source of water should the City of Detroit system fail, the City of Flint is required to maintain the Water Treatment Plant in operation mode. The raw water source for the Water Treatment Plant is the Flint River. The Hamilton Dam provides the impoundment area from which the Water Treatment Plant draws its raw water. The raw water intake is located on the right bank of the river adjacent to the WTP. Water enters an underground conduit at this location and flows to the adjacent pumping station which houses low service pumps which subsequently pump water to the treatment plant for treatment. The low service pumping station has a firm pumping capacity of 35,000,000 gallons per day. An evaluation was made of the low service pumps and piping to determine what impact, if any, lowering of the impoundment elevation would have on the ability of these pumps to reliably operate. Theoretical calculations determined that the normal impoundment elevation could be lowered two feet before the pumps would experience

cavitation due to vortexing. In May 2008 an attempt was made to verify these calculations by performing pump tests during a planned drawdown for a river cleanup. This pump testing was postponed due to the failure of the intake to function at the lower elevation. Investigation indicated that the intake has accumulated substantial sediment which impedes flow into these pumps. The City has subsequently applied for a permit from the MDEQ to dredge the sediment in the area of the intake. On completion of this work, it is recommended that the pump study be performed to confirm the theoretical computed two foot drawdown. For Option 2, the preliminary estimate of probable cost is based on a complete replacement of the existing intake and low service pump station.

Downstream Inflatable Dam – the downstream inflatable dam was installed as part of the US Army Corp of Engineers river redevelopment project in the mid 1980's. The purpose of this inflatable dam is to provide backwater between the Hamilton Dam and the Inflatable Dam and to provide water for the various sluiceways installed in the Riverfront Park. The inflatable dam is typically inflated during summer seasons, May through October. The MDNR has also stated their concern about this dam's ecological impact on the river in particular its blockage of upstream fish passage. The MDNR has recommended that this facility be permanently abandoned. The consent order from the MDEQ for lowering the Hamilton Dam impoundment also requires that the inflatable dam be permanently deflated, at least until the Hamilton Dam reconstruction is permitted. The City of Flint Parks and Recreation Department which has the responsibility for operation and maintenance of the inflatable dam has indicated that the inflatable dam could be replaced with a pump system for providing water to the Riverfront Park sluices. Further investigation into the disposition of this facility will need to be performed.

Utah Dam – the Utah Dam is located upstream of the Hamilton Dam and was once used as a backup facility for impounding water at the water treatment plant. The Utah Dam has been decommissioned for some time. Decommissioning was performed by raising the existing vertical sluice gates and allowing the river to flow freely through the existing facility. Unfortunately, while the river flows freely under normal conditions, under flood flow conditions the existing gates will restrict flow through this facility. This fact has been identified in the last two dam safety inspection reports. In each of these reports, removal of the gates has been recommended. The other purpose the Utah Dam currently serves is to provide a means of pedestrian crossing from a residential area on the left bank to a city park on the right bank. It is envisioned that the gates and operating superstructure could be removed while leaving the piers and walkway in place. An allowance for this work has been included as an optional item for each of three options.

Schedule – it is recommended that the City pursue this project on a phased basis. The first phase will include the base work necessary for correcting structural deficiencies and providing the reliability necessary for insuring public health, welfare and safety, including dam safety and drinking water considerations. It is believed that each of the three options proposed can be designed, permitted, and constructed in an expedient fashion to accomplish this objective. Of

the three options, Option 3 would be the most expedient from a construction standpoint. The construction scope of work minimized and long lead time items such as gate and gate operator fabrication are not included. Option 2 would require the greatest timeframe from both a design, permitting and construction standpoint due to the complexities associated with intake and low service pumping systems. Phase Two work could consist of fish passage, recreational and aesthetic enhancements desired by the City and stakeholders. Further study is required to determine the extent and scope of this work and the possibility for grant funding. Currently it is envisioned that construction of Phase I improvements could take place in 2010. Phase Two improvements in all likelihood will not take place before 2012 or beyond.

An evaluation matrix (see **Appendix C, Figure 3.7**) has been developed to summarize the three development options and to assist in selection of the preferred option. The matrix assigns a high, medium, or low value to each of the evaluation criteria. As previously indicated prioritization of the review criteria will also play a significant role in the selection process. Since protection of public health, welfare and safety is of utmost importance it should be assigned a high priority level. The same is true for both capital and O&M costs as the City has limited financial resources for undertaking this project. Aesthetic consideration on the other hand is non-critical to the basic function of the facility and therefore can be considered to be of lesser importance. We have assigned what we believe to be appropriate priority values to each of the evaluation criteria. We emphasize that these assignments are subjective in nature and thus are dependent on individual opinion and preference.

4.0 SUMMARY AND RECOMMENDATIONS

4.1 GENERAL

Three options for repair, reuse or removal and replacement of the Hamilton Dam have been studied with regard to technical feasibility for redevelopment. The three options chosen were developed after careful consideration of the study objectives and site constraints. An attempt has been made to study a wide range of concepts for disposition of the existing facility. The concepts vary from minimal change, i.e. reconstruct to original conditions to almost total (partial) removal of the existing facility.

4.2 SUMMARY

The first option studied consists of replacement of the existing facility similar to its original construction. Existing piers, bridge, gates and gate operating mechanism would be removed. The existing foundation piles, base slab and gated ogee section would remain. All six floodgates would be replaced with new hydraulically actuated crest gates. The gate operation would be automated with remote SCADA capability. The hydraulically operated crest gates do not require an operating platform thus no superstructure is needed. A control building to house the hydraulic component and controls will need to be constructed most likely at or near the right end of the dam possibly where the existing fish ladder is located. For the purpose of pedestrian accessibility a prefabricated steel bridge/walkway is considered. The existing fish ladder would be decommissioned. It is envisioned that new fish passage system will be installed, most likely at a future date when and if grant funding is made available for all or a portion of this cost. Due to fish passage design constraints, 1:40 slope minimum for walleye, it is envisioned that fish passage will be in the form of a bypass sluiceway around either end of the dam. The Archimedean screw could either be decommissioned of replaced. Since it is a non-critical item to the primary objective of the dam, costs to re-commission are not considered. Recreational opportunities are also not considered as part of this study, but could be incorporated into the design basis either as a concurrent implementation task or a future task. Both cost and schedule implications may dictate that this work be performed in the future. This option will have no impact on the impoundment flood elevations used by FEMA in their flood insurance program and thus no changes are envisioned to the floodplain mapping and related flood insurance requirements. This initial capital cost for this option is estimated to be $4,901,000 or $5,401,000 should it be decided to include disposition of the Utah Dam in the project.

The second option studied consists of a near total (partial) removal of the dam. This would result in a lowering of the normal impoundment elevation by 6.5 feet. The partial drawdown will minimize downstream movement of existing impoundment sediments and provide minimal backwater at the WTP intake. Work associated with this option includes complete removal of the existing superstructure including piers, bridge, gates and gate operating mechanism. The existing foundation slab and gate ogee section would remain in place although should the City decide to "naturalize" the Flint River they could be removed and replaced with a more natural

concept. Two intermediate piers would be constructed to serve as foundations for the proposed pre-fabricated steel bridge/walkway. The fish ladder and Archimedean screw would be decommissioned similar to the first option. Since this option results in a reduced head it is envisioned that fish passage could be accomplished in channel possibly as a multi-purpose facility with recreation, aesthetic components. This option would result in a minor decrease to the upstream flood elevations. Depending on the extent of change revisions may be required to the FEMA Flood Maps. Since the normal impoundment elevation will be lowered 6.5 ft. it is assumed that some streambank stabilization will be required. The major impact that this option has is at the City of Flint Water Treatment Plant. The lowered impoundment elevation will render the existing intake and low service pumps useless and thus a new intake and low service pumping station will be required. Due to minimal pool depth design of the intake will need to be evaluated closely. The estimated initial capital cost for this option is estimated to be $13,494,000 or $13,994,000 with inclusion of the Utah Dam disposition. Much of this cost is related to the WTP intake and low service pump station and thus may be beneficial to the WTP operations especially if the existing intake and low service pumps are planned for replacement.

The third option is a compromise between the first two options. This option consists of replacement of the existing gated spillway with a gravity or concrete overflow spillway. This type of spillway is sometimes referred to as a "passive" spillway in that no active operation of flood gates is required. The normal impoundment elevation would be lowered 2 feet which by preliminary calculations is the minimum impoundment elevation at which the existing intake and low service pumps at the WTP will reliably function. As with the first two options, the existing spillway piers, bridge gates and gate operators would be removed. A pre-fabricated steel bridge/walkway is planned. The archimedean screw would be disposed of similar to the first two options. The existing fish ladder would be decommissioned and replaced by a bypass fish sluice when and if grant funding is made available. The resultant maximum impoundment elevation will be equal to or less than what currently exists, however greater than that used by FEMA in their flood insurance program. Therefore, further investigation is needed regarding flood impacts and FEMA mapping. Similar to the first two options, recreational opportunities could be incorporated into the design basis either concurrent with the dam reconstruction or as a future task. The estimated capital cost of this option is $3,705,000 or $4,205,000 should the Utah Dam disposition be included.

4.3 RECOMMENDATIONS

It is recommended that the City of Flint undertake OPTION No. 3 – Overflow Spillway, Lowered Impoundment for redevelopment of the Hamilton Dam. This option is chosen because it represents a cost effective means of improving the facility integrity and thus affording the needed protection to public health, welfare and safety. The benefits to public health, welfare and safety will not only be realized from increased dam safety, but also from the provision of a reliable raw water source to the Water Treatment Plant. Cost benefits are realized both in short term initial capital outlay and in long term annual operation and maintenance costs. Inclusion of

a pedestrian bridge/walkway in the option, while not critical to the primary objective of maintaining public health, welfare and safety, is recommended due to both public and institutional (University of Michigan) benefits derived from providing efficient pedestrian access. Further study is recommended to determine how recreational opportunities and fish passage can be incorporated into the project. It is envisioned that phasing the project may be necessary to accommodate these interests. The recommended option lends itself favorably to constructing basic safety related improvements in an initial phase while possibly deferring recreational and fisheries improvements to a later date. It is also recommended that the City consider disposition of the Utah Dam concurrent with the Hamilton Dam project. The Utah Dam represents a public safety risk both due to increased flood risk and potential for injury at the dam.

Implementation of OPTION 3 will require additional detailed study of certain issues prior to finalizing the basis of design and beginning detailed design work. These items include:

- WTP Intake and Low Service Pumps – pump testing should be performed to confirm the minimum impoundment elevation at which the WTP intake and low service pumps can reliably operate. An attempt was made to perform these tests in May 2008 during a planned drawdown for river cleanup however the pumps were unable to operate due to sediment accumulation in the intake. A permit to dredge this sediment was issued by the MDEQ (Permit No. 08-25-0028-P) on September 30, 2008. Upon completion of the dredging the pump testing should be performed. Coordination of impoundment level variation with the MDEQ must be made in accordance with the above permit.

- Existing Facility Condition Survey – the condition of the existing base slab, abutments and gated ogee section should be confirmed by concrete coring and testing. These components are scheduled for reuse and their ability to provide reliable service throughout the proposed 50 year life of the new facility should be evaluated.

- Flood Impacts – the proposed facility will increase flood elevations along the impoundment above those listed in the FEMA Flood Insurance Study (FIS). A study of the potential implications related to this should be made in coordination with the MDEQ and FEMA. This should include revised hydraulic modeling and physical survey of the surrounding area to determine the extent of impact, if any. The FEMA flood maps will require amending in accordance with FEMA policy.

- Survey Datum – past work performed in the City has utilized different vertical reference datum. This has resulted in confusion and suspect work. The bench datum used for the Hamilton Dam should be confirmed to be NGVD datum and compared to the vertical datum currently utilized at the WTP.

- Upstream Right Embankment – a detailed topographic survey should be performed of the upstream right embankment to determine the extent of berm/retaining wall improvements required to provide proper overtopping protection to this area.

- Fish Passage – the conceptual plan for fish passage should be finalized in cooperation with the MDNR and US Fish and Wildlife Service (USFWS). A preliminary design concept and cost should be developed to assist in applying for an Inland Fisheries Trust Grant. The 2008 grant application is due on or before February 28, 2009.

- Consumers Energy Contamination – the City should seek legal confirmation of the MDEQ determination that Consumers Energy would be solely liable for any damage related to contamination spread resultant from the permanent reduced impoundment elevation. It should be noted that since the City has already lowered the impoundment 3.25 ft. to meet the MDEQ's consent order requirements this issue may have already been investigated.

- Utah Dam – a more detailed analysis of Utah Dam should be made to confirm disposition scope and cost.

The above items are considered to be part of the Preliminary Design Phase of this project. Upon completion of this phase the project design basis should be finalized. Final Design and Permitting constitute the next phase of effort followed by the Construction Phase. As previously indicated, it is believed that the project construction can be phased with the basic dam reconstruction performed in the first phase followed by recreational, aesthetic and fish passage enhancements in the second phase. The construction phasing may be a benefit in that it will allow more time to better plan and fund the proposed Phase Two improvements. Realistically construction of Phase One will not take place until 2010. A proposed schedule to meet this objective is as follows:

	Begin	End
Phase 1 – Preliminary Design	1/1/2009	6/1/2009
Phase 2 – Final Design & Permitting	6/1/2009	2/1/2009
Phase 3 – Bidding	2/1/2010	5/1/2010
Phase 4 - Construction	6/1/2010	12/1/2010

It should be noted that this project schedule could be expedited if the City desires.

Funding for this project is assumed to be provided by the City. Past attempts to secure grant funding have proven unsuccessful. It is possible that the Phase Two efforts will be eligible for certain grants related to recreational enhancements and fisheries. A list of potential grant sources as listed by the MDEQ. Dam Safety Division is including in the Appendix. This listing consists mainly of public grants and does not include possible private grants which may be available for this project.

MDEQ Information

P.A. 451, Part 315

March 14, 2008 Order

Drawdown Permit

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION ACT (EXCERPT)
Act 451 of 1994

PART 315
DAM SAFETY

324.31501 Meanings of words and phrases.

Sec. 31501. For purposes of this part, the words and phrases defined in sections 31502 to 31505 have the meanings ascribed to them in those sections.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31502 Definitions; A to D.

Sec. 31502. (1) "Abandonment" means an affirmative act on the part of an owner to discontinue maintenance or operation of a dam.

(2) "Administrative procedures act of 1969" means Act No. 306 of the Public Acts of 1969, being sections 24.201 to 24.328 of the Michigan Compiled Laws.

(3) "Alteration" means a change in the design of an existing dam that directly affects or may directly affect the structural integrity of a dam.

(4) "Appurtenant works" means the structure or machinery incident to or annexed to a dam that is built to operate and maintain a dam, including spillways, either in a dam or separate from the dam; low level outlet works; and water conduits such as tunnels, pipelines, or penstocks, located either through the dam or through the abutments of the dam.

(5) "Auxiliary spillway" means a secondary spillway which is operational at all times and does not require stoplog removal or gate manipulation.

(6) "Dam" means an artificial barrier, including dikes, embankments, and appurtenant works, that impounds, diverts, or is designed to impound or divert water or a combination of water and any other liquid or material in the water, that is or will be when complete 6 feet or more in height, and that has or will have an impounding capacity at design flood elevation of 5 surface-acres or more. Dam does not include a storage or processing tank or standpipe constructed of steel or concrete, a roadway embankment not designed to impound water, or a dug pond where there is no impoundment of water or waste materials containing water at levels above adjacent natural grade levels.

(7) "Days" means calendar days, including Sundays and holidays.

(8) "Design flood" means the design flow rate for spillway capacity and dam height design.

(9) "Design flood elevation" means the maximum flood elevation that is considered in the design of the spillway capacity and freeboard for a dam.

(10) "Downstream toe elevation" means the elevation of the lowest point of intersection between the downstream slope of an earthen embankment and the natural ground.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31503 Definitions; E to H.

Sec. 31503. (1) "Emergency action plan" means a plan developed by the owner that establishes procedures for notification of the department, public off-site authorities, and other agencies of the emergency actions to be taken prior to and following an impending or actual failure of a dam.

(2) "Enlargement" means any change in or addition to an existing dam which raises or may raise the design flood elevation of the water impounded by the dam.

(3) "Failed dam" means a dam not capable of impounding water at its intended level due to a structural deficiency.

(4) "Failure" means an incident resulting in an unplanned or uncontrolled release of water from a dam.

(5) "Flood of record" means the greatest flow rate determined by the department to have occurred at a particular location.

(6) "Freeboard" means the vertical distance between the design flood elevation and the lowest point of the top of the dam.

(7) "Half probable maximum flood" means the largest flood that may reasonably occur over a watershed, and is derived from the combination of hydrologic runoff parameters and the half probable maximum storm

© Legislative Council, State of Michigan Courtesy of www.legislature.mi.gov

that produces the maximum runoff.

(8) "Half probable maximum storm" means the spatial and temporal distribution of the probable maximum precipitation, divided by 2, that produces the maximum volume of precipitation over a watershed.

(9) "Hazard potential classification" means a reference to the potential for loss of life, property damage, and environmental damage in the area downstream of a dam in the event of failure of the dam or appurtenant works.

(10) "Height" means the difference in elevation measured vertically between the natural bed of a stream or watercourse at the downstream toe of the dam, or, if it is not across a stream channel or watercourse, from the lowest elevation of the downstream toe of the dam, to the design flood elevation or to the lowest point of the top of the dam, whichever is less.

(11) "High hazard potential dam" means a dam located in an area where a failure may cause serious damage to inhabited homes, agricultural buildings, campgrounds, recreational facilities, industrial or commercial buildings, public utilities, main highways, or class I carrier railroads, or where environmental degradation would be significant, or where danger to individuals exists with the potential for loss of life.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31504 Definitions; I to P.

Sec. 31504. (1) "Impoundment" means the water held back by a dam.

(2) "Low hazard potential dam" means a dam located in an area where failure may cause damage limited to agriculture, uninhabited buildings, structures, or township or county roads, where environmental degradation would be minimal, and where danger to individuals is slight or nonexistent.

(3) "Maintenance" means the upkeep of a dam and its appurtenant works but does not include alterations or repairs.

(4) "One-hundred year flood" means a flood that has a 1% chance of being equaled or exceeded in any given year.

(5) "Owner" means a person who owns, leases, controls, operates, maintains, manages, or proposes to construct a dam.

(6) "Probable maximum precipitation" means the theoretically greatest depth of precipitation for a given duration that is physically possible over a given size storm area at a particular geographic location at a certain time of year.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31505 Definitions; R to T.

Sec. 31505. (1) "Removal" means the physical elimination of a dam or impoundment.

(2) "Repair" means to substantially restore a dam to its original condition and includes only such restoration as may directly affect the structural integrity of the dam.

(3) "Riparian owner" means a person who has riparian rights.

(4) "Riparian rights" means rights which accrue by operation of law to a landowner on the banks of an inland lake or stream.

(5) "Significant hazard potential dam" means a dam located in an area where its failure may cause damage limited to isolated inhabited homes, agricultural buildings, structures, secondary highways, short line railroads, or public utilities, where environmental degradation may be significant, or where danger to individuals exists.

(6) "Spillway" means a waterway in or about a dam designed for the discharge of water.

(7) "Spillway capacity" means the maximum rate of discharge that will pass through a spillway at design flood elevation.

(8) "Two-hundred year flood" means a flood that has a 0.5% chance of being equaled or exceeded in any given year.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31506 Jurisdiction of dams and impoundments; exemptions.

© Legislative Council, State of Michigan Courtesy of www.legislature.mi.gov

Sec. 31506. (1) Except as otherwise provided in subsections (2) and (3), dams and impoundments in the state are under the jurisdiction of the department.

(2) The following are exempt from this part:

(a) Projects licensed, projects that have preliminary permits, or projects for which an application for licensure has been filed under the federal power act, chapter 285, 41 Stat. 1063, 16 U.S.C. 791a to 793, 796 to 797, 798 to 818, 820 to 824a, and 824b to 825r, if federal dam safety inspection provisions apply during the license period and the inspection reports are provided to the department.

(b) Projects located on boundary waters under the jurisdiction and supervision of the United States army corps of engineers.

(c) Impoundments licensed pursuant to part 115 that contain or are designed to contain type III wastes as defined in rules promulgated under that part.

(3) Until January 1, 1998, a permit shall not be required under this part for the repair, reconstruction, or improvement of a dam, a portion of which is at least 75 years old, was damaged or destroyed by an act of God and is located in a county that has a per capita income of less than $8,500.00. However, a person who is performing a project for the repair, reconstruction, or improvement of a dam that is exempt from obtaining a permit under this subsection shall submit to the department and the joint capital outlay committee plans and specifications for the project. These plans and specifications shall be prepared by a licensed professional engineer and shall meet acceptable standards in the industry in order for a dam to be repaired, reconstructed, or improved. In reviewing plans and specifications for the project, the joint capital outlay committee may recommend environmental considerations to protect water quality such as underspill devices, minimum flow releases and removal of contaminated sediments that may be resuspended in the water column upon impoundment. Such contaminated sediments shall be disposed of in accordance with state law.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1995, Act 100, Imd. Eff. June 22, 1995.

Popular name: Act 451

Popular name: NREPA

324.31507 Prohibited conduct; exception.

Sec. 31507. (1) A person shall not construct, enlarge, repair, reconstruct, alter, remove, or abandon any dam except in a manner provided for in this part.

(2) This section does not apply to maintenance performed on a dam that does not affect the structural integrity of the dam.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31508 Preparation of plans and specifications; licensed professional engineer required; exceptions.

Sec. 31508. (1) Except as otherwise provided in subsection (2), a licensed professional engineer shall prepare all plans and specifications, except for minor projects undertaken pursuant to section 31513.

(2) A person who is not a licensed professional engineer may prepare plans and specifications only for repairs or alterations to a dam where the application is made by a nonprofit organization under the following circumstances:

(a) The nonprofit organization has assets of less than $30,000.00, is exempt from taxation under section 501(c)(3) of the internal revenue code of 1986, 26 U.S.C. 501, and is not composed primarily of the owners of property adjacent to or contiguous to an impoundment.

(b) The proposed repairs or alterations have a projected total cost of less than $25,000.00.

(c) The impoundment is open to the public and a notice of public access is posted.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31509 Activities requiring permit; application for permit; fees; waiver and disposition of fees.

Sec. 31509. (1) Except as otherwise provided in this part or as authorized by a permit issued by the department pursuant to part 13, a person shall not undertake any of the following activities:

(a) Construction of a new dam.

© Legislative Council, State of Michigan Courtesy of www.legislature.mi.gov

(b) Enlargement of a dam or an impoundment.
(c) Repair of a dam.
(d) Alteration of a dam.
(e) Removal of a dam.
(f) Abandonment of a dam.
(g) Reconstruction of a failed dam.

(2) An application for a permit shall include information that the department determines is necessary for the administration of this part. If a project includes activities at multiple locations, 1 application may be filed for the combined activities.

(3) An application for a permit for construction of a new dam, reconstruction of a failed dam, or enlargement of a dam shall be accompanied by the following fees:

(a) For a dam with a height of 6 feet or more but less than 10 feet, $500.00.
(b) For a dam with a height of 10 feet or more but less than 20 feet, $1,000.00.
(c) For a dam with a height of 20 feet or more, $3,000.00.

(4) An application for a permit for the repair, alteration, removal, or abandonment of a dam shall be accompanied by a fee of $200.00, and an application for a permit for a minor project pursuant to section 31513(1) shall be accompanied by a fee of $100.00.

(5) The department shall waive the fees under this section for applications from state agencies, department sponsored projects located on public lands, and organizations of the type described in section 31508(2)(a) through (c).

(6) The department shall forward fees collected under this section to the state treasurer for deposit in the land and water management permit fee fund created in section 30113.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2004, Act 325, Imd. Eff. Sept. 10, 2004.

Popular name: Act 451

Popular name: NREPA

324.31510 Request for notification of pending applications for permits; annual fee; biweekly list of applications; copies; contents.

Sec. 31510. (1) A person who wants to be notified of pending applications for permits issued under this part may make a written request to the department, accompanied by an annual fee of $25.00. The fee shall be deposited in the state treasury and credited to the general fund.

(2) The department shall prepare a biweekly list of the applications made during the previous biweekly period and shall promptly mail copies of the list for the remainder of the calendar year to the persons who have requested notice and paid the fee under this section.

(3) The biweekly list shall state the name and address of each applicant, the legal description of the lands included in the applicant's project, and a summary statement of the purpose of the project.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31511 Copies of application and statement; submission; public hearing; notice.

Sec. 31511. (1) Upon receipt of an application for a permit under this part, the department shall submit copies of the application accompanied by a statement indicating that the department may act upon the application without a public hearing unless a written request is filed with the department within 20 days after the submission for review. The department shall submit copies of the application to all of the following:

(a) The local unit of government where the project is to be located.
(b) The adjacent riparian owners.
(c) Any person considered appropriate by the department.
(d) Any person who requests copies.
(e) A watershed council, organized pursuant to part 311, of the watershed within which the project is located or is to be located.

(2) The department may hold a public hearing upon the written request of any of the following:

(a) An applicant.
(b) A riparian owner.
(c) A person or local unit of government that is entitled to receive a copy of the application pursuant to subsection (1).

© Legislative Council, State of Michigan Courtesy of www.legislature.mi.gov

(3) A public hearing held pursuant to this section shall be held in compliance with the open meetings act, Act No. 267 of the Public Acts of 1976, being sections 15.261 to 15.275 of the Michigan Compiled Laws. Public notice of the time, date, and place of the hearing shall be given in the manner provided by that act. Additionally, the department shall mail copies of the public notice to the persons who have requested the biweekly list pursuant to section 31510, the person requesting the hearing, and the persons and local units of government that are entitled to receive a copy of the application pursuant to subsection (1).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31512 Necessity for immediate action; emergency conditions; application for permit to reconstruct failed dam.

Sec. 31512. (1) When immediate action is necessary to protect the structural integrity of a dam, the department may issue a permit before the expiration of the 20-day period referred to in section 31511(1). This subsection does not prohibit an owner from taking action necessary to mitigate emergency conditions if imminent danger of failure exists.

(2) A person applying for a permit to reconstruct a failed dam shall file a complete application not less than 1 year after the date of the failure. If such an application is filed more than 1 year after the date of the failure, the department shall consider the application to be an application to construct a new dam.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2004, Act 325, Imd. Eff. Sept. 10, 2004.

Popular name: Act 451

Popular name: NREPA

324.31513 Minor project categories; rules.

Sec. 31513. (1) The department shall promulgate rules to establish minor project categories for alterations and repairs that have minimal effect on the structural integrity of a dam. The department may act upon an application and grant a permit for an activity or project within a minor project category, after an on-site inspection of the dam, without providing public notice.

(2) All other provisions of this part shall be applicable to minor projects, except that a final inspection by the department or certification of the project by a licensed professional engineer shall not be required for a project completed under a permit granted pursuant to subsection (1).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31514 Effect of proposed activity on public health, safety, welfare, property, or natural resources.

Sec. 31514. The department shall not issue a permit to construct a new dam, reconstruct a failed dam for which a complete application to reconstruct has been submitted more than 1 year after the date of the failure, or enlarge the surface area of an impoundment by more than 10% unless it determines, after a review of the application submitted, that the proposed activity for which a permit is requested will not have a significant adverse effect on public health, safety, welfare, property, or natural resources or the public trust in those natural resources.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31515 Approval of plans and specifications; completion of permitted activity; time; extension; approval of changes; duration and renewal of permit; terms and conditions; mitigating measures; recommendations; performance bond; suspension, revocation, annulment, withdrawal, recall, cancellation, or amendment of permit; hearings.

Sec. 31515. (1) Except as otherwise provided in this section, a permit issued by the department under this part shall require that plans and specifications be approved by the department before construction begins. The department shall approve or reject complete plans and specifications within 60 days after their receipt. The permitted activity shall be completed within a specified time not to exceed 2 years after the date of issuance of the permit. Upon the written application of the permittee, and for good cause shown, the department may extend the time for completing construction. The permittee shall notify the department at least 10 days before

© Legislative Council, State of Michigan Courtesy of www.legislature.mi.gov

beginning construction and shall otherwise notify the department as the department may require.

(2) A change in approved plans and specifications shall not be implemented unless the department gives its prior approval. The department shall approve or reject changes in plans and specifications within 30 days after the request for the changes.

(3) A permit is effective for the length of time specified in the permit unless it is revoked pursuant to this part. The department may renew a permit.

(4) A permit to alter, repair, or construct a new dam, reconstruct a failed dam, or enlarge the surface area of an impoundment by more than 10% may specify the terms and conditions including, but not limited to, requirements for minimum flows, cold water release, impoundment fluctuations, portage, contingency plans, and conditions under which the work is to be performed. The terms and conditions of a permit shall be effective for the life of the project. The department may consider, in issuing a permit, any mitigating measures in conjunction with the permitted activities and may make recommendations as to fish passage that may be required by part 483.

(5) A permit to construct a new dam or reconstruct a failed dam may require a performance bond to assure completion of the project or to provide for complete or partial restoration of the project site, as determined by the department in rules promulgated by the department.

(6) A permit may be suspended, revoked, annulled, withdrawn, recalled, canceled, or amended after a hearing for a violation of any of its provisions, a violation of this part, a violation of a rule promulgated under this part, or any misrepresentation contained in the application. Hearings shall be conducted by the department in accordance with the provisions for contested cases in the administrative procedures act of 1969.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31516 Spillway capacity; minimum criteria; freeboard; auxiliary spillway; duty of owner.

Sec. 31516. (1) Spillway capacity shall meet the following minimum criteria:

(a) Low hazard potential dams shall be capable of passing the 100-year flood, or the flood of record, whichever is greater.

(b) Significant hazard potential dams shall be capable of passing the 200-year flood, or the flood of record, whichever is greater.

(c) High hazard potential dams, less than 40 feet in height, as measured from the 200-year design flood elevation to the lowest downstream toe elevation, shall be capable of passing the 200-year flood, or the flood of record, whichever is greater.

(d) High hazard potential dams, 40 feet or greater in height, as measured from the 200-year design flood elevation to the lowest downstream toe elevation, shall be capable of passing the half probable maximum flood. The half probable maximum flood criterion may be reduced to not less than the 200-year flood, with proper documentation evidencing a failure of a dam under half probable maximum flood conditions will not cause additional flood damage or loss of life.

(e) Spillway design capacity shall not be less than the flood of record.

(2) Freeboard shall be considered when determining spillway capacity.

(3) If a dam cannot pass the design flood, an auxiliary spillway must be provided. The owner must document, to the satisfaction of the department, that the dam has sufficient spillway capacity, and that proper means are available to operate the spillway or spillways during the design flood.

324.31517 Duties of owner; inspection; notice of final approval; notice of project not completed in accordance with plans, specifications, or conditions; enforcement action.

Sec. 31517. (1) Except for minor projects authorized pursuant to section 31513, the owner shall do both of the following:

(a) Within 10 days after the completion of a new, reconstructed, enlarged, repaired, or altered dam, notify the department of its completion.

(b) Within 20 days after submitting the notice of completion, file with the department as-built plans and a statement signed by a licensed professional engineer certifying that the project was constructed in conformance with plans and specifications approved by the department.

(2) The department shall inspect the project and shall provide the owner with written notice of final approval if the project is determined to have been completed in accordance with approved plans,

© Legislative Council, State of Michigan Courtesy of www.legislature.mi.gov

specifications, and permit conditions.

(3) If the project is determined not to be completed in accordance with plans and specifications approved by the department and permit conditions, the department shall provide notice to the permittee as to the specific reasons the department determines the project not to be completed in accordance with those plans, specifications, or conditions. The department may then take enforcement action as provided in this part.

324.31518 Inspection reports; determination of hazard potential classification; inspection schedule; notice; additional inspection reports; contents of inspection report; visual inspection and report; detailed investigation or evaluation; life or property threatened by breach of dam; cause of action; ordering actions to alleviate danger.

Sec. 31518. (1) An owner shall submit to the department inspection reports prepared by a licensed professional engineer that evaluate the condition of the dam. The inspection report shall be submitted as follows:

(a) Not less than once every 3 years for high hazard potential dams.

(b) Not less than once every 4 years for significant hazard potential dams.

(c) Not less than once every 5 years for low hazard potential dams.

(2) The department shall determine the hazard potential classification of all dams and shall establish an inspection schedule. The inspection schedule shall require annual submission of inspection reports for approximately 1/3 of all high hazard potential dams, 1/4 of all significant hazard potential dams, and 1/5 of all low hazard potential dams. The department shall notify owners in writing when inspection reports are due. The department may order additional inspection reports following an event or change in condition that could threaten a dam.

(3) An inspection report required by this section shall include, at a minimum, all of the following:

(a) An evaluation of the dam's condition, spillway capacity, operational adequacy, and structural integrity.

(b) A determination of whether deficiencies exist that could lead to the failure of the dam.

(c) Recommendations for maintenance, repair, and alterations of a dam as are necessary to eliminate any deficiencies.

(4) Instead of engaging a licensed professional engineer to prepare an inspection report, local units of government or an organization of the type described in section 31508(2)(a) through (c) may request the department to conduct a visual inspection of a dam owned by that local unit of government and prepare a report on the condition of the dam in accordance with subsection (3). The department shall notify a requesting local unit of government as to when the inspection is to occur.

(5) If an inspection report discloses the need for a more detailed investigation or evaluation of certain dam features for the purpose of determining the condition of the dam, the department may order the completion and submission of that detailed investigation or evaluation at the expense of the owner. An investigation or evaluation required under this subsection shall be conducted under the supervision of a licensed professional engineer.

(6) If an owner does not submit an inspection report as required by subsection (1) or conduct additional investigations if required by subsection (5), the department or any person who would have life or property threatened by a breach of the dam may have a report prepared and recover the costs of preparing the report in a civil action commenced in a court of competent jurisdiction. This subsection does not limit the right of any person to bring a cause of action in a court of proper jurisdiction to compel an owner to comply with the requirements of this part.

(7) If, based on the findings and recommendations of the inspection report and an inspection by the department, the department finds that a condition exists which endangers a dam, it shall order the owner to take actions that the department considers necessary to alleviate the danger.

324.31519 Order to limit dam operations; order to remove dam; hearing.

Sec. 31519. (1) Where significant damage to the public health, safety, welfare, property, and natural resources or the public trust in those natural resources or damage to persons or property occurs or is anticipated to occur due to the operation of a dam, the department may order the owner to limit dam

© Legislative Council, State of Michigan Courtesy of www.legislature.mi.gov

operations. These orders may include, but are not limited to, cold water release, minimum flow releases from dams, impoundment fluctuation restrictions, or requirements for run-of-the-river operation. In issuing these orders, the department shall take into account social, economic, and public trust values.

(2) Where significant damage to persons, property, or natural resources or the public trust in those natural resources occurs as a result of the condition or existence of a dam, the department may order the removal of the dam following a determination by the department that, due to the continued condition or existence of the dam, the dam is likely to continue to cause significant damage. In issuing a removal order, the department shall take into account social and economic values, the natural resources, and the public trust in those natural resources and shall not issue a removal order when those factors exceed adverse impacts on natural resources or present danger to persons or property. The department shall not issue a removal order involving a dam subject to the regulatory authority of the Michigan public service commission or the federal energy regulatory commission unless that commission has concurred in writing with the order.

(3) Prior to finalizing an order under this section, the department shall provide an owner an opportunity for a hearing pursuant to the administrative procedures act of 1969.

324.31520 Sudden or unprecedented flood; unusual or alarming circumstance or occurrence; emergency drawdowns, repairs, breaching, or other action; notice.

Sec. 31520. (1) The owner or his or her agent shall advise the department and the affected off-site public authorities and safety agencies of any sudden or unprecedented flood or unusual or alarming circumstance or occurrence existing or anticipated that may affect the safety of the dam within 24 hours of the flood, circumstance, or occurrence.

(2) The owner shall notify the department as soon as possible of any necessary emergency drawdowns, repairs, breaching, or other action being taken in response to an emergency condition.

324.31521 Emergency orders.

Sec. 31521. (1) The department may issue emergency orders as provided in this section. The department may, by written notice, order an owner to immediately repair, draw down, breach, or cease operation of a dam where a dam is in imminent danger of failure and is causing or threatening to cause harm to public health, safety, welfare, property, or the natural resources or the public trust in those natural resources. If an owner fails to comply with an order, or is unavailable or unable to be contacted, then the department may undertake immediate repair, drawdown, breaching, or cessation of operation, as may be necessary to alleviate the danger, and may recover from the owner the costs incurred in a civil action commenced in a court of competent jurisdiction. The department may terminate an emergency order upon a determination in writing that all necessary emergency actions have been complied with by the owner and that an emergency no longer exists.

(2) When ordering emergency actions under subsection (1), the department may specify maximum drawdown level and discharge rates and require sediment surveys, water quality sampling, monitoring, or any other action determined necessary by the department to ensure adequate protection of the public health, safety, welfare, property, or natural resources or the public trust in those natural resources. The department may modify the requirements of an emergency order if, during the conduct of ordered actions, it determines that the modification is necessary to protect the public health, safety, welfare, property, or natural resources or the public trust in those natural resources.

(3) Upon the issuance of an emergency order, the department shall provide the owner with an opportunity for a hearing pursuant to the administrative procedures act of 1969 within 15 days of the date of its issuance. At the hearing, the department shall determine, based on information and fact, if the emergency order shall be continued, modified, or suspended as necessary to protect public health, safety, welfare, property, or natural resources or the public trust in those natural resources.

324.31523 Emergency action plans; submissions; review; consistency with other plans; contents of plans.

Sec. 31523. (1) An owner shall prepare, and keep current, emergency action plans for all high and significant hazard potential dams owned by that person.

(2) Emergency action plans shall be submitted to the department.

(3) The applicable county or local emergency management coordinators shall review for consistency emergency action plans with the county or local emergency operations plan prior to submission of those plans to the department.

(4) An emergency action plan shall be consistent with the applicable provisions of the affected county or local emergency operations plans and the Michigan emergency preparedness plan as developed pursuant to the emergency preparedness act, Act No. 390 of the Public Acts of 1976, being sections 30.401 to 30.420 of the Michigan Compiled Laws.

(5) Emergency action plans shall include, but not be limited to, the name, address, and telephone number of the person, and of an alternate person, responsible for operation of the dam; the name and telephone number of local emergency management coordinators; and a listing of occupied facilities, buildings, and residences that may be threatened with flooding due to a failure of the dam.

324.31524 Violation; order; suspension, modification, or revocation of permit; remedies cumulative; civil action.

Sec. 31524. (1) If the department determines that a person is in violation of this part, a rule promulgated under this part, or a condition set forth in a permit issued under this part, the department may issue an order requiring the person to comply with the conditions or to restore the site affected by the violation as nearly as practicable to its original condition. Restoration may include, but is not limited to, removing fill material deposited or replacing soil, sand, or minerals.

(2) An order shall state the nature of the violation and the required remedial action, and shall specify a time for compliance that the department determines is reasonable, taking into account the seriousness of the violation and the nature of any threat to public health, safety, welfare, property, or natural resources, or the public trust in those natural resources, that may be involved.

(3) If the department determines that a person is in violation of this part, a rule promulgated under this part, an order issued by the department, or a permit, the department, after notice and opportunity for hearing pursuant to the administrative procedures act of 1969, may suspend, modify, or revoke a permit. The remedies under this section and section 31525 are cumulative and do not prevent the department from imposing other penalties available under this part, a rule promulgated under this part, or an order of the department.

(4) If the department determines that a person is in violation of this part, a rule promulgated under this part, an order issued by the department pursuant to this part, or a permit issued pursuant to this part, the department may bring a civil action in the circuit court.

324.31525 Commencement of civil action; request; place; civil fine; contempt; willful or reckless violation as misdemeanor; penalty; subsequent violations; fine for failure to obtain permit; restoration of site; schedule of administrative monetary penalties for minor violations.

Sec. 31525. (1) The attorney general may commence a civil action for appropriate relief, including injunctive relief, upon request of the department under section 31524.

© Legislative Council, State of Michigan Courtesy of www.legislature.mi.gov

(2) Any civil action under this section may be brought in the circuit court for the county of Ingham or for the county in which the dam is located.

(3) In addition to any other relief granted under this section, the court may impose a civil fine of not more than $10,000.00 for each day of violation of this part, a rule promulgated under this part, or a permit issued under this part.

(4) A person found guilty of contempt of court for the violation of an order of the court shall be subject to a civil fine not to exceed $10,000.00 for each day of violation.

(5) A person who willfully or recklessly violates this part, a rule promulgated under this part, an order issued by the department, or a condition in a permit issued under this part, which violation places or may place a person in imminent danger of death or serious bodily injury or may cause serious property damage or serious damage to natural resources, or a person who has knowledge of or is responsible for such a violation, is guilty of a misdemeanor, punishable by imprisonment for not more than 1 year or a fine of not less than $2,500.00 or more than $25,000.00 for each day of violation, or both. A person who violates this section a second or subsequent time is guilty of a felony, punishable by imprisonment for not more than 2 years or a fine of not less than $10,000.00 for each day of violation, or both.

(6) A person required to obtain a permit for activity regulated under this part who does not obtain that permit shall be fined not less than twice the fee charged for the appropriate permit application.

(7) In addition to the orders of compliance and penalties provided under this part, the court may order a person who violates this part, a rule promulgated under this part, or a permit issued under this part to restore the site affected by the violation as nearly as practicable to its original condition. Restoration may include, but is not limited to, removing fill material deposited or replacing soil, sand, or minerals.

(8) The department may establish, by rule, a schedule of administrative monetary penalties for minor violations of this part, a rule promulgated under this part, a permit issued pursuant to this part, or an order issued by the department pursuant to this part.

STATE OF MICHIGAN
DEPARTMENT OF ENVIRONMENTAL QUALITY
LANSING

JENNIFER M. GRANHOLM
GOVERNOR

STEVEN E. CHESTER
DIRECTOR

March 14, 2008

Certified Mail

Mr. Brent Wright, Director
Department of Public Works
City of Flint
4500 North Dort Highway
Flint, Michigan 48506

Dear Mr. Wright:

SUBJECT: Lowering of Flint River water level at the Hamilton Dam, City of Flint

We are writing to remind the City of Flint (City) of its obligation to lower the water level behind the Hamilton Dam in 2008, in accordance with an order issued by the Land and Water Management Division (LWMD) of the Michigan Department of Environmental Quality (MDEQ).

On August 20, 2004, under the authority of Part 315, Dam Safety, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, the LWMD issued an order to the City relative to safety concerns at the Hamilton Dam. This order, in part, stated:

"Due to the poor condition of the Hamilton Dam, the City is therefore ordered to take the following actions:

1. Provide a plan and schedule, to be approved by the MDEQ, stating how the City plans to address the deficiencies at the dam.

2. Implement the approved plan and schedule.

3. In the event that the hazard at the dam is not alleviated in the time frame set forth in the schedule approved by the MDEQ, the City shall draw down the water behind the dam to minimize the hazards posed by failure."

In response to this order, Mr. William C. Daniels of the City provided the LWMD with a schedule calling for the replacement for the Hamilton Dam to be constructed October 2006-08. This schedule was accepted by the LWMD. To date, the City has taken no action to initiate replacement of the dam as proposed, and it is now obvious that the dam will not be replaced by 2008. Therefore, based on condition 3 of the order, the City shall draw down the water behind the dam to minimize the hazards posed by failure.

Note that in a letter to the City dated February 24, 2005, the LWMD specified **the amount of the required drawdown to be at least 3.25 feet to an elevation of no greater than 705.25 feet, National Geodetic Vertical Datum (NGVD). In addition, the letter specified that the inflatable dam located downstream of the Hamilton Dam should remain deflated during any required period of drawdown.**

Please be advised that this drawdown will require a permit under Part 301, Inland Lakes and Streams, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. The permit application is available on our web site at:

www.michigan.gov/jointpermit

Please allow a minimum of 90 days or, if a public hearing is necessary, 120 days for the permit to be issued.

Copies of the order, the City's response, and our approval of the City's schedule are enclosed for your reference.

If you would like to discuss this matter further, please contact me.

Sincerely,

Byron Lane, P.E., Chief
Dam Safety Program
Land and Water Management Division
517-241-9862

MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY
PERMIT

ISSUED TO:

Brent Wright
of Flint
) North Dort HWY
, MI 48505

Permit No.	08-25-0028-P
Issued	September 30, 2008
Extended	
Revised	
Expires	September 30, 2013

permit is being issued by the Michigan Department of Environmental Quality (MDEQ) under the sions of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended PA) and specifically:

art 301 Inland Lakes and Streams
☐ **Part 315 Dam Safety**
art 325 Great Lakes Submerged Lands
☐ **Part 323 Shorelands Protection and Management**
art 303 Wetlands Protection
☐ **Part 353 Sand Dune Protection and Management**
art 31 Floodplain/Water Resources Protection

nission is hereby granted, based on permittee assurance of adherence to State requirements and permit ditions to:

nitted Activity:

er the water level upstream of the Hamilton Dam by 3.25 feet (to an elevation of 705.25 NGVD) to reduce potential for the dam to fail.

dge approximately 210 cubic yards of sediment from the intake area at the Water Treatment Plant and lly dispose of the spoils.

nanently deflate the Obermeyer Dam downstream of the Hamilton Dam

er Course Affected: Flint River
perty Location: Genesee County, City of Flint, Section 7
Subdivision, Lot .Town/Range 7N, 7E Property Tax No.

ority granted by this permit is subject to the following limitations:

itiation of any work on the permitted project confirms the permittee's acceptance and agreement to comply with all terms and onditions of this permit.
he permittee in exercising the authority granted by this permit shall not cause unlawful pollution as defined by Part 31, oodplain/Water Resources Protection of the NREPA.
his permit shall be kept at the site of the work and available for inspection at all times during the duration of the project or until its ate of expiration.
ll work shall be completed in accordance with the plans and the specifications submitted with the application and/or plans and ecifications attached hereto.
o attempt shall be made by the permittee to forbid the full and free use by the public of public waters at or adjacent to the structure work approved herein.
is made a requirement of this permit that the permittee give notice to public utilities in accordance with Act 53 of the Public Act of 974 and comply with each of the requirements of that act.
his permit does not convey property rights in either real estate or material, nor does it authorize any injury to private property or vasion of public or private rights, nor does it waive the necessity of seeking federal assent, all local permits or complying with other ate statutes.
his permit does not prejudice or limit the right of a riparian owner or other person to institute proceedings in any circuit court of this ate when necessary to protect his rights.
ermittee shall notify the MDEQ within one week after the completion of the activity authorized by this permit, by completing and rwarding the attached, preaddressed post card to the office addressed thereon.
his permit shall not be assigned or transferred without the written approval of the MDEQ.
ailure to comply with conditions of this permit may subject the permittee to revocation of permit and criminal and/or civil action as ted by the specific State Act, Federal Act and/or Rule under which this permit is granted.
ork to be done under authority of this permit is further subject to the following special instructions and specifications:

1. All work shall be completed in accordance with the attached plans and the terms and conditions of this permit.
2. Prior to initiating construction, authorized by this permit, the permittee is required to provide a copy of the permit to the contractor(s) for his/her review.
3. The property owner, contractor(s), **and any agent involved in exercising this permit** are held responsible to ensure the project is constructed in accordance with all drawings and specifications contained in this permit. The contractor is required to provide a copy of the permit to any and all subcontractors doing work authorized by this permit.
4. **Water levels upstream of the Hamilton Dam may not be permanently raised above 705.25 NGVD without obtaining the prior written approval of the DEQ's Dam Safety Unit.**
5. Permittee may temporarily raise the water level upstream of the Hamilton Dam to an elevation of no more than 708.5 NGVD to allow **testing the water treatment plant** on a schedule pre-approved by the DEQ's Dam Safety Unit and DEQ's Lansing District Office of the Water Bureau. A written copy of this schedule, and any subsequent amendments, shall be promptly provided to the Lansing District Office of the Land and Water Management Division (P.O. Box 30242, Lansing, MI 48909-7742).
6. **In an emergency, permittee may temporarily raise the water level upstream of the Hamilton Dam to an elevation of no more than 708.5 NGVD with the prior approval of the DEQ's Dam Safety Unit.**
7. Lowering the water level upstream of the Hamilton Dam below 705.25 NGVD (temporarily or permanently) will require a revision to this permit, or a new permit under Part 301. A request for setting the water elevation below 705.25 NGVD must be accompanied by an assessment of the potential for sediments to be released and likelihood that the affected sediments are contaminated.
8. **The Obermeyer Dam may not be re-inflated or removed** without first obtaining a modification of this permit, or a separate permit under Part 301.
9. The project is limited to the area of permittee's operation and riparian interest. Care shall be taken to minimize downstream siltation. Raw banks shall be sodded or riprapped to prevent erosion. The permit does not authorize deterioration of downstream water quality or quantity.
10. Unless specifically stated under the "Permitted Activity" of this permit, construction pads, haul roads, temporary structures, or other structural appurtenances to be placed in a wetland or on bottomland of the waterbody are not authorized and shall not be constructed unless authorized by a separate permit or permit revision granted in accordance with the applicable law.
11. No work shall be done in the stream during periods of above-normal flows except as necessary to prevent erosion.
12. Prior to the initiation of any permitted dredging, a siltation barrier shall be constructed immediately downgradient of the **spoil disposal** area. Siltation barriers shall be specifically designed to handle the sediment type, load, water depth, and flow conditions of each construction site throughout the anticipated time of construction and unstable site conditions. The siltation barrier shall be maintained in good working order throughout the duration of the project. Upon project completion, the accumulated materials shall be removed and disposed of at an upland (non-wetland, non-floodplain) site. The siltation barrier shall then be removed in its entirety and the area restored to its original configuration and cover.
13. Prior to commencement of any dredging authorized by this permit, **the entire dredged area shall be enclosed with a filter fabric sediment curtain** to prevent off-site siltation. The sediment curtain shall be installed to extend from the bed of the waterbody to a point above the existing water's surface. The sediment curtain shall be maintained for the duration of the project and shall be left in place after completion of dredging until all disturbed sediments have settled.
14. **The permittee acknowledges that the dredged material has not been classified as to contaminant status. Disposal of the dredged sediments is to uplands. If the dredged sediments are determined to be contaminated at a future date, permittee is considered a potentially responsible party and remains liable for any and all necessary site restoration and clean up under Part 115, Solid Waste Management, and Part 201, Environmental Remediation, of the NREPA.**

15. All dredge/excavated spoils including organic and inorganic soils, vegetation, and other material removed shall be placed on upland (non-wetland, non-floodplain or non-bottomland), prepared for stabilization, and stabilized with sod and/or seed and mulch in such a manner so as to prevent and ensure against erosion of any material into any waterbody, wetland, or floodplain.
16. All slurry resulting from any dewatering operation shall be discharged through a filter bag or pumped to a sump located away from wetlands and surface waters and allowed to filter through natural upland vegetation, gravel filters, or other engineered devices for a sufficient distance and/or period of time necessary to remove sediment or suspended particles.
17. No fill within the 100-year floodplain is authorized by this permit.
18. No fill, excess soil, or other material shall be placed in any wetland or surface water area not specifically authorized by this permit, its plans, and specifications.
19. Use or placement of the spoils shall be done in such a manner to prevent nuisance conditions and control the release of fugitive dust or visible emissions as required by Part 55, Air Pollution Control, of the NREPA, or the rules promulgated under this Act.
20. The spoils shall not be mixed with other waste or materials that are not inert as defined in Part 115, Solid Waste Management, of the NREPA.
21. The provisions of this permit do not preclude the permittee from disposal of the spoils in accordance with Part 115 at a properly licensed Type II solid waste disposal facility or at an out-of-state facility in accordance with the State's solid waste disposal regulations.
22. All raw areas resulting from the permitted construction activity shall be promptly and effectively stabilized with sod and/or seed and mulch (or other technology specified by this permit or project plans) in a sufficient quantity and manner so as to prevent erosion and any potential siltation to surface waters or wetlands.
23. The permittee is cautioned that grade changes resulting in increased runoff onto adjacent property is subject to civil damage litigation.
24. Fill shall not be placed to prevent surface water drainage across the site. Site runoff shall be directed to public or natural drainage ways and not unnaturally discharged onto adjacent properties
25. In issuing this permit, the MDEQ has relied on the information and data, which the permittee has provided in connection with the permit application. If, subsequent to the issuance of this permit, such information and data prove to be false, incomplete or inaccurate, or additional information demonstrates that the spoils are causing environmental contamination or that new State or Federal regulations are promulgated which cause this disposal to be inappropriate, the MDEQ may modify, revoke, or suspend the permit, in whole or in part, in accordance with the new information.
26. The authority to conduct the activity as authorized by this permit is granted solely under the provisions of the governing act as identified above. This permit does not convey, provide, or otherwise imply approval of any other governing act, ordinance, or regulation, nor does it waive the permittee's obligation to acquire any local, county, state or federal approval, or authorizations necessary to conduct the activity.
27. Authority granted by this permit does not waive permit requirements under Part 91, Soil Erosion and Sedimentation Control, of the NREPA, or the need to acquire applicable permits from the County Enforcing Agent (CEA). To locate the Soil Erosion Program Administrator for your county visit www.deq.state.mi.us/sesca/.
28. A storm water discharge permit may be required under the Federal Clean Water Act for construction activities that disturb one or more acres of land and discharge to surface waters. For sites over five (5) acres, the permit coverage may be obtained by a Part 91, Soil Erosion and Sedimentation Control (SESC) permit and filing a "Notice of Coverage" form to the MDEQ's Water Bureau. For sites with disturbance from one acre up to five acres, storm water coverage is automatic once the SESC permit is obtained. These one to five acre sites are not required to apply for coverage, but are required to comply with storm water discharge permit requirements. Information on the storm water discharge permit is available from the Water Bureau's Storm Water Permit Program by calling 517-373-8088 or at www.michigan.gov/deqwater. Select "surface water" and then select "storm water."

29. The permittee shall indemnify and hold harmless the State of Michigan and its departments, agencies, officials, employees, agents and representatives for any and all claims or causes of action arising from acts or omissions of the permittee, or employees, agents, or representatives of the permittee, undertaken in connection with this permit. This permit shall not be construed as an indemnity by the State of Michigan for the benefit of the permittee or any other person.

30. Noncompliance with these terms and conditions, and/or the initiation of other regulated activities not specifically authorized by this permit shall be cause for the modification, suspension, or revocation of this permit, in whole or in part. Further, the MDEQ may initiate criminal and/or civil proceedings as may be deemed necessary to correct project deficiencies, protect natural resource values, and secure compliance with statutes.

31. If any change or deviation from the permitted activity becomes necessary, the permittee shall request, in writing, a revision of the permitted activity and/or mitigation plan from the MDEQ. Such revision requests shall include complete documentation supporting the modification and revised plans detailing the proposed modification. Proposed modifications must be approved, in writing, by the MDEQ prior to being implemented.

32. This permit may be transferred to another person upon written approval of the MDEQ. The permittee must submit a written request to the MDEQ to transfer the permit to the new owner. The new owner must also submit a written request to accept transfer of the permit. The new owner must agree, in writing, to accept all conditions of the permit. A single letter signed by both parties which includes all the above information may be provided to the MDEQ. The MDEQ will review the request and if approved, will provide written notification to the new owner.

33. This permit is being issued for the maximum time allowed under Part 301, Inland Lakes and Streams of the Natural Resources and Environmental Protection Act, PA 451 of 1994, as amended, including all permit extensions allowed under the administrative rules R 281.813. Therefore, no extensions of this permit will be granted. Initiation of the construction work authorized by this permit indicates the permittee's acceptance of this condition. The permit, when signed by the DEQ, will be for a five-year period beginning at the date of issuance.

34. This permit placard shall be kept posted at the work site, in a prominent location at all times for the duration of the project, or until permit expiration.

Dana,

Attached is the memo (w/o figures) I sent a year ago to the City of Flint concerning fish passage at Hamilton Dam to give you an idea of Fisheries Division thoughts. This link also puts into perspective concern over dams in the Saginaw Bay watershed.

http://www.publicsectorconsultants.com/Documents/Saginaw_Bay/FishPassage/FishPassage12_2005.pdf

I will be calling you soon.

Joe Leonardi

Joe,

We are currently in the process of performing a feasibility study for the City of Flint on the Hamilton Dam. Based on a discussion with representatives from the Flint River Corridor Alliance we understand that you have some ideas/concerns regarding fish passage at this site. Could you please contact us to initiate/coordinate your input. If I am not available (and that is quite frequently the case) at the below listed number please feel free to call me on my cell.....734-368-3107.

Thanks,

Dana M Dougherty, P.E.

STATE OF MICHIGAN
JENNIFER M. GRANHOLM
GOVERNOR

DEPARTMENT OF NATURAL RESOURCES
LANSING

REBECCA A. HUMPHRIES
DIRECTOR

February 6, 2007

Mr. Peter Dobrzeniecki
Finance Director
City Hall
1101 S. Saginaw Street
Flint, MI 48502-1416

Peter,

As you are aware, the Michigan Department of Natural Resources (MDNR), Fisheries Division was asked by the Flint River Corridor Alliance to serve on their Hamilton Dam Committee. The Hamilton Dam Committee is working on issues surrounding the replacement of Hamilton Dam.

At the committee's December 6, 2006 meeting, primary concerns with the deteriorating dam were identified as being; 1) the dam's role as backup water supply; 2) known sediment contamination behind the dam; and 3) flooding hazards surrounding the dam. The committee identified secondary concerns that any replacement structure ultimately fit into community needs with emphasis on promoting the Flint River as an attraction. Part of those secondary needs identified by MDNR, Fisheries were for consideration of fish passage and recreational boat navigation. Certainly, though it never functioned properly, the existing fish ladder at Hamilton Dam gives testimony that fish passage was a concern when the dam was last built.

On January 9, 2007, MDNR, Fisheries presented to the Hamilton Dam Committee our experience with dam removals and modifications around the State. It is sufficed to say, the negative impacts dams have on river ecosystem are well documented and considered not just a State problem but also a worldwide problem. New engineering and concept designs are paying greater attention to deal with the negative impacts associated with dams.

One of the new designs used in the Midwest is modeled after the work of Luther Aadland and the Minnesota Department of Natural Resources. Mr. Aadland's design is commonly referred to as "rock arch rapids" or "rock ramps". The design utilizes the existing dam at a fixed height with a series of rock weirs on the downstream side, sloped to accommodate both fish passage with potential for recreational boat navigation (Figure 1-3). A 5% slope is necessary to pass most fish associated with the Flint River. A particular advantage of this design is it uses portions of the existing dam and holds upstream sediment in place.

In Michigan, we have seen the rock ramp design (or modified versions) used on the Potagannissing Dam, Narrow Lake Outlet, and Grayling Dam. Currently, the Village of Chesaning has hired engineers (John Ernst, Wade Trim, phone = 989-732-3584) for a conceptual

www.michigan.gov/dnr • (517) 373-2329

rock ramp design for the Chesaning Dam on the Shiawassee River (Figure 4). Fisheries Division fully supports the Village of Chesaning with this alternate rock ramp design.

Fisheries Division realizes there are many complexities surrounding the replacement of Hamilton Dam and design alternatives will have to rely on engineering studies. Whether a rock ramp is a feasible alternative is unknown but we are optimistic the City of Flint will consider secondary concerns such as fish passage and recreational boat navigation as part of any pre-engineering study. An added benefit of including fish passage and recreational passage is new grant opportunities may become available to assist with funding.

MDNR, Fisheries Division is committed to assist you in any way possible. Feel free to contact me at 810-245-1250. Thank you.

Sincerely,

Joseph M. Leonardi

Subject: Hamilton Dam

Mike,

I just spoke with Joe Leonardi. Their phone and internet is down so Joe left the office. His next window for a call is this Friday from 8-10am. I will not be able to make that but indicated to him that you would give him a call. I also indicated that we would forward a conceptual sketch(es) of the proposed fish bypass via e-mail prior to your phone call. Joe's contact info is in the e-mail that I previously forwarded re: Saginaw River Basin fish passage.

Joe did answer a few questions.

1. 9" x 15' step weirs sound okay to him but he really knows little about fish passage design and will defer to others within the Department. All the more reason to get the concept sketch to him prior to the meeting to give him a chance to go over it with their specialists.
2. The bypass can be placed at either end of the dam or for that matter in the middle. It can be a multi-use facility ie. whitewater.
3. Seasonal upstream passage for walleye (spring) is acceptable. Downstream migration can take place over the dam as well as the downstream inflatable dam. The MDNR will request that the inflatable dam be deflated in the spring spawning season. The City currently does this so that should not be a problem.
4. The fish passage portion of the project would be eligible for an Inland Fisheries Grant. In the past dam removal/fish passage at dams has been given a priority however Joe is uncertain if that will be the case moving forward. He indicated that the City should definitely apply.....applications are due March 31 each year.

I will call to follow up further on this as well as the renderings.

Subject: RE: Hamilton Dam

Hello Joe (Dana),

Following on our discussion this morning, I have provided the following as clarification regarding the proposed project at Hamilton Dam.

My understanding is that a primary objective of the proposed project is to provide upstream fish passage for target warmwater species (i.e., walleye) at Hamilton Dam. A variety of approaches are possible for achieving this goal, some of which we discussed. Technical fishpasses, such as Denil and Alaska steeppass designs, are not ideal for walleye, and better suited to salmonids. My understanding is that we are not considering this type. Similarly, other typical technical fishpasses (e.g., vertical slot, pool-and-weir) were not considered.

A "rock ramp" type fishpass with a slope of 20:1 (H:V) and the upstream end at the dam has apparently been discussed. My opinion is that a 1:20 slope is too steep to provide reasonable ("safe, timely, and effective" in USFWS speak) fish passage performance. In addition, high speed flows require a very robust design. In addition, such a fishpass would need to be at least 300 ft long based on a dam height of 15 ft. Note that this length assumes that the downstream channel invert does not decrease progressing downstream, which would require additional length. Even if this slope was appropriate, a problem is that such a fishpass would have its "fish" entrance hundreds of feet downstream from the dam - this is bad, as many fish would likely move upstream to the base of the dam, effectively missing the fishpass. This is bad.

Our conceptual approach is a bypass channel on one side of the dam, with the fishpass entrance located adjacent to the downstream side of one of the abutments. The channel banks would be designed to blend in with the surrounding environment. Given space limitations, I suggested a slope of 20:1. Hydraulic conditions suitable for upstream fish passage would be attained by having weirs with hydraulic heights of 0.75 ft (9 inch) every 15 feet. The weirs would include notches as the primary upstream fish passage routes along with adjacent, horizontal sections. The horizontal sections would likely be designed to have overtopping flow at the fishpass design flow, so that the concrete weirs are not readily apparent. This approach would essentially result in a modified pool-and-weir fishpass, albeit with a more natural appearance.

I look forward to meeting with you next week.

Best Regards, Michael

Dougherty, Dana

From: Dougherty, Dana
Sent: Tuesday, June 10, 2008 2:26 PM
To: 'Matthew Sherwood'; Brent Wright
Subject: Hamilton Dam - WTP Intake

Matt/Brent,

We have completed our review of the low service pumps at the WTP. Specifically we have attempted to compute the theoretical minimum submergence for the pumps which would in turn dictate the minimum normal impoundment elevation allowed. As you are aware we have performed this exercise to determine if the permanent pool elevation can be lowered as part of the Hamilton Dam reconstruction. The results of our evaluation indicate that the normal impoundment elevation may be lowered up to 2.0 ft without impacting the pumps. We should note that this calculation is theoretical and thus is based on assumed values and coefficients. We believe that it is reasonable to use this figure at this stage of our study, however, should this option be selected for implementation we strongly recommend conducting a pump test at the proposed impoundment elevation in order to confirm this assumption. Intake dredging would need to be performed prior to any testing and we have forwarded a sketch showing the proposed dredging under separate cover. We recommend that you immediately proceed with the dredging as it is a maintenance item that needs to be performed regardless of whether or not the impoundment is lowered and it would be beneficial to have this work completed to provide greater pumping flexibility during the MDEQ mandated drawdown.

Some of our findings include:

1. The original plans show the normal impoundment elevation to be elev 709 (Plant Datum). Our recent survey indicated the impoundment to be at elev 709.2 even though the impoundment was 0.5 - 1.0 ft below normal on the date of our survey. We therefore believe that the historical normal elevation is more in the range of 710 (Plant Datum).

2. Our calculations indicate that the 30 MGD pump is the controlling factor with regard to intake vortices. The minimum submergence for that pump is computed to be 7.14 ft. Using an assumed bottom of intake bellmouth of 700.0 and an estimated 0.75 ft headloss in the intake piping, etc. the resultant minimum normal impoundment elevation is computed to be 707.79 which is approximately 2 ft below the estimated historical normal impoundment elevation (710). Our assumptions on piping elevations and headloss coefficients should be field confirmed as part pf any further study and as previously indicated performance of pump tests would prove even more valuable

3. The vertical datum originally used on Hamilton dam and the WTP are most likely not in sync and thus one has to be careful when comparing elevations between these two points. These datums will need to be confirmed as part of any future work.

Based on this determination we will proceed to investigate the option of a partial (2ft) drawdown in the impoundment elevation as part of our initial study. As indicated we believe that this may be accomplished by use of a fixed crest spillway which would save the City money in both initial capital and ongoing O&M costs.

Please call with any questions or to further discuss the above.

Best Wishes,

Dana M Dougherty, P.E.

Subject: Re: flood or low flow discharge request (ContentID - 168812)

This reply is being sent via email only.

We have estimated the flood frequency discharges requested in your email of April 8, 2008 (Process No. 20080126), as follows:

Flint River at Hamilton Dam, Dam ID 60, Section 7, T07N, R07E, City of Flint, Genesee County, has a drainage area of 748 square miles. The design discharge for this dam is the 0.5% chance (200-year) flood. The 10%, 4%, 2%, 1%, and 0.5% chance peak flows are estimated to be 7200 cubic feet per second (cfs), 9000 cfs, 10300 cfs, 11800 cfs, and 13000 cfs, respectively. (Watershed Basin No. 32B Flint).

Danaher Creek at Danaher Lake Dam, Dam ID 573, Section 18, T17N, R13W, Pleasant Plains Township, Lake County, has a total drainage area of 17 square miles and a contributing drainage area of 8.4 square miles. The design discharge for this dam is the Flood of Record. The 10%, 4%, 2%, 1%, and 0.5% chance peak flows are estimated to be 90 cubic feet per second (cfs), 140 cfs, 180 cfs, 230 cfs, and 290 cfs, respectively. The Flood of Record is estimated to be 400 cfs. (Watershed Basin No. 25 Pere Marquette).

Huron River at Geddes Dam, Dam ID 561, Section 36, T02S, R06E, Ann Arbor Township, Washtenaw County, has a drainage area of 775 square miles. The design discharge for this dam is the 0.5% chance (200-year) flood. The 10%, 4%, 2%, 1%, and 0.5% chance peak flows are estimated to be 5000 cubic feet per second (cfs), 6300 cfs, 7400 cfs, 8500 cfs, and 9700 cfs, respectively. (Watershed Basin No. 15 Huron).

Huron River at Argo Dam, Dam ID 559, Section 20, T02S, R06E, City of Ann Arbor, Washtenaw County, has a drainage area of 741 square miles. The design discharge for this dam is the 0.5% chance (200-year) flood. The 10%, 4%, 2%, 1%, and 0.5% chance peak flows are estimated to be 4800 cubic feet per second (cfs), 5800 cfs, 6500 cfs, 7450 cfs, and 8500 cfs, respectively. (Watershed Basin No. 15 Huron).

Please include a copy of this letter with your inspection report or any subsequent application for permit. These estimates should be confirmed by our office if an application is not submitted within one year. If you have any questions concerning the discharge estimates, please contact Mr. Richard Sorrell, Hydrologic Studies Unit, at 517-335-3176, or by email at: sorrell@michigan.gov. If you have any questions concerning the hydraulics or the requirements for the dam safety inspection report, please contact Mr. Paul Wessel of our Dam Safety Program at 517-335-6748, or by email at: wesselpt@michigan.gov.

Subject: *Flint River - Hamilton Dam*
Attachments: flint_fis_flint_river_hamilton_dam_usgs_letter.pdf; flint_fis_flint_river_hamilton_dam_usgs_response.pdf

Dana:
I looked through our files related to the Flood Insurance Study for the Flint River in the City of Flint. Attached is what I have been able to find. The first attachment is our comment to USGS relating to the Hamilton Dam, the second attachment is USGS's response. In essence, USGS assumed all of the gates were open, but made some adjustments to the computed impoundment elevation to more closely match operation procedure. However, USGS indicated that computing the flood elevation with only two gates functioning was beyond the scope of the FIS and was more of a Dam Safety Inspection issue.

Not sure if this helps or not, but it is all that I could find.

I believe we have the all of the information that FEMA would have in their library, but it may still be worth contacting FEMA to see if they have anything else. Following is a link to FEMA's website which describes how to request information from their "library":

http://www.fema.gov/plan/prevent/fhm/st_order.shtm

If you have any questions, or require additional information, feel free to let me know.

Thanks!

Hamilton Dam, Flint River

Dear Mr. Cummings:

We have discovered inconsistencies in the FIS analysis assumptions made at the Hamilton Dam. Could you please investigate these inconsistencies and help us determine if our concerns are valid? We have found:

1) Datum inconsistencies -- The dam elevations used in the analysis appear to be at Flint City datum rather than at USGS datum. The City datum does not appear to be consistently different from USGS datum, but appears to be 1.5 - 1.7 ft. below USGS datum at the dam.

   The sill elevation used for the FIS is 701.3, which is from the COE report used in the analysis. This elevation was assumed to be at USGS datum. However, from the city plans, it appears that 703.0 USGS is the top of sill elevation. Enclosed is a xerox of a copy of the old dam plans from the city; Dennis Bowles, Flint City Parks and Recreation has access to those plans. Also, enclosed is a copy of survey notes made by a departmental Engineer at Hamilton Dam in December 1980.

2) Operational procedure inconsistencies -- The original analysis assumed that all 6 gates could be opened. An interview with city officials made under the National Dam Inspection Program showed that only 2 gates can be opened. They are opened and held open by electrical winches which have apparently never been moved from their present location.

A rough estimate, made assuming that the dam datum is incorrect and that only 2 gates can be opened, yields a water surface elevation that is about 3 ft. higher upstream of the dam for the 100-year flood. This difference carries upstream the C & O Railroad bridge which is upstream of the Dort Highway. That higher elevation closely matches a reservoir routing which routed flows by HEC 1 from the

C.S. Mott dam to the C & O Railroad.

Additionally, the Halloway dam was repaired in February. Flows were released downstream without warning the operator of Hamilton dam. A discharge of 5000 cfs (at the City of Flint gage - 04148500) was measured. At the dam, which has a drainage area of 203 square miles less than at the gage, this discharge would be less than 5000 cfs; the 500-year discharge at the dam is 14400 cfs. However, a water surface elevation in excess of the 500-year flood stage was experienced.

We request that you consider these comments. A reply in this regard would be appreciated.

If you have any questions, please feel free to call me at 517/373-3930.

Sincerely,

Daniel H. Morgan, P.E., Chief

Mich. Dept. of Natural Resources
P.O. Box 30028
Lansing, MI 48909

Dear Mr. Morgan:

In response to your April 8, 1981 letter concerning the city of Flint, FIS, we have the following comments:

(1) Hydraulic data for the Hamilton Dam were obtained from a COE report. City of Flint plans, assumed to be based on city of Flint datum, agreed, after adjustment, with COE data. The datum label on city of Flint plans seems most questionable at this time.

The 1980 survey notes you provided do not show a sill elevation for Hamilton Dam. However, the elevation of the top of the taintor gates shown from the survey notes varies, but averages 708.04 ft (NGVD 1979?) which verifies the assumptions made by our office, see the enclosed sketch.

The 100-year flood elevation above Hamilton Dam published in the FIS is 0.95 ft higher than the hydraulic computation indicated. This 0.95 ft adjustment was made because normal pool elevation is higher than the computed 100-year level. The justification for this 0.95 ft adjustment is enclosed.

In response to your request, I computed the discharge for the 100-year flood elevation published in the FIS report, assuming a 1.6 ft higher sill elevation. The results, which are enclosed, show that the hydraulic head is sufficient to pass the 100-year discharge.

(2) We realize that the operation of this small dam is not strictly regulated and that opening any or all 6 gates may present a problem. However, hydraulic analysis of the structural or operational failure of dams was beyond the scope of this report. Such information might reasonably be incorporated under the National Dam Inspection Program.

Should you have additional questions concerning this report, please contact this office.

Sincerely yours,

David J. Holtschlag

using h_1 published in report and 6 gates open results in sufficient head to pass Q. (with +1.6 foot datum change)

Because of regulation starting elevations above Hamilton Dam cannot be determined by conventional Dam computations. If all gates were open the 10- and 50-year flood elevations above the dam would be as much as 2.5 feet less than "Normal Pool" elevations. The 100-year flood (all gates open) results in a pool elevation of 708.35 only about 1/4 foot above Normal Pool.

In Normal operation patterns, according to Dick Collings, Flint Water Treatment Plant, the pool is not allowed to increase in elev. by more than 1 ft above Normal Pool. Resultant max. elev. would be about 709 feet.

In a somewhat arbitrary relationship I have used 708.5 for the 10-yr flood & the computed 500-y- flood as flood elevations and connected the 2 points by a smooth curve. This results in the 100-y- flood elev. at 709.3. The COE 100-y- flood was, according to Ed Watkins Flint DPW, 709.19 Ft.

All gates cannot be open at one time. Only 2 of the 6 can be open due to only 2 members working on the gates at the open position.

Jon W. Hunt 2-23-81
Mich DNR
Dam Safety & Flood
Dam Unit. Water
ENR plight Dept
373-2208

According to Edgar Wilkins, DPW, Flint, the normal pool above Hamilton Dam is 708 ft. U.S.G.S. Our levels of May 17-18/77 gave 708.1 Ft.

Dick Collings of the Water Treatment Plant indicated that normal pool was 709 ft. He wasn't sure of the datum. There are 2 city datums, One is about 1 ft different than U.S.G.S. and the other 1.6 ft different

Mr Collings said that they try not to let the pool elev. increase by more than a foot, depending on downstream flooding.

Stantec

Flint-Hamilton Dam 10/20/08
Determine Headwater Stage Curve

OBJECTIVE/METHODOLOGY

Determine headwater elevation versus flow curve for various flows up to a 500 yr flood. First compute for original conditions assuming that all (6) gates are operable. Compare results to USGS computations used in the FEMA Flood Insurance Study (1981 FIS.) Then compute results assuming two gates are operative and compare results to the US Army Corp of Engineers 1981 National Dam Safety Report. Then compute for existing conditions i.e. 3 gates open with steel sheeting in front of 3 gates and compare to Access 1997 results. Lastly perform computations for proposed conditions assuming a fixed crest overflow spillway along the entire width of the river i.e. existing 6 bays - determine proposed spillway crest elevation assuming no increase in headwater elevation - FIS, USACE, Access All computations to be performed using US Dept. of Interior, Bureau of Reclamation, "Design of Small Dams - Third Edition, 1987, pg 365-376

KNOWN:

Flood Discharges per MDEQ

10yr =	7200 cfs
25yr =	9000 cfs
50yr =	10,300 cfs
100yr =	11,800 cfs
200yr =	13,000 cfs

Designed by: Dana M Dougherty Checked by:

Stantec

Flint Hamilton Dam
Headwater Curve

Per Michigan P.A. 451, Part 315 guidelines which govern the spillway design capacity must be equal to or greater than the 200 yr flood - 13,000 cfs. Furthermore a minimum of 1 foot of freeboard is required at the rated flow.

For the purpose of this calculation all elevations will be referenced to NGVD datum. Past documents have used a variety of datums. The original drawings (Fargo) used datum assumed to be City of Flint which is 1.7' higher than NGVD datum. The 1991 dam repair plans (MI&NM) used datum that was 0.5' higher than NGVD. Both the USACE 1981 National Dam Safety Report and the 1981 FEMA - FIS are based on NGVD datum

Existing dam data:

Elevation ogee crest	701.3
Elevation top tainter gates (closed)	707.8
Elevation top temporary sheet pile	707.8
Elevation upstream bed tapers from 696 -	701.3
Elevation downstream apron	695.3
Elevation tailwater 200yr - (FIS)	±709.0
Elevation top of bridge deck	718.8
Elevation bottom of bridge deck	719.3
Elevation top archimedean screw intake	711.3
Elevation low point right embankment	711.6
Elevation left upstream retaining wall	±715
Spillway gates - 6 @ 33 wide x 16.5' high	
Elevation bottom of gates fully open	±711.5

Designed by: dmd Checked by:

Stantec

Flint-Hamilton Dam
Headwater Curve

Rounded piers - 4' wide
Left entrance bank is vertical i.e. suppressed
right entrance contains a bay which has
a fish ladder & anchorages screw therefore
upstream total width is approx 250 ft

COMPUTE:

1. Headwater curve for existing conditions assuming all six gates are operative

Assume weir flow through gate openings up to bottom of gates fully open ± 11.5 after which assume orifice flow.

For weir flow use equation (3) #9.11 $Q = CLH_e^{3/2}$

For orifice flow use equation (7) #9.16 $Q = CDL\sqrt{2gH}$

Determine effective weir length (4) #9.11

$L = L' - 2(NK_p + K_a)H_e$

	h_a =	width	area	$v = Q/A$ (13 units)	$\frac{v^2}{2g}$ or h_a
elev 708	6.7	250'	1675 sf	7.76	0.93
709	7.7	250'	1925	6.75	0.71
710	8.7	250'	2175	5.97	0.55
711	9.7	250'	2425	5.36	0.45
712	10.7	250'	2675	4.86	0.37
713	11.7	250'	2925	4.44	0.31
714	12.7	250'	3175	4.09	0.26

Designed by: dmd Checked by:

Stantec

Flint - Hamilton Dam
Headwater Curve

Per the FEMA FIS. the approximate 200y - HW elevation is 710.'

$H_e = h_o + h_a$ where h_a = 0.55 'e. ekv 710
h_o = 710 - 701.3 = 8.7'
H_e = 8.7 + 0.55 = 9.25'
K_p for round nose piers is 0.01 (pg 368)
K_a = 0.10 rounded abutment (pg 369)
N = 5 = number of piers
L' = 6 x 33 = 198' net length of crest

L = 198 - 2(5 x 0.01 + 0.10) 9.25'
= 195.23' say 195'

Per # 9.12 pg 369 the weir coefficient for sharp crested weirs with height H_o > 2 h_o is 3.3
Also note that Figure 9.23 pg 370 only applies when the edge is formed to the ideal Ogee shape which in this case is highly doubtful
Using an elevation of the upstream streambed of 696.0 P = 701.3 - 696.0 = 5.3
P/H_e = 5.3/9.25 = 0.57 < 0.2 ∴ C_o = 3.3

Effect of heads different than the Design Head
Assume calculations are at the Design Head at least for the Design Flow (73,000 cfs) ∴ this factor will not be taken into consideration

Effect of a sloped upstream face which we have due to the upstream hill's negligible for 1:3 hill slope ref Figure 9-25 pg 371

Designed by: dmd Checked by:

Stantec

Flint - Hamilton Dam
Headwater Curve

i

Effect of downstream apron interference and downstream submergence. From Figure 9-26a (pg 372)
$h_d + d / H_e$ = where h_d = ± 710.55 - 709 = 1.55
d = 709 - 695.3 = 13.7
1 + 13.7 / 9.25 = 1.59 say 1.6
h_d / H_e = 1.55 / 9.25 = 0.17
From Figure 9-26 the flow condition = 1.5 "Drowned jump with diving jet" and the corresponding reduction in C_o is .73
From Figure 9-28 the reduction in C_o for tailwater submergence based on h_d / H_e 1.55 / 9.25 = 0.17 is C_s = 0.80
Based on comparison of Figures 9-26 & 9-28 it appears that the submergence (Figure 9-28) would control i.e. it results in a greater reduction
Therefore use C_s = .80(3.3) = 2.64 as a starting point

Now compute H_e @ the design flow 13,000 cfs

$Q = C_s L H_e^{3/2}$ where C_s = 2.64
L = 195'
$H_e = (Q / C_s L)^{2/3}$
$= [13{,}000 / 2.64 (195)]^{2/3}$ = 8.61 ft say 8.6'

H_e = 701.3 + 8.6' = 709.9
This compares to 701.3 + 9.25 = 710.55 assumed from the FEIS study
9/28/01
Per correspondence from the USGS, it was indicated that the published 100 yr flood elev. is 0.95 ft greater than that calculated

Designed by: Checked by:

Stantec

Flint - Hamilton Dam
Headwater Curve

Therefore the actual USGS computed elevation is 710.55 - 0.95 = 709.6 which compares quite closely to our computed 200 yr HW elevation of 709.9 - 0.5 = 709.4

2. Headwater assuming two gates operational - as assumed by the USACE - 1981 National Dam Safety Report

2 gates open -

HW	h_o	h_a	H_E	h_d @ 13,000 cfs	h_d/H_E	C_s
709	7.7	0.5	8.2	0.5	.07	.55

714	12.7	0.5	13.2	5.5	.42	.97

	$Q_{weir\ only}$ $(C_s L H_E^{3/2})$	* $Q_{weir/orifice}$ (gate bottom = 711.5)
709	2813	
710	4741	
711	6456	
712	7592	6872
713	8817	7792
714	10132	8615

* Use Eq 9.31 pg 379 for orifice calculation
$Q = C D L 2\sqrt{2gH}$ $C = 0.62$ h_o $\phi = 90°$
$L = 66'$ (2 gates) $H = h_d$

Designed by: dmd Checked by:

Stantec

Flint-Hamilton Dam
Headwater Curve

4 gates closed - top of gates 702.8

H_w	h_o	h_a	H_e	h_d @13,000cfs	h_d/H_e	C_s	Q
709	1.2	0.5	1.7	0.5	.29	.93	966
710	2.2		2.7	1.5	.56	.98	1933
711	3.2		3.7	2.5	.68	1.00	3100
712	4.2		4.7	3.5	.75	1.00	4938
713	5.2		5.7	4.5	.79	1.00	5928
714	6.2		6.7	5.5	.82	1.00	7554

Q total	Weir only	Weir/orifice
709	3774	
710	6674	
711	9556	
712	12038	11,310
713	14795	13,720
714	17686	16,169

Using weir/orifice combination the 200yr (13,000cfs) HWelev is estimated to be ±712.8
This is approximately 1.2' greater than the USACE generated headwater curve. The cause of this disparity is unknown but tailwater influence may be the cause as the USACE tailwater curve appears to be less than that produced by the F.I.S. Overtopping of the right embankment which begins at elev ±709.5 has not been taken into consideration in our calculations

Designed by: [illegible] Checked by:

Stantec

Flint-Hamilton Dam
Headwater Curve

3. Headwater assuming 3 gates operational - as assumed by Acres (1993)

Assume discharges are a direct ratio of the 2 gates open / 4 gates closed scenario i.e.
3 gates open = 3/2 = 1.5 (2 gates open)
3 gates closed = 3/4 = 0.75 (4 gates closed)

	3 gates open		3 gates closed	Total	
	weir	orifice		weir	orifice
709	9219		724	9943	
710	7311		1450	8561	
711	9684		2325	12009	
712	11388	10308	3329	14717	13637
713	13225	11686	4446	17671	16134
714	15198	12923	5666	20864	18589

Using the weir/orifice assumption - the 200 yr (13,000 cfs) HW is estimated to be 711.8 which is approximately 1.0 ft below the Acres rating curve. The Acres curve is steeper than ours which could be the result of varied assumptions regarding TW influence, discharge coefficients and maximum gate openings. It should also be noted that Acres indicates that overtopping begins @ elev 714.5 due to Flint Park & Rec improvements made in the mid 1980's. This appears to be in conflict with current survey which confirms the 1981 overtopping elevation of ±711.5.

How absent setting the proposed crest @ 704.8

H_w	Q
711	11658
712	14511

→ 200 yr. HW = ± 711.6

Designed by: dmd Checked by:

Stantec

Flint Hamilton Dam
Headwater Curve

5. Summary/Conclusions

A summary of historical computed HW elev for the 200 yr (13,000 cfs) design flow as well a computed elevations is as follows

Source		200 yr HW elevation
1981 FIS	(6 gates open)	± 709.05*
1981 USACE	(2 gates open)	± 711.6
1993 Acres	(3 gates open)	± 712.8
2008 Stantec	6 gates open	± 709.4
	2 gates open	± 712.8
	3 gates open	± 711.8
	new spillway (705.8)	± 712.6
	new spillway (704.8)	± 711.6

*±710.0 is shown in the FIS mapping. 0.95 ft was added per USGS 4/24/81 correspondence

Conclusions:

1. Any option for replacement that does not include full gate replacement will result in an increased HW as compared to the FIS data. Thus a FEMA - LOMR will be required
2. A detailed survey of impacted areas for the increased HW is needed to evaluate risks related to the increased HW
3. Further empirical pump testing is needed at the WTP to confirm the maximum permissible drawdown.

Designed by: Checked by:

Stantec

Flint - Hamilton Dam
Headwater Curve

4. Overtopping occurs on the right embankment at HW elevations greater than ±711.5. Further protection is needed along the upstream right riverbank (i.e. earthen berm or wall)

Grant Sources

Potential Grant Sources for Stream Habitat Restoration in Michigan

Federal Watershed Protection and Flood Prevention Act

To rehabilitate or decommission dams and other water resource projects constructed under previous federal agricultural development and flood control programs. Federal funds provide up to 65% of total cost. Contact your local office of the USDA, Natural Resources Conservation Service for more information.

FishAmerica Foundation

FishAmerica's mission is to provide funding, without preference to species or geographic location, for hands on-projects at the local level. These projects enhance fish populations, water quality, and/or applied fisheries research in North America—thereby increasing the opportunity for sportfishing success.

- http://www.fishamerica.org./content/conservation/fishamerica/faf_grant.cfm

Great Lakes Commission, Great Lakes Basin Program for Soil Erosion and Sediment Control

The Great Lakes Basin Program improves water quality through soil erosion and sedimentation control demonstration projects, technical assistance, and education programs.

- http://www.glc.org/basin/

Great Lakes Fishery Trust

The mission of the Great Lakes Fishery Trust is to provide funding to enhance, protect and rehabilitate Great Lakes fishery resources. The GLFT will manage its resources to compensate for lost use and enjoyment of the Lake Michigan fishery resulting from the operation of the Ludington Pumped Storage Plant.

- http://www.glft.org/

Great Lakes Protection Fund

The Fund welcomes pre-proposals for projects that identify a specific improvement to the health of the Great Lakes ecosystem and have a pragmatic plan to produce those improvements. The Fund supports

projects that produce results for the entire basin ecosystem, are carried out by collaborative teams, and tackle issues that have not generally been addressed at basin scale.

- http://www.glpf.org/

Michigan Department of Natural Resources, Inland Fisheries Grants

Projects that are beneficial to the people of Michigan, inland fisheries resources, and meet one or more of the program objectives are eligible for funding. Applicants must demonstrate they can contribute at least 50% of the project's cost as a match to the State grant.

- http://www.michigan.gov/dnr/0,1607,7-153-10366_14349-40253--,00.html

Michigan Habitat Improvement Fund

To provide funds for projects on the Manistee, Muskegon and AuSable rivers to improve and enhance fisheries and aquatic resources affected by the operation of Consumers Energy Company's hydropower projects. These projects include fisheries habitat restoration and enhancement, preparing comprehensive river management plans, aquatic studies, fisheries recreation, water quality improvement and soil erosion control activities on these three rivers.

- http://www.michigan.gov/dnr/0,1607,7-153-10366_14349-40305--,00.html

National Fish and Wildlife Foundation

The National Fish and Wildlife Foundation funds projects to conserve and restore fish, wildlife, and native plants through matching grant programs. The Foundation awards matching grants to projects that address priority actions promoting fish and wildlife conservation and the habitats on which they depend, work proactively to involve other conservation and community interests, leverage Foundation-provided funding, and evaluate project outcomes. Federal, state, and local governments, educational institutions, and nonprofit organizations are welcomed to apply for a general matching grant throughout the year.

- http://www.nfwf.org/

Natural Resource Trust Fund

The objective is to provide grants to local units of government and to the State for acquisition and development of lands and facilities for outdoor recreation or the protection of Michigan's significant natural resources. Applications are evaluated on established criteria such as resource protection, water access, and project need. At least 25% match on either acquisition or development projects is required from local government applicants.

- http://www.saginawbaywin.org/

Trout Unlimited- Save a Stream Program

TU offers several national fishery conservation programs to mobilize volunteers to clean up and restore streams and rivers, teach the next generation of conservationists, and unite our chapters, councils and national staff in conservation work. Those programs include:

- Home Rivers (watershed restoration)
- Embrace-A-Stream (fishery resource, research and education)
- Shared Streams (streams on private forest lands)
- Bring Back the Natives (native species on federal lands)
- TU/Forest Service Partnership (fish recovery on National Forests)
- Youth Education (environmental and fishing education)
- http://www.tu.org/conservation/save-a-stream.asp

U.S. Army Corps of Engineers- Continuing Authorities Program

The U.S. Army Corps of Engineers has the authority, provided by Section 1135 of the Water Resources Development Act of 1986, as amended, to modify the structures and operations of Corps projects to improve the quality of the environment and restore ecosystem functions impaired by projects built by the Corps or jointly by the Corps and other Federal agencies, or at any site that has been affected by a Corps project. The primary goal of these projects is ecosystem restoration with an emphasis on projects benefiting fish and wildlife. There is a 25% non-federal cost share.

- http://www.saw.usace.army.mil/Floodplain/Section%201135.htm

U. S. Fish and Wildlife- Fish Passage Program Funds

The U.S. Fish and Wildlife Service's National Fish Passage Program is a voluntary, non-regulatory program that provides funding and technical assistance toward removing or bypassing barriers to fish movement.

- http://fisheries.fws.gov/FWSMA/FishPassage/fpprgs/GetInvolved.htm

1.0 Purpose and Authority

The purpose of this report is to summarize the findings for the field inspection of the Hamilton Dam on the Flint River, completed by Wade Trim, Inc. on April 29, 2015, pursuant to the requirements of Part 315, Dam Safety, of the Natural Resources and Environmental Protection Act, 1994 P.A. 451, Section 31518.

Completion of the inspection and this report were authorized by the City of Flint (dam owner) in purchase order 15-020 on February 2, 2015. The Hamilton Dam is registered with the Michigan Department of Environmental Quality (MDEQ) as Dam Number 0060.

2.0 Conclusions and Recommendations

This report is limited to a discussion of observations based on a visual investigation and review of any previous reports, plans, and data that are available. This report should not be considered an in-depth engineering investigation.

For purposes of this Report, "north=left" and "south=right" references are based on looking upstream.

The Hamilton Dam was inspected on April 29, 2015 in accordance with Michigan P.A. 451, Part 315 criteria. The weather on the date of inspection was clear, dry, and sunny with a temperature of 55°F. Per the inspection, the dam superstructure and substructure were found to be in very poor condition. The dam base and the sheet pile behind gates #1, #2 and #6 were found to be in fair condition. A summary of findings/recommendations are as follows:

1. The stability of the superstructure is questionable. All elements of the superstructure, including the deck, support beams and trolley rails are in poor condition. The overall condition of the trolley support beams which lift the gates is unknown because most parts are inaccessible underneath the operable parts of the dam. The superstructure components are no longer capable of serving their intended purpose and it is likely that local failures of some of these items will occur in the near future.

2. The substructure components (piers and abutments) are in poor condition. The abutments and piers have signs of significant concrete spalling, delaminations, cracking and efflorescence. These components appear to be able to currently support the loads placed on them. These elements require concrete patching and crack sealing.

3. Three of the six floodgates have been decommissioned. The reliability of the remaining gates is unknown. Two of the gates are currently operable (#3 and #4) with the operability of gate #5 being questionable (this gate has not been operated in over 5 years). With three gates operating, inadequate freeboard exists at the north embankment. In addition upstream flood elevations will be greater than those included in the FEMA Flood Insurance Maps.

4. The MDEQ mandated drawdown should be adhered to until the dam is repaired or reconstructed.

5. Based on the poor condition of the gates, the City should consider performing an in-depth inspection on the three operable gates to assess strength of the beams supporting the trolleys and determine steel thickness and section loss on the tainter gates. This inspection may reveal the need to strengthen or replace the trolley beams or gates.

6. The City should exercise the Emergency Action Plan (EAP) annually to insure an efficient implementation when and if needed.

3.0 Project Information

The Hamilton Dam is located on the Flint River in downtown Flint, Michigan near the University of Michigan-Flint campus, and approximately 800 feet upstream from the Saginaw Street Bridge.

There are plans of the current dam on file with the City of Flint. Original design data, however, is not available. The dam was designed by Fargo Engineering Company of Jackson, Michigan, and was constructed about 1920 by Price Brothers Company of Lansing, Michigan. A mill dam had previously existed on this site. The dam was constructed to sustain a head for the upstream water treatment plant intake.

3.1 Pertinent Data

The new dam was built on piles driven into the soft sand below the structure. Boring logs from the original plans show sand with an occasional pocket of clay or gravel overlying soft sandstone which is 40 to 50 feet below the ground surface.

The structure is a reinforced concrete gravity dam that has six gated spillway bays with tainter gates. A concrete spillway is located below each tainter gate which opens out onto an 18 foot long concrete scour pad. The total length of the dam is 218 feet with each spillway being 33 feet long and each pier being four feet thick. The original 1920 dam had seven bays, however, in 1964, the southernmost gate, spillway and headrace was removed.

In 1978, further modifications were made by constructing a fish ladder through the north abutment sidewalls as well as an Archimedean screw pump.

In 1992, several repairs were completed to the dam. Due to the heavy deterioration of the gates in Bays #1, #2 and #6, sheet piling was installed upstream of these structures. The top of the sheet pile was set at the same elevation as the top of the tainter gates when closed (Elev. 707.8 feet). The remaining gates were also repaired which included replacement of the old gates with new ones, repair of buttress and sill concrete, repair of gate trunnions, replacement of lift chains, and painting of all exposed gate steel.

Finally, in 2010, the lift chains on both trolleys were replaced because they had broken. A diver was needed to hook the chains to the existing gates.

The top deck of the structure contains a pedestrian walkway that is closed and hoist rails to lift the two gates. There are two hoists (trolleys) which can be moved back and forth to open up different gates. The hoist rails consist of an 18-inch and 15-inch steel I beam which are supported by the piers. The concrete deck itself is supported by a rectangular concrete beam on the upstream side and an encased steel beam with false arches on the downstream side.

A U.S. Army corps of Engineer's bronze disk is set flush with the bridge deck in the walkway at the second pier from the north end. Unless otherwise noted, data given in this report is based on the

assumption that the E1 715.06 ft. elevation given for this benchmark is on National Geodetic Vertical Datum (NGVD).

The dam is located in an urban setting with the University of Michigan Flint campus located on both sides of the river, adjacent to the dam. Additionally, gently rolling grassed areas are at the approaches to the structure. A pedestrian bridge is located to the east and several road bridges are located to the west of the dam.

The Hamilton Dam was classified by the U.S. Army Corp of Engineers as **High Hazard** in the 1980 Phase I Inspection Report. This classification remains in effect to date.

Plans for the original Dam construction in 1920 and plans for repairs performed in 1992 are on file with the City of Flint. Past inspection reports on file include the following:

1980 USACE, Phase I, National Dam Safety Program Report

- *1986 Ayres, Lewis, Norris & May, Inc. (ALNM) and Sublakes Diving Inspection Report*
- *1988 MDNR Inspection Report*
- *1989 Ayres, Lewis, Norris & May, Inc. (ALMN) Structural Evaluation and Reconstruction of Hamilton Dam Report*
- *1993 Acres International Corp., Dam Inspection Report*
- *1996 Ayres, Lewis, Norris & May, Inc. (ALMN) Inspection Report*
- *1999 Paul C. Rizzo Associates, Inc. Dam Inspection Report*
- *2000 USACE Hamilton Dam Condition Survey*
- *2005 Soil & Materials Engineers, Inc. Dam Inspection Report*
- *2008 Stantec Feasibility Study for Reconstruction*
- *2008 Stantec Inspection Report*
- *2010 Wade Trim/Somat Preliminary Engineering Report*
- *2011 Wade Trim Inspection Report*

These previous reports have been consistent in both their analysis of the dam and their recommendations to address the deficiencies.

On March 14, 2008, acting under the authority of Part 315, Dam Safety of the Natural Resources and Environmental Protection Act, 1994 P.A. 451 as amended, the Michigan Department of Environmental Quality issued an order to the City of Flint to drawdown the Hamilton impoundment 3.25 ft. to an elevation not greater than 705.25 NGVD for the purpose of public health, welfare and safety protection. The depth of necessary drawdown was computed by the MDEQ to eliminate the danger of loss of life downstream in the event of a sudden dam failure. A permit under Part 301, Inland Lakes and Streams was issued for this activity on September 30, 2008. The City of Flint has subsequently abided by the conditions of this permit and has lowered the normal impoundment elevation to the prescribed elevation. The MDEQ permit also required permanent deflation of the Obermeyer (Inflatable) Dam located downstream of the Hamilton Dam near Grand Traverse Street bridge.

4.0 Field Inspection

A visual inspection of the dam was performed by Leon Solowjow, Jr., PE (Wade Trim, Inc.) on April 29, 2015. The weather on the date of inspection was clear, dry, and sunny with a temperature of 55°F. Photographs of the inspection can be found in **Appendix C**. The following items were noted during the inspections.

4.1 Control Structures & Spillway

- Floodgates #1, #2 and #6 have been decommissioned due to significant corrosion or outright failure of the gate arms (framing).
- The operational tainter gates show signs of surface corrosion with possible minor section loss in spots. Gate #4 was up during the first inspection and gate #3 was fully open during the second inspection. Gate #5 has not been operated in approximately two years according to the City.
- The access walkway above the dam is in extremely poor condition. There are large holes all the way through the concrete with exposed corroded reinforcement, delaminations, spalling and weed growth. The walkway surface is uneven with loose and chipped concrete pieces covering most of the surface. Steel plates have been placed over the larger holes, but there are still several holes visible through the deck.
- The two hoists which lift the gates are operational, but they are showing their age. They have general spots of corrosion and peeling paint throughout. The support chains used to lift the tainter gates are in fair shape with surface corrosion throughout.
- The steel beams which support the trolleys show signs of corrosion and possible section loss. Unfortunately, many sections of these beams are inaccessible, so a thorough inspection of them was not possible.
- The superstructure concrete is in fair to poor condition. The concrete deck has numerous holes through it as well as large spalled areas with corroded and broken reinforcement underneath. The deck is supported by concrete arches on the downstream side and rectangular beams on the upstream side that span between piers. The beam on the upstream side of bay #2 has almost completely failed as all of its moment reinforcement is broken and hanging down into the river. The beams in bay's #1, #4 and #6 on the upstream side have large horizontal cracks and spalling. The arches on the downstream side in bays #1, #2, #5 and #6 have large cracks, heavy spalling and/or exposed and heavily corroded steel.
- The substructure concrete has numerous areas of spalling, efflorescence and delaminations. Areas near the gate pins appear to be sound for the most part with some minor cracking and efflorescence noted.
- The concrete base/foundation areas inspected downstream of the dam show general abrasion damage from years of use, but appear to be intact and overall dam stability due to sliding or overturning does not appear to be a concern.
- The sheet piling placed behind gates 1, 2 and 6 appears to be stable. There is minor miscellaneous debris caught up on it in spots and minor surface corrosion.

4.2 Embankments

- Retaining walls along the river close to the dam appear to be currently stable. There are miscellaneous cracks and some efflorescence on the concrete.

5.0 Structural Stability

The structural stability of the Hamilton Dam is based on visual observations made during field inspections August 9, 2011 and November 3, 2011. The downstream side of the dam was observed by boat. The top, sides and back of the dam were observed from each side of the river and by walking the top portion of the dam.

The structural condition of this dam is very poor. The following is a list of deficient items observed.

- The top walkway surface is very uneven and has numerous spalls as well as holes and unsafe areas. There are several areas where temporary covers have been placed over large holes.
- Three tainter gates have previously failed due to serious corrosion problems or failure of their support framing.
- The remaining tainter gates which are operational exhibit corrosion and minor section loss. The last known date when these gates were maintained was possibly in 1996. A close up inspection of the tainter gates is impossible due to inspector safety.
- The movable hoists which operate the tainter gates are currently operational and appear to be in fair condition.
- The steel beams which support the hoists show signs of corrosion and possible section loss. Unfortunately, due to safety concerns, most areas of these beams can't be viewed up close, so an in-depth inspection of these beams is recommended so that their capacity can be determined.
- The concrete substructure components have areas of cracking, efflorescence and spalling.

The stability of these items is currently questionable. This dam should be considered structurally deficient and future failure of portions of this dam could occur. This dam is an on-going liability with regard to public health, welfare and safety. If this dam is not to be removed/replaced in the near future, the following recommendations are warranted.

- An in-depth inspection of the operational portions of the dam including the tainter gates and the hoist support beams in dry conditions. This might include installing scaffolding and protective netting in each of the three operational bays so that the underside of hoist support beams and the gates can be closely inspected.
- A structural analysis of the support beams for the hoists may be warranted if section loss is noted on these beams.
- Furthermore, it is recommended that maintenance personnel not use the walkway over the dam or take appropriate safety precautions when doing so as possible partial failures of this area are likely.

6.0 Hydrology and Hydraulics

The Hamilton dam is regulated under State of Michigan P.A. 451 Part 315 statute. Guidelines that accompany this statute require high hazard potential dams with heights less than 40 feet to be capable of passing a 200-year flood or the flood of record whichever is greater. For this structure, the 200-year flood controls and has been previously computed by the Michigan Department of Environmental Quality to be 13,000 cfs (reference **Appendix B**). Flood discharge data was requested this year and the resulting data is the same as the previous reports.

The maximum impoundment elevation for this 200-year flood varies depending on the calculation models and number of floodgates that are open. The United States Geologic Survey completed calculations for this dam in 1981 that form the basis for the FEMA flood Insurance mapping. These calculations assumed that all six floodgates were operational. In the 1981 USACE Dam Safety Inspection Report, the maximum impoundment elevation was computed based on two gates being opened simultaneously (based on the fact the gates cannot be locked in the open position and require a hoist to keep them open). Finally, in 1993, after the decommissioning of Gates 1, 2 and 6, Acres International Corporation computed the maximum headwater elevation assuming that three gates were open simultaneously.

The results of these reports are as follows (refer to **Appendix B** for more information):

Source	Estimated 200-year Impoundment Elevation NGVD Datum
1981 F.I.S. (U.S.G.S.)	709.05*
1981 Dam Safety Inspection Report (USACE)	711.6
1993 Dam Safety Inspection Report (ACRES)	712.8

** USGS added 0.95' to the computed impoundment elevation for the purpose of floodplain mapping. Therefore the floodplain mapping indicates a 200-year flood elevation of approximately 710.0 NGVD.*

With only two gates operational, the previously calculated discharge through the dam is approximately 10,000 cfs which is much lower than both the State and Federal spillway capacity standards.

Previous reports have mentioned uncertainties as to whether or not adequate freeboard exists on the north stream bank. The 1993 Acres report indicated that the north stream bank was raised in the mid 1980's. The survey conducted as part of the 2008 Reconstruction Feasibility Study, however, indicates the elevation of this area to be similar to that shown in the 1981 USACE report (i.e. ±711.5 NGVD). Based on current information, it appears that there is inadequate freeboard at this site.

7.0 Operation and Maintenance

The Hamilton Dam is maintained and operated by the City of Flint Water Treatment Plant. Currently, there are only three of the six total tainter gates that are operational. Gates #1, # 2 and #6 have been permanently disabled due to their severe deterioration or total failure. Sheet pile behind these gates prevents water from flowing through. Gate #5 is supposed to be operational, but has not been exercised in over five years.

The City staff currently maintains the elevation of the backwater by regularly monitoring river flows and operating the three gates as required. The MDEQ has mandated the level behind this dam at NGVD which is 3.25' below the historical normal level.

Major maintenance improvements other than on-going minor tasks completed by City personnel have been delayed based on funding constraints as well as the on-going potential for complete removal and replacement of the dam.

From: deq-wrd-qreq
To: Solowjow, Leon
Subject: RE: flood or low flow discharge request (ContentID - 168812)
Date: Monday, May 11, 2015 5:43:15 PM

This reply is being sent via email only

We have estimated the flood frequency discharges requested in your email of April 30, 2015 (Process No. 20150233), as follows:

Flint River at Hamilton Dam, Dam ID 60, Section 7, T7N, R7E, City of Flint, Genesee County, has a total drainage area of 749 square miles and a contributing drainage area of 740 square miles. The design discharge for this dam is the 0.5% chance (200-year) flood. The 50%, 20%, 10%, 4%, 2%, 1%, 0.5%, and 0.2% chance peak flows are estimated to be 4000 cubic feet per second (cfs), 5800 cfs, 7200 cfs, 9000 cfs, 10300 cfs, 11800 cfs, 13000 cfs, and 14400 cfs, respectively. (Watershed Basin No. 32B Flint).

Please include a copy of this letter with your inspection report or any subsequent application for permit. These estimates should be confirmed by our office if an application is not submitted within one year. If you have any questions concerning the discharge estimates, please contact Ms. Susan Greiner, Hydrologic Studies and Dam Safety Unit, at 517-284-5579, or by email at: GreinerS@michigan.gov. If you have any questions concerning the hydraulics or the requirements for the dam safety inspection report, please contact Mr. Luke Trumble of our Dam Safety Program at 517-284-5581, or by email at TrumbleL@michigan.gov

MICIMS Incident for monitoring: 2015-10-01-City of Flint-Water Contamination / Shortage

---

Subject: URGENT - SEOC Activation

On January 4, 2016, Genesee County requested that a "State of Emergency/Disaster" be issued by Governor Snyder. Today, the Governor issued a State of Emergency declaration.

EMHSD will activate the SEOC tomorrow at 0800 and will conduct a briefing at 0900 on the event. All state agencies are to send a representative to the 0900 briefing. MDHHS and MDEQ have been directed to brief on the situation. Following initial SEOC briefings, each state agency, in consultation with the State Director, must determine if

they need to play a role in ongoing SEOC operations to contribute to addressing the problem. At minimum, MDEQ, MDHHS, Education, DTED, DTMB, and MDARD should maintain a presence in the SEOC. The initial focus of the SEOC will be to:

- Identify and implement any needed protective actions to protect public health and safety;
- Develop situational awareness;
- Develop understanding of technical aspects;
- Coordinate damage assessment;
- Coordinate public information; and
- Identify programs to assist in remediating damage.

Johnson, Michael (MSP)

From: Bolger, Matt (MSP)
Sent: Saturday, January 09, 2016 11:17 AM
To: Kelly, David (MSP); Johnson, Michael (MSP)
Subject: SEOC

EMHSD has requested that MPS staff the SEOC from 8-5 every day until further notice.

At this time, we will serve dual roles: Safety Officer and our normal SEOC Ops, Public Safety role.

Currently, I am working with Capt. Kapp to address two resource requests:

Resource Request Received to establish a Safety Officer at the Genesee County EOC.
--Request has been made to Capt. Kapp to assign personnel to staff the Local EOC during the operational period. He has begun to work on identifying appropriate staff to report to the Local EOC. Once staff is assigned, they will communicate back to us.

Resource Request for four troopers in uniform and patrol vehicle to escort volunteers in the affected area beginning Tuesday, Jan 12, 2016. This operation will be ongoing and the end date has not been determined.
Contact has been made with Capt. Kapp regarding request. The assigned Safety Officer, request above, will be taksed to work to coordinate this deployment.

Sent: Saturday, January 09, 2016 11:34 AM
To: Kish, Thomas (MSP)
Cc: Kapp, Gene (MSP); Kelly, David (MSP); Johnson, Michael (MSP)
Subject: Additional Resource Request

Tom,

There is an additional request.

Training will be provided on filters, replacement filters, water test kits, and operations on Monday, 1 p.m., at the DHHS Office at 4809 Clio Road, Flint 48501.

They are requesting troopers be in attendance in a community services role. This training should not be very long and, if you have a squad of on-duty, city detail troopers, that should suffice.

Starting Tuesday, for the troopers that will be on overtime assigned to this project, meeting place will be GCCARD at 2727 Lippincott Boulevard, Flint 48507.

Hours of operation will be 8:30am - 5pm daily. Their assignment will be a force multiplier: helping to distribute water, filters, replacement filters, test kits, etc. along with taking any necessary security precautions based on their observations.

Once I know who you have assigned to the Local EOC, I will begin to go direct with them, copying you.

Thank you,

Matt

Subject: SEOC deployment

We need to work out a schedule for MSP to staff the SEOC from 8:00-5:00 until further notice.

What is your availability for the next week?

I think I can cover Monday, until 2:00 pm
Tuesday, all day
Wednesday until 3:00
Thursday Morning

Though, please feel free to cover any of these times as well...

Subject: Re: SEOC deployment

Insp.,

I am available everyday with the exception of Tuesday morning, MiPSB Conf. call. I hope to visit the GRCC and DRCC next week but as long as I make it to one RCC I will go to the other the following week.

As an FYI, I think F/Lt. Bush is headed to the FBI Academy this month.

In my experience, this will be a long term activation unless a Presidential Declaration is granted (which I'm not sure we are requesting) and a Joint Field Office is opened.

Mike,

Bush leaves tomorrow, so he's out.

Let's identify any dual coverage days for Ops Lts so we can use the extra Lt for coverage at the SEOC.

MJ,

The days that we have deeper coverage are shown in green. This might work better if we bring the watch desk schedule into the mix....

2015-2016	1/11	1/14	1/21	1/28	2/2	2/3	2/5
OPS DESK	M	TH	TH	TH	T	W	F
GARLAND *DAYS 12*	P		P			P	
HORHN *DAYS MIX*		P		P	P		
JONES *RELIEF*							12p-12a
WOODARD *MIDS 12*	P	6p-6a	P	6p-6a	6p-6a	P	10p-6a
STONER *MIDS MIX*	10p-6a	P	6p-6a	P	10p-6a	10p-6a	P

Unless either one of you want to work on Saturday 1/16, Sunday 1/17, or Saturday 1/23, let me know who to schedule for those shifts form the Ops Desk. We have OT available, Index 28900, PCA 28670.

Alright.

Let them know that coverage is tentative beyond 1/15 right now. They will determine later in the week if we need to staff beyond Friday. The schedule I will send in a few has it covered through 1/15. You will see that next week is pretty open, as I can only staff it on Wednesday and Lt. Horhn will cover on Thursday.

Subject: SEOC MSP Schedule
Attachments: Flint Water MSP SEOC Schedule.docx

All,

At this time, the SEOC will need to be staffed with MSP personnel from 8:00-5:00 at least through 1/15/16. This need may be extended beyond and we will know more later this week.

Attached is the schedule for this staffing.

The MICIMS incident is **2015-10-01-City of Flint-Water Contamination/Shortage**
Make sure you are logging into MICIMS in the role of **SEOC OPS Public Safety MSP**

Our assignment at the SEOC is dual at this time.

1) We are in the Ops Section as the Public Safety Coordinator
2) We are also serving as the Safety Officer for the SEOC

Lt. Amy Dehner, MSP Flint, is the MSP Rep (this is her MICIMS role) and the Safety Officer at the local EOC in Flint. Her cell number is on the schedule.

At the end of each day, do not forget to update the agency situation report. Also, copy and paste that report into an email and send it to Capt. Kelly, me, and F/Lt. Johnson.

For any **overtime hours** (if we go beyond 1/15, we MAY need to use Ops Lts on OT a few days) spent working in the *SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:*

Index 28900 with PCA 28670

Subject: FW: SEOC MSP Schedule - Overtime
Attachments: Flint Water MSP SEOC Schedule.docx

All,

Please look at the attachment for OT for SEOC staffing for the Flint water activation. In speaking to F/Lt. Johnson, the only days that we need staffed for certain are the 16th, 17th, and 23rd. More information will be learned later this week if additional staffing will be needed on the other dates shown... In the short term however, please feel free to sign up for all of the listed dates that are available.

Email back to Ops with your availability for all listed dates.

Thank you,
Mike

Subject: RE: SEOC MSP Schedule

In order to provide consistent operations in the SEOC, please do the following as you log into the system, then take further action as appropriate:

- Do not log into the computer as yourself. Leave the computer logged in in as MSP-EOC-MDSP and use this email address for SEOC communications. If the computer is not logged in, ask for help from someone from EMHSD.
    - You will need to log into your own email via Internet Explorer, if you wish to use that for anything.
- Click on the MI-CIMS Icon on the lower left of the computer screen
- Log into the incident (**2015-10-01-City of Flint-Water Contamination/Shortage**) in the role of **SEOC OPS Public Safety MSP**
- Open the **Activity Log** and enter yourself as present at the SEOC as a "new record"
    - Post this activity log entry to be shared with SEOC and Shared with Agency, NOT a Statewide Shared Activity
- Open **Resource Request/Task Assignment** to check for any pending tasks/requests
    - Update those requests, etc. in MICIMS when you have time. If tasking out to Lt. Dehner, she will be logged into the system as MSP Rep. Call her also and let her know there is a request coming her way.
- Any actions taken should be also updated in the Activity Log when you have time. Continue to update the same entry you created at the beginning, do not create a new record.
- At the end of the day, complete the **Agency Situation Report** by selecting "SEOC Situation Report - Agency List," then selecting "State Police (MSP)." Before you leave for the day, "Archive" the record and copy and paste the text and email it to Capt. Kelly, F/Lt Johnson, and me.

If you have questions about anything, feel free to call F/Lt. Johnson or Insp. Bolger

Subject: MSP Site Safety - Threat Assessment / Summary

F/Lt Johnson-

In looking at our intell products over the past 30 days, it looks like time of day for incidents is all over the map, literally. For the purposes of providing you coherent information to formulate a plan for door to door delivery operations here is what is going to be noteworthy:

-- Criminal activity to be aware of in the City of Flint (all Hot Spots) includes shootings, both fatal, and non at both residential locations, commercial store fronts, and drive by shootings. Assaultive crimes where there appears to be a known victim-offender relationship, and burglaries (thefts from ATMs). The times for these incidents range from 0630HRS around the clock, typically to around 0200 HRS.

--MSP personnel assigned to the door to door detail are aware of patterned criminal activity (via hot spot mapping provided by an embedded analyst), and routinely patrol these areas within the City.

--Weather related considerations would also may daylight only operations optimal, taking into consideration below freezing temperatures, poor road conditions, and the high likelihood that sidewalks, front porches, etc. are still likely to be ice covered throughout the City for the remainder of the week.

Outside of that, logistically I am not able to access the state network to provide an actual 'Hot Spot" map that is produced via daily and weekly sitreps, from the Genesee County EOC. Based on the above considerations however, I would recommend that daylight only operations of door to door delivery be conducted in order to best protect volunteers supplementing state operations in the area.

Sent: Tuesday, January 12, 2016 4:39 PM
To: Kelly, David (MSP)
Subject: Revised: Volunteers needed for water resource teams in Flint

Note: Dates are January 14 and January 15.

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on Thursday, January 14 and Friday, January 15. Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

Subject: FW: Water

Lt.,

Below is the information requested from Tpr. Jones.

Lt. Paul M. Pummill
Assistant Post Commander
Michigan State Police – Flint Post
G4481 Corunna Road
Flint, Michigan 48532
Office: (810) 732-1111

A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY

From: Jones, Richard (MSP)
Sent: Tuesday, January 12, 2016 8:47 PM
To: Pummill, Paul (MSP); Dehner, Amy (MSP)
Subject: Water

LT,

Today we started out the day using two groups that consisted of approximately 10 people in each group.

We eventually combine groups with Genesee County Sheriff's group and they brought two more groups with approx. 10 people (Local UAW) in each group.

This made us a lot more efficient and we were able to set up a game plan.

The Sheriff had 4 U-Haul trucks we used and this was a lot more efficient than the 24' Semis. The Semis are too big to make it down the tight streets, so I set them up as a mobile filling station. When we ran low on supplies we were able to pull up to them and refill the U-Haul trucks. This is the game plan for tomorrow and the rest of the week. Saves us from driving all the way back to the HQ to fill.

Also we had way to many vehicles and it made us less mobile. Tomorrow the game plan is to meet at the Sheriff admin building and we will then bus the volunteers into the zone we will be working.

I will be meeting with the sheriff's team at 8am and we will discuss what are goal is for the day. We will discuss the most efficient way to map out the days route and plan the groups out.

Today we met at lunch time to determine our progress and what we would do in the afternoon. We will continue this at 12:30 each day (So the volunteers can get lunch and warm up) and we can continue to go over the maps/game plan to make any adjustments if needed.

Tomorrow I feel we will be more efficient and we will have a better plan in place to get the maximum output out of our resources.

Thank you

Richard Jones
Trooper/Sex Offender Coordinator
3rd District/ Flint Post
Michigan State Police
G-4481 Corunna Rd

Subject: MSP Volunteers and uniform personnel

All,

Logistically, we can support 15 teams consisting of **60-75 MSP volunteers**. We will fold these personnel into multi agency teams with local volunteers, other state agencies, the county, etc.

To run this operation, we will **need a minimum of 15 enlisted uniform troopers and sergeants** (to lead the teams) in marked vehicles, plus any need command and control staff.

Corrections will supply vans to transport teams as well as trucks to transport product.

Muster location will be at the GCCAR; 2727 Lippincott, Flint MI.

Lunch will be served at the EOC, Genesee County Admin. Building.

G Event 9 (primary) and G Event 10 (secondary) have been set up for 800 MHz communications.

Once you have names, please provide this email box those names so that we can add them to our resource list here.

If you have any questions, please let me know.

Subject: RE: MSP Volunteers and uniform personnel

So we are all on the same page, optics on this are critical. Regardless of who the personnel are, we need to make sure they do not look they are going into a battle zone. I can see some (volunteers internally/externally or from other state agencies or the public) wanting to wear their new "survival gear" they got over the holidays. Uniforms are good as directed by FSB for the 15 personnel, but any "tactical" type gear should not be used unless mission critical. We could also have volunteers wearing military surplus fatigues and that would cause confusion as the National Guard is not going door to door (at this time). I have talked with the MDOC about any SRT members as they do typically show up in fatigues with vest carriers. Please help monitor this and let me know if you need anything on this. While this direction could change, it is the current standing order.

Thanks

Sent: Tuesday, January 12, 2016 4:39 PM
To: Kelly, David (MSP)
Subject: Revised: Volunteers needed for water resource teams in Flint

Note: Dates are January 14 and January 15.

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on Thursday, January 14 and Friday, January 15. Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

Subject: RE: Beyond Expectations - For Consideration for Publication

Good morn Juiwana – you are very welcome and please feel free to share with your staff. I hope it makes our publication for a public "thanks" to you all. About our meeting, might it be possible to move it to the week of Feb 22nd after all? We have so much going on in Flint with the water crisis and everything, this month is swamped. Kindly advise if this will work for you and your staff?

F/Lt. Johnson: would you be opposed to Juiwana and I moving our Jan. 26 meet to the week of Feb 22, if possible?

Good morning Inspector,

Aw. Thanks we really appreciate it. I will share this with my staff.

How are you doing? Are we still on for our meeting this month?

Thanks,

Juiwana Pickett MPA, BBA, LNHA

Subject: Beyond Expectations - For Consideration for Publication

Hi Linda,

Regarding the kindness from our Detroit Regional Communications (DRCC) staff, kindly consider the below acknowledgement for publication in our MSP "BEYOND EXPECTATIONS – Members Acknowledging Members:"

We extend our sincerest appreciation to the staff at the Detroit Regional Communications Center (DRCC) for their gracious gesture in adopting a second MSP family during the recent holiday season. The DRCC staff extended their tradition of adopting a 2nd District family to include a family from our 3rd District this year. The DRCC staff generously provided gifts to our Tri-City Post custodian and her family and filled needs for her children and grandchildren. Their thoughtfulness and generosity was a blessing to this family and an inspiration to us all. Thank you very much.

Thanks.

Sir,

We have Dispatcher Amy Darling. We had many others but it would require us to bring in other people on OT to cover their shifts.

Thanks, Mike

Subject: Revised: Volunteers needed for water resource teams in Flint

Note: Dates are January 14 and January 15.

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on Thursday, January 14 and Friday, January 15. Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

Subject: Thoughts on the following wording

Attached is a list containing the names of those approved to participate in the water response team in Flint. In order to minimize travel time, location of the volunteers was considered. Each Bureau is responsible for notifying their respective staff members and arranging for carpooling to Flint.

Attire: Appropriate attire for the weather conditions. Jeans are allowable. MSP uniforms including fatigue uniforms are prohibited. Military Surplus attire or attire that could be mistaken as that of the National Guard shall not be worn.

All individuals assigned to work as the Water Response Team in Flint shall report to the Genesee County EOC by 9 am on Thursday and/or Friday.

Location:
Genesee County Administration Building
1101 Beach St
Flint, MI 48502
In the basement or level "G" if someone used the elevator
Parking is available at Trinity Church, on the corner of Beach and Eighth. It is two blocks southeast of the Admin Building.

Lunch will be served at the EOC, Genesee County Admin. Building.

G Event 9 (primary) and G Event 10 (secondary) have been set up for 800 MHz communications.

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Johnson, Michael (MSP)

From: Medrano, Sierra (MSP)
Sent: Wednesday, January 13, 2016 3:58 PM
To: Johnson, Michael (MSP)
Subject: Draft email for volunteers

F/Lt. Johnson,

Below is a revised message seeking volunteers. I've highlighted the information that will need to be updated and/or confirmed.

The State Emergency Operations Center is soliciting volunteers from state agencies to join water response teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on [INSERT DATES]. Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.
Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

Subject: FW: Flint Water Detail
Attachments: Copy of Copy of Flint Water Detail (2).xlsx

This is the message that was sent to each Bureau.

The way I see it, we would need 13 uniform troopers assigned on Thursday and Friday just for the MSP personnel.

I do not know the commitment of personnel you have from other areas requiring uniform troopers to be assigned to.

Please confirm the numbers and ensure the request is made to FSB.

Thank you

Dan,

I know it is after 1pm, however Carrie just came in at 1500 and she would like to participate and Tami Welt also. Is it possible to get them both added to the Friday list of volunteers? We apologize for the delay.

Thanks,

Juiwana Pickett MPA, BBA, LNHA

Importance: High

Good morning everyone,

I need to know who would like to volunteer this Thursday and Friday in Flint. I need to send my DRCC volunteer list to Mr. Wibert by 1300.

Per the Col's email:
"Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled workday. Overtime or compensatory time is not authorized for this assignment."

Have a great day!

Thanks,

Sent: Tuesday, January 12, 2016 4:39 PM
To: Wibert, Daniel (MSP)
Subject: Revised: Volunteers needed for water resource teams in Flint

Note: Dates are January 14 and January 15.

The department is soliciting volunteers from within the department, both enlisted and civilian, to join water resource teams working to hand out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint. This effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.

Teams are being assembled for shifts on Thursday, January 14 and Friday, January 15. Volunteers

will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be available for one or both days. Lunch will be provided.

Employees chosen for this assignment are considered to be working on-duty; this assignment would be considered their scheduled work day. Overtime or compensatory time is not authorized for this assignment.

Transportation will be provided using state vehicles; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

Interested employees should obtain the approval of their supervisor. **Supervisors must forward the names of approved volunteers and their email addresses through the chain of command to bureau with the date(s) available by 1 p.m. tomorrow, Wednesday, January 13.**

Confirmation of selected employees, along with additional logistical details, will be made via email by 5 p.m. on Wednesday, January 13.

For questions, please contact Insp. Scott Marier at 517-373-7761.

This email was sent to wibertd@michigan.gov using GovDelivery, on behalf of: Michigan State Police · 333 S Grand Ave · P O Box 30634 · Lansing, MI 48933

Subject: Flint Water Detail

Attached is a list containing the names of those approved to participate in the Flint Water detail. In order to minimize travel time, location of the volunteers was considered. Each Bureau is responsible for notifying their respective staff members and arranging for carpooling to Flint.

Attire: Appropriate attire for the weather conditions. Jeans are allowable. MSP uniforms including fatigue uniforms are prohibited. Military Surplus attire or attire that could be mistaken as that of the National Guard shall not be worn.

All individuals assigned to work as the Water Response Team in Flint shall report to the Genesee County EOC by 9 am on Thursday and/or Friday.

Location:
Genesee County Administration Building
1101 Beach St
Flint, MI 48502
In the basement or level "G" if someone used the elevator
Parking is available at Trinity Church, on the corner of Beach and Eighth. It is two blocks southeast of the Admin Building.

Lunch will be served at the EOC, Genesee County Admin. Building.

Each enforcement member should bring their assigned radio.
G Event 9 (primary) and G Event 10 (secondary) have been set up for 800 MHz communications.

Subject: Request for State Agency Volunteers

Lt. Johnson,

In regards to procuring volunteers from all State Agencies for the Flint Water Response Teams beginning Saturday, January 16th – Monday January 18th, 2016, we are requesting MSP initiate the call out. Below is the pertinent information for the mission:

- Teams will be handing out bottled water, water filters, replacement cartridges, and water testing kits at homes in the city of Flint.
- This strictly voluntary effort is part of the state's response to the ongoing health and safety issues caused by lead in the city of Flint's drinking water.
- Teams are being assembled for shifts Saturday, January 16th, Sunday, January 17th and Monday, January 18th, 2016.
- Volunteers will begin their assignment in Flint at 9 a.m. and end by 4 p.m. Volunteers can be offer to be available for one, two or all three days.
- Lunch will be provided.
- All three days are un-paid volunteer hours.
- Volunteers are responsible for their own transportation and mileage reimbursement for personal vehicles is not authorized.
- Volunteers should dress for working outdoors and wear foot attire appropriate for walking.
- State Agency PIOs need to communicate with their Directors to field a list of volunteer names through their SEOC representative. Responses are requested no later than _____ (as soon as possible dependent on when the request goes out) so an accurate count can be used to create the teams.

Let us know if you need additional information for Public Affairs or the JIC to put this in the proper format for distribution.

Thank you,

SEOC Recovery Branch

Subject: Summary of EOC Activity

Mike,

At your request, just a quick analysis of what worked and what needed improvement in the recent days at the EOC in Genesee County.

What worked:
Very good synergy between Flint Post troopers and Genesee County Sheriff command and deputies in effective and efficient deployments for distribution efforts.

Great attitude and efforts by uniforms and volunteers to make important contributions to the City of Flint on water team deployments.

Clear direction and coordination in the field of supply teams by lieutenants and troopers. No confusion. Clearly defined roles.

What didn't work:
No clear leadership role from the Genesee County Emergency Manager.

No clear delegation of assignments and tasks by agencies at the EOC. Multiple smaller informal teams formed to problem solve without specific and defined goals. Communication and cross talk lacking.

No clear assignment of priorities for MSP, EMHSD, or the Genesee County EM.

Requests for resources that went through multiple channels rather than one single source.

Assumptions made about what resources were needed at the EOC by well intentioned personnel at the SEOC without asking the questions about needs first.

Blurred lines of responsibility/supervision/leadership for Flint Post and EMHSD staff at the EOC.

I hope this is constructive, I certainly intend it to be. It is a dynamic and fluid situation at the EOC and out on the streets of Flint. Everybody is trying to address the problem, its just that at times we weren't rowing in the same direction.

Tom

>
> Mike,
>
> At your request, just a quick analysis of what worked and what needed improvement in the recent days at the EOC in Genesee County.
>
> What worked:
> Very good synergy between Flint Post troopers and Genesee County Sheriff command and deputies in effective and efficient deployments for distribution efforts.
>
> Great attitude and efforts by uniforms and volunteers to make important contributions to the City of Flint on water team deployments.
>
> Clear direction and coordination in the field of supply teams by lieutenants and troopers. No confusion. Clearly defined roles.
>
> What didn't work:
> No clear leadership role from the Genesee County Emergency Manager.
>
> No clear delegation of assignments and tasks by agencies at the EOC. Multiple smaller informal teams formed to problem solve without specific and defined goals. Communication and cross talk lacking.
>
> No clear assignment of priorities for MSP, EMHSD, or the Genesee County EM.
>
> Requests for resources that went through multiple channels rather than one single source.

Assumptions made about what resources were needed at the EOC by well intentioned personnel at the SEOC without asking the questions about needs first.

Blurred lines of responsibility/supervision/leadership for Flint Post and EMHSD staff at the EOC.

I hope this is constructive, I certainly intend it to be. It is a dynamic and fluid situation at the EOC and out on the streets of Flint. Everybody is trying to address the problem, its just that at times we weren't rowing in the same direction.

Subject: Fwd: State of The State

Lts. and Valencia,

Please see the below. The State of the State Address takes place on January 19th, please double check the date to make sure I obtained the correct date. I don't have the background as to why, but my assumption is with the Flint Water issue there may be a potential for large protests so it could be to assist in ensuring we can deploy resources quickly in the need of a mobilization.

Thanks, MJ.

Subject: DOC vehicles.

Apparently, some of the DOC vehicles we are trying to demobilize for tomorrow are either already loaded with filters or were left there and staff all rode together home tonight with the plan to ride together back in tomorrow.

Therefore, they will show up in the morning, if nothing more than to unload what they have.

If you don't need them or want them, go ahead and have them unload and send them home.

Lt,

Just to make life easier, per Wendy at the Logistics Desk, it would be great if we could be provided a spread sheet of what persons (Troops) are doing what job, assignment or location.....

I've attached the Red Cross Spread sheet that I think will work with slight modification. I'm such a huge fan of plagerism!!!!!

Subject: ARC Teams

OIC Robert Gaskill
Robert.Gaskill-Clemons@redcross.org

We have committed to pushing 5 teams tomorrow and 10 teams from Saturday onward

Mission for each team = Distribute resources to 100 occupied homes per day

Disbo kit per house/no filter
1 door hanger
1 case water
1 filter* if filter doesn't fit, then get pitcher (20% non fit rate)
1 test kit
TBD replacement filters

ERVS will be coordinated, staged and housed at the 2315 Cilo Rd Warehouse location

Starting Product Load Per Team will be
100 cases water ~ 1 pallet - on ERV
100 door hangar - on chase vehicle
100 filters - on ERV
20 pitchers - on chase vehicle
100 test kits - On ERV

Team/Crew = a minimum of 1 ERV driver and 1 ERV crew member and 1 driver in the chase vehicle. We will attempt to recruit 3 additional volunteers for each team per day.

Crew vehicle requirement is 1 ERV/Box Truck & 1 Rental chase vehicle

The ARC will contact the MSP Water Resource Commander to report team launch by 9am

The ARC will submit a progress report to the MSP for each team by 12p

The ARC will submit a final progress report to the MSP for each team by 6pm

Distribution Reporting for today will be paper goal is to resource with ipads

Subject: Formal Mission Request: Volunteer Lunches Weekend

Good Afternoon Pam,

My name is Tom Kish and I am the Michigan State Police Lieutenant currently working in the Genesee County Emergency Operations Center help to coordinate the water emergency in Flint. I am making a formal mission request for afternoon lunches to be provided by the Red Cross for the upcoming weekend, Saturday, January 16, Sunday, January 17, and Monday, January 18. We anticipate approximately 150 volunteers for each day, although exact numbers are difficult to determine due to some unanticipated volunteers showing up to help. Lunch would be provided here at the Genesee County EOC at 1101 Beach St., in the Genesee County building cafeteria in the basement. Lunch is typically provided in stages, one group at noon and one group at 12:30 pm. Our lunches have been everything from pizza to sack lunches provided by Panera Bread. We would be grateful for whatever assistance you could provide.

Please let me know if this mission request could be filled as soon as possible. We certainly appreciate all of the assistance we've received from the Red Cross. Your contribution to this effort has been critical to our collective success thus far.

Thank you,

F/Lt. Thomas Kish
Commander
Michigan State Police-Flint Post

Distribution Team:

Please see attached Distribution Operations Plan 1.0 that was discussed in our 10:30 a.m. meeting today. Review with track changes on and send back to me and I will submit to Lauren all edits into one clean document. I would like your edited copy by 5 p.m. today.

Please add to your edited document: name, position, and all contact information.

The conference call with the team will be conducted each day at 10:30 a.m. and 7 p.m.

Conference call information:

Dial In #:
Access Code:

If you are asked to email me (Pam Strobel) for SEOC information, donations, updates, tasks, etc., from this time forward please use the following email address: MSP-SEOC11@michigan.gov, this is the designated email address for my position, which is now the SEOC Logistics Order Unit Leader.

If you have any questions, please ask.

Thank you,

Pam Strobel

From: JICManager
Sent: Friday, January 15, 2016 5:07 PM
To: MSP-SEOCPIO
Subject: FW: LG & Volunteers

Can you please find out what time the State of Michigan employee volunteers are meeting tomorrow before they begin going door to door? If it's before 9 a.m., the Lt. Governor would like to meet with them briefly.

Please send me the location, time, and who the contact would be on-site. The Gov's Office will coordinate this visit.

-Nicole

Just got a follow-up text on the below. If it's only 9 a.m. it won't work out for tomorrow so particularly looking to know if there is a later meet-up time.

Subject: LG & Volunteers

The Lt. Gov. is hoping to meet a group of state employee volunteers tomorrow to say a few words of thanks before they head out on delivery. Are there multiple times volunteers meet or do they all meet at 9 a.m. and that's it?

Looking for times and locations.

Hi Mike,

Please see below, would it be possible for the Lt. Governor to meet with them?

Can you please find out what time the State of Michigan employee volunteers are meeting tomorrow before they begin going door to door? If it's before 9 a.m., the Lt. Governor would like to meet with them briefly.

Please send me the location, time, and who the contact would be on-site. The Gov's Office will coordinate this visit.
